<sup>1</sup> Figures for filling stations for years subsequent to 1930 have been revised and are estimated on basis of gallonage data and retail gasoline prices. The changes affect the provincial totals and automotive group totals for the same years.

factor in the food and apparel groups. On the other hand, the prices of more durable goods have not declined so much as food prices, so that the greater reduction in sales of groups handling durable goods is, no doubt, due much more to reduced volume.

The improvement in retail trade, evident in Canada since the spring months of 1933, was continued in 1936 when the value of sales was 7.2 p.c. greater than in the preceding year and 23 p.c. greater than in 1933. The index of retail sales for 1936 on the base 1930 equals 100 stands at 79.9. Increases over 1935 were recorded in all provinces, these increases ranging from 5.5 p.c. in Alberta to 14.6 p.c. in Prince Edward Island.

**Chain Stores.**—During the past decade the chain store has come to occupy an important place in the field of distribution. The Dominion Bureau of Statistics classifies as chains all retail organizations operating four or more branches, excepting departmental concerns. The number of chains reported in any year thus depends not only on the rise or disappearance of firms but also on the number of units operated. As a minimum of four stores is required before a firm is classified as a chain, the

Trade, by Provinces and Kinds of Business, 1930, 1932-36—concluded.

reduction in branches below this number automatically removes a firm from the chain store group. In an effort to obtain some comparative information for chain stores, a careful check was made of census and other records for the year 1923. The data secured do not provide complete figures for chain stores in the early year, but the figures in Table 33 give some indication of the growth in chain stores between 1923 and 1930 for the trades in which chains hold important positions.

<sup>1</sup> Incomplete figures, see text on pp. 624 and 625.

The sales of chain stores formed 17.7 p.c. of the total retail merchandise trade in 1930 and 17.9 p.c. in 1936. Grocery and combination store chains had 29.5 p.c. of the total sales for these businesses in 1930 and 33.0 p.c. in 1936. The proportion of chain sales to total sales in some other important lines of trade for the year 1936 were: shoe stores, 32.6 p.c.; drug stores, 20.1 p.c.; and furniture stores 12.8 p.c. Summary figures for all chain stores in Canada are given in Table 34.

<sup>1</sup> Revised since the publication of the 1937 Year Book.

**Retail Sales of New Motor Vehicles in Canada.**—Statistics on new motor vehicle sales in Canada are collected monthly from Canadian manufacturers and assemblers, and from manufacturers in the United States of vehicles made for sale in this country. Number of units sold and retail value of sales are both reported. The retail value is the price paid by an individual purchaser at the Canadian point of manufacture and includes sales and excise taxes, charges for standard accessories, dealers' commissions, etc. Freight charges from factory to place of purchase are excluded. Duty is included in the retail value of sales of imported cars.

Sales in 1937 were up 27.1 p.c. in number and 26.3 p.c. in value over the preceding year. More than three times as many new vehicles were sold in 1937 as in 1933 when the lowest point was reached. Passenger model sales registered increases of 23.7 p.c. in number and 22.3 p.c. in value over 1936, while the improvement for commercial vehicles was even greater, resulting in increases of 42.0 p.c. in number and 43.2 p.c. in value over the preceding year.

### 35.—Retail Sales of New Motor Vehicles in Canada, calendar years, 1932-37, with Total Value for 1930.

NOTE.—The first year for which details are available is 1932. The total for 1930 was secured in connection with the Census of Merchandising and Service Establishments.

**Financing of Motor Vehicle Sales in Canada.**—Financing corporations play an important part in the retail distribution of both new and used motor vehicles in Canada. They extend credit facilities to customers who could not enter the market if required to pay with cash and to others who, though in a position to pay cash, find it more convenient to budget their expenditures on the instalment basis. They also provide a service to the motor dealers by assuming the risks and inconveniences connected with instalment sales, thus permitting the dealers to operate on a smaller capital outlay than would otherwise be necessary.

Statistics on financing are compiled monthly from returns secured from all large finance companies in Canada which are engaged in purchasing accounts, contracts or notes arising out of retail sales of motor vehicles. Aggregates of the monthly data show that sales of 176,387 motor vehicles (including both new and used models) were financed to the extent of \$75,486,464 in 1937. These figures reveal increases of 28.3 p.c. in number and 37.6 p.c. in amount over the 137,514 vehicles which were financed for \$54,859,812 in 1936. New vehicles numbering 55,949 were financed for \$40,538,414 or an average of \$725 each. There were also 120,438 used vehicles whose sales were financed to the extent of \$34,948,050 or for \$290 each.

A comparison of sales and financing of new motor vehicles is shown in Table 36; 38.8 p.c. of all new motor vehicle sales in Canada in 1937 passed through the hands of financing corporations. The corresponding amount of financing amounted to 27.3 p.c. of the total selling value of all new models. Total sales of used vehicles not being available, a similar comparison for these types cannot be made.

**Monthly Indexes of Retail Sales.**—In recent years the Dominion Bureau of Statistics has published monthly indexes of the dollar value of retail sales based upon reports received from department stores, from chain organizations and from a number of independent firms operating in thirteen lines of business. While these reports cover only a part of the field and relate mainly to the business of department and chain stores, they embrace a sufficiently large number of stores to provide a fairly accurate indication of the current movements in retail sales for the kinds of business which are included.

Two sets of figures are shown for the general indexes of retail trade in Table 37; in the first set no adjustments have been made, while in the second, corrections are incorporated to allow for the variations in number of business days and for seasonal influences. This general index of retail sales shows that the low point in retail trade was reached in the early part of 1933. Since that time there has been a gradual improvement in the dollar volume of sales. It has already been pointed out in connection with the annual merchandising figures that the dollar value of retail sales is greatly affected by changes in price levels. This factor should be borne in mind when considering the monthly indexes of retail sales.

A comparison of the unadjusted indexes of retail sales based upon the aggregate monthly figures of the reporting firms reveals wide seasonal swings in most lines of retail business. In general, retail sales are lowest in January and February and are highest for the year in December. A secondary peak in the spring months is followed by a recession during July and August which brings the level of trade almost to the low point of January and February. Seasonal swings are not similar in extent or timing for all lines of business. The variations are least for businesses such as drug stores, grocery and meat stores, and restaurants, whereas clothing, shoe, radio and music, hardware, and furniture stores show the greatest seasonal fluctuations. (See Table 38.)

The indexes of retail sales for the individual lines of business mentioned in Table 38 are corrected to allow both for variations in the number of business days in different months and for usual seasonal influences.

### 37.—Index Numbers of Retail Sales Based on Monthly Reports of Department and Chain Stores, by Months, 1929, 1930, and 1933-37.

NOTE.—The general indexes are composite figures secured by weighting the indexes of sales for the thirteen kinds of business in proportion to their relative position in the total trade.

(Average for 1930=100.)

## 38.—Adjusted Index Numbers of Retail Sales Based on Monthly Reports of Department and Chain Stores, by Kinds of Business, January, 1935, to December, 1937.

NOTE.—The indexes are compiled from the returns of 36 departmental organizations and 165 chain companies operating more than 2,300 stores and a number of independents in those lines of business whose chains are of minor importance. The indexes are adjusted for variations in number of stores operated, for number of business days in each month, and for seasonal variations.

<sup>1</sup> Revised since the publication of the 1937 Year Book.

**Motion Picture Statistics.**—The motion picture has become the most popular form of public entertainment and the business of satisfying the demand for such amusement has assumed a corresponding importance. In 1930 the expenditure on motion picture entertainment (exclusive of amusement taxes) was \$3.77 per capita. By 1933, due to reduced patronage and lower prices of tickets, the per capita expenditure had dropped to \$2.33, while for 1935 the figure rose slightly to \$2.50. In 1936 there was a further increase to \$2.70.

Statistics for motion picture theatres in Canada were secured for the first time in connection with the Census of Merchandising and Service Establishments, 1931. According to the results of this census, there were 910 motion picture theatres in operation in 1930. During the depression a number of theatres were closed so that in 1933 only 765 were reported. During the following three years some recovery took place, 797 theatres being reported in operation in 1934, 862 in 1935, and 959 in 1936. Summary figures of motion picture theatres by provinces for 1930, 1935, and 1936 are given in Table 39 and the principal statistics by leading cities for 1935 and 1936 in Table 40.

**39.—Motion Picture Theatres, Employees, Salaries and Wages, and Total Receipts, by Provinces, 1930, 1935 and 1936.**

### Section 10.—Control and Sale of Alcoholic Liquors and Beverages in Canada.\*

During the years 1916 and 1917, as a war policy, legislation prohibiting the sale of alcoholic liquors, except for medicinal and scientific purposes, was passed in all the provinces except Quebec, where similar legislation was passed in 1919. The prohibition extended to the sale of beer and wine except in Quebec. Native wine, however, could be sold in Ontario.

In aid of provincial legislation prohibiting or restricting the sale of intoxicating liquors, the Dominion Government, in 1916, passed a law making it an offence to send intoxicating liquors into any province to be dealt in contrary to the law of that province. In 1919 this Act was changed to read that "on the request of the Legislative Assembly of a province a vote would be taken on the question that the importation and the bringing of intoxicating liquors into such province be forbidden". If the majority of those voting were found to be in favour of such prohibition, the Governor in Council was to declare it in force.

After the War the provinces continued under prohibition for varying periods. Plebiscites were taken from time to time to ascertain the will of the electorate as to whether the policy of prohibition, adopted as an emergency war measure, should be continued. During 1921 Quebec and British Columbia discarded the existing prohibition laws and adopted the policy of liquor sale under government control. The same course was followed by Manitoba in 1923, Alberta in 1924, Saskatchewan in 1925, Ontario and New Brunswick in 1927, and Nova Scotia in 1930. Thus Prince Edward Island is the only province still adhering to a policy of prohibition.

The provincial Liquor Control Acts have been framed to conform to conditions peculiar to the regions where they are in force and no two are exactly alike. The salient feature of all is the establishment of a provincial monopoly of the retail sale of alcoholic beverages, with the practical elimination of private profit therefrom. Partial exception is made in the retail sale of malt liquor by brewers, which certain provinces permit while reserving regulative rights and taxing such sales heavily. In all the provinces, however, spirits may be bought only at government liquor stores. The provincial monopoly extends only to the retail sale of alcoholic beverages, the manufacture being still in private hands but under the supervision of the Liquor Boards or Commissions. The original Liquor Control Acts have been modified from time to time as deemed advisable. Brief summaries of the legislation are given in the Bureau's annual report on the Control and Sale of Liquor.

**Retail Sales by Liquor Control Boards.**—Data on gross sales, other revenue, and net profits of the provincial Liquor Boards, are tabulated in Table 41. In connection with the figures on gross sales it is essential to note that for Quebec, Manitoba, and Alberta, the sales of beer made directly by the brewers to the licensees are not included. The proceeds from such sales do not pass through the Boards, but the purchasers must pay through the brewers to the Boards a tax equal to 5 p.c. of the purchases in the case of Quebec, and 12½ cents per gallon in Manitoba. In Alberta purchasers from the brewers paid a tax of 12½ cents per gallon prior to April 1, 1932, and 15½ cents per gallon thereafter to April 1, 1936.† For Manitoba and Alberta, it is possible to calculate from the taxes the gallonage of beer sold but the corresponding values are not available. For Quebec, the quantity and value of sales are published by the Liquor Commission, as shown in the footnote to Table 41.

\*Abridged from the report "The Control and Sale of Liquor in Canada", by Miss L. J. Beehler, M.A., published by the Dominion Bureau of Statistics.

†An amendment to the Alberta Liquor Control Act passed at the 1936 session of the Legislature provides that "brewers who manufacture beer in Alberta may sell only to the Liquor Board". All sales, both to beer licensees and to permit holders, are made only through the Board. Under the new arrangement the gallonage tax is no longer levied.

Further, it should be pointed out that the values as given do not represent the sales values to the final consumers as, in most provinces, the sale of beer by the glass is permissible. Of course, all the liquor sold in any province is not consumed by the residents of that province. The tourist traffic is a very important factor in this connection.

All the revenue resulting from the Liquor Control Acts is not paid to the Liquor Boards. In certain provinces, permit fees are paid directly to the governments and do not pass through the Boards. Table 41 further indicates the total revenue accruing to the governments through the control of liquor sales.

The reports of the Boards do not in all cases show the quantities of liquors sold; in comparing values for a series of years or between provinces it should be borne in mind that price variations may be an important factor.

**Apparent Consumption of Liquor in Canada.**—It is not possible to obtain accurate figures on Canadian consumption of liquor. Except in Nova Scotia, Quebec, Ontario, and Alberta, the Liquor Boards do not publish figures to show sales on a gallonage basis, and even were such data on quantity sales available for all provinces they would not necessarily represent total consumption. For example, our great tourist traffic must be considered, for it is likely that the quantities consumed by tourists reach a considerable amount. Further, there is no definite information regarding the illegal traffic in liquor, though inquiry has revealed that such illicit business has reached fairly large proportions.

In Tables 42, 43 and 44 an attempt has been made to indicate separately the apparent consumption in Canada of spirits, malt liquors, and wines. Obviously, these computations are subject to error for the reasons mentioned above, and also because no consideration has been given to increases or decreases in the quantities held in stock by the Boards or by licensees. For example, owing to exceptionally favourable conditions abroad, the Liquor Boards may in certain years buy heavily to replenish stocks or create reserves; such purchases would unduly weight the apparent consumption figures for these years. The figures in these tables have been arrived at as follows:—

**Spirits.**—Practically the total production of spirits is placed in bonded warehouses whence it is released for various purposes. The quantities shown as "entered for consumption" are released from warehouse, duty paid, presumably for consumption for beverage purposes in Canada. However, part of these may be exported. The supply of spirits available in Canada for home consumption or for export must be the sum of the quantities shown under (a) entered for consumption; (b) imports; and (c) exports in bond, and if the total domestic exports and re-exports of imported goods are deducted from this figure the remainder indicates the apparent consumption in Canada.

**Malt Liquors.**—Only a small part of the output of malt liquors is placed in warehouses. The available supply is, therefore, made up of (a) production; (b) changes in warehouse stock; and (c) imports. By deducting the domestic exports and re-exports of imported goods from this total supply, it is possible to obtain a figure to show the apparent consumption in Canada.

**Wines.**—The apparent consumption of native wines is obtained by dividing the rates of excise tax into the total tax collections. This is believed to furnish a better measure of consumption than the method formerly used, i.e., to subtract the exports from the production, since part of the product is not consumed in the year of production but is placed in storage for maturing. The apparent consumption of imported wines is arrived at by deducting from the imports into Canada, the re-exports of foreign supplies.

#### 41.—Gross Sales and Net Profits of Liquor Control Boards, Additional Revenues Paid Directly to Governments, and Total Net Revenue from Liquor Control, 1934-36.

NOTE.—For Quebec, Manitoba and Alberta gross sales do not include beer sold direct by the brewers to the licensees.

| 1934.....    | 17,576,048                                      | 13,129,808 | 1,297,137                   | 1,010,946 | 1,294,539                        | 1,114,353 | 762,755   |
| 1935.....    | 18,288,799                                      | 13,603,405 | 1,154,871                   | 963,284   | 3,617,068                        | 3,315,035 | 894,086   |
| 1936.....    | 18,184,161                                      | 13,447,882 | 1,199,265                   | 1,055,081 | 4,158,107                        | 3,841,168 | 917,206   |

<sup>3</sup>Of this amount \$18,979,822 was sold from the liquor stores and \$8,772,854 from breweries and brewers' warehouses. In addition, sales of beer from breweries and brewers' warehouses from July 24 to October 31 totalled \$8,340,932, which amount should be taken into consideration in making comparisons with earlier years.

<sup>4</sup>In addition, sales of beer from breweries and brewers' warehouses totalled \$9,317,289, which amount should be taken into consideration in making comparisons with earlier years. Sales of domestic wine direct to customers at wineries and branch sales offices amounted to \$557,109.

<sup>5</sup>In addition, sales of beer from breweries and brewers' warehouses totalled \$29,396,420, which amount should be taken into consideration in making comparisons with earlier years. Sales of native wines direct to customers from licensed sales offices and, when permitted, from the winery premises amounted to \$1,407,933.

<sup>6</sup>In Manitoba and Alberta the value of beer sales is not given but the beer taxes paid to the Boards are tabulated below. In this connection it should be noted that the Boards also pay the beer tax on their purchases from the brewers and the beer sales of the Boards are included in the total gross sales shown above.

## CHAPTER XVIII.—TRANSPORTATION AND COMMUNICATIONS.

Canada is a country of continental dimensions, nearly 4,000 miles in length from east to west, with its relatively small population of 11,120,000 (estimated population as at June 1, 1937), in the main thinly distributed along the southern strip of its vast area. Different parts of the country are shut off from each other by areas of rough, rocky, forest terrain, such as the region lying between New Brunswick and Quebec, the areas north of lakes Huron and Superior, dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies and the barriers interposed by the mountains of British Columbia. To such a country with a population so distributed and producing, as do our western agriculturists, mainly for export, or, like our manufacturers, largely for consumption in distant portions of the country itself, cheap transportation is a necessity of life. Before 1850, when the water routes were the chief avenues of transportation and were closed by ice for several months each year, the business of the central portions of the country was reduced to a state of relative inactivity during the winter. The steam railway was required, therefore, for the adequate economic development of Canada, more particularly for linking up with the commercial and industrial world the vast productive areas of the Canadian West, and thus promoting their development. The construction of the Canadian Pacific railway gave to Canada, as an economic unit, length; the building of the newer transcontinental railways has given the country breadth.

Railway transportation, though essential in a country such as Canada, is nevertheless expensive for bulky and weighty commodities, and also for short distances where the cost of repeated handling amounts to more than actual transportation. For bulky freight, new enterprises have been either undertaken or are under consideration for improving water communication, such as the new and deeper Welland canal, the deepening of the St. Lawrence canals and of the channel between Montreal and Quebec, and the development of the Hudson Bay route. For freight movement over moderate distances the motor truck, operating over the growing network of improved highways, is providing an increasing proportion of the service. For inaccessible areas remote from the railways the aeroplane has established itself commercially and is a valuable addition to other transportation facilities.

In order to appraise the value of each of these agencies of transportation from this viewpoint, this chapter of the Year Book deals with the four main agencies, namely, carriers by rail, road, water, and air, in Parts II, III, IV, and V of the chapter. In each Part the arrangement is intended to show: (1) the plant, equipment, and facilities available; (2) the cost to the Canadian people; and (3) the traffic carried or services performed, in so far as statistics are available for each picture. Unfortunately this arrangement brings out some rather serious gaps in the information at present available; these are pointed out in the respective Parts.

Scarcely less important, from the social and economic viewpoints, is the development of communications in a country so vast and with population centres so scattered. The Post Office has been a great though little-recognized factor in promoting solidarity among the people of different parts of the Dominion, and this same desirable object is now being further aided by the radio, while telegraphs and telephones have done much to annihilate distance—the rural telephone, in particular, having been of great social and economic benefit in country districts. The press, again, assisted by cheap telegraph and cable rates and by low second-class mail rates

to all parts of the country, has been helpful in developing national sentiment. These means of communication are dealt with in Parts VI, VII, VIII, and IX.

Part I of this chapter includes a statement of the tendencies toward monopoly which has made it necessary to establish a measure of government control over those transportation and communication agencies which are not governmentally-owned and operated; to this is added an account of the origin and functions of the Board of Railway Commissioners.

## PART I.—GOVERNMENTAL CONTROL OVER AGENCIES OF TRANSPORTATION AND COMMUNICATION.

Problems of transportation, because they are of such vital importance in the economic life of Canada, occupy a large part of the time and thought of our Parliaments and public men. With the modern development of new forms, it is becoming increasingly important to realize that the several agencies of transportation—carriers by rail, road, water, and air—are, or should be, inter-related parts of an integral whole. Each agency has its place in the efficient provision of necessary transportation in Canada. The problem, therefore, is to adjust the conditions under which each of these agencies operates so that the resulting movement of passengers and freight may be accomplished with the maximum of economic efficiency, that is, at the least possible cost commensurate with desired convenience. The recognition of this growing necessity for viewing the problems of transportation and related communications as parts of a co-ordinated whole is indicated by the organization of the Dominion Department of Transport. This Department was organized on Nov. 2, 1936, under authority of c. 34, 1936, unifying in one Department the control and supervision of railways, canals, harbours, marine and shipping, civil aviation and radio. The Meteorological Service is also under the Department of Transport.

Private enterprises engaged in the transportation and communications business in Canada, have, in the past 50 years, shown the same tendency toward consolidation and amalgamation which has been evident elsewhere throughout the civilized world. The basic reason for such consolidation and amalgamation has been the fact that the business of transportation and communications is, generally speaking, a 'natural monopoly', *i.e.*, a type of enterprise in which service can be more efficiently and economically rendered to the public where one or a few concerns control a particular type of service throughout the country. The outstanding example of these consolidations in Canada in our time is the concentration of control of the railways of the country in the hands of the Canadian Pacific Railway Company and the Canadian National Railways.

However, since such control brings with it elements of monopoly and possible overcharge which are distasteful to the public, it has been deemed advisable in Canada, as in other countries, to set up authorities controlling the rates to be charged and the other conditions on which services to the public are to be rendered by common carriers. This control eventually, so far as the railways within the jurisdiction of the Dominion Government were concerned, was placed in the hands of the Board of Railway Commissioners. From time to time the regulatory authority of the Commission was extended to a limited extent to other utilities. A brief summary of the history and functions of this body follows on pp. 638-639.

Besides the Board of Railway Commissioners, dealing with the larger public utilities coming under the jurisdiction of the Dominion Government, there exist, in several of the provinces, bodies which undertake among their duties the supervision and control of local public utilities operating under the jurisdiction of the

provinces, and the regulation of their rates for service. Among these are the Ontario Department of Municipal Affairs (formerly the Railway and Municipal Board of Ontario, established in 1906), the Quebec Commission of Public Utilities established in 1909, the Nova Scotia Board of Commissioners of Public Utilities, and the Public Utilities Commission of Manitoba. In the three westernmost provinces these same duties are performed by provincial Departments of Railways.

### **The Board of Railway Commissioners for Canada.\***

In the early days of railway building in Canada, the provinces were more concerned with rapid development than with rate regulation. Under the Railway Clauses Consolidation Act of 1851, rates were fixed by the directors of the railway, subject to the approval of the Governor in Council. Beyond this, competition was relied upon to bring rates to a reasonable level. As time went on, however, those who believed in the efficacy of competition as a regulator were disillusioned. For example, complaints were made that the Grand Trunk gave low through transit rates, say from Chicago to New York, through Canada, and recouped itself by high non-competitive rates in Upper Canada. In 1888, the supervision of rates was assigned to the Railway Committee of the Privy Council, sitting in Ottawa.

At the turn of the century, two reports were prepared for the Department of Railways and Canals by Prof. S. J. McLean, the first setting down the experience of railway commissions in England and the United States, and the second discussing Canadian rate grievances, with a recommendation that regulation by commission be adopted in Canada. The second report found that non-competitive rates were exorbitant as compared with competitive rates and that the railways had exercised their right to vary rates without notice, to the great distress of shippers. Among the weaknesses of the Railway Committee as a rate-regulating body was its fixed station at Ottawa, which made the cost of appearing before it practically prohibitive. Besides, members of Parliament had no necessary aptitude for dealing with railway rates, and of their two functions—legislative and administrative—the legislative was to them the more important.

The Board of Railway Commissioners for Canada, as provided for by the amended Railway Act of 1903, was organized on Feb. 1, 1904. In the beginning, its membership consisted of a Chief Commissioner, a Deputy Chief and one Commissioner. In 1908 the membership was increased by the inclusion of an Assistant Chief Commissioner and two other Commissioners. According to the Act, the Board may be divided into two sections of three members but, since any two constitute a quorum, two Commissioners usually hear all but the more important cases, and, agreeing, give the decision of the Board.

The powers of the Commission, in brief, are in matters relating to the location, construction and operation of railways. The most important of these powers has to do with rate regulation. Passenger rates are divided into standard and special, freight rates into standard, special and competitive. Standard rates are maximum rates and the only ones which must be approved by the Board before they are applied. Special and competitive rates, being less than maximum rates, may be applied by railways without the Board's approval, provided that a change of rates has been advertised. But important rate adjustments usually come to the notice of the Commission, for the changed rate alters the extent of the territory in which a shipper can compete and on this account he is apt to appeal the case to the Commission. It is a knotty problem to mark the boundaries of competitive areas—

\*Revised by P. F. Baillargeon, Secretary, Board of Railway Commissioners for Canada.

to decide whether Nova Scotian manufacturers should be given rates which would allow them to compete west of Montreal, or again, whether high construction and operation costs in British Columbia should enforce a rate which would prevent her goods from moving far into the prairies. By an amendment to the Railway Act, the regulation of telephone, telegraph, and express rates was given to the Commission, but with narrower powers than were given to it in dealing with railways.

The procedure of the Board is informal, as suits the nature of its work, for experience has shown that hearings in strict legal form lead the parties to the argument to take uncompromising attitudes. If possible, matters are settled by recommendations to the railway company or the shipper; thus, during 1936, 94-96 p.c. of the applications to the Board were settled without formal hearing. The Railway Committee had kept its station at Ottawa, giving only formal hearings, so that the grievances of those who could not afford to appear in person or pay counsel went unredressed. The itineraries of the Railway Commission are arranged so that evidence may be taken at the least expense to those giving it.

The Chief or Assistant Chief Commissioner, depending upon which one is presiding, gives final judgment on points of law when, in the opinion of the Commissioners, the question is one of law. On questions of fact the findings of the Board are final and are not qualified by previous judgments of any other court. Questions of law and jurisdiction are differentiated. In the first case, the Board may, if it wishes, allow an appeal to the Supreme Court; in the second, the applicant needs no permission to present his appeal.

The Railway Committee of the Privy Council, being a Committee of the Cabinet, was responsible to Parliament. When the powers of the Committee were made over to the Railway Commission the responsibility was retained, but necessarily by a different means. There is now provision for an appeal from any decision to the Governor General in Council, who may also of his own motion rescind or vary the action of the Board, but the power to rescind or vary usually consists in referring to the Board for reconsideration. From its inception until Dec. 31, 1936, the Board gave formal hearing to 10,382 cases. Its decision was appealed in 120 cases, 71 of these being to the Supreme Court of Canada and 49 to the Governor General in Council. Of the appeals, 13 of those carried to the Supreme Court were allowed and 3 of those to the Governor General in Council.

## PART II.—RAILWAYS.

The treatment of rail transportation is divided into three sections dealing, respectively, with steam railways, electric railways, and express companies.

### Section 1.—Steam Railways.\*

The steam railway is still the most important transportation agency from the standpoint of investment and of traffic handled. Fortunately, the statistical field is more completely covered for this form of transportation than for any other, since there are fairly complete figures dealing with steam railway mileage, and equipment, finances, and traffic.

\*Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an Annual Report on Steam Railways, as well as numerous other reports, for a full list of which the reader is referred to Chapter XXIX of this volume. Certain of the financial statistics of steam railways are compiled with the co-operation of officers of the Department of Transport.

**Historical Sketch.**—Construction was begun on the first Canadian railway in 1835. This was a line only 16 miles long between St. Johns and Laprairie, Quebec, intended to expedite the journey between Montreal and New York. It was opened for traffic in 1836, being operated at first with horses, for which steam locomotives were substituted a year later. About the same time, a line 6 miles long was built in Nova Scotia from Stellarton to a loading point on Pictou harbour to haul coal from the mines to vessels. On this line also the motive power was at first provided by horses, but in the spring of 1839 the "Samson", a locomotive built in England, brought over in a sailing vessel and still preserved in Halifax, was put in operation. A railway from Montreal to Lachine was opened in 1847 and another line to St. Hyacinthe in 1848. In 1850, however, there were only 66 miles of railway in Canada.

**Commencement of the Railway Era—The Grand Trunk.**—The railway era in Canada may be said to have begun in 1851, when charters were granted providing for the construction of a main line of railway between the two Canadas. These charters were repealed when the Grand Trunk charter was granted in 1852. The result was the completion of the Grand Trunk railway between Montreal and Toronto in 1856, its extension westward to Sarnia in 1859, and eastward to Rivière du Loup in 1860. The Atlantic and St. Lawrence railway, to Portland, Maine, was leased in 1853 and in 1859, on the completion of the Victoria bridge across the St. Lawrence at Montreal, the Grand Trunk had a through route 800 miles long from Portland to Sarnia. Within the next thirty years many important railways of Ontario, including the Great Western, were acquired and the Grand Trunk lines were extended to Chicago.

**Construction of the Intercolonial.**—An intercolonial railway linking Nova Scotia and New Brunswick with Upper and Lower Canada had been proposed as early as the 1830's. In 1844 the Imperial Government made a survey for a military road, and in 1851 agreed to recommend to Parliament either a guarantee of interest or an advance of the sum required to build a railroad. Differences of opinion as to the route resulted in the project being dropped, but in 1853 Nova Scotia undertook to construct, by 1862, a trunk line from Halifax to the New Brunswick frontier, with branch lines to Pictou and Victoria Beach. In both Nova Scotia and New Brunswick, however, the scheme of an intercolonial railway broke down for lack of funds, and in 1867 there were only 374 miles of railway in the Maritimes. These, under the B.N.A. Act, passed to the Dominion Government. The latter undertook the completion of the railway, and in 1876 the line was opened to Rivière du Loup. Later on, by acquisition of, lease of, or running rights over, other lines, the Intercolonial was extended to Montreal.

**The First Transcontinental Railway—The C.P.R.**—As early as 1849 a pamphlet published by Major Carmichael-Smyth advocated the construction of a Canadian Pacific railway along a route approximating that later taken. In 1851 a Parliamentary Committee reported against the enterprise at that time. In 1871 the terms under which British Columbia entered Confederation bound the Dominion to commence the Pacific railway within two years and complete it within ten years. The building of the railway as a public work actually commenced in 1874, but was not very rapidly pushed forward. In 1880 the Government entered into a contract with the Canadian Pacific Railway syndicate, granting to the syndicate all portions of the line completed or under construction, a cash subsidy of \$25,000,000, a land grant of 25,000,000 acres, free admission of materials for construction, and protection for 20 years against competing lines. The company on its side agreed to complete the railway to a fixed standard by May 1, 1891, and thereafter to maintain it effi-

ciently. As a matter of fact, the last spike on the main line was driven on Nov. 7, 1885. Like the Grand Trunk, the Canadian Pacific Railway began to acquire branch lines as feeders in the settled parts of the country along its route.

*The Second Transcontinental—The Grand Trunk Pacific.*—About the end of the century the Grand Trunk, which already had a line as far west as Chicago, submitted to the Canadian Government a proposal whereby it might participate in the settlement and development of the West. Lines were to be leased from Chicago *via* Minneapolis to Winnipeg, and thence a new line, subsidized by the Government, would be built to the Pacific coast. The Government raised objections to so much of the line lying in the United States and a second proposal was made for a connecting line with larger subsidies from North Bay to Winnipeg. The Government submitted, in 1903, a counter proposal that the line, instead of terminating at North Bay, should be continued east to Moncton, New Brunswick, the eastern section from Moncton to Winnipeg to be constructed by the Government and leased to the Grand Trunk Pacific for a 50-year period, the railway paying no rent for the first seven years and 3 p.c. on the cost of the railway for the remaining 43 years. The western half of the railway from Winnipeg to Prince Rupert was to be built by the Grand Trunk Pacific, the Government guaranteeing interest on bonds to 75 p.c. of the cost of construction, not exceeding \$13,000 per mile on the prairie section and \$30,000 per mile on the mountain section. The Grand Trunk reluctantly accepted this proposition and construction of the National Transcontinental and Grand Trunk Pacific commenced.

*The Third Transcontinental—The Canadian Northern Railway.*—The third transcontinental railway, the Canadian Northern, was begun in 1896 with the completion by Mackenzie and Mann of the 125-mile line of the Lake Manitoba Railway and Canal Co., chartered in 1889. The charters of the Winnipeg and Hudson Bay, the Manitoba and Southeastern, the Ontario and Rainy River, and the Port Arthur, Duluth and Western were next acquired. Assisted by the Manitoba Government, which desired to establish competition with the Canadian Pacific Railway, the Canadian Northern then secured the Manitoba lines of the Northern Pacific and in 1902 completed its line from Winnipeg to Port Arthur. During the following decade, the agricultural west was filling up very rapidly and, with the public of Canada under the influence of this boom, the Canadian Northern Railway was able to secure guarantees of bonds from the Dominion and Provincial Governments to enable it to extend its lines both westward to Vancouver and eastward to Montreal and so complete the great scheme of a transcontinental road.

*Effect of the War on the Railways—The Drayton-Acworth Report.*—With two new transcontinental main lines, besides branches, under construction, Canadian railway mileage was doubled between 1900 and 1915, increasing from 17,657 miles in the former year to 34,882 miles in the latter. The builders of the new lines, as well as the Canadian Government and people, had expected that immigration of capital and labour from Europe would rapidly settle the areas tributary to the new railroads and give them abundant and lucrative traffic, as had been the case with the C.P.R. Instead, the War came, and European labour and capital were conscripted for the struggle; immigration fell off and the anticipated traffic did not develop. On the other hand the interest on the bonds had to be met, and in 1915 the Government felt it necessary to give assistance to the railways. In 1916, after having again made loans to the Grand Trunk Pacific Railway and the Canadian Northern Railway Co., a Royal Commission was appointed by Order in Council of July 13, 1916, to investigate: (1) the general problem of transportation; (2) the status of each

of the three trancontinental systems; (3) the reorganization of any of the said systems, or their acquisition by the State; and (4) other matters considered by the Commission to be relevant to the general scope of the inquiry. The majority report of the Commission, signed by Sir Henry Drayton and Mr. Acworth, has formed the basis of the subsequent railway policy of Canada. Their recommendation was that the public should take control of the Canadian Northern, of the Grand Trunk Pacific and the Grand Trunk proper, and that they should be administered on purely business principles by a board of trustees, such compensation as seemed proper to be decided by arbitration and given to the shareholders of the Canadian Northern and the Grand Trunk.

The process of the acquisition of these railways and the financial results of their operation down to the end of 1936 are described in the latter part of Subsection 2, pp. 649-657.

*The Royal Commission of 1931.*—During 1930 and 1931 both freight and passenger traffic declined until new low records were being established each succeeding month. Freight and passenger revenues consequently decreased at alarming rates and with increased capital expenditures and fixed charges, the financial condition of Canadian railways demanded readjustment. To study the situation and, if possible, to remedy it, the Government appointed a Royal Commission which, on Sept. 13, 1932, submitted its report, summarized at pp. 648-650 of the 1933 Year Book. During the following session of the Dominion Parliament legislation known as The Canadian National-Canadian Pacific Act, (c. 33) 1933, was passed. A summary of this legislation was given at p. 655 of the 1936 Year Book.

### Subsection 1.—Mileage and Equipment.

The mileage of steam railways in operation in Canada is given for 1835 to 1849 and for each year from 1850 to 1936 in Table 1, showing the first great period of construction in the 1850's, when the mileage grew from 66 to 2,065, the lull in the 1860's, the second great period of construction in the 1870's and 1880's, the lull in the 1890's, the third great period of construction between 1900 and 1917 and the subsequent falling-off in the rate of increase.

#### 1.—Record of Steam Railway Mileage as at June 30, 1835-1919, and Dec. 31, 1919-36.

| Year.       | Miles in<br>Operation. | Year.    | Miles in<br>Operation. | Year.    | Miles in<br>Operation. | Year.    | Miles in<br>Operation. | Year.                | Miles in<br>Operation. | Year.    | Miles in<br>Operation. |

<sup>1</sup> First railway construction begun but line not open for traffic until 1836.  
prior years.

<sup>2</sup> Dec. 31 for this and later years.

<sup>3</sup> June 30 for this and

In total railway mileage Canada now ranks fourth with 42,552 miles, the United States, Soviet Russia and British India being the only countries with greater total mileages, and in miles per capita only Australia has a greater average, Canada's density being one mile of line for each 263 persons (exclusive of 339 miles, chiefly main lines, of Canadian railways crossing over United States territory).

The operated mileage in the different provinces is given for recent years in Table 2. Construction was most active in Manitoba, Saskatchewan and Alberta during the period covered while there has been a tendency for mileages to decline slightly in the other provinces, due to the abandonment of unprofitable lines.

2.—Operated Steam Railway Mileage, by Provinces, Dec. 31, 1925-26.

**Rolling-Stock.**—Statistics of the rolling-stock of the steam railways of Canada are given for the latest seven years in Table 3. The figures may be supplemented by the statement that between 1920 and 1936 the average capacity of box cars increased from 34·779 tons to 40·706 tons, of flat cars from 33·459 to 41·123 tons, and of all freight cars from 35·141 tons to 41·401 tons. The average tractive power of the locomotive in use in 1920 was 31,112 lb. and in 1936, 38,432 lb.

## Subsection 2.—Finances of Steam Railways.

The tables in this subsection deal with the capital liability, capital invested, earnings, operating expenses, employees and their earnings, and governmental aid to steam railways. However, the presentation of the financial statistics of railways in Canada would not be complete without some detailed consideration of the finances of the Government-owned railways. This is given in the latter part of the subsection. Some further statistics of revenue are included in Table 9 of the following subsection, where they are shown in relation to traffic.

**Capital Liability.**—The capital liability of the steam railways of Canada is shown in Table 4 for the years 1901 to 1936. The great increase after 1922 is due to the inclusion of all Government loans to railways and investment in road and equipment of Government railways as part of the capital liability of the railways. Statistics of individual lines are given in Table 5.

## 4.—Capital Liability of Steam Railways, as at June 30, 1901-19, and Dec. 31, 1919-36.

NOTE.—Corresponding figures for each year from 1876 to 1900, inclusive, were given on p. 649 of the 1927-28 Year Book.

| Year.    | Stocks.       | Funded Debt. | Total.        | Year.                | Stocks.       | Funded Debt.  | Total.        |

<sup>1</sup> Not reported.<sup>2</sup> Ceased operations during the year.<sup>3</sup> Includes 26-18 miles of joint track.

Canadian lines only for Canadian National, but Canadian and U.S. lines for Canadian Pacific.

<sup>4</sup> Including capital of leased lines.<sup>5</sup> Included with Canada Southern Ry.<sup>6</sup> Constructed and

operated by Ontario Government Railway Commission.

<sup>7</sup> Included in C.P.R.<sup>8</sup> Includes

\$203,102,989 Canadian railway capital owned by Canadian railways.

**Capital Investment.**—When comparison is made between the figures of Table 6 and those of Table 4, it is seen that the capital liability of the steam railways is considerably greater than the actual investment in physical property by the railways at the same date. This discrepancy is largely accounted for by the fact that the total of capital liabilities as shown in Table 4 includes loans and advances from the Government to cover deficits of the Canadian National Railways and unpaid accrued interest on Government loans which, up to Dec. 31, 1936, amounted to \$530,832,598 as shown in Table 16. A further factor in the discrepancy is that some of the outstanding railway stocks represent little actual investment in physical property.

<sup>1</sup> Details of this item are given in the Annual Report on Steam Railway Statistics issued by the Transportation and Public Utilities Branch of the Bureau of Statistics.

**Earnings and Expenses.**—Operating expenses of Canadian railways rose during 1918, 1919 and 1920, much more than operating revenues, and the operating ratio, or ratio of expenses to revenues, increased from around 70 p.c. to above 90 p.c. and remained high thereafter. The United States Government took over the operation of the United States railways when that country entered the World War and increased the rates of pay of the railway employees. The Canadian railways were also obliged to make corresponding increases and this increase in payroll has been the chief factor in increased operating ratio. Declining revenues without corresponding reductions in expenses during the past five years have also maintained the high operating ratio. The gross earnings and operating expenses of individual railways in the latest year appear in Table 5.

### 7.—Earnings and Operating Expenses of Steam Railways per Mile of Line and per Train Mile, for the years ended June 30, 1915-19, and the calendar years 1919-36.

**Railway Wages and Salaries.**—The data in Table 9 show the numbers of employees and the amounts of salaries and wages as reported by the railways for 1926 to 1936, inclusive. The Canadian National Railways brought into their railway accounts in 1928 the commercial telegraph employees, and these have been added for 1926 and 1927 in this table to make the data comparable. Because of inability of the railways to supply strictly comparable data for previous years, the numbers of employees and wages have been omitted for such, but index numbers have been computed for 1912-36 on as nearly comparable bases as possible, using 1926 data as equal to 100. The number of employees fluctuates with the volume of traffic, but not to the same extent. Salaries and wages are affected by the number of employees, rates of pay, and by the time worked. The rapid increase in the average wage in 1918 and 1919 was due to large increases in rates of pay corresponding to the "Macdoo Award" in the United States. Also the fluctuations in 1932-35 were due to reductions and restorations in basic rates of pay.

## 9.—Steam Railway Employees, Totals and Averages of Salaries and Wages, and Ratio of Salaries and Wages to Operating Revenues and Expenses, 1912-36.

<sup>1</sup> Owing to the inability of the railways to supply strictly comparable data for the years prior to 1926, statistics of employees and wages which were given on p. 664 of the 1936 Year Book have been omitted here; the adjusted index numbers express the relation with later years as closely as it can be approximated.

<sup>2</sup> Ratio of salaries and wages chargeable to operating expenses only for 1926 and subsequent years.

**Government Aid to Railways.**—In order that the private railways of Canada might be constructed in advance of settlement, as colonization roads, or through thinly settled districts where little traffic was available, it was necessary for Dominion and Provincial Governments and even the municipalities to extend some form of assistance. The form of aid was generally a bonus of a fixed amount per mile of railway constructed and, in the early days, grants of land other than for right-of-way were also made. Tables 10 and 11 show the areas of the land granted as subsidies and for right-of-way, station grounds and townsite purposes to steam railway companies by the Dominion and Provincial Governments; the former gives the data by type of grant and the latter by railway companies to which the grants were made.

As the country developed, the objections to the land-grant method became more apparent, and aid was more frequently given in the form of a cash subsidy per mile of line, a loan, or a subscription to the shares of the railway, as shown analytically in Table 12. Table 13 records the details of the most recent type of assistance given to private railways, *viz.*, by the guaranteeing of their bonds or of the interest thereupon. These guarantees enabled the railways receiving them to borrow money at rates of interest considerably lower than would otherwise have had to be paid.

<sup>1</sup> Does not include \$216,207,142 perpetual debenture stock and guaranteed stock of the Grand Trunk Railway, now part of the Canadian National system, on which interest and dividends are guaranteed by the Dominion Government, nor Government-guaranteed bonds held by the Government itself.

## FINANCIAL STATISTICS OF GOVERNMENT-OWNED RAILWAYS.

**Canadian Government Railways.**—The Intercolonial Railway, built as a condition of Confederation and completed in 1876, and the Prince Edward Island Railway, opened in April, 1875, have, since their construction, been owned and operated by the Dominion Government. In 1903 the Dominion Government undertook the construction of the National Transcontinental railway line from Moncton, N.B., to Winnipeg, to be leased to the Grand Trunk Pacific Railway Co. for a period of 50 years. However, during the Great War the company was unable to take over the operation of the road when completed in 1915. The Government itself undertook its operation and was also obliged to lease the Lake Superior branch of the Grand Trunk Pacific Railway, which was isolated from the main line. A number of eastern branch lines have been acquired in recent years. The Hudson Bay Railway is a direct liability of the Dominion Government and is being operated by the Canadian National for the Government from Apr. 1, 1935, but is not included in the data for Canadian National Railways. To Mar. 31, 1937, the total cost of this railway was \$33,941,012, and of terminal work at Churchill \$14,054,400, exclusive of the expenditure of \$6,274,218 on the terminal at Nelson.\*

\*These figures of total cost include deficits from operations during construction.

#### 14.—Canadian Government Investments in Railways,<sup>1</sup> including Loans, to Mar. 31, 1937, and for the fiscal year 1937.

NOTE.—Summarized from the Annual Report of the Department of Transport. These investments were given by individual railways on pp. 671-672 of the 1936 Year Book. Since, except for the Hudson Bay Railway and loans to the Canadian National, they have changed little in recent years, they are repeated here only in so far as the main items of interest are concerned.

<sup>1</sup> Not including operating losses and profits.

**The Consolidation and Organization of the Canadian National System.\***  
—In pursuance of an Act of 1917 (7-8 Geo. V, c. 24), the Government acquired the capital stock of the Canadian Northern Railways with a mileage of 9,566.5. The insolvency of the Grand Trunk Pacific led to the appointment of the Minister of Railways as receiver on Mar. 9, 1919, and in October, 1920, the road was transferred to the Canadian National Railways. The Grand Trunk Railway was acquired under c. 13 of the Statutes of the second session of 1919, providing for arbitration of the considerations to be given to its shareholders. This arbitration finally disposed of, steps were taken to consolidate the various railways under government operation and control. In October, 1922, the Grand Trunk Board and the Canadian Northern Board gave place to a single Canadian National Board, to which the former Canadian Government Railways were turned over for management and operation. The unification of the Grand Trunk and Canadian National Railways was provided for by Order in Council of Jan. 30, 1923, which also brought into effect the Act to incorporate the Canadian National Railway Co. and respecting Canadian National Railways (c. 13, 1919).

**Operating Finances of the Canadian National Railways.†**—In Table 15 "Canadian Lines" include those of the Canadian Northern system, the Grand Trunk Railway of Canada, the Grand Trunk Pacific, and the Canadian Government Railways. The "United States Lines" include those lines known as the New England line, the Grand Trunk Western, the Duluth, Winnipeg and Pacific, and,

\*For further details of the acquisition of the Canadian Northern, Grand Trunk Pacific, and Grand Trunk Railways by the Dominion Government, see pp. 602-603 of the 1926 Year Book.

†For detailed statistics of the operation and finances of the Canadian National Railways during 1936, see Steam Railway Statistics, 1936, and Canadian National Railways, 1923-36, published by the Dominion Bureau of Statistics, also the Annual Report of the Canadian National Railways.

from Feb. 1, 1930, the Central Vermont. The Hudson Bay Railway was returned to the Government while under construction, and appropriations, etc., for this were not included with the 1926 and later data.

Gross revenues, operating expenses and net revenues shown in Table 15 include only those from steam railway and commercial telegraph operations, but the deficits are for the entire system, including the operating results of the Niagara, St. Catharines and Toronto Railway (electric) and other railways operated separately, hotels, commercial telegraphs, coastal steamships and all other outside operations.

Up to 1928 there was a marked improvement over the results of the first year after consolidation (1923), when the deficit, including profit and loss adjustments, was \$54,634,323, but the light traffic in 1932 so reduced gross revenues that, with increased interest charges, the deficit increased to \$101,335,074. It was reduced slightly in 1933 to \$97,651,937, in 1934 to \$80,662,354, increased in 1935 to \$115,281,690, and in 1936 stood at \$92,311,038.

The figures of Table 15 are taken from the accounts of the railways.

<sup>1</sup> Includes Central Vermont Railway from Feb. 1, 1930.

<sup>2</sup> Revenues and expenses 1923-27, adjusted to include commercial telegraph lines to be comparable with 1928-36.

<sup>3</sup> The deficit shown includes appropriation for insurance fund of \$9,739,533.

<sup>4</sup> Interest at 4 p.c. on \$34,927,098 G.T.P. debenture stock reduced under agreement to 2 p.c.

**The Debt and Interest Charges of the Canadian National Railways.**—Table 16 analyses the increase in the debt and interest charges of the system, including both Canadian and United States lines. To define clearly what is included under debt due to the Dominion Government in Table 16, the appropriations for the Canadian Government Railways have been separated from the loans and advances to the remainder of the system. The Canadian Government Railways include the Intercolonial, National Transcontinental, Prince Edward Island and several other smaller railways in the eastern provinces, together with the Quebec Bridge. The Hudson Bay Railway was included in the Canadian Government Railways until 1926, when it was transferred back to the Department of Railways and Canals for completion, and appropriations on its account were deducted. These Canadian Government Railways appropriations do not include the operating deficits of the Canadian Government Railways for 1919 and subsequent years nor the deficits of other portions of the Eastern Lines\* since July 1, 1927, but include investments for construction, purchase and working capital of the Canadian Government Railways. As the book value of these properties is included on the assets side of the balance sheet, the cost of these roads to the Dominion is included in the liabilities of the system as an offset. The construction or purchase of these roads was financed by the Dominion from the Consolidated Revenue Fund, and consequently no interest on such expenditures accrued in the railway accounts.

\*Canadian National lines east of Lévis and Diamond Junction, Que.

<sup>1</sup> See Table 17 for short-term debt. <sup>2</sup> Deficits of Eastern Lines from July 1, 1927, and for entire system from Jan. 1, 1932, are paid by the Dominion Government and are not included in this table. See Table 17. <sup>3</sup> Temporary loans and inter-line loans eliminated. <sup>4</sup> Amounts outstanding at dates constituent lines were taken over by Canadian National, viz.: Canadian Northern, Sept. 30, 1917; Grand Trunk Pacific, Mar. 9, 1919; Grand Trunk, May 21, 1920; Canadian Government, Mar. 31, 1919 (actual date of transfer Nov. 20, 1918). <sup>5</sup> Includes Hudson Bay \$14,531,706, eliminated from statement in 1926. <sup>6</sup> Government loans to lines other than Canadian Government Railways now comprising Eastern Lines ceased to accrue interest after July 1, 1927. Those on June 30, 1927, were: capital \$2,585,605, deficits \$8,835,176, total \$11,400,781. <sup>7</sup> Includes temporary loan for refunding purposes, \$35,865,757. <sup>8</sup> Credits for property including Hudson Bay Railway, Halifax Harbour property, etc., transferred to other Government departments or bodies. <sup>9</sup> Includes \$216,207,145 perpetual debenture stock guaranteed as to interest only, formerly Grand Trunk bonds. <sup>10</sup> The amount not included in the Dominion Government debt is the total due the public, since the total due the Government is already taken into account in Dominion debt figures. <sup>11</sup> Central Vermont included in annual report; excluded here. <sup>12</sup> St. John and Quebec Railway bonds \$3,737,978 guaranteed by New Brunswick transferred from unguaranteed to guaranteed, 1929-30.

In a rather different class are the loans and advances made by the Government to the Canadian National Railways or constituent companies on notes, bonds and receiver certificates with accrued simple interest ranging from 3½ to 6 p.c. In computing the public debt of Canada the Finance Department considers these railway loans and advances as "non-active assets" similar to investments in canals, public works, etc., and as such does not subtract them from the gross debt in computing the net debt. The railways, however, debit their accounts with the accrued interest on these Government advances, all of which remains unpaid.

The debt due to the public includes debenture stock maturing and perpetual and bonds and mortgages of the constituent railways, but does not include the capital stock of the Grand Trunk Railway held by the Government, nor the cost of acquiring the same. Likewise it does not include the capital stock of the Canadian Northern system. The stock of the Grand Trunk Pacific is all held by the Canadian National system and is, therefore, not included either.

Table 17 has been compiled to reconcile the investments in and loans to the Canadian National Railways (including Canadian Government Railways) as shown

in the Public Accounts for the fiscal year ended Mar. 31, 1937, with the debt to the Dominion Government shown in the Railways' balance sheet at Dec. 31, 1936, amounting to \$1,656,978,867 as shown for 1936 in the first half of Table 16.

<sup>1</sup> Excludes assistance under Supplementary Public Works Construction Act, c. 34, 1935, as follows: purchase of railway equipment, \$3,854,489; increased employment in shops for equipment repairs, \$1,183,593; total, \$5,038,082.

Table 18 analyses the funds received and expended by the Canadian National Railways. In addition to the funds available under long-term debt, as shown in Table 16, the railways have frequently had short-term loans as well as appropriations from Consolidated Fund Account for Eastern Lines and other cash deficits. The figures given in Table 18 differ from the figures given in the annual reports of the railways by reason of certain accounting adjustments.

<sup>1</sup> This is the net increase in par value as shown in Table 17, less issue expense and discount. Interest on Government loans is not included.

<sup>2</sup> Temporary loans and inter-line loans are excluded in the first two columns of Funds Received and included in the fifth column. "Other Balance Sheet Accounts" include profit and loss balances.

<sup>3</sup> Deficit of lines other than Eastern Lines for 1932 not paid until 1933.

<sup>4</sup> Includes charges for property abandonments, obsolete equipment and writing down land values, etc., not required in cash amounting to \$72,520,298, included in the fifth column of Funds Received.

<sup>5</sup> Includes credit \$8,138,492 cancellation of G.T.P. 4 p.c. debenture stock interest of which credit \$5,348,152 relates to the period prior to 1923.

Table 19 shows the assets of the Canadian National Railways at Dec. 31, 1922, and at Dec. 31, 1936, with the increase or decrease for the fourteen-year period.

**Capital Revision of the Canadian National Railways.**—The Canadian National Railways Capital Revision Act, c. 22 of the Statutes of 1937, dealt with certain Government liabilities of the system. It created the Canadian National Railways Securities Trust as a medium for maintaining in perpetuity the Government claims against the system for loans made, amounting to \$643,860,558, and accrued unpaid interest of \$574,781,637. This total of \$1,218,642,195 included a claim of \$43,949,039 for interest on loans not included in the Canadian National accounts. No-par value capital stock of the Securities Trust was issued to the Government in exchange for these claims at an initial stated value equal to the amount of loans used for capital purposes, namely, \$270,037,438. Capital stocks held by the Government were cancelled to the extent of \$247,628,339, and claim for an old grant of the Province of Canada, amounting to \$15,142,633 was abandoned.

All stock ownership of the various railways was placed under the control of the Canadian National Railway Company, the Government in turn receiving stock of the latter company.

A great deal of confusion has been evident when the liability accounts of the National Railways and those of the Dominion were brought together, and to avoid duplication in future, the Act provided that liabilities of the National Railways to the Government (excepting temporary financing) will be shown under the descriptive heading of "Dominion Government—Proprietor's Equity"; this is because such liabilities are all included in the net debt of Canada. At Jan. 1, 1937, this account appears as follows:—

|   |                          |
|---|--------------------------|
| Dominion Government—Proprietor's Equity—  |                          |
| 1,000,000 shares of no-par value capital stock of the Canadian National Railway Company issued in exchange for residual value of Canadian Northern Capital stock.....                               | \$ 18,000,000.00         |
| 5,000,000 shares of no-par value capital stock issued by Securities Trust to the Government in consideration of the advances—claims for unpaid interest and collateral held by the Government. .... | 270,037,437.88           |
| Dominion Government capital expenditures for Canadian Government Railways.....  | 388,290,263.52           |
|   | <u>\$ 678,327,701.40</u> |

This new account will reflect annually all capital losses due to abandonments and the like that are not included in the annual deficit of the Railway as submitted to Parliament.

Deficits will be paid from the Consolidated Fund of Canada, in conformity with the provisions of the Canadian National-Canadian Pacific Act, 1936, which provides that deficits shall not be funded. Any temporary assistance by the Government on capital account will be repaid through the proceeds of securities sold by the Canadian National Railways.

Finally, the Act provides that an appendix shall be included in the Public Accounts of Canada to show the historical record of Government assistance to Railways, and a note to this effect will appear on the balance sheet of the Canadian National Railways in connection with the "Proprietor's Equity".

### Subsection 3.—Steam Railway Traffic.

In addition to an analysis of passenger and freight traffic statistics for all steam railways, a separate analysis is given of the operations and traffic of the Canadian National Railways, since, being controlled by the Dominion Government, the information is considered of special interest.

**Passenger and Freight Traffic.**—The maximum volume of passenger traffic, as indicated by passengers carried one mile, was reached in the calendar year 1919 and the maximum of freight traffic in 1928. In recent years both freight and passenger traffic, especially the latter, have been affected by the increase in the use of motor vehicles and this traffic decrease was much aggravated by the general decline in commercial activity after 1929, but improvements were made in 1934, 1935, and 1936.

The average haul for freight in Table 20 is the average for all railways, which eliminates the effects of consolidations of railways and of interchanging freight between Canadian railways. The average revenue per passenger increased in 1918 and 1919 with increases in rates, but the increases between 1924 and 1930 were largely due to decreases in the short haul traffic. The increases in freight train loading and train revenues have been due to the use of larger and more powerful locomotives.

**20.—Summary Analysis of Statistics of Passenger and Freight Services and Receipts, for the calendar years 1920-36.**

NOTE.—Corresponding figures for the years 1915-19 were given at pp. 652-653 of the 1937 Year Book and for 1910-15 at pp. 628-629 of the 1923-23 Year Book.

<sup>1</sup> Includes enboose miles.<sup>2</sup> Duplication eliminated, see Table 23 for details of freight carried.<sup>3</sup> Revised classification includes mileage previously classed as "mixed".<sup>4</sup> Revised since publication of the 1937 Year Book, to exclude duplications.

Operation of the Canadian National Railways.—The Canadian National system's steam mileage at Dec. 31, 1936, including lines in the United States, but exclusive of the Northern Alberta Railways and Toronto Terminals Railway (which are controlled jointly by the Canadian National and the Canadian Pacific Railways), was 23,566. Including the Thousand Islands Railway, 4-51, and the Muskegon Railway and Navigation Co., 5-25, controlled but separately operated, the total steam mileage was 23,576. Including 120-52 miles of electric lines, the grand total was 23,696-24.

The Maritime Freight Rates Act (17 Geo. V, c. 44), effective July 1, 1927, ordered that the accounts of the Canadian National lines east of Lévis and Diamond Junction, Quebec, be kept separate from those of the remainder of the Canadian National system. These lines were designated the "Eastern Lines" of the Canadian National Railways. The Act ordered that specified freight rates on the Eastern

Lines be reduced by 20 p.c. Other railways were allowed to make similar reductions in their freight rates in that territory and to bill on the Board of Railway Commissioners of Canada for the difference in freight receipts due to such reductions. The differences between the reduced rates and the normal rates are treated as revenues by the Canadian National Railways and paid by the Dominion Government. The totals paid to all railways under the Act were: \$1,353,464, \$2,758,893, \$3,092,677, \$3,615,218, \$2,554,673, \$1,922,073, \$1,989,130, \$2,529,394, \$2,348,399, and \$2,505,823, respectively, for the years 1927-36.

The Quebec Bridge across the St. Lawrence above Quebec city, with a main span of 1,800 ft., carrying a single-track railway and accommodation for motor and pedestrian traffic, forms a connecting link in the Canadian National Railways system and is operated as a part of it.

Table 21 shows some of the more important train traffic statistics of Canadian National Railways operation for the years 1935 and 1936.

21.—Canadian National Railways (Canadian and U.S. Lines) Train Traffic Statistics, for the calendar years 1935 and 1936.<sup>1</sup>

<sup>1</sup> Excludes electric lines.

<sup>2</sup> Work service excluded.

Commodities Hauled.—In Table 22, the duplications from two or more railways handling the same freight have been eliminated. The peak year was 1928 when agricultural products were particularly heavy. The 1936 statistics show an increase of 6,705,466 tons, or 9.7 p.c. over the 1935 total.

## 22.—Commodities Hauled as Freight on Steam Railways during the calendar years 1932-36.

NOTE.—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. In this respect these figures differ from those in the corresponding table in the 1926 and previous Year Books.

| Group and Product.   | 1932.             | 1933.             | 1934.             | 1935.             | 1936.             |

**Railway Accidents.**—The numbers of passengers, employees and others killed or injured in steam railway accidents are given in summary form from 1920 to 1936 in Table 23, and in detailed analysis for 1934 to 1936 in Table 24. All injuries to passengers are included, no matter how slight, but for employees only injuries which keep the employee from his work for at least three days during the ten days following the accident are recorded.

23.—Numbers of Passengers, Employees and Others Killed or Injured on Steam Railways, calendar years 1920-36.

NOTE.—For the years ended June 30, 1888 to 1919, see Canada Year Books, 1910, p. 378, and 1922-23, p. 635.

| Year.     | Passengers. |          | Employees. |          | Others. |          | Totals. |          |

| 1925..... | 5           | 401      | 105        | 8,256    | 199     | 642      | 309     | 9,299    |
| 1926..... | 20          | 446      | 127        | 10,622   | 312     | 638      | 459     | 11,700   |
| 1927..... | 14          | 569      | 131        | 11,057   | 256     | 695      | 401     | 12,321   |
| 1928..... | 15          | 359      | 140        | 12,626   | 353     | 790      | 507     | 13,505   |
| 1929..... | 20          | 551      | 118        | 12,453   | 299     | 809      | 431     | 13,843   |
| 1930..... | 15          | 548      | 103        | 9,678    | 345     | 837      | 463     | 11,063   |
| 1931..... | 3           | 390      | 55         | 5,966    | 202     | 630      | 260     | 7,195    |
| 1932..... | 7           | 342      | 77         | 4,631    | 242     | 598      | 326     | 5,571    |
| 1933..... | 8           | 319      | 53         | 4,409    | 219     | 645      | 280     | 5,373    |
| 1934..... | 16          | 432      | 57         | 5,170    | 242     | 589      | 315     | 6,200    |
| 1935..... | 10          | 440      | 70         | 5,221    | 271     | 625      | 351     | 6,286    |
| 1936..... | 6           | 691      | 93         | 6,338    | 282     | 703      | 381     | 7,732    |

The number of passengers killed in accidents dropped from 10 in 1935 to 6 in 1936. None of these was killed in collisions or derailments. The passengers injured in accidents which resulted from the movement of trains (Table 24), as distinct from all accidents, increased from 432 in 1935 to 657. The number of employees killed increased from 43 in 1935 to 83 and the number injured increased from 1,026 to 1,293. The number of other persons killed in train accidents increased from 269 to 273. The number of motorists killed decreased from 106 to 105 and the number injured increased from 213 to 266. Railway employees were absent from their duties because of injuries received in accidents (train and non-train) for 181,662 days as against 150,615 days in 1935.

These accidents include all accidents in which railway trains were involved and accidents on railway property. The classification of accidents used in the Bureau's vital statistics classes collisions between motor vehicles and trains as motor vehicle accidents; also provincial statistics of motor vehicle accidents class these as motor vehicle accidents and consequently adjustments should be made when compiling total accidental deaths of all kinds or comparing results of accidents of different kinds, such as train and motor vehicle.

## Section 2.—Electric Railways.\*

The cheap and reasonably rapid conveyance of human beings is a necessity of modern urban life. One important means by which this necessity is supplied throughout Canada is the electric street railway, operated by hydro-electric energy in the majority of cases.

**Historical.**—Replacing the horse-car systems, used in Montreal and Toronto as early as 1861, electric street railways were first seen in operation in Canada in 1885, when a successful experimental railway was constructed and operated at the Toronto exhibition grounds. Before many years their safety and convenience resulted in the discarding of the older systems. An electric system 7 miles in length was opened at St. Catharines in 1887, using the double overhead trolley. The second electric railway in Canada commenced operations in Vancouver, in June, 1890. This was followed by the completion of the Ottawa Electric Railway in 1891, and the electrification of the Montreal and Toronto systems in 1892. The street railways of other eastern cities were generally electrified during the 1890's, while in the newer western cities electricity was used from the commencement. In the cities of Eastern Canada, electric street railways are generally operated by private companies under city franchises, while in a considerable number of cities in Ontario and the West the street railways are owned and operated by the municipalities, a fact indicated in Table 27.

Many difficulties are met in operating the cars during the winter season, owing to the heavy falls of snow. This, however, has been overcome by the use of sweepers, scrapers, and ploughs. The single overhead trolley system has been found the most suitable and is in general use. During the past few years an increasing number of motor buses have been used; in 1924 only 48 were operated, but by 1936 the number had increased to 605.

In addition to street railways in the cities there are several systems serving suburban areas and also doing an inter-urban business, but this latter class of service is fast being supplanted by bus service. Indeed the development of motor vehicles, while providing competition for all forms of rail transportation, has affected electric railways more seriously than steam railways. The dependence of the former upon short-distance passenger traffic renders them particularly susceptible to the competition of motor vehicles. Since the War, a number of electric railways have been abandoned, first main track mileage has declined 28 p.c. since 1925 (see Table 28, p. 667), while even in the larger cities electric railways have generally been obliged to increase their tariffs owing to the slow growth or actual decline of traffic.

### Subsection 1.—Equipment of Electric Railways.

Table 25 shows details of the track mileage and of the rolling-stock of electric railways in the four latest years. Statistics of the first and second main track mileage in each year since 1919 will be found in Table 28 of Subsection 3, and of the mileage operated by individual companies in Table 27 of Subsection 2.

\* Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on Electric Railways in Canada.

## 25.—Mileage and Equipment of Electric Railways, calendar years 1933-36.

<sup>1</sup> Municipally owned. <sup>2</sup> \$4,204,725 held by Canadian Pacific Railway. <sup>3</sup> Operated by the Hydro-Electric Power Commission of Ontario. <sup>4</sup> Provincially owned. <sup>5</sup> Debentures of the London Rly. Commission. <sup>6</sup> \$310,500 held by Canadian National Rlys. and \$189,500 included in stock outstanding of Canadian National Rlys. <sup>7</sup> Not reported. <sup>8</sup> Investment in road and equipment. <sup>9</sup> Held by Canadian National Rlys. <sup>10</sup> Operated by Toronto Transportation Commission. <sup>11</sup> Citadel division operations only. Total capital and operations of the Montmorency division are included in steam railways. <sup>12</sup> Represents all divisions of the company. <sup>13</sup> Operated by Winnipeg Electric Railway.

## Subsection 3.—Traffic of Electric Railways.

The most important traffic statistics for electric railways are given for each year since 1919 in Table 28. Passenger traffic on individual railways is included in Table 27 above. Accidents to passengers and employees are given in Table 29.

## 28.—Summary Statistics of Electric Railway Operation, calendar years 1919-36.

NOTE.—Owing to lack of comparability in some particulars, figures prior to 1919 are omitted here but they may be found at p. 681 of the 1936 Year Book for the years 1911-18 and at p. 676 of the 1933 Year Book for years 1901-10.

| Year.     | Mileage in Operation. |                    | Car Mileage. |           |             | Passengers. | Freight.  |

## Section 3.—Express Companies.\*

"Express service is an expedited freight service on passenger trains". But express companies do not own the means of performing their services; they use railway facilities by virtue of contracts with the railway companies. Express companies in Canada have had close relations with the railways practically from the beginning. A brief history of the various express companies will be found on pp. 611-612 of the 1926 Year Book.

\* Revised and checked by G. S. Wong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch issues an annual report on Express Statistics.

Goods are sent by express for quick transit, so that express rates do not compete with freight rates. Thus in its first tariff the Dominion Express Co., in pursuance of its contract with the Canadian Pacific Railway, gave a rate of  $2\frac{1}{2}$  times the maximum first-class railway freight rate for the same goods carried the same distance. The majority of the contracts between express and railway companies for carrying express freight are on the basis of a percentage of the gross express revenue. The rates are subject to the approval of the Board of Railway Commissioners.

**Express Company Operations.**—During 1936, the latest year for which statistics are available, three Canadian and one American express organizations operated in Canada. The Canadian Pacific Express Co., formerly the Dominion Express Co., is a subsidiary of the Canadian Pacific Railway and handles the express business on the railways and the inland and ocean steamship lines of the parent company. The express business of the Canadian National system and Northern Alberta railway is handled by departments of the respective railways. The Railway Express Agency, Inc., operates over the Canadian sections of United States railways and over the route from Skagway to points in Yukon. These companies are all organized under powers conferred by Acts of the Dominion Parliament and their business consists in the expeditious shipment of valuable live stock, and such perishable commodities as fresh fish, fruit, etc., the forwarding of parcels and baggage and the issue of money orders, travellers cheques, letters of credit and other forms of financial paper. No statistics are available regarding the volume of traffic carried by express. Much of the traffic, of course, consists of parcels and small lots which would make statistical classification and measurement very difficult. However, there is also an important movement in car lots of live stock, fresh fish, fruit, vegetables and other perishable commodities. The total capital liabilities of the three Canadian companies and departments stood at \$6,239,535 on Dec. 31, 1936.

In the following tables the amounts paid by express companies to the carriers, i.e., railways, steamship lines, etc., for transporting the express matter, are shown under the heading "express privileges". Of the total of 63,146 miles operated in 1936, 42,192 were over steam railways, 280 over electric railways, 14,227 on ocean steamship services (mainly by the Canadian Pacific lines), 5,188 miles on inland or coastal steamboat routes, 397 by aircraft, and 862 miles over highways by motor trucks.

### 30.—Summary Statistics of Revenues and Expenses of Express Companies, calendar years 1919-36.

NOTE.—Corresponding figures for the years ended June 30, 1911-13, were published at p. 673 of the 1927-28 Year Book.

| Calendar Year. | Gross Earnings. | Operating Expenses. | Express Privileges.    | Net Operating Revenue. |
|----------------|-----------------|---------------------|------------------------|------------------------|
|                | \$              | \$                  | \$                     | \$                     |
| 1919.....      | 24,933,219      | 13,227,652          | 12,936,615             | - 1,231,048            |

## PART III.—ROAD TRANSPORTATION.\*

Since the recent development of highways in Canada has been almost exclusively for the purpose of providing roadbed for motor vehicle traffic, highways and motor vehicles have been treated since the 1937 edition as related features of transportation, instead of being dealt with in separate parts of the chapter as in former editions. After an introductory section which briefly summarizes provincial regulations regarding motor vehicles and motor traffic, the whole subject of road transportation is dealt with under the headings of facilities, finances, and traffic, similarly to the treatment of other forms of transportation.

## Section 1.—Provincial Motor Vehicle and Traffic Regulations.†

**NOTE.**—In this Section, it is obviously impossible to include the great mass of detailed regulations in force in each province. The purpose in view is to provide only the more important general information. For detailed regulations for specific provinces the sources of information are given on pp. 670-671. See also "The Highway and Motor Vehicle in Canada", an annual bulletin published by the Dominion Bureau of Statistics and obtainable from the Dominion Statistician, price 25 cents.

**General.**—The licensing of motor vehicles and the regulation of motor vehicle traffic lies within the legislative jurisdiction of the Provincial Governments in

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report "The Highway and Motor Vehicle in Canada".

†The information in this Section has been revised from material provided by the officials in charge of the administration of Motor Vehicle and Traffic Acts and Regulations in the individual provinces.

Canada. Regulations which apply in all the provinces may be summarized as follows:—

*Operators' Licences.*—The operator of a motor vehicle must be over a specified age (usually 16 years) and must carry a licence, obtainable only after prescribed qualification tests and renewable annually. Special licences are required for chauffeurs.

*Motor Vehicle Regulations.*—In general, all motor vehicles and trailers must be registered annually, usually for the calendar year, with the payment of specified fees, and must carry two registration plates, one on the front and one on the back of the vehicle (one only, for the back, in the case of trailers). A change in ownership of the vehicle must be recorded with the registration authority. However, exception from registration is granted for a specified period (usually at least 90 days) in any year to visiting private vehicles registered in another province or a State which grants reciprocal treatment. Further regulations require a safe standard of efficiency in the mechanism of the vehicle and in its brakes, and provide for its equipment with non-glare headlights and a proper rear light, with a satisfactory locking device, a muffler, a windshield wiper, and a rear-vision mirror.

*Traffic Regulations.*—In all the provinces, vehicles keep to the right-hand side of the road. Motorists are everywhere required to observe traffic signs, lights, etc., placed at strategic points on highways and roads. While permissible speeds vary in different provinces, slower speeds are always required in cities, towns and villages, in passing schools and public playgrounds, at road intersections, railway crossings, or at other places or times where the view of the highway for a safe distance ahead is in any way obscured. Motor vehicles must not pass a street car which has stopped to take on or discharge passengers except where safety zones are provided. Accidents resulting in personal injury or property damage must be reported to a provincial or municipal police officer and any driver involved must not leave the scene of accident until he has rendered all possible aid.

*Penalties.*—These ascend in scale from small fines for minor infractions of any of the regulations to a suspension of the operator's driving permit, impounding of the car or imprisonment for serious infractions, recklessness, driving without an operator's licence, and especially for attempting, while intoxicated, to operate a motor vehicle.

There is such wide variation in the different provinces regarding the basis of licences and fees, the regulation of public commercial vehicles, details of traffic rules, speed, and the use of motor vehicles, that it is impossible even to outline them satisfactorily in the space available here. The most important features are summarized in the annual bulletin referred to in the headnote to this Section, p. 669. The authorities responsible for the administration of motor vehicles and the legislation governing vehicles and traffic are given below for each province.

*Prince Edward Island.*—*Administration.*—The Provincial Secretary, Charlottetown. *Legislation.*—The Highway Traffic Act (c. 2, 1936) and amendments.

*Nova Scotia.*—*Administration.*—Motor Vehicle Branch, Department of Highways, Halifax. *Legislation.*—The Motor Vehicle Act (c. 6, 1932) and amendments.

*New Brunswick.*—*Administration.*—Motor Vehicle Branch, Department of Public Works, Fredericton. *Legislation.*—The Motor Vehicle Act (c. 20, 1934).

*Quebec.*—*Administration.*—Motor Vehicle Bureau, Office of the Provincial Treasurer, Quebec. *Legislation.*—The Motor Vehicle Act (c. 35, R.S.Q. 1925) and amendments.

*Ontario.*—*Administration.*—Motor Vehicles Branch, Department of Highways, Toronto. *Legislation.*—The Highway Traffic Act (c. 251, R.S.O. 1927) and amendments.

**Manitoba.**—*Enforcement.*—Attorney General. *Registrations.*—Treasurer, Tax Commission Office, Winnipeg. *Legislation.*—The Highway Traffic Act (c. 19, 1930) and amendments.

**Saskatchewan.**—*Administration.*—Motor Licence Division, Provincial Tax Commission, Revenue Building, Regina. *Legislation.*—The Vehicles Act (c. 68, 1935) and amendments.

**Alberta.**—*Administration.*—Motor Vehicle Branch, Department of the Provincial Secretary, Edmonton. *Legislation.*—The Vehicles and Highway Traffic Act (c. 31, 1924) and amendments.

**British Columbia.**—*Administration.*—Motor Vehicle Branch, Commissioner of Provincial Police, Victoria. *Legislation.*—The Motor Vehicle Act (c. 195, R.S.B.C. 1936) and the Highway Act (c. 116, R.S.B.C. 1936) and amendments.

**Yukon.**—*Administration.*—Territorial Secretary, Dawson, Yukon. Information regarding regulations may also be obtained from the Lands, Parks, and Forests Branch, Department of Mines and Resources, Ottawa. *Legislation.*—The Motor Vehicle Ordinance, No. 14, 1914, and amendments.

## Section 2.—Roads and Vehicles.

The facilities for road transportation are dealt with in two subsections devoted, respectively, to roads and highways and to motor vehicles.

### Subsection 1.—Roads and Highways.

**Historical.**—A brief description of the early colonization roads in Canada was given at p. 733 of the 1934-35 Year Book.

**Recent Highway Development.**—With the rapid increase in the percentage of motor-car owners to population (see pp. 672-673) the demand for improved roads has become more and more insistent since the War. Furthermore, the advantages to be gained by attracting touring motorists have been a powerful incentive to governing bodies to improve trunk roads and scenic highways within their jurisdictions. One sphere where the motor car has been of special economic advantage has been in rural areas, where its speed and economy are a great improvement over the old horse-drawn vehicle. As a result, in the Census of 1931 every second farm reported a farm-owned motor vehicle (1.96 farms per farm-owned motor vehicle). This widespread rural ownership of automobiles has resulted in the improvement of secondary rural roads.

The table of road mileages, p. 672, includes all roads under provincial jurisdiction and local roads in the Maritime Provinces and Ontario and estimates of local roads in the four western provinces. There are great stretches of country in the northern portions of Quebec, Ontario, the Prairie Provinces, and British Columbia with very few people and very few roads, but the southern portions are well supplied. The Trans-Canada Highway is now under construction, running from the Atlantic to the Pacific oceans entirely in Canadian territory.

A start has been made on the compilation of statistics of urban streets. For 1936 the mileage reported was 11,662, of which 2,340 was asphalt, 2,387 was gravel and crushed stone surface, and 3,054 was unsurfaced. The remaining 3,881 miles was water-bound macadam, bituminous and other surfaces. These statistics do not include all urban streets, but places not included would increase the totals very little.

## 1.—Classification of Canadian Highways, by Provinces, 1936.

| Province.          | Year Ended—   | Earth.         | Gravel and Stone. | Water-Bound Macadam. | Portland Cement Concrete. | Bituminous Macadam. | Bituminous Concrete. | Asphalt.   | Total.         |

<sup>1</sup> None reported.

<sup>2</sup> Includes 839 miles of oil-treated gravel and stone and 400 miles of other surface.

## Subsection 2.—Motor Vehicles.

**Registration.**—The increase in the use of motor vehicles in Canada has been very rapid; this is shown by the statistics of Table 2. In Table 3 the numbers of motor vehicles registered in 1935 and 1936 are given by provinces, classified as passenger cars, commercial cars or trucks, motor buses, and motor cycles.

The average population per vehicle registered was 8.9 in 1936. Canada ranked fourth in this respect, the United States being first with 4.5. On the basis of the total registration of 1,240,124, only four countries had larger numbers in 1936, viz., United States, United Kingdom, France, and Germany.

## 2.—Numbers of Motor Vehicles Registered in Canada, by Provinces, calendar years 1920-36.

**NOTE.**—Registrations given here include passenger cars, trucks, buses, motor cycles, service cars, etc., but not trailers or dealers' licences. Registrations in Yukon are included in the total for Canada. Figures for the years 1904-19 were given at p. 668 of the 1937 Year Book.

<sup>1</sup> Includes taxicabs.<sup>2</sup> Includes tractors, road machines, flushers, municipal fire engines, etc.

**Apparent Consumption of Automobiles in Canada.**—The apparent consumption of automobiles in Canada in any year may be computed by deducting the number exported from the sum of the production and imports. Prior to 1925 the figures of apparent consumption do not show a pronounced trend but between 1925 and 1929 they increased substantially. From 1929 to 1932 the decrease was rapid and continuous but was practically halted in 1933, in which year production showed some improvement but mainly on account of the export demand. In 1936 the apparent consumption showed an increase of 3.4 p.c. over the figure for 1935.

## 4.—Apparent Consumption of Automobiles in Canada, 1917-36.

| Year.     | Production. | Imports. | Total Supply. | Exports. | Re-Exports. | Total Exports. | Apparent Consumption. |

### Section 3.—Finances of Road Transportation.

The cost of road transportation to the people of Canada might be summarized under the following headings: expenditures on roads and highways; expenditures of individuals and corporations upon owned motor vehicles; and expenditures for freight and passenger services rendered by motor vehicle public carriers such as taxi, bus, and motor transport companies. Since expenditures on roads and highways are made almost entirely by governmental bodies, fairly complete statistics are available regarding them, but, owing to the tremendous number of individuals and organizations which would have to be canvassed, no statistics are available regarding expenditures under the other two headings. By applying theoretical unit values to the automobiles registered, an estimate may be obtained of their total present value, which for 1936 was \$416,000,000.

The annual expenditure for the purchase of new motor vehicles is given for the year 1930 and since 1932 in the chapter on Internal Trade at p. 627. Unfortunately, this series as yet covers only a few years, several of which were years of depression, so that its significance will increase with a longer and more representative period. The retail value of new cars sold in 1932 was \$45,261,000, while in 1937 it had risen to \$148,486,000. The average for the seven years, 1930 and 1932-37, was \$93,795,000.

Some indication of the annual expenditures for the servicing of motor vehicles may be obtained from the statistics of retail merchandising appearing on pp. 626-627. Sales of gasoline are given on p. 678. No statistics are available regarding the earnings of motor transport and bus companies.

**Expenditures on Roads and Highways.**—Roads in Canada, except in the Territories and the National Parks are under the jurisdiction of provincial and municipal authorities. Unfortunately, there are no comprehensive or comparable statistics available regarding expenditures prior to 1928. Expenditures by the Dominion Government, outside of the National Parks, have taken the form of subsidies to the provinces for specific highways and have been made under the Canada Highways Act, 1919, (see p. 669 of the 1929 Year Book) largely in the few years immediately after the War and under relief legislation during the depression, to aid in providing useful employment. The present report includes expenditures on roads in the National Parks by the Dominion Government, also those on road construction work undertaken through the Department of National Defence to relieve unemployment in the western provinces. These expenditures, direct and as road subsidies, are shown in Table 5. The net expenditures here are the expenditures less subsidies received or collectable. They cover only national and provincial highways, secondary highways and other important roads to which the Provincial Governments contribute, together with the bridges or ferries necessary to such highways. The figures do not include expenditures on roads or streets within urban municipalities nor expenditures by rural municipalities on local roads to which no contribution is made by the Provincial Governments. Although the record of expenditures on roads by municipalities is incomplete, the expensive roads to construct and maintain are under provincial jurisdiction, so that only a small percentage of the total expenditures is omitted. In the Maritime Provinces all road expenditures are made by the Provincial Governments.

In accordance with an agreement of the Conference of British Commonwealth Statisticians, which met in Ottawa in 1935, an effort was made to collect statistics regarding urban streets and roadways beginning with 1935. The resulting statistics

appear in an appendix to the report "The Highway and Motor Vehicle in Canada", issued by the Bureau of Statistics. As these first results are considered preliminary, they are not included in the table. The total for 1936 was \$11,363,566, of which \$3,056,209 was for new construction and major improvements.

5.—Capital, Maintenance and General Expenditures on Provincial Highways or Provincially Subsidized Highways in Canada, calendar years 1932-36.

<sup>1</sup> No report on 1935 basis.

<sup>2</sup> Total expenditures divided between construction, maintenance, and general.

<sup>3</sup> None reported.

<sup>4</sup> Does not include Prince Edward Island.

Provincial Funded Debt Incurred for Highways.—Table 6 shows the funded debts of the provinces incurred for highway development. These amounts should not be confused with estimates of the total investment in highways. The

cost of constructing a new road is considerably greater than that of putting a permanent surface on an old road; the latter has been the purpose of much of the provincial expenditure.

#### 6.—Provincial Government Funded Highway Debt and Annual Charges Thereon, 1934-36.

NOTE.—Provincial Governments report for years ended at various dates. The figures given here are for the reported years approximating most nearly to the calendar year stated.

<sup>1</sup> 1934 data.

**Provincial Government Revenue.**—The taxation of motor vehicles, garages, chauffeurs, etc., is becoming a lucrative source of Provincial Government income. In every province the following licences or permits, duly issued by the provincial authorities, are required: motor vehicles of all kinds, trailers (in all provinces except Alberta), operators or drivers, paid chauffeurs, dealers, garages, and gasoline and service stations. A sales tax on gasoline is also levied by each province. The following table shows the provincial revenue for the years 1935 and 1936, indicating, at the same time, the more important sources from which it is derived. Dominion Government revenues from import duties, excise, and sales taxes are not included.

#### 7.—Provincial Revenues from the Taxation of the Distribution and Operation of Motor Vehicles, calendar years 1935 and 1936.

NOTE.—See the headnote to Table 6.

### Section 4.—Road Traffic.

Up to the present the motor vehicle has affected passenger traffic more than freight traffic of the steam and electric railways. This diversion of passenger traffic has been effected largely by the private automobile, although the motor bus is rapidly becoming more important and now operates between all large centres. The motor truck also carries a considerable amount of freight, although no statistics showing the tonnage handled are as yet available. The difficulties of collecting statistics from the very large number of unorganized operators concerned are obvious.

Widely differing opinions are held regarding the extent to which the motor vehicle has cut into railway traffic.\* A definite conclusion cannot be reached until reliable statistics regarding motor vehicle traffic are available. While undoubtedly the passenger motor vehicle now carries a certain amount of passenger traffic which would otherwise be carried by steam or electric railways, the error should be avoided of considering all the passenger movement by motor vehicles as a loss to the railways. Much of that movement is due to the convenience and cheapness of motor vehicle travel and would not take place at all under less favourable circumstances.

Similar considerations apply also, though less importantly, to freight moved by motor trucks. Part of the short-haul truck traffic has displaced the horse-drawn vehicle rather than the railway. Furthermore, traffic diverted from the railways to motor vehicles has been offset to some extent by new traffic for the railways created by the automobile industry, consisting of raw and finished products of manufacture, motor fuel and oil, and materials for construction and maintenance of roads suitable for motor travel.

On the other hand a phase of this new competition with railway transportation has been its effect on freight rates. The railway rate structure took into consideration the value of the goods handled, *i.e.*, bulk and low-value commodities were carried at relatively low rates, while manufactured and high-class commodities were at higher rates, the difference in rates having little relation to the difference in costs of transportation. Such a structure allowed raw materials to be moved

\* Counsel for the railways before the Transport Committee of the Senate of Canada, presented arguments showing a serious loss of revenue by the railways from motor vehicle competition. On the other hand, in *Automobile Facts and Figures, 1936*, published by the Automobile Manufacturers' Association, estimates of railway and motor traffic are given which, in the field of freight movement, rather minimize the seriousness of the motor truck competition, if conditions of motor traffic in Canada may be assumed to be similar to those of the United States.

cheaply and the railways were compensated by higher rates on the finished commodities. The motor truck is changing this; the motor truck operator carries these high-class commodities at rates closer to actual costs and does not attempt to carry raw materials except in special cases. His costs are reduced by a right-of-way being supplied for which he pays only a part of the cost and, if his rates are much above the actual cost, the manufacturer can quite easily supply his own transportation. Some branch lines of the railways are practically deserted except for a short time each year when snow interferes with motor vehicle operation. Consequently, railway losses include both losses from freight diverted and also from reductions in rates for high-class freight in attempts to retain such traffic without compensating increases in low-class freight rates.

**Gasolene Consumption.**—All provinces require retail sales of gasolene to be reported and a tax is imposed on all gasolene consumed by motor vehicles using the highways and streets and also on that used for an increasing number of other purposes. The taxable gasolene is, however, still largely consumed by motor vehicles and indicates in a general way the increase or decrease in the use of motor vehicles. Net sales are the differences between the total or gross sales reported and the quantities on which the tax is refunded in whole or in part, or on which the tax is not imposed at the time of sale.

8.—Sales of Gasolene in Canada, by Provinces, calendar years 1932-36.

**Motor Vehicle Accidents.**—Motorists are required to report accidents but comprehensive statistics are not available for all provinces. The Vital Statistics Branch of the Bureau of Statistics compiles statistics on all deaths from motor vehicle accidents and these are shown in Table 9. A direct comparison of such statistics between the provinces is of little value due to differences in size, population, motor vehicle density, etc., but, to put them on somewhat the same basis, the average number of deaths per 10,000 registered motor vehicles has also been tabulated. Although this treatment puts the data on a better footing than the absolute figures, it still gives no weight to differences in use of motor vehicles, differences in climate, roads, tourist cars, etc., all of which are factors in accidents.

Table 10 shows the numbers of persons killed or injured in automobile accidents as reported by the motor vehicle branches of the Provincial Governments. It is quite possible that the latter reported some persons as injured who subsequently died from the injuries and these would be included in the fatalities of the vital statistics shown in Table 9; also accidents might occur late in December and resulting deaths might be charged to December by the provincial authorities but to January of the next year in the vital statistics. Consequently, these data do not agree.

## 9.—Deaths Resulting from Motor Vehicle Accidents in Canada, by Provinces, calendar years 1926-36.

NOTE.—Statistics in this table are compiled by the Vital Statistics Branch, Dominion Bureau of Statistics.

| Year.              | P.E. Island. | Nova Scotia. | New Brunswick. | Quebec. | Ontario. | Manitoba. | Saskatchewan. | Alberta. | British Columbia. | Total. |

<sup>1</sup> For the period Mar. 1 to Dec. 31, 1936. <sup>2</sup> Not reported. <sup>3</sup> This figure is incomplete. See footnote 2. <sup>4</sup> Not distributed. <sup>5</sup> This figure is incomplete. See previous footnotes.

#### PART IV.—WATERWAYS.\*

Under this heading the statistics relating to shipping, aids to navigations, canals, and harbours are brought together because they are all essential and integral parts of the facilities for water-borne traffic; these facilities work together to promote the expeditious handling of the same freight without transshipment intervening. Under this form of treatment all the facilities for water-borne traffic are first presented, then the cost of other available financial statistics and, finally, figures which give some indication of the traffic handled. The general aim is to present a rounded picture of water transportation, rather than details of the activities of Government Departments dealing with certain phases of it. Legislation regarding all phases of shipping has now been consolidated under the Canada Shipping Act.

**The Canada Shipping Act.**—The Parliament of Canada, since the passage of the Statute of Westminster in 1931, has exercised full responsibility for the regulation of Canadian shipping. Previously certain phases of Canadian shipping business were regulated by the provisions of the Imperial Merchant Shipping Acts. The Parliament of Canada may now repeal sections of the Imperial Statutes, so far as they relate to Canada, if it so desires, and re-enact their provisions or substitute other provisions in lieu thereof.

The shipping legislation of Canada was remodelled in 1934 by the Canada Shipping Act, c. 44 of the Statutes of that year, and was brought more into conformity with present developments. The Act incorporates important provisions of certain international conventions including the Safety of Life at Sea Convention; the Load Line Convention; the International Convention Concerning Seamen's Articles of Agreement; and the International Convention Concerning Repatriation of Seamen. This comprehensive piece of legislation was, in fact, the incorporation into the shipping law of Canada of features of International, British, and previous

\* Information and statistics dealing with the indicated subject have been supplied as follows: aids to navigation, harbours, administrative services, and Government merchant marine, by the Department of Transport; shipping, by the Department of National Revenue; graving docks and part of the financial statistics, by the Department of Public Works; Panama Canal, by the Governor of the Panama Canal Zone; and other canal traffic, by the Transportation and Public Utilities Branch, Dominion Bureau of Statistics.

Canadian legislation which now properly come under Dominion authority, and is framed so as to be in conformity with similar Acts of the Imperial Parliament and other Dominions.

The Act is administered by the Minister of Marine (except as regards Part V, which governs the health and hospitalization of mariners) and deals in 16 parts with the regulations of coasting and inland, as well as ocean, shipping.

Part I deals with the conditions governing the recording and the registering of vessels.

Part II of the Act deals in detail with the proper certification of masters, mates, and engineers of all except certain smaller vessels.

Part III is concerned with the engagement and discharge of seamen and the facilities to be provided by shipping masters for this purpose, as well as for the making of apprenticeships to the sea service. The payment of wages to seamen, and the rights of seamen in respect thereto, are dealt with in Secs. 184-214. The remainder of this Part is concerned with various protective measures for the employment and welfare of seamen.

Part IV lays down provisions for the relief and repatriation of distressed seamen.

Part V governs the treatment of sick mariners and the establishment of marine hospitals. This Part of the Act is to be administered by the Minister named by the Governor in Council.

Part VI treats of pilotage, defines the pilotage districts and allows for the constitution of pilotage authorities and the creation of new districts. The duties and powers of pilotage authorities are laid down and the requirements with regard to the payment of pilotage dues.

Part VII has reference to the safety of shipping, which is ensured through a properly appointed and competent steamship inspection service. Penalties are provided against the overloading of passenger ships, safety precautions are laid down, and the installation of radio equipment made compulsory on all passenger ships and other ships of 1,600 tons gross and upwards registered in Canada. Regulations governing the inspection of radiotelegraph apparatus and the qualification of radio operators are described. Elaborate provisions are made regarding load lines and loading as these matters refer to different classes of ships registered in Canada or not registered in Canada.

Part VIII treats of wrecks, salvage and investigations into shipping casualties. An official Receiver of Wrecks, or, in his absence, the Chief Officer of Customs, or the agent of the Department of Marine, shall have power to take command of a wreck in his district and assign duties to each and all persons present, for the preservation of the vessel and lives of shipwrecked persons. Important further powers of Receivers of Wrecks are also enumerated. All wrecks (including aircraft) shall be delivered to the Receiver as soon as possible by any person taking possession. Conditions governing disposition of wrecks, of procedure in salvage and inquiries into casualties are laid down.

Part IX deals with safeguards to navigation—lighthouses, buoys, beacons—and the government of Sable island.

Parts X and XI govern the creation and extension of Public Harbours, the appointment of Harbour Masters and Port Wardens.

Part XII lays down the rules, regulations and orders regarding collisions and limitation of liability of owners.

Parts XIII-XVI are taken up with matters pertaining to the coasting trade, delivery of goods, legal proceedings, etc.

Appended to the Act are twelve schedules, the first six set out the text of certain international conventions which have been incorporated to a large extent in the Act and which are referred to in the definition section and in other sections of the Act. The other schedules are forms which are used in connection with the administration of the Act.

### Section 1.—Equipment and Facilities.

The developments and equipment to facilitate water traffic are classified under the sub-headings of shipping, aids to navigation and miscellaneous works, canals, and harbours. A subsection is added giving figures of administrative activities regarding the pilotage service, steamship inspection, personnel, and accidents to shipping.

#### Subsection 1.—Shipping.

Although a large part of the water-borne traffic, especially inland and coast-wise, is carried in ships of Canadian registry, the commerce of the Dominion is by no means entirely dependent upon Canadian shipping since all waterways, including canals, and inland lakes and rivers, are open upon equal terms, except in the case of the coasting trade, to the shipping of all countries of the world.

**Canadian Registry.**—Statistics are given below showing the numbers and tonnages of vessels on the Registry of Shipping of Canada, and of vessels built in Canada and vessels sold to other countries. As is found by reference to Part I of the Canada Shipping Act, every ship that falls under the definition of 'British ship' given in Sec. 6 of the Act and is controlled, as to management and use, in Canada, must, unless registered elsewhere in the Empire, be registered in Canada. An exception is made in the case of ships not exceeding 10 tons register and engaged solely in coastal or inland navigation. A ship (whatever her qualification for British registry) which is not registered in any part of His Majesty's dominions, is not entitled to the privileges accorded to British ships. Vessels about to be built *may* be recorded, and vessels being built or equipped *must* be recorded, by a registrar of British ships under the Act. The procedure for the registration in Canada of British ships and the issuance of certificates is covered in Secs. 9-36. Secs. 64-70 govern the registry of alterations (or the registering anew if such be required) and lay down penalties for non-compliance with the requirements. The conditions governing transfer of registry are also laid down.

For a record of the number and tonnage of ships engaged in the carrying trade of Canada, see the tables under Section 3 (pp. 698-702) of this Part of the chapter. The tables are included there under traffic statistics because they relate more directly to traffic and services than merely to the shipping available. For an account of the shipping services operated by the Dominion Government, see p. 696.

## 1.—Numbers and Net Tonnages of Vessels on the Registry of Shipping of Canada, by Provinces, Dec. 31, 1927-36.

NOTE.—The figures in this table are supplied by the Department of Transport.

### Subsection 2.—Aids to Navigation and Miscellaneous Works.

Included under this heading are the lighthouses and the whole system of marine danger signals on the east and west coasts of Canada, on Hudson bay and strait, the St. Lawrence river and gulf, the inland rivers and lakes and at the entrances to harbours—a very extensive system designed to provide safe navigation in all Canadian waters. In addition, a pilotage service is maintained in waters where navigation is difficult; this service is described under administrative services on p. 688. As a further aid to safe navigation, there are chains of radio signal and direction-finding stations which are described under that section of this chapter dealing with radiotelegraphy, on pp. 727-729.

### 3.—Comparative Statement of Marine Danger Signals, fiscal years ended Mar. 31, 1926-37.

NOTE.—In addition to the aids to navigation listed in the following table, approximately 9,268 unlighted buoys, ballies, dolphins, and beacons are maintained. The figures are supplied by the Department of Transport.

A great deal has been done to improve navigable waters by dredging in channels and harbours, by the removal of obstructions, and by the building of remedial works to maintain or control water levels. Probably the largest task of this nature has been the St. Lawrence River Ship Channel. An extensive floating plant is in service to maintain and improve the deep-water channel from Montreal to the sea for ocean-going shipping. Incidental to these developments of navigable waters are works to guard shore lines and prevent erosion, and also the control of roads and bridges which cross navigable channels. In order to prolong the season of navigation in important waters which freeze over in winter, ice-breaking operations are carried on at both the beginning and end of winter. This is particularly the case in connection with sea-going shipping from Montreal.

#### 4.—Duration of the Season of Open Navigation in the St. Lawrence Ship Channel, calendar years 1911-37.

NOTE.—For the years 1882-1910, see Canada Year Book, 1934-35, p. 756.

<sup>1</sup> "Channel open" means it can be navigated although there may be floating ice still in the river.

#### Subsection 3.—Canals.

Before the period of extensive railway construction which commenced for Canada in the 1850's, the water routes, more especially the St. Lawrence, the Great Lakes and the Ottawa, were the chief avenues of transportation. These routes were interrupted at certain points, necessitating portages, and to eliminate the toil of unloading, transporting and reloading at the portages the canals of Canada were constructed.

The earliest mention of canals in Canada is in connection with the Lachine canal, begun by early French settlers in 1700, but only after the conquest of Canada by the British were improvements of the main water routes made, and in the early part of the 19th century increased internal and foreign trade and the introduction of steam navigation resulted in more attention being given to this work. Although some of the early canals were constructed primarily for military purposes they soon became essential to the commercial life of the country. However, since the development of railways in Canada, and even more since the growth of motor vehicle traffic, the canals, with the exception of those on the Great Lakes and St. Lawrence river, are playing a minor part in the transportation activities of the country.

There are in Canada six canal systems, under the control of the Dominion Department of Transport, which are connected with the Atlantic ocean by navigable routes, in addition to a number of other minor locks and canals, under the control of the Dominion Department of Public Works or other authority, to facilitate local navigation on disconnected lakes and rivers. The six main systems consist of the canals: (1) between Port Arthur or Fort William and Montreal; (2) from Montreal to the International Boundary near lake Champlain; (3) from Montreal to Ottawa; (4) from Ottawa to Kingston and Perth; (5) from Trenton, lake Ontario, to lake Huron (not completed); and (6) from the Atlantic ocean to Bras d'Or lakes, Cape Breton. By means of these canals, total waterways of 1,890 miles have been opened to navigation, the actual mileage of canals being 508-67.

A detailed description of the individual canals was given on pp. 626-629 of the 1926 Year Book. Summary statistics of their length and lock dimensions are given in Table 5.

## Subsection 4.—Harbours.

Water transportation cannot be studied with any degree of completeness without taking into consideration the co-ordination of land and water transportation at many of the seaboard and inland ports. Much equipment designed to facilitate interchange movements is provided by the harbours. This harbour equipment includes the necessary docks and wharves, some for passenger traffic but most of them for freight, warehouses for the handling of general cargo, and special equipment for such bulk freight as lumber, coal, oil, grain, etc. Equipment may include cold storage, harbour railway and switching connections, grain elevators, coal bunkers, oil storage tanks, and, in the main harbours, dry-dock accommodation.

Eight of the principal harbours of Canada are under the administration of the National Harbours Board, as explained below. Some other harbours are administered by commissions which include municipal as well as Dominion Government appointees, while the remainder are administered by harbour masters directly under the authority of the Department of Transport.

In addition to the harbour facilities owned by the National Harbours Board or other operating commission, at most ports there are dock and handling facilities owned by private companies such as railways, pulp and paper, oil, and sugar industries, etc. At a number of ports there are also graving docks which are dealt with separately below.

It is not possible at present to compile comparable representative statistics regarding the equipment of the leading ports of Canada but with the consolidation of control under the Department of Transport, such statistics should be available in the near future.

**National Harbours Board.**—Prior to October, 1935, the seven national harbours of Canada—Halifax, Saint John, Chicoutimi, Quebec, Three Rivers, Montreal, and Vancouver—were under the management and control of separate Harbour Commissions, each consisting of three persons appointed from the immediate locality. Orders in Council were passed on Oct. 31, 1935, accepting the resignations of the individual Harbour Commissions, and other Orders in Council passed as of the same date vesting in a single Board of three Harbour Commissioners the powers and responsibilities inherent in each of the seven former commissions. In this way effect was given to the more important recommendations of Sir Alexander Gibb, following his survey of national ports in 1931.

During the 1936 session of Parliament, the individual Acts relating to the administration of these ports were repealed and a single uniform Act (c. 42) substituted, placing the general direction and control of the national ports referred to under a single National Harbours Board, leaving the local administration in the hands of a port manager responsible to the Board. This legislation became effective on Oct. 1, 1936. An Order in Council was passed Feb. 27, 1937, transferring Churchill harbour (including the grain elevator) as well as grain elevators at Prescott and Port Colborne, to the National Harbours Board for administration, management and control.

The headquarters of the National Harbours Board is at Ottawa, and, under the Minister of Transport, the Board is now responsible for the administration, maintenance, and control of the eight ports and two grain elevators referred to, as well as any other harbour property which the Governor in Council may transfer to the Board for administration. Engineering works, heretofore under the direction of small local staffs, are now looked after by the departmental engineering services, while local direction devolves upon competent port managers with a proper background of experience. The financial control of each port is under the direction of the Comptroller of the Treasury and subject to audit by the Auditor General of Canada. Accounting for each port is, however, to be carried out at the port, and funds earned at one port will not be diverted for use elsewhere.

**Public Harbours and Harbour Masters.**—In the smaller ports, the Governor in Council, as formerly, may create public harbours by proclamation, as provided by Part X of the Canada Shipping Act (c. 44, 1934), and the Minister of Transport may, from time to time, appoint harbour masters for these smaller ports, who will administer the same under rules and regulations approved by the Governor in Council. Remuneration of these harbour masters will be from fees levied on vessels under the terms of the Act.

**Graving Docks.**—The Department of Public Works of the Dominion Government has constructed five dry docks, which are shown in Table 6. The dock at Kingston, Ont., is under lease to the Kingston Shipbuilding Company, while the

old Esquimalt Dry Dock was temporarily transferred to the Department of National Defence on Nov. 1, 1934. This transfer is to be effective until such time as the dock is commercially required, when it will be returned to the control of the Department of Public Works. The large dry docks at Lauzon, Que., and Esquimalt, B.C., can be divided into two parts and were built at a cost of approximately \$3,850,000 each. Under the Dry Dock Subsidies Act, 1910 (9-10 Edw. VII, c. 17), several docks have been subsidized by payments of 3 to 4 p.c. per annum on the original cost for a given number of years, as shown in Table 7.

#### 6.—Dimensions of Graving Docks Owned by the Dominion Government.

| Port Arthur, Ont. ....   | 708-3   | 77-6   | 16-2             | 1,255,050   | 3 p.c. for 20 years.  |
| Montreal, Que. (floating dock), <i>Duke of Connaught</i> ..... | 601     | 100    | 31-5             | 3,000,000   | 3½ p.c. for 35 years. |
| Prince Rupert, B.C. (floating dock).....                       | 600     | 100    | 32               | 2,199,168   | 3½ p.c. for 35 years. |
| Saint John, N.B. ....  | 1,164-5 | 133    | 40               | 5,500,000   | 4½ p.c. for 35 years. |
| North Vancouver, B.C. (floating dock).....                     | 556-5   | 98     | 28               | 2,500,000   | 4½ p.c. for 35 years. |

<sup>1</sup> Subsidy payments on these two dry docks have been completed.

#### Subsection 5.—Government Administrative Services.

The services covered by this subsection are those dealing with the pilotage service, steamship inspection, sea-faring personnel, and accidents to shipping.

**Pilotage.**—This service functions under the provisions set forth in Part VI of the Canada Shipping Act (c. 44, 1934). The necessity for pilots is that qualified men may offer their services to the stranger in local and confined waters. At the same time, pilotage might also be considered as a method of insurance—the fewer accidents, the cheaper insurance rates will be.

There are 40 pilotage districts in Canada, eight of which, namely, Sydney, Halifax, Saint John, Quebec, Montreal, St. Lawrence-Kingston-Ottawa, British Columbia, and Churchill, are under the Minister of Transport as Pilotage Authority. The Pilotage District of New Westminster, B.C., is under a local authority. The other districts function under local Pilotage Authorities appointed by the Governor in Council under the provisions of the Canada Shipping Act (see p. 681).

The following statement shows the number and aggregate tonnage of ships using pilots for our major Canadian ports during the year ended Mar. 31, 1937. Corresponding statistics are not available for the St. Lawrence-Kingston-Ottawa District.

## DETAILS OF PILOTAGE, BY DISTRICTS, FISCAL YEAR ENDED MAR. 31, 1937.

| District.             | Pilots. | Ships<br>Piloted in<br>and out. | Net<br>Tonnage. |
|-----------------------|---------|---------------------------------|-----------------|
|                       | No.     | No.                             |                 |
| Sydney.....           | 15      | 2,238                           | 2,566,588       |
| Halifax.....          | 21      | 2,185                           | 7,340,044       |
| Saint John.....       | 12      | 800                             | 2,620,362       |
| Quebec.....           | 58      | 3,888                           | 13,996,541      |
| Montreal.....         | 77      | 5,757                           | 14,553,619      |
| Churchill.....        | 2       | 30                              | 91,110          |
| British Columbia..... | 35      | 3,953                           | 15,594,831      |
| New Westminster.....  | 7       | 502                             | 1,759,798       |

**Steamboat Inspection.**—The Steamboat Inspection Service of Canada, maintained under the authority of the Department of Transport, comprises the Board of Steamboat Inspection, together with staffs of inspectors at the principal ocean and inland ports. The Board decides on the standards required of all vessels coming under its jurisdiction. These must be attained by all ships given official warrant as to their seaworthiness and mechanical condition. Regulations for the issue of safety certificates under the International Convention for the Safety of Life at Sea were approved by Order in Council of Oct. 18, 1934, and are now being administered by the Board.

The Board is also responsible for the examinations for competency of marine engineers, and grants certificates of competency to successful candidates.

## 8.—Steamboat Inspection, by Inspection Divisions, fiscal years ended Mar. 31, 1936 and 1937.

| Year and Division. | Vessels Inspected.                           |                |  |                | Vessels Not Inspected. |                |
|--------------------|--|----------------|--|----------------|------------------------|----------------|

**Wrecks and Casualties.**—The figures of Table 10, supplied by the Department of Transport, apply to vessels of every nationality in respect of wrecks and casualties in Canadian waters, and to Canadian vessels in respect of wrecks and casualties in other waters. The returns in some years cover wrecks and casualties of previous years.

## 10.—Canadian Wrecks and Casualties, 1911-26.

NOTE.—For details of the years 1870-1910, see Canada Year Book, 1911, p. 381.

<sup>1</sup> Includes 1,042 lives lost in the *Empress of Ireland* disaster.<sup>2</sup> Years ended June 30 for 1917 and earlier years.<sup>3</sup> Excluding damage to cargo estimated at \$4,310,350.<sup>4</sup> Years ended Dec. 31 for 1918 and subsequent years.<sup>5</sup> Includes 323 lives lost in the *Princess Sophia* disaster.

## Section 2.—Financial Statistics of Waterways.

The principal statistics available to aid in making an appraisal of the cost of water-borne traffic consist of the record of public expenditures on waterways. Such expenditures are classified as investments which are shown in Table 11, and as annual expenditures for maintenance and operation, shown in Table 12, which are partly balanced by the revenues shown in Table 13. Undoubtedly, in so far as capital expenditures for the permanent improvement of waterways are concerned, those of the Dominion Government cover the major part. There has been some expenditure by municipalities on local harbour facilities, while private capital expenditure is also confined almost entirely to terminal or dockage facilities. The investment in shipping, however, with the exception of the Canadian National (West Indies) Steamships, as shown at p. 696, has come almost entirely from private sources such as railway companies, steamship companies, industrial corporations, and private individuals. No figures are available regarding private investments in shipping except those appearing in the reports of the operating companies which cover only a portion of the field. Neither are there statistics showing the revenues of ship operators from passenger and freight traffic. In the case of railways, statistics show fairly completely: (1) the investment in plant, roadbed, etc.; (2) the revenues of the railways or the annual payment by the people of Canada for the passenger and freight transportation; and (3) the annual deficits which are also indirectly paid by the public whether as investors or taxpayers. No such picture can be given for water-borne traffic.

**Capital and Operation Expenditures.**—In the following statement of investments by the Dominion Government, no amounts have been written off as a result of the destruction or abandonment of property such as the first, second, and third Welland canals and the Port Nelson terminal. Neither have the capital expenditures been reduced by allowances for depreciation.

The classification as between capital and operation expenditure is very difficult to make with respect to some items and cannot be regarded as minutely exact for the long period. This difficulty applies particularly in the case of dredging where the distinction between the removal of accumulating silt and the deepening of a channel is largely one of opinion. For this reason the dredging account of the Department of Public Works is not included in the total investments of Table 11, but is given at the end of the table since a large part of the work has been undoubtedly of the nature of a permanent improvement. This dredging account does not, how-

ever, include the total expenditures for dredging as some dredging expenditures have been distributed with other items. Both capital and operation costs include expenditures by the former Departments of Marine and of Railways and Canals, now the Department of Transport, and by the Department of Public Works.

# 11.—Capital Expenditures of the Dominion Government<sup>1</sup> on Waterways and Harbours to Mar. 31, 1937.

NOTE.—The dredging expenditures by the Department of Public Works shown separately at the end of this table cannot be accurately divided between capital and maintenance expenditures. However, since they have been largely for permanent improvements, they are shown here but are not included in the grand totals of capital expenditure. Other dredging expenditures are included in the various items.

<sup>1</sup> Included with Chambly canal.

<sup>2</sup> Included with Hudson Bay Railway.

**Shipping Subsidies.**—The information given in the following table formerly appeared under the part of this chapter dealing with the Post Office but is now shown here because these subsidies are granted to assure the required steamship services rather than for the mere carriage of mails.

## 14.—Mail Subsidies and Steamship Subventions, fiscal years ended Mar. 31, 1935-37.

NOTE.—The figures in the following table were supplied by F. E. Bawden, Director of Steamship Subsidies, Department of Trade and Commerce. Such data appear annually in the annual report of the Auditor General and represent the amounts paid in connection with contracts made under statutory authority by the Department of Trade and Commerce for trade services, including the conveyance of mails.

#### Merchant Marine Services Operated by the Canadian Government.

**Canadian Government Merchant Marine.**—The circumstances under which the Canadian Government became possessed of and responsible for the operations of a merchant marine are explained on p. 776 of the 1934-35 Year Book.

This merchant fleet reached its greatest development in 1924 and at Dec. 31 of that year numbered 57 vessels of a total deadweight tonnage of 353,450, representing an original capital investment of \$79,661,921. On June 8, 1936, the 10 remaining vessels were disposed of for a consideration of \$389,444. A table showing the operating results from 1919 to 1936 appeared at p. 689 of the 1937 Year Book.

**Canadian National (West Indies) Steamships.**—In conformity with the Canada-West Indies Trade Agreement Act of 1926 (16-17 Geo. V, c. 16), the Dominion Government has provided direct steamship services to the West Indies through the medium of Canadian National (West Indies) Steamships, Ltd. The service is provided by a fleet of eleven vessels of a total deadweight tonnage of 62,486. Five of these boats, known as the 'Lady' ships, were specially constructed for passenger service on this route, while the remaining six vessels previously formed part of the Canadian Government Merchant Marine fleet, and were taken over by the Canadian National (West Indies) Steamships, Ltd., for operating purposes, under entrusting agreements with the respective companies which owned the ships. The investment in vessels at Dec. 31, 1936, amounted to \$10,942,896, mainly made up of the construction cost of the 'Lady' ships and the present-day valuation of the other six ships, together with the cost of conversion for use in the West Indies service of three of the latter. The financial results of the operations of the Canadian National (West Indies) Steamships, Ltd., have been as follows:—

| Calendar Year. | Operating<br>Revenues. | Operating<br>Expenses. | Operating<br>Net. | Depreci-<br>ation. | Interest. | Book<br>Loss. |
|----------------|------------------------|------------------------|-------------------|--------------------|-----------|---------------|

### Section 3.—Water Traffic and Services.

Complete statistics, comparable to those given for the railways, showing all the freight carried by water, are not available. Indeed it would be very difficult to obtain a record of the traffic handled by small independent coasting vessels. However, there is a record of the number and tonnage of ships calling at all ports and of all the cargoes which pass through the canals.

#### Subsection 1.—Shipping.

Canadian shipping may be divided into three classes: (1) ocean or sea-going shipping; (2) inland or rivers and lakes international shipping (exclusive of ferrage); and (3) coasting trade or coastwise shipping. Ocean shipping covers the sea-going vessels arriving or departing from Atlantic and Pacific Coast ports, including St. Lawrence River ports up to Montreal. Inland international shipping is the term used to cover shipping between Canadian and United States ports on the Great Lakes and international rivers, and on lakes and rivers accessible to shipping from United States ports such as the Ottawa, Rideau, Trent, etc. (Ferrage is, however, excluded from this and other classes of shipping.) Coastwise shipping or the coasting trade covers shipping between one Canadian port and another on the Atlantic coast, on the Pacific coast, and on the inland international lakes and rivers or lakes and rivers accessible to them. It does not, however, include shipping on isolated Canadian waterways, such as the Mackenzie river, lake Winnipeg, lake St. John, etc.

**Ocean Shipping.**—Canadian ocean shipping dates back to the days of early European fishermen who frequented the shores of Newfoundland and the Maritime Provinces. Later on, exploration and settlement produced a larger volume of traffic. The first ocean-going vessels in Canada were probably built by Pont-Gravé, one of the first settlers in New France, and soon afterwards Talon and Hocquart, intendants of the colony, realizing the advantages offered by the timber resources available, gave ship-building every encouragement. Shipyards were established at Quebec and other points along the St. Lawrence, and these, together with later establishments in the Maritime Provinces and on the western coast, have formed the principal bases of Canadian shipping on the Atlantic and the Pacific.

Canadian shipping attained some prominence in the days of fast wooden sailing vessels, and also at a later date when steam power first came into use. In 1833, the *Royal William*, a Canadian ship built to ply between Quebec and Halifax, crossed the Atlantic from Pictou to London, and was the first vessel to navigate the Atlantic entirely under steam power. At the present time, in addition to other lines, the Canadian Pacific Railway operates fleets on the Atlantic and Pacific oceans, and the Dominion Government operates a fleet in the West Indies trade.

The following table has been compiled from the Shipping Reports of the Department of National Revenue for the individual fiscal years.

### 15.—Sea-Going Vessels Entered and Cleared at Canadian Ports with Cargo and in Ballast, fiscal years ended Mar. 31, 1911-37.

NOTE.—The figures in this table are compiled from Statement X of the Shipping Reports of the Department of National Revenue. For the years 1868-1910, see Canada Year Book, 1911, p. 379.

<sup>1</sup> Includes freight in both tons weight and tons measurement.

\* Not available.

**Inland Shipping.**—Inland shipping is associated in its beginnings with the birch-bark canoe of the American Indian. Later the *bateau* and Durham boat came into common use after the migration of the U.E. Loyalists. In the absence at that time of any roads to make land travel possible, the St. Lawrence river and the Great Lakes formed the main highway to the interior. The route from Montreal to the Upper Lakes was broken at three places—from Montreal to Kingston transportation was by *bateau* or Durham boat; from Kingston to Queenston schooners were used; then there was the portage road from Queenston to Chippawa and, finally, schooner again to the destination.

In 1809, the *Accommodation*, the first Canadian steamship, was built for the Hon. John Molson, to run between Montreal and Quebec. On lake Ontario, the *Frontenac* was used from 1817 on a weekly service between York and Prescott and, following this beginning, came a period of great activity in lake and river shipping. In 1845, the *Core* reached lake Huron by way of the Welland canal to carry on transport trade on the Upper Lakes, where previously there had not been enough traffic to support a large ship. Shipping on the Upper Lakes became brisker now, for there were settlers to be carried from Buffalo to the western United States and grain to be brought back. In this period Canadian shipping made its profit by carrying United States goods, for there was little traffic originating in the Canadian near-West.

Upon the advent of steam railways, water-borne traffic did not decrease but, on the contrary, increased, and at present the greater part of the western grain is shipped *via* the Great Lakes route to eastern ports. The iron ore and coal traffic between lake Superior and lake Erie is chiefly United States traffic and sometimes exceeds 80 million short tons in a year; the total traffic on these Upper Lakes alone is greater than that carried by all Canadian railways and about one-twelfth of that carried by all United States railways.

Totals of inland shipping are given for each fiscal year since 1923, and by provinces for the latest year, in Table 17, p. 702.

**Coasting Trade.**—This form of water-borne traffic has assumed great importance in Canada owing to the long coast lines on the Atlantic and Pacific oceans and along the Great Lakes and St. Lawrence River system. The movement of grain from Fort William and Port Arthur to Canadian ports on the Lower Lakes and to Montreal is one important factor in coastwise shipping. The registered tonnage of vessels engaged in the coastwise movement is shown for each fiscal year since 1923, and by provinces for the latest year, in Table 17.

**Shipping by Ports.**—The volume of shipping in the leading ports of the provinces of Canada is shown in Table 16. Details are given of the sea-going vessels, and of the total of all shipping (exclusive of ferriage) arrived at and departed from each port. In the fiscal year ended Mar. 31, 1937, the tonnage of sea-going vessels arriving at and departing from Vancouver exceeded that of any other port in Canada; Victoria was next, followed by Montreal and Halifax. In total shipping, which included coastwise and inland international as well as sea-going shipping, Vancouver was considerably in the lead, followed by Montreal, Victoria, and Halifax.

**16.—Numbers and Tonnages of Sea-Going and of All Vessels (Exclusive of Ferriage), Entered and Cleared at each Principal Canadian Port, fiscal year ended Mar. 31, 1937.**

NOTE.—For details of coastwise and inland international shipping at these ports and at all other ports of Canada, see the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1937.

<sup>1</sup> Since the ferry at Sarnia operates without a ferry permit, the "arrived" and "departed" figures for this port each include ferriage to the amount of 15,217 vessels and 1,678,272 tons register.

**Grand Total Shipping Trade.**—Statistics are given in Table 17 showing sea-going, inland international, coastwise and total vessels (exclusive of ferriage), entered and cleared at Canadian ports, by provinces, during the fiscal year ended Mar. 31, 1937, and totals for the fiscal years 1923 to 1937. It is noteworthy in this table that the volume of coastwise shipping is the greatest, while sea-going is next in tonnage. Both sea-going and coastwise shipping show marked expansion since 1923, although the effect of the depression is evident here also. Inland international shipping, on the other hand, has varied considerably and showed a more definite decrease during the depression. The total tonnage of shipping entered and cleared was greater for Ontario than for British Columbia in the fiscal year ended 1937. This was partly due to the fact that the great bulk of the inland international shipping was through Ontario ports, while there was also a large tonnage of coasting trade through these ports. It will be noted, however, from the footnotes to Tables 16 and 17 that a certain amount of ferriage, at Sarnia, is included in the Ontario figures. After making a deduction for this ferriage, the tonnage of total shipping in 1937 was slightly greater for British Columbia than for Ontario, after which came Quebec, Nova Scotia, and New Brunswick.

17.—Numbers and Tonnages of All Vessels (Exclusive of Ferriage). Entered and Cleared at Canadian Ports, 1923-37, With Details by Provinces for the fiscal year ended Mar. 31, 1937.

<sup>1</sup> The Ontario figures and the totals for Inland International and Total Shipping are inclusive of ferriage at Sarnia amounting in each case of "arrived" and "departed" to: 13,180 vessels and 1,415,012 tons for 1934; 13,444 vessels and 1,433,031 tons for 1935; 14,583 vessels and 1,620,820 tons for 1936; and 15,217 vessels and 1,678,272 tons for 1937. Corresponding deductions for earlier years are not available. (See also footnote 1 to Table 16.)

## Subsection 2.—Canal Traffic.

Since the canals of Canada are open to the vessels and traffic of all nations upon equal terms, United States traffic constitutes an important part of the total carried through certain canals, especially the Welland Ship Canal. This is shown in Tables 18 and 21. More complete details of the traffic through canals may be found in the annual report on Canal Statistics published by the Dominion Bureau of Statistics.

## 18.—Traffic through Canadian Canals, by Nationality of Vessels and Origin of Freight, navigation seasons 1911-37.

NOTE.—Figures include duplications where cargoes use two or more canals. For Canadian canal traffic from 1836 to 1899, see 1902 Year Book, p. 398, and for the figures of 1903-10, see the 1933 Year Book, p. 697.

<sup>1</sup> Includes a small percentage of vessels of other foreign countries.

<sup>2</sup> Third lock of United States

Sault Ste. Marie canal opened Oct. 21, 1914.

<sup>3</sup> Fourth lock of United States Sault Ste. Marie canal

opened Sept. 18, 1919.

## 19.—Tonnage of Canal Traffic, by Canals and Classes of Products, navigation seasons 1936 and 1937.

NOTE.—Figures include duplications where cargoes use two or more canals.

<sup>1</sup> Includes a small percentage of ports of other foreign countries.<sup>2</sup> Revised since the publication of the 1937 Year Book.

The canal traffic figures in the foregoing Tables, 18 to 21, include duplications where the same freight passes through two or more canals. Table 22 below eliminates most of this duplication for the St. Lawrence-Great Lakes system. Even in this analysis, however, grain traffic originating at Lake Superior ports and transhipped from Upper Lake to smaller boats at Port Colborne or other points on lakes Erie or Huron, is really a duplication although not appearing as such and is shown separately and deducted in the table. The elimination of duplications for Canadian canals only, is not feasible because both Canadian and United States vessels use the locks on both sides of the river at Sault Ste. Marie without the payment of tolls or other restrictions.

**22.—Freight Traffic Using the St. Lawrence River, Welland Ship, and Sault Ste. Marie Canals, navigation season of 1937.**

NOTE.—Excluding duplications.

<sup>1</sup> Includes both Canadian and United States canals at Sault Ste. Marie.

**The Panama Canal.\***—The Panama canal, which was opened to commercial traffic on Aug. 15, 1914, is a waterway which is destined to be of the greatest importance to the British Columbian ports, from which vessels now leave direct for Great Britain and European ports throughout the year. As an alternative route to that of the transcontinental railway lines, such a passage by water is of vital importance in the solution of the larger transportation problems of the continent, and while its influence is perhaps more potential than actual, such a check on transcontinental rail rates is a valuable one. During the War the great expectations based upon the opening of the canal were not realized, owing to the scarcity of shipping, but, with the post-war decline in ocean freight rates, an increase in traffic between our Pacific ports and Europe has taken place, and, while the proportion carried in vessels of Canadian registry is comparatively small, the cargo tonnage has nevertheless assumed considerable proportions.

Table 23 shows the amount of traffic originating in or destined for Canada carried through the canal. The greater importance of the route as one from Pacific to Atlantic ports is illustrated by the much larger volume of freight originating at western ports than at eastern ports, and the larger volume destined for eastern than for western Canadian ports. Strictly inter-coastal Canadian cargo during the latest year aggregated 119,939 long tons as compared with 119,577 long tons in 1936.

With respect to total traffic through the canal by nationality of vessels and cargo carried, vessels of United States registration carried 9,844,254 tons, or 35.0 p.c. of the total cargo of 28,108,375 loaded through in the fiscal year ended June 30, 1937. British vessels carried 7,179,136 tons, or 25.5 p.c.; Norwegian vessels 3,506,109 tons, or 12.5 p.c.; Japanese vessels 1,789,178 tons, or 6.4 p.c.; and German vessels 1,496,084 tons, or 5.3 p.c.

**Subsection 3.—Harbour Traffic.**

The freight movement through a large port takes a number of different forms. The overseas movement, *i.e.*, the freight loaded into or unloaded from sea-going vessels, frequently constitutes a surprisingly small part of the total. Usually the volume coming in and going out by coastwise vessels is larger. Then there is the 'in transit' movement in vessels which pass through the harbour without loading or unloading. Finally there is the movement from one point to another within the harbour, which in many ports amounts to a larger total than any of the other activities. With the consolidation of administrative activities in the Department of Transport, and the control of many of the leading ports in the National Harbours Board, traffic statistics for the seven harbours so administered are now obtainable from the Annual Reports of the Board. These harbours are Halifax, Saint John, Chicoutimi, Quebec, Three Rivers, Montreal, and Vancouver. There still exist divergencies of classification that render it difficult to compile a statement covering the total traffic for these seven harbours, and it is at present not possible to include the traffic of other ports not administered by the Board. Marked progress is noticeable since the Board was organized, however, and comparable basic summary statistics, even if not altogether comprehensive, will no doubt be evolved in the course of time.

## PART V.—AIR NAVIGATION.\*

Aircraft furnish a rapid and convenient means of transportation for passengers and supplies to remote and unsettled areas. The use of aircraft has made it possible to obtain accurate information for the development and conservation of natural resources in parts of Canada that would otherwise have been practically inaccessible. Air-mail and air-transportation lines and commercial services are increasing steadily in number and in the scope of their operations and usefulness.

The treatment of air navigation in this part of the Year Book is confined to civil aviation; the military activities and organizations are dealt with under National Defence (see "Air Service" in the Index). The subject is introduced with a section dealing with the history and administrative control of civil aviation and this is followed by sections on facilities and equipment, finances and employees, and traffic, along the lines of the treatment adopted in this chapter for other forms of transportation.

The collection and compilation of statistics of civil aviation was transferred from the Branch of the Controller of Civil Aviation to the Bureau of Statistics in 1936. To preserve continuity with aviation statistics published in previous Year Books, a statistical summary of civil aviation for the years 1932 to 1937 is given below in Table 1. The statistics collected since 1936 have been somewhat enlarged and consequently no comparisons with similar data for previous years can be made for items appearing in other tables of this Part.

\*Descriptive and administrative information has been prepared from material supplied by J. A. Wilson, Controller of Civil Aviation, Department of Transport, while statistics have been compiled by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics.

## 1.—Statistical Summary of Civil Aviation in Canada, 1932-37.

NOTE.—Figures for 1921-23 may be found at p. 616 of the 1924 edition of the Year Book, for 1924-29 at p. 661 of the 1930 edition, and for 1930 and 1931 at p. 698 of the 1936 Year Book. Dashes in this table indicate that no information was reported under the corresponding head for those years.

## Section 1.—History and Administration.

## Subsection 1.—Development of Aviation in Canada.

**Historical Sketch.**—About the turn of the century Mr. W. R. Turnbull, who may be termed the "father of aeronautical research in Canada", was experimenting with aerofoils and propellers at Rothesay, New Brunswick, where, in 1902, he set up the first small wind tunnel in Canada. He discovered the laws of the centre of pressure movement on aerofoils, and made deductions from these laws which explained the longitudinal stability of aeroplanes. He also propounded the static laws of air propellers and in later years evolved and developed the controllable-pitch propeller.

At the time that Mr. Turnbull was beginning his work, Dr. Graham Bell was experimenting with kites and air-screws in laboratories at his summer home at

Baddeck, Cape Breton island. The "Aerial Experiment Association", formed in 1907, consisted of Dr. Bell, J. A. D. McCurdy and F. W. Baldwin, two young Canadian engineering graduates, Glen Curtiss, a motor-cycle engine builder from New York State, and Lieut. Selfridge, on leave from the United States army. As a result of the work of these associates, the first flight in Canada was made at Baddeck on Dec. 7, 1907, in the *Cygnet*, a tetrahedral kite, which was towed by a steam tug. On Feb. 23, 1909, McCurdy's aeroplane, the *Silver Dart*, was taken out for tests on the ice at Baddeck. With its designer as pilot and under its own power, it flew for half a mile, rising thirty feet above the ice. This was the first aeroplane flight by a British subject. The *Silver Dart* was an advance on any aircraft previously flown, notable features being a three-wheel undercarriage, tapered wings, and the use of aileron controls.

Progress was rapid throughout the civilized world in the development and design of heavier-than-air flying craft from 1908 to the outbreak of the War, and this progress was accelerated during the War by the intensity of competition for superiority in the air, and by the wide field for experiment which the war activities provided. Officially, Canada took little part in these developments. However, many young Canadians entered the flying service of Britain and, to facilitate their recruitment and preparation, training units were established in Canada. To provide the aircraft for training purposes, Canadian Aeroplanes, Limited, was organized by the Imperial Munitions Board and, by the end of the War no less than 2,900 planes had been built by this industry. In the latter part of the War, owing to the extension of submarine raiding to the Atlantic coast of America, a Royal Canadian Naval Air Service was organized to patrol the coasts of the Maritime Provinces and the gulf of St. Lawrence. Bases were established at Halifax and Sydney, and patrols inaugurated on Aug. 25, 1918.

At the end of the War thousands of young men with training and experience in the British flying services returned to Canada, full of enthusiasm for aviation, and seeking an opportunity to apply their new knowledge to peace-time developments. At the same time, governments were disposing of their surplus stocks of planes at bargain prices. Action was necessary to supervise and control aviation in Canada. The Air Board was appointed in June, 1919, with authority for the full regulation of civil aeronautics. Branches were organized to deal with licensing of aircraft and personnel, to conduct operations for other Government services, and to provide technical services.

The immediate post-war circumstances of a large number of trained pilots and many surplus aircraft resulted in great activity in flying. However, much of this was in the form of exhibition flying, joy-riding and flying instruction. Patronage of these activities soon waned as the novelty of flying wore off among the general public. However, the foundations for real progress were laid by a few more far-sighted men who sought to apply the facilities of aircraft to real practical purposes in forest reconnaissance, surveying, and transportation in inaccessible areas of country. In the summer of 1919 successful flights were made for forest protection and survey work at Lac à la Tortue in Quebec. In the summers of 1920 and 1921 bases were established by the Air Board, with provincial co-operation, at various points across Canada from which forest patrols and survey work were carried on. In addition some large corporations, such as the Laurentide Company and Price Brothers, established their own air services for forest patrol, surveys and transportation. The discovery of crude oil at Fort Norman on the Mackenzie river in the fall of 1921 led to the first large-scale attempt to establish air transportation in the far north by the Imperial Oil Company. As a result of the development of mining activity at Rouyn

in northwestern Quebec, the first regular freight and passenger air transport service was inaugurated in 1924 by the Laurentide Air Services, Limited.

From these beginnings the expansion has been rapid. The speed and ease of air transport played a very important part in the expansion of mining activity during recent years throughout many areas of the Canadian Shield. Aircraft have been regularly used all across Canada for forest sketching, patrol and fire suppression, while very large areas have been mapped each year by aerial photography. The basic reasons for this progress of flying in the north country are simple. The only alternative means of transportation in many cases—the canoe in summer and the dog team in winter—are arduous, tedious, very costly, and slow for long distances. Furthermore, the lakes which dot the country everywhere provided from the first readily available landing places for aircraft equipped with floats in summer and with skis in winter. The flying could all be done in daylight hours and trips could generally be postponed if weather conditions were unfavourable. As a result commercial flying throughout the north country has been able to supply a very real economic service and to show substantial progress without governmental subsidies of any kind, while numerous governmental functions are being carried out with increased efficiency and economy through the aid of flying.

The situation was wholly different in the older settled parts of Canada. Here other forms of dependable and efficient transportation were already in existence and in some phases over-developed. The only advantage flying could offer was a saving of time, and to effect this an elaborate system of ground facilities was necessary. On account of the expense entailed, the development of inter-city air transportation was left in abeyance at first until progress elsewhere would give a clearer indication of its success and value. However, the success of inter-city air services in Europe and the steady growth of the United States airway system led to a reconsideration of Canada's position in 1927. As a step in establishing a chain of airports across Canada and also to provide for the training of personnel, the flying-club movement was started with the offer of government grants and gifts of aircraft. Twenty-three flying clubs were established in the principal cities of Canada in 1928 and 1929. Aerodromes established by municipalities or by these flying clubs formed the nucleus for the Trans-Canada airway, the Dominion Government having to provide intermediate landing fields, especially through the Rocky mountains and across northern Ontario, and the weather-reporting, lighting, and radio services. (See pp. 713-714.)

Mention has already been made of the administration of aviation under the Air Board immediately after the War. At the beginning of 1923, in the unification of the defence forces under the Department of National Defence, the Air Board was abolished and the administration of aviation was placed under the new Department. At this period when both military and civil flying services were small and in the early stages of their development, the advantages of combining their administration in one department were manifest. However, the two functions inevitably developed along different lines, these differences applying both to types of aircraft and to training of personnel. With the growth of both military and civil flying, their administration in one department became less convenient and stability in the administration of aviation in the Dominion was finally reached in the autumn of 1936 by the complete separation of the military and civil functions, the latter being transferred to the new Department of Transport. Civil aviation has now become so important a part of the transportation facilities of Canada that it can best be administered by the Department which deals with railway, shipping, and highway services, to which aviation is complementary.

## THE TRANS-CANADA AIRWAY.

**Modern Airway Facilities.**—The term 'airway' may be defined as the path of flight between two terminal airports on which have been installed permanent aids to air navigation. In North America a standard system of aids to air navigation has gradually been evolved. This is being closely adhered to in the construction and equipment of the Trans-Canada airway, and some of the most important characteristics should be mentioned. Essential features are efficient weather and radio services. Terminal airports, *i.e.*, those where regular stops are made, should be all-weather and all-weather fields, having three or more hard-surfaced runways, at least 3,000 feet in length, fully lighted with electric airway beacons, floodlights, boundary lighting systems to define the runways, range and approach lights to indicate the path of flight to the paved landing strips, and obstruction lights to define obstacles that might interfere with the clear approach to the airport. At a distance of about three miles there should be a radio-beam station, by means of which the pilot is guided along the airway and brought directly over the airport at the proper altitude for landing.

A meteorological service is essential on every main airport. By means of two-way radio, aeroplanes in flight are given, every thirty minutes, the latest information on the weather, are controlled during their flight, given full information as to other aeroplanes flying in their vicinity, and advised when to land.

Present practice requires radio-beam and two-way communication stations along the airway at intervals of about 100 miles between the terminal airports. Adjacent to these and directly in the path of flight secondary aerodromes are constructed. These are not necessarily stopping points but they afford a safe landing in case of need. The number of such additional intermediate aerodromes considered necessary for safety varies with the type of country. In open, settled, farm lands, where there are no mountains and where the weather is normally fine, they may be dispensed with altogether or spaced at intervals of about fifty miles between the major airports. Owing to the nature of the climate and the difficult physical character of the terrain in the Rocky Mountain region and northern Ontario, where there are absolutely no alternative emergency landing places, the spacing averages about thirty miles. The Trans-Canada Airway when finally completed will consist of a chain of airports from 30 to 50 miles apart reaching from Halifax to Vancouver with 'feeder' lines at branches from larger cities on the main airway to neighbouring cities in the United States and into the Canadian North.

**Major Divisions of the Trans-Canada Airway.**—Natural conditions divide the Trans-Canada airway into four distinct regions—the Mountain region, from the Pacific coast to the foothills in Alberta; the Prairie region, stretching from the foothills to the Ontario boundary; the Laurentian area, extending through western Ontario as far as the Ottawa valley; and the Atlantic section, which takes in the settled areas in the basin of the Great Lakes, the Eastern Townships of Quebec, and the Maritimes.

The Prairie region obviously presented the simplest construction and operating problems. There, precipitation is light, visibility normally good, contour changes are gradual, and aerodrome sites requiring little development were obtainable everywhere. Airway surveys commenced on the prairie section in the summer of 1928, and aerodrome construction and lighting installation followed. By the end of 1929, a chain of lighted aerodromes from Winnipeg to Edmonton *via* Regina and Calgary had been prepared and a contract for the carriage of mails had been let to Canadian Airways by the Post Office Department. Actual flying operations started on Mar.

1, 1930, with the operation of a nightly service each way. Five radio-beam stations, constructed in 1931, increased the efficiency of the airway materially. This service continued in regular operation with satisfactory results till Mar. 31, 1932, when, for reasons of economy in all services, it was temporarily suspended. Although the operation of the trans-prairie service was stopped, the airway surveys then in hand in the mountains and in northern Ontario, Quebec, and the Maritime Provinces were continued with a view to the eventual completion of the system from coast to coast.

**Progress of the Airway.**—Preliminary development on practically all aerodromes west of Montreal is now completed and while further construction work is required on some of the key airports to bring them up to the high standard of construction required, the route may now be flown safely in daylight hours. The installation of the radio-beam and two-way radio systems is proceeding as deliveries of equipment can be obtained. The lighting program is also well in hand.

Regular operations from Vancouver to Winnipeg—the western half of the airway—were possible at the end of 1937, and the airway should be in shape for regular operation at all seasons of the year, both night and day, from Vancouver to Montreal by mid-summer, 1938. The Atlantic section, east of Montreal, is not so far advanced but by the close of another construction season this too should be ready for regular operation.

An Act creating a national operating company—Trans-Canada Air Lines—for the operation of the Trans-Canada system was passed by Parliament in 1937. Time is required to build up such an organization but already it is operating the Seattle-Vancouver air-mail service and using this service as a training ground. As aircraft now on order are delivered, Trans-Canada Air Lines will extend its operations until they include the whole system from coast to coast.

The increase in landing speed and the introduction of night and all-weather flying necessitate larger airports, with longer clear approaches and improved surfaces. Airports which were adequate five years ago no longer suffice. The Department of Transport is co-operating with the municipal authorities in all parts of the country to provide air terminals of the required standard and is giving generous assistance so that first-rate airports may be available at all the principal traffic centres.

#### TRANS-ATLANTIC AIR SERVICE.

The past decade has witnessed the creation of a world-wide system of communications by air. European air lines cover that continent with a network connecting all the principal centres and stretching out to the farthest confines of Africa, Asia, and Australasia. In North America, the United States airway system provides a similar network and has been extended to give rapid means of transportation to all points in Central and South America. The Pacific ocean has been spanned and South America connected with Europe. The only major trade route not yet regularly served by aircraft is the North Atlantic. This trade route is perhaps the most important in the world. It joins the greatest centres of population and industry of the Old and New Worlds. It is served by the most highly efficient transport and communication systems in the world and here, if anywhere, is to be found traffic of sufficient value and quantity to justify the establishment of a commercial air service. The great circle track, or shortest route joining these two great industrial districts, passes down the Rhine Valley, through northern France and Belgium, London, northern Ireland, the Straits of Belle Isle, Montreal, the valley of the St. Lawrence and thence to the Mississippi basin. The eastern and western terminals of the direct

Trans-Atlantic airway lie in the British Commonwealth and from the earliest days of aviation the Canadian Government has watched its development with growing interest. The length of the ocean crossing and the climatic difficulties have delayed the establishment of any regular service by this route, but, with the advance of aeronautical and radio science and meteorological services, these are being conquered.

At the invitation of the Government of Newfoundland, representatives of the Canadian and United Kingdom Governments visited St. John's, Newfoundland, in July, 1933, for a conference on trans-Atlantic flying. This conference was also attended by representatives of Imperial Airways and Pan American Airways. The result of this conference was close co-operation between the three Governments in certain preliminary surveys and meteorological studies.

An agreement for co-operation in the establishment of the Trans-Atlantic air service by the Governments of Canada, the United Kingdom, the Irish Free State, and Newfoundland was reached by representatives of these Governments in Ottawa in December, 1935. Since the friendly co-operation of United States interests, rather than the institution of a rival service, was highly desirable, at the close of the Ottawa Conference in December, 1935, the representatives of the Commonwealth Governments proceeded to Washington and an agreement was reached with representatives of the United States Government for their co-operation in the institution of a regular transatlantic air-mail, passenger, and express service. The practical results of these two conferences were the trial flights made by aircraft of Imperial Airways and Pan American Airways during the summer of 1937. Flying boats were used by both companies, Imperial Airways operating two of the new 'Empire' type, high wing monoplane boats, while Pan American Airways used the 'Clipper' flying boat, a type which had been successfully flown on their trans-Pacific service. The success of these trial flights inspires confidence that, in a relatively short time, commercial transatlantic services will be in operation.

Canada's share in the trial flights has been confined so far to the provision of seaplane bases, meteorological and radio services in Canada and, as regards the two services last named, in Newfoundland as well. Under the Ottawa Agreement, when the trial flights justify the establishment of a regular service, a joint operating company will be formed by Imperial Airways, Trans-Canada Air Lines and a company nominated by the Irish Free State for the permanent operation of the route. Negotiations are now proceeding between the three companies for the establishment at an early date of such a joint operating company.

### Subsection 2.—Administration.

Civil aviation, previously administered by the Department of National Defence, is now a function of the Department of Transport, created in November, 1936.

The administrative duties under the Controller of Civil Aviation include the inspection and registration of aircraft and air harbours, the licensing of commercial and private air pilots, air engineers and air navigators. In addition to these duties, the location and construction of air routes and any matters connected with airship services are administered in this Branch.

**Provincial Government Operations.**—The Ontario Provincial Air Service owns 25 aircraft, which are operated by the province in the work of forest fire protection, transportation, air photography and sketching in northern Ontario. The Manitoba Government Air Service operated, in 1937, 6 aircraft on forest protection

in the province for the Forestry Branch. Work requiring the use of aircraft was carried out in other provinces by commercial operators on contract with the Provincial Governments concerned.

**Royal Canadian Mounted Police.**—Since the Royal Canadian Mounted Police took over the duties of the Preventive Service in 1932, aircraft have been utilized in the work on a wide scale, particularly along the coastal areas of the Maritime Provinces and in the lower St. Lawrence river. Such aircraft are equipped to maintain communication with the Preventive Service patrol vessels and also the land detachments, thereby enabling closest co-operation between all branches. Prior to 1937, this work had been performed by seaplanes provided by the Royal Canadian Air Force, who also furnished the pilots. During 1937 aircraft operations along the Atlantic seaboard in connection with Preventive Service work were carried out entirely by aircraft purchased by the Royal Canadian Mounted Police. Four DeHavilland twin-engine Dragonfly landplanes were purchased by the Force, three of which were operated from the base located at Moncton, N.B. Flying operations commenced July 9, 1937, and terminated for the season Oct. 31, 1937, during which time a total of 117 separate patrols were carried out, which involved a total of 350 hours flying time. No accident or other untoward incident occurred during these patrols.

**Commercial Aviation.**—During 1937 the principal activity of commercial aircraft operators in Canada was the carriage by air of passengers, freight, and mails to mining fields in the more remote parts of the Dominion. Their work also included forest fire patrols, timber cruising, air photography, flying instruction, advertising, short passenger flights, etc., in various parts of the country.

**Air-Mail Services.**—Regular air-mail services were established in December, 1927. Statistics of the air-mail services, showing routes operated, mileage flown, and mail carried during the fiscal year ended Mar. 31, 1937, may be found in Table 6, p. 736, under the part of this chapter dealing with the Post Office.

**Encouragement of Aviation.**—To encourage a more wide-spread interest and knowledge of aviation, the Department of National Defence, since 1928, has assisted by issuing light aeroplanes and making grants to each of the 22 flying clubs, viz.: Halifax, Cape Breton, Saint John, Montreal, Brant-Norfolk, Fort William, Hamilton, Kingston, London, Ottawa, St. Catharines, Toronto, Border Cities, Kitchener, Brandon, Winnipeg, Moose Jaw, Regina, Saskatoon, Calgary, Edmonton, and Vancouver. Many aerodromes have been established through this movement. Details of membership, aircraft, hangars, flights, etc., of flying clubs are shown separately in the tables.

## Section 2.—Airports and Aircraft.

### Subsection 1.—Ground Facilities.

The nucleus of the chain of aerodromes and ground facilities mentioned below, which will constitute the Trans-Canada airway, consists of municipal or flying-club airports adjacent to the larger urban centres. There are also numerous terminals from which commercial flying services operate, chiefly into the northerly mining regions. These different types of air harbours are indicated in Table 3.

A large air terminal has been built at St. Hubert, seven miles south of Montreal. Immigration, customs, and postal facilities are available. An aerodrome has also been constructed at Rimouski to expedite the dispatch and reception of trans-Atlantic mails.

### 3.—Air Harbours in Canada, 1936.

#### MUNICIPAL AIR HARBOURS.

| Location.                                   | Name of Aeroplane Club Using Harbour.        | Landing Surface.    | Capacity of Hangar. | Investment. <sup>1</sup> |

<sup>1</sup> Not included in investments shown in Table 4.<sup>2</sup> Information not available.

### Subsection 2.—Aircraft.

**The Manufacture of Aircraft.**—An aircraft industry, to construct in Canada the aircraft and equipment required for aviation, is essential to the development of flying. Canadian Vickers was the pioneer firm in Canada. Several manufacturers are now producing original types especially suited to operation in Canada. Several aircraft manufacturers from England and the United States have formed branches in Canada for the assembly and service of their products. The list of aircraft manufacturers for 1937 includes the following: Canadian Car & Foundry Co. Ltd., Fort William, Ont.; Boeing Aircraft Co. of Canada Ltd., Vancouver, B.C.; DeHavilland Aircraft of Canada, Toronto, Ont.; Fleet Aircraft of Canada Ltd., Fort Erie, Ont.; Cub Aircraft Ltd., Hamilton, Ont.; National Car & Foundry Co. Ltd., Hamilton, Ont.; A. E. Link, Gananoque, Ont.; Canadian Vickers Ltd., Montreal, Que.; Fairchild Aircraft Ltd., Longueuil, Que.; Noorduyt Aircraft Ltd., Montreal, Que.; and Montreal Aircraft Industries, Ltd., Montreal, Que.

The following firms have established plants for the manufacture of landing gear designed to meet the needs of Canadian aviation: MacDonald Bros. Aircraft Ltd., Winnipeg, Man.; Elliott Bros., Sioux Lookout, Ont.; Aircraft Supplies Ltd., Winnipeg, Man.; Sachau Marine Works, Toronto, Ont.; S. W. Waggett, Toronto, Ont.; Rutherford Co. Ltd., Montreal, Que.; Ottawa Car Mfg. Co. Ltd., Ottawa, Ont.; and Alberta Motor Boat Co., Edmonton, Alta.

Aero engine factories are established for construction or assembly and service of their products as follows: Standard Machine Works, Winnipeg, Man.; Coates Ltd., Eboune, B.C.; Wells Air Transport Ltd., Eboune, B.C.; Canadian Airways Ltd., Winnipeg, Man.; DeHavilland Aircraft of Canada, Toronto, Ont.; Fleet Aircraft of Canada Ltd., Fort Erie, Ont.; Cub Aircraft Ltd., Hamilton, Ont.; Canada Car & Foundry Co. Ltd., Hamilton, Ont.; Aero Engines of Canada Ltd., Montreal, Que.; Canadian Pratt & Whitney Ltd., Longueuil, Que.; Canadian Wright Ltd., Montreal, Que.; Canadian Car & Foundry Co., Montreal, Que.; Armstrong-Siddeley Motors Ltd., Ottawa, Ont.; Aircraft Repair Ltd., Edmonton, Alta.; M. & C. Aviation Co. Ltd., Prince Albert, Sask.; Prairie Airways Ltd., Moose Jaw, Sask.; and Institute of Technology & Arts, Calgary, Alta.

### Section 3.—Finances and Employees.

**Investments.**—The development of aviation requires a considerable outlay of capital not only for the provision and replacement of aircraft but also for the provision of landing fields or harbours, buildings, servicing shops, etc.

#### 4.—Investment for Civil Aviation in Canada, 1936.

| Net operating revenues.....   | 16,076        | 111,223     |

**Personnel and Employees.**—The numbers of pilots and engineers holding licences under the Controller of Civil Aviation in 1937 were as follows: private pilots 625; commercial pilots 320; limited commercial pilots 129; transport pilots 73; and air engineers 595.

In Table 6 are shown employees and salaries and wages in flying clubs and commercial flying organizations in 1936.

| Salaries and Wages..... | \$  | \$0,707       | \$15,931    |

## Section 4.—Traffic.

The freight carried by aircraft consisted largely of machinery, supplies, etc., for mines in the northern part of Quebec, Ontario and the western provinces and the Northwest Territories. Many of these mines are accessible only by canoe in the summer and dog team in the winter or by aircraft, and aircraft transportation will probably be the cheapest and most effective method of transportation during the life of a large number of these. The amount of freight and express carried by aircraft has grown steadily and rapidly, increasing from 2,372,467 pounds in 1931 to 26,226,260 pounds in 1937 exclusive of 12,836 pounds carried in international service. This is considerably more than was carried in any other country, the United States reporting 7,127,369 pounds for 1937. The activity in mining, particularly in gold mining, due to the increased price of gold, has been a large factor in this rapid growth of air transportation of freight and express. Much mail, not included in the mail carried under contract, is also carried into the mines by aircraft.

7.—Commercial Air Traffic in Canada,<sup>1</sup> by Provinces, 1937.

<sup>1</sup> Flights between Canada and the United States.<sup>2</sup> From Point to point only.<sup>3</sup> Not available.<sup>4</sup> Pilot miles.<sup>5</sup> Crew and passenger miles.<sup>6</sup> Exclusive of 46,375 lbs. carried on contract with means of transportation optional.<sup>7</sup> Carried under Canadian Postal contracts—1,323,584 lbs.<sup>8</sup> Carried under Canadian Postal contracts—

Some countries include in their statistics traffic between two foreign stations of companies incorporated in the reporting country. In Table 7 are shown separately statistics of companies operating regular routes between points in Canada and the United States. These statistics include only those of traffic between the two countries. The company operating between Montreal, Albany, and New York reported only the flights, passengers, and freight, etc., from and to Montreal. Consequently, it would be quite proper to add this international traffic to the strictly Canadian traffic.

The Northern Airways Company has a postal contract for mail in the north-west to be carried by any means feasible and on this contract 46,375 pounds not included in the official air-mail contracts was carried by aeroplane.

## PART VI.—WIRE COMMUNICATIONS.\*

The statistics regarding communication by wire are classified under two sections—telegraphs and telephones.

## Section 1.—Telegraphs.

The early history of telegraphic communication in Canada, given on p. 778 of the 1934-35 Year Book, is not repeated in this volume in order to economize space.

**Dominion Government Telegraph Service.**—This service is operated by the Telegraph Branch of the Department of Public Works. Its general object has been to furnish wire communication for outlying and sparsely settled districts where the amount of business is so small that commercial companies will not enter the field but where the public interests require that there should be communication. Thus these facilities include: telegraph and telephone services to scattered settlements around the coasts of Cape Breton island; cable services to Campobello, Grand Manan and other islands in the bay of Fundy, to Prince Edward Island, Magdalen islands and Anticosti island in the gulf of St. Lawrence; telegraph or telephone services along the north shore of the gulf of St. Lawrence from Quebec to the straits of Belle Isle; cable connections with Pelee and Manitoulin islands in Ontario; some lines to northern outlying districts in Saskatchewan; lines from Edmonton to the Athabaska and Peace River country in Alberta; telegraph or telephone communications around the coast of Vancouver Island and to fishing, lumbering, and mining settlements along the coast of the mainland of British Columbia, as well as to isolated mining centres in the interior; and finally the overland telegraph line to Dawson and other settlements in Yukon. Statistics of these services are included in the tables which follow.

## 1.—Summary Statistics of All Canadian Telegraphs, calendar years 1920-36.

| Year. | Gross Revenue. | Operating Expenses. | Net Operating Revenue. | Pole Line Mileage.  | Wire Mileage. | Em- ployees.       | Offices. | Messages, Land. | Cable- grams. <sup>1</sup> | Money Trans- ferred. |

<sup>1</sup> Excluding messages relayed to the United States.

<sup>2</sup> Revised since the publication of the 1937 Year Book.

<sup>3</sup> Excluding commission operators.

**Telegraph Systems.**—The Canadian telegraph systems are composed of lines owned by the Dominion Government and by chartered railway and telegraph companies. The Canadian facilities, in proportion to population, are among the most extensive in the world, and are operated under considerable climatic and geographical disadvantages. In the operation of railways and in the receipt and dispatch of market and press reports, the service to the nation is invaluable.

\*Revised by G. S. Wong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch issues annual reports dealing with telegraph and telephone statistics, respectively, to which the reader is referred for more detailed information.

Table 2 gives figures of telegraph operation and line and wire mileage of various companies for the years 1932 to 1936. Statistics of the Halifax and Bermudas Cable Co., the Canadian Marconi Wireless Telegraph Co., and the Pacific Cable Board are not included.

**2.—Statistics of Chartered Telegraph Companies for the calendar years 1932-36.**

<sup>1</sup> Cablegrams not included.

<sup>2</sup> The figures for Table 1 include offices of wireless and cable companies and to that extent are larger than the sums of the items given here for corresponding years.

<sup>3</sup> Included with Canadian National. The Western Union handles only through business.

<sup>4</sup> Leased telephone line.

**Submarine Cables.**—Sixteen transoceanic cables have termini in Canada—fourteen of them on the Atlantic coast and two on the Pacific. In addition there are eight cables between Atlantic coastal stations in Canada and the United States. The year in which the cable was first demonstrated to be of commercial value was 1866, and up to the present its use has greatly increased. The Atlantic cables are controlled by English and United States interests. The Pacific cable, from Canada to Australia and New Zealand, has been in operation since 1902, and was owned by a partnership of the Governments of Great Britain, New Zealand, Australia, and Canada. As a result of the recommendation of the Imperial Wireless and Cable Conference of 1928, in view of increased wireless competition, it was decided to dispose of the Pacific and West Indian Islands cable systems to the Imperial and International Communication Co., a company formed to take over all Empire-owned cables and lease the Empire-owned beam wireless systems. The necessary legislation was passed by the United Kingdom in February, 1929, and by Canada in June, 1929.

## Section 2.—Telephones.

A brief historical account of the early development of telephones in Canada appeared at p. 781 of the 1934-35 Year Book.

## Subsection 1.—Systems and Equipment.

**Telephone Systems.**—The 3,063 telephone systems existing in 1936 included the three large provincial systems in Manitoba, Saskatchewan, and Alberta, and a smaller governmental system in Ontario, together with the system operated by the National Parks of Canada, Department of Mines and Resources. There were also 143 municipal systems, the largest operated by the cities of Edmonton, Fort William, and Port Arthur. Out of the 1,901 co-operative telephone companies, no fewer than 1,153 were in Saskatchewan alone, 419 in Alberta, and 206 in Nova Scotia. The largest among the 772 joint-stock companies operating telephone systems in 1936 were the Bell Telephone Co., and the British Columbia Telephone Co. Almost 58 p.c. of the total telephone investment in Canada belonged to the Bell Telephone Co., and their telephones in Quebec and Ontario constituted 56 p.c. of the total for Canada.

**Telephone Equipment.**—The number of telephones per capita is second only to that of the United States, the numbers being 13·69 telephones per 100 population in the United States and 11·5 in Canada. This is a favourable showing in view of the low density of population in Canada as a whole and the fact that 46 p.c. (46·30 p.c. in 1931) of the population is rural.

There were 546,887 telephones out of a total of 829,078 in 51 leading cities of Canada operated from automatic switchboards; the remainder, or 282,191, were operated from manual switchboards. Automatic switchboards have completely displaced manual switchboards in the principal cities of the Prairie Provinces and are displacing them in the other provinces.

<sup>1</sup> Includes telephones on rural exchange lines and urban exchange lines which have more than four parties.

<sup>2</sup> Figures for 1911-18 are for years ended June 30; those since 1918 are for calendar years.

<sup>3</sup> First year reported.

The density of telephones in the different provinces is naturally influenced by the urbanization of the population because the number of telephones used for business purposes is much greater in cities and towns than in rural areas.

#### 4.—Telephones in Use, by Provinces, Dec. 31, 1936.

| Provinces.  | On Individual Lines. |            | On 2- and 4-Party Lines. |            | On Rural Lines. |            | Private Branch Exchange and Extensions. |            | Public Pay Station. | Total.    | Telephones per 100 Population. |

#### Subsection 2.—Telephone Finances.

The financial statistics of Table 5 show that the investment in telephone property in Canada, represented by the cost of property, is a very large item and is exceeded in the field of transportation and communications only by the investments in steam railways (pp. 645-646) and roads and highways (pp. 674-675).

#### 5.—Summary Financial Statistics of Telephones in Canada, 1911-36.

| Year.                   | Capitalization. |              | Cost of Property. | Gross Revenue. | Operating Expenses. | Net Operating Revenue. |            | Salaries and Wages. <sup>1</sup> | Em-<br>ployees. <sup>2</sup> |

<sup>1</sup> Includes Bell Telephone in Ontario and Quebec.<sup>2</sup> Excludes rural lines.

## Subsection 3.—Telephone Calls.

Systems operating almost 90 p.c. of all telephones in Canada made estimates by actual count on days of normal business, and, after adjusting for uncompleted calls, holidays, Sundays, etc., the average was multiplied by 365. The long-distance calls in practically all cases were the actual long-distance calls put through or completed. The averages were 1,912 local and 22.1 long-distance calls per telephone and 222 telephone conversations per capita. The estimated per capita average for the United States in 1935 was 197.

## 7.—Local and Long-Distance Calls and Averages per Telephone and per Capita, calendar years 1928-36.

| Year.     | Local Calls.  | Long-Distance Calls. | Total Calls.  | Averages per Telephone. |                |        | Total Calls per Capita. <sup>1</sup> |

<sup>1</sup> Per capita figures are based on official estimates of population given on p. 155.

## PART VII.—WIRELESS COMMUNICATIONS.\*

Under the Radiotelegraph Act (c. 195, R.S.C. 1927) the administration of radio within the Dominion is vested in the Minister of Transport.

### Section 1.—Radio-telegraphy.

**The Coast Station Radio-telegraph System.**—The present coast station system of 81 stations consists of three chains—one extending from Vancouver to Prince Rupert on the Pacific, another from Port Arthur to the Atlantic ocean in the East, and the third from Port Churchill to Resolution island at the entrance to Hudson strait. The Great Lakes coast stations connect with those of the east coast, which, in turn, connect with the Hudson Bay route chain. There is no direct radio connection between the Great Lakes and the Pacific Coast chain.

Of the above stations, 14 on the east coast and Great Lakes are operated by the Canadian Marconi Co. under contract with the Department, and the remaining 67 on the east coast, west coast, and Hudson bay and strait are operated directly by the Department. Twice daily, at advertised hours, a number of these stations broadcast messages to shipping containing such important information as weather forecasts, storm warnings, reports in connection with floating derelicts, ice, and other dangers to navigation. In the interests of navigators, to whom accurate time is essential in computing observations on celestial bodies, one Canadian coast station transmits time signals at advertised hours daily.

Some years ago the discrimination of underwriters in the matter of insurance rates charged on ships plying to Canadian ports led the Department to feel that any reasonable expenditure which would tend to reduce these charges would be a sound investment. To this end 13 direction-finding stations have been established at specially selected sites with respect to navigational routes—7 on the east coast, 5 on Hudson bay and strait, and 1 on the west coast. These stations are fitted with special apparatus which enables the direction of the incoming radio signal transmitted by a ship to be accurately determined.

A network of 28 radio beacon stations (including one combined direction-finding and beacon station and one combined coast and beacon station) is maintained on the Atlantic and Pacific coasts and on the Great Lakes to enable a ship or aircraft equipped with its own direction-finding apparatus to determine its bearing or direction in relation to the radio beacon station. The operation of these radio beacons is automatic, the transmissions being made in clear weather hourly or half-hourly as advertised, and continuously during foggy weather. At Point Atkinson, B.C., the signals of the radio beacon are synchronized with the emissions of the fog alarm at that place during foggy weather for distance finding. To insure the safety of life at sea, all passenger steamers and freighters plying to and from Canadian ports must carry radio equipment manned by competent operators in possession of a certificate of proficiency in radio. The Department maintains a complete radio inspection service to enforce this regulation. Inspectors located at various ports throughout the Dominion are responsible for checking the efficiency of the radio equipment on ships of all nationalities, and seeing that only competent operators are carried. Ships are also surveyed with a view to the issuance of the necessary certificates prescribed under the Safety of Life at Sea and Load Line Conventions Act, 1931. Examinations for certificates of proficiency in radio are conducted by the Radio Division, and 7,006 certificates had been issued up to Mar. 31, 1937.

\*Section 1 and Subsection 1 of Section 2 have been revised by Commander C. P. Edwards, O.B.E., Chief of Air Services, Department of Transport, Ottawa. A fuller treatment of the historical and descriptive background of radio communication was published at pp. 607-610 of the 1932 Year Book.

## 1.—Government-Owned Radio Stations in Canada, fiscal year ended Mar. 31, 1937.

NOTE.—Of these Government-owned stations some only are operated by the Government. The rest are operated by the Marconi Co. and are indicated by asterisks (\*).

<sup>1</sup> This is the same station as that listed under Direction-Finding Stations, but is included under the two headings to indicate its dual function. It is counted only as a D/F station in the summary in Table 3.

<sup>2</sup> Also included under Radio Beacon Stations to show its double function.

In 1937, Government radio-telegraph stations on the east coast, west coast, the Great Lakes, and Hudson bay and strait handled 452,031 messages or 7,872,891 words compared with 342,587 messages or 7,712,803 words handled in 1936. In 1937, the cost of maintenance was \$474,805 compared with \$466,198 in the previous year.

## Section 2.—Radio-telephony.

Broadcasting of the human voice by radio first commenced in Canada with test programs carried out by the Canadian Marconi Co. in Montreal during the winter evenings of 1919. Regular organized programs were commenced in December, 1920, by the same company, on a wavelength of 1,200 metres. In April, 1922, the establishment of broadcasting stations on a general scale commenced, 52 private, commercial and amateur broadcasting licences being granted during the fiscal year 1923. A radio-telephone service between Canada and Great Britain was first made available to the Canadian public, through the medium of the Bell Telephone Co. *via* the transatlantic radio circuit operated by the American Telegraph and Telephone Co. from New York, in March, 1928. In 1932, a direct circuit with Great Britain was opened through the beam station of the Canadian Marconi Co. at Drummondville, Quebec.

### Subsection 1.—Regulation of Radio-telephony.

As explained on p. 727, the administration of radio, including broadcasting, in Canada is vested in the Dominion Department of Transport. All stations must be licensed; the fee for a broadcasting station is \$50 per annum, and for a receiving set, \$2 per annum.\*

Approximately \$200,000 is expended annually by the Radio Division of the Department of Transport for the suppression of inductive interference in the interests of broadcast listeners. This service is entirely free.

The extent to which private receiving sets are used for the reception of public broadcasting is indicated by the number of private receiving licences issued in the various provinces of the Dominion during the fiscal year 1937 as follows: Prince Edward Island, 3,282; Nova Scotia, 40,938; New Brunswick, 27,253; Quebec, 240,105; Ontario, 424,126; Manitoba, 69,861; Saskatchewan, 68,193; Alberta, 72,458; British Columbia, 91,978; Yukon and Northwest Territories, 306.

\*Increased to \$2.50 per annum as from Apr. 1, 1938, by an Order in Council of Jan. 21, 1938, under authority of the Radiotelegraph Act (c. 197, R.S.C. 1927).

<sup>1</sup> This class of station discontinued Apr. 1, 1935.  
numbering 2,758 in 1937, 2,314 in 1936, 1,931 in 1935, 1,517 in 1934, and 1,202 in 1933.

<sup>2</sup> Includes licences issued free to the blind.

### Subsection 2.—Canadian Broadcasting Corporation.

National radio broadcasting in Canada entered a second phase on Nov. 2, 1936, when the Canadian Broadcasting Corporation replaced the Canadian Radio Broadcasting Commission. Notable progress was made during 1937 toward improvement in broadcast coverage, reception, and program service.

The most important technical developments were the inauguration of two 50,000-watt transmitting stations, CBF, at Verchères, Que., to serve the province of Quebec, and CBL, Hornby, Ont., to serve the province of Ontario. These have vastly improved the service in those areas and form the nucleus of a chain of such stations ultimately to be placed at strategic points throughout the country.

Care has been given to improving announcing standards, and a special department has been created to deal with this. Reference libraries have been established and a comprehensive handbook for announcers has been published. A guide to the pronunciation of Canadian place names is at present in preparation. This service is available without cost to any private station.

A successful experiment was conducted in the Spring of 1938 when certain Canadian universities were invited to put on programs of undergraduate and student talent. These programs were very well received and it is proposed to continue them from other universities. They provide an excellent field for the discovery of new artistic talent.

A talks department was established during 1937 and a wide variety of informative and popular talks have since been planned and presented. Subjects range from nature study, book reviews, discussions on poetry, history, and science, to stories of travel and adventure. Balanced controversy has been encouraged. Representative groups of citizens across Canada have formed discussion clubs to give broadcasts on current Canadian questions. The forum method has also been used, as in the "Whither Democracy" series on the problems of Canadian politics and economics. Care is taken to ensure that such programs are well balanced, with all major points of view presented. On current affairs, commentaries on international events have been given on Sunday afternoons, while special talks on British and United States affairs have been brought directly to Canadian listeners from London and New York.

In British Columbia, in co-operation with the provincial Department of Education, an interesting experiment was begun with a series of broadcasts to schools.

In June a special mobile unit was added to the CBC's broadcasting equipment. This unit, which consists of a motor van in which is installed the most modern and scientifically correct broadcasting apparatus, enables the CBC to cover important special events of national interest which it hitherto has not been able to present to Canadian listeners. The unit, which is capable of transmitting programs by short-wave to a CBC station for release over the national network, also contains recording machines. These recording machines are being used for the presentation of programs from remote parts, reflecting the varied and distinctive character of Canadian life. Broadcasts of this nature include a series entitled "Summer Over Prince Edward Island", "Summer over Nova Scotia", and "Summer Over New Brunswick". A series of descriptive broadcasts of the National Parks also is planned.

An outstanding feature of the CBC's program policy was the inauguration of a series of broadcasts by leading Canadian symphony orchestras. This series was inaugurated in May when the Toronto Promenade Symphony Orchestra concerts were broadcast over the CBC national network and over the vast blue and red networks of the NBC in the United States. This series proved very successful and the broadcasting of symphony music of Canadian orchestras over such networks is

to be encouraged. All the more important music organizations in Canada eventually are to be included in this plan.

**Select Standing Committee on National Broadcasting.**—On Feb. 24, 1938, the Government appointed a Select Standing Committee to review the policies of the CBC, with special reference to revenues, expenditure, and development. The Committee held seven meetings and, following deliberations of its findings, the Committee reported to the Government that it approved the policies followed by the CBC, its business administration and set-up and that it was in accord with the CBC's plan for national coverage, involving ownership of high-power stations and the extension of Corporation coverage through its own comprehensive facilities—facilities which, it was pointed out, are urgently required. A feature of the Committee's report was the recommendation that a high-power short-wave transmitting station should be established at an early date for the purpose of interpreting and advertising Canada abroad and to facilitate the exchange of programs between Canada and other countries. It should be financed, the Committee recommended, as a national project, operated and controlled by the CBC. Canada, at the present time, is the only major trading nation without such facilities.

Early in the year, the CBC entered into an arrangement with the BBC which made possible exchange of producers between the two systems. A CBC representative spent six months with the BBC, during which time he made a study of broadcasting in England; at the same time a BBC representative was the guest of the CBC. It is the intention of the CBC to effect other exchanges with various countries from time to time.

During the year the CBC continued with even greater success than in previous years the exchange of programs with Great Britain, the United States, and a number of European and South American countries.

## PART VIII.—THE POST OFFICE.\*

**Historical.**—A brief account of the pre-Confederation development of postal services in Canada was given on pp. 789-790 of the 1934-35 Year Book.

At Confederation the provincial systems were transferred to the Dominion. The Post Office Act of 1867 established a service throughout Canada. The domestic rate on letters was reduced from 5 to 3 cents per half-ounce, and in 1870 the rates to the United States and the United Kingdom were reduced from 10 to 6 cents and from 12½ to 6 cents, respectively, per half-ounce. In 1875 a convention between Canada and the United States reduced postal rates between the countries to the domestic level. In 1878, on the admission of Canada to the Postal Union, letter postage to the countries of the Postal Union was reduced to 5 cents per half-ounce. After a conference in 1897 Imperial penny postage (2 cents per half-ounce) was established on Dec. 25, 1898, while the domestic rate was reduced from 3 to 2 cents per ounce. These rates were maintained until 1915, when, with the rising costs of the war period, rates were increased. Penny postage again became effective for Canada, to the United States, Newfoundland and other countries of North America on July 1, 1926, and to the United Kingdom and all other places within the British Empire on Dec. 25, 1928, with later extensions to France and South America. On July 1, 1931, a special revenue tax, imposed by the Government for the purpose of obtaining additional revenue, came into effect on letters addressed to places in Canada, throughout the Empire, to France, to Spain and to North and South America generally, making the rate in these cases 3 cents for the first ounce and 2 cents for each additional ounce.

\*Revised by H. Beaulieu, Director, Administrative Services, Post Office Department.

The Post Office Department is administered by the Postmaster General. Besides the several administrative branches at Ottawa, the Dominion is divided into 15 districts, each in charge of a District Director or Superintendent of Postal Service. The Canadian system embraces a territory more extensive than that served by any other system, excepting those of United States and Russia, and the relatively small population compared with the great distance to be covered makes inevitable a peculiarly difficult and relatively expensive service.

**Rural Mail Delivery.**—A system of rural mail delivery was inaugurated in Canada on Oct. 10, 1908, limited at that time to existing stage routes. The service was greatly extended by new regulations taking effect on Apr. 1, 1912. The result has been an increase in the number of rural routes from approximately 900 in 1912 to 4,436 in 1936, having 246,462 mail boxes as against approximately 25,000 in 1912.

**Mail Transportation.**—The conveyance of mail by land, water, and air entailed a total expenditure of \$13,358,239 during the fiscal year ended 1937. Railway carriage cost \$6,808,896, land transportation (largely that by rural delivery) cost \$5,988,040, conveyance by steamship cost \$272,721, while that by air cost \$288,582. These amounts were paid solely for services rendered as carriers. For details regarding air-mail services, see p. 737. Special subsidies are granted to assure the maintenance of certain steamship services. Since these subsidized services provide transportation for passengers and freight as well as mail, the subsidies are included with other expenditures on water transportation on pp. 694-696.

**Statistics.**—Tables 1 to 3 show, respectively, the numbers of post offices in operation in Canada in the latest six years, the gross revenue in each office collecting \$10,000 and upwards in 1936 and 1937, and the net revenues and expenditures the Department in various years since 1890.

<sup>1</sup> "Net Revenue" is exclusive of commissions and allowances to postmasters and some other smaller items. The gross revenue in the fiscal year 1936 was \$39,403,500 and in 1937, \$41,181,506.

**Postage.**—The net revenue receipts shown in Table 3 are mainly received in the form of postage as is indicated by the following gross figures.

The gross value of the postage stamps, post cards, etc., sold during each of the latest eight fiscal years, was: \$27,101,353 in 1930, \$25,769,781 in 1931, \$27,242,715 in 1932, \$25,999,159 in 1933, \$25,541,129 in 1934, \$26,303,451 in 1935, \$27,341,608 in 1936, and \$28,179,323 in 1937. Receipts from postage paid in cash were as follows: \$9,045,805 in 1930, \$8,887,322 in 1931, \$9,078,136 in 1932, \$8,173,950 in 1933, \$8,129,387 in 1934, \$8,619,712 in 1935, \$9,277,072 in 1936, and \$10,203,389 in 1937.

**Auxiliary Services.**—The auxiliary postal services—the issuing of money orders (including postal notes) and the facilities offered by the Post Office savings banks—have expanded enormously since Confederation. In 1868, there were 515 money order offices in operation, issuing orders to an amount of \$3,342,574, while the following tables show the magnitude of operations now. Statistical tables showing deposits with the Government savings banks since Confederation and the business of the Post Office savings banks, 1932-37 are included in the chapter on Currency and Banking (Chapter XXII).

#### 4.—Operations of the Money Order System in Canada, fiscal years ended Mar. 31, 1911-37.

NOTE.—For 1868 to 1910, see Canada Year Book, 1911, p. 289; for 1901-10, see 1932 Year Book, p. 622.

**Air-Mail Services.**—The total weight of mail carried by air throughout Canada during the year ended Mar. 31, 1937, was 1,200,831 lb., while the mileage flown was 977,864.

An interesting feature of the returns is the continued volume of mail carried by air into the several mining districts, and there would seem to be little doubt that aerial postal communication contributes materially to the development of Canada's natural resources.

**6.—Mileage Flown and Weight of Mail Carried by Air, fiscal year ended Mar. 31, 1937.**

## PART IX.—THE PRESS.

The Dominion Bureau of Statistics does not collect statistics regarding the circulation of newspapers and periodicals in Canada but a short treatment compiled from data published in *McKim's Directory of Canadian Publications* is introduced here. Industrial statistics of the printing and publishing, and of the printing and bookbinding industries will be found on p. 426, in Chapter XIV, dealing with manufactures. The press is a very important factor in carrying information to the people and in crystallizing and expressing public opinion on current questions. In any survey of methods of communication it occupies a noteworthy place.

The publications enumerated in Table 1 include a number for which no estimate of circulation is given. Such publications are therefore omitted from the compilation of circulations in Tables 2 and 3. This accounts for the difference in the number of daily, semi-weekly, and weekly publications shown in Tables 1 and 2. Comparison of the figures of Table 3 showing publications in cities of 20,000 population or over, with those for the same year of Table 2, showing publications for the whole of Canada, indicates that the daily newspapers are confined almost entirely to these larger urban communities, but that, in the field of weekly publications, while the greater part of the circulation is accounted for by the publications of these cities, by far the greatest number of weeklies are issued in smaller communities. The weekly seems to be the standard medium for local news in small towns and villages.

Since circulations in many cases are only roughly estimated, totals in the tables are given in round numbers.

## 1.—Number of Publications in Canada, by Frequency of Issue, 1926-36.

NOTE.—Compiled from *McKim's Directory of Canadian Publications*. Figures do not include Newfoundland.

| Year.    | Daily. | Tri-Weekly. | Semi-Weekly. | Weekly. | Bi-Weekly and Semi-Monthly. | Monthly. | Bi-Monthly and Quarterly. | Miscellaneous. | Total. |
|----------|--------|-------------|--------------|---------|-----------------------------|----------|---------------------------|----------------|--------|
| 1926.... | 113    | 7           | 28           | 929     | 46                          | 365      | 38                        | 10             | 1,536  |
| 1927.... | 113    | 6           | 23           | 955     | 48                          | 355      | 37                        | 9              | 1,556  |
| 1928.... | 113    | 7           | 21           | 950     | 56                          | 390      | 38                        | 15             | 1,590  |

<sup>1</sup> For newspapers—average for 12 months ended Sept. 30; for periodicals—average for 6 months ended Dec. 31. <sup>2</sup> Includes the sum of morning and evening editions of the same newspaper. Also includes papers issued five times a week. <sup>3</sup> Includes papers published two, three, or four times a week.

<sup>4</sup> Includes special Saturday and Sunday editions of daily papers.

**Publications in the French Language.**—Such publications include a comparatively large proportion of periodicals dealing with literature, music, religion, and similar cultural subjects, and the circulations of many of these periodicals are not reported in *McKim's Directory of Canadian Publications*. Publications for which the circulations are not reported are not included in either the number or circulation figures of Table 4 below. Since the majority of such unreported publications are likely to have fairly small circulations, the figures of the table represent a larger proportion of total circulation than of the total number of publications. Among daily newspapers, there is only one small publication unreported in each year.

**4.—Number and Circulation of French Language Publications in Canada, by Provinces, 1935 and 1936.**

NOTE.—Figures of circulation given to nearest thousand as some publications are not exactly reported. Compiled from *McKim's Directory of Canadian Publications*.

<sup>1</sup> Bi-monthly, quarterly, and annual.

<sup>2</sup> Includes bilingual publications.

<sup>3</sup> Includes special editions for United States circulation averaging: in 1935, 12,200 daily, and 12,200 weekly; and in 1936, 11,300 daily, and 11,300 weekly.

# CHAPTER XIX.—LABOUR AND WAGES.\*

## PART I.—LABOUR.

### Section 1.—Occupations of the Wage-Earning Population.

At the census, the total population in gainful occupations is recorded. In Section 15 of Chapter IV, pp. 128-146 of the 1937 Year Book, the gainfully occupied in 1931 were dealt with rather extensively under the heading "Occupations of the Canadian People". This Section is limited to the treatment of occupations of wage-earners. The gainfully occupied population is composed of four classes of persons: (1) employers, (2) own accounts, (3) wage-earners, (4) unpaid family workers. The third class, *i.e.*, the wage-earners, comprises that portion of the gainfully occupied which in the course of its employment receives either wage or salary payment. In Canada the wage-earners numbered 2,570,097 at the 1931 Census, representing 65.44 p.c. of the total population in gainful occupations. The number of male wage-earners was 2,022,260 or 78.68 p.c. of the total of both sexes combined, and the number of female wage-earners was 547,837 or 21.32 p.c. of the total.

The only complete record of the industrial distribution of the gainfully occupied population is obtained at the decennial censuses. The usefulness of such decennial compilations, however, is considerably enhanced if the trend during intercensal years can be approximately ascertained. In this respect statistics of employment regularly collected by the Bureau of Statistics covering employees in the major fields of industry, with the exception of agriculture, fishing and some of the services, are valuable. Although difficulties of classification exist, there is reason to feel that the employment data provide the basis for projecting the figures of Table 2 for intercensal comparisons. More information on this subject will be found under the heading "Employment as Reported by Employers" on p. 768.

Table 1 shows the numerical and percentage distribution of the wage-earners by provinces in 1931.

\*The sections and subsections of this chapter, with the exceptions of Sections 1, 3, 7, and 9 (Subsections 3, and 5) and Section 10, all of Part I, and Section 4 of Part II, have been revised by, or under the direction of W. M. Dickson, Deputy Minister, Department of Labour, Ottawa; the summary of Labour Legislation given in Section 12 has been specially prepared by Miss M. Mackintosh, M.A., Chief, Library and Research, of the Department. The information in Section 3, Part I, has been obtained through the courtesy of the Provincial Departments of Labour or Bureaus of Labour, and that in Section 7, Part I, has been revised by the chairmen of the respective provincial Workmen's Compensation Boards. Section 10 has been revised under the direction of Dr. W. C. Clark, Deputy Minister, Department of Finance, Ottawa. The remaining sections have been prepared and revised in the Dominion Bureau of Statistics.

### 1.—Numerical and Percentage Distribution of Wage-Earners, by Provinces, 1931.

| Province.                 | Numbers.         |                  |                | Percentages.  |               |               |
|---------------------------|------------------|------------------|----------------|---------------|---------------|---------------|
|                           | Total.           | Male.            | Female.        | Total.        | Male.         | Female.       |
| Prince Edward Island..... | 12,344           | 9,159            | 3,185          | 0.48          | 0.45          | 0.58          |
| Nova Scotia.....          | 117,781          | 95,244           | 22,537         | 4.53          | 4.71          | 4.11          |
| New Brunswick.....        | 84,232           | 66,310           | 17,922         | 3.28          | 3.28          | 3.27          |
| Quebec.....               | 696,339          | 535,203          | 161,136        | 27.09         | 26.47         | 29.41         |
| Ontario.....              | 965,907          | 752,851          | 213,756        | 37.57         | 37.23         | 38.84         |
| Manitoba.....             | 170,739          | 132,883          | 37,856         | 6.64          | 6.57          | 6.91          |
| Saskatchewan.....         | 145,568          | 116,157          | 29,411         | 5.66          | 5.74          | 5.37          |
| Alberta.....              | 142,421          | 116,005          | 26,416         | 5.54          | 5.74          | 4.82          |
| British Columbia.....     | 235,096          | 198,448          | 36,618         | 9.15          | 9.81          | 6.08          |
| <b>Totals.....</b>        | <b>2,570,097</b> | <b>2,022,260</b> | <b>547,837</b> | <b>100.00</b> | <b>100.00</b> | <b>100.00</b> |

It will be seen that almost two-thirds of the wage-earners were found in Ontario and Quebec at the latest decennial census, a little less than one-fifth in the Prairie Provinces, and somewhat less than one-tenth in British Columbia or in the Maritimes.

In Table 2 the numbers and percentages of the wage-earners in the main industrial groups are given for Canada, while in Table 3 the distribution is according to broad occupational groupings. It should be noted that the industrial grouping of the gainfully occupied is not concerned with the type or kind of occupation, but rather with the product made or the service rendered, grouping together all persons in a given industry such, for example, as clothing manufacturing whether directly employed in the manufacturing process, or in the warehousing or sales branch of the business, or in clerical occupations in the office, and so on. On the other hand, the occupational grouping shown in Table 3 includes all persons following the listed occupations irrespective of the industry in which they may be engaged.

## 2.—Numerical and Percentage Distribution of Wage-Earners, by Industrial Groups, for Canada, 1931.

| Industrial Group.                      | Numbers.         |                  |                | Percentages.  |               |               |
|--|------------------|------------------|----------------|---------------|---------------|---------------|

| <b>All Industries.....</b>             | <b>2,570,697</b> | <b>2,022,260</b> | <b>547,837</b> | <b>100.00</b> | <b>100.00</b> | <b>100.00</b> |

Table 2 shows that almost one-quarter of the wage-earners are employed in the manufacturing industries, over one-fifth in the services, and just over 10 p.c. both in transportation and communications, and in trade. It will be noted that 55 p.c. of the females find employment in service, chiefly in personal and professional services.

## 3.—Numerical and Percentage Distribution of Wage-Earners, by Occupational Groups, for Canada, 1931.

| Occupational Group.   | Numbers.         |                  |                | Percentages.  |               |               |

<sup>1</sup> Less than one-hundredth of one per cent.

<sup>2</sup> Includes "Electric Light and Power".

<sup>3</sup> Includes

"Warehousing and Storage".

<sup>4</sup> Includes Public Administration and Recreational Services in addition to Professional and Personal.

<sup>5</sup> Includes "Laundering, Cleaning, Dyeing and Pressing".

In Table 3, where the wage-earners are classified into broad occupational groups, separate groups have been shown for clerical workers and labourers in other than primary pursuits—two groups with wide industrial range. Over one-fifth of all female wage-earners reported clerical occupations at the 1931 Census, while a similar proportion of males were returned as labourers in secondary industries and services.

A table at p. 732 of the 1937 Year Book shows the numerical and percentage distribution of wage-earners, by age groups, as at the Census of 1931.

## Section 2.—The Dominion Department of Labour.

The Department of Labour of the Dominion Government was established in 1900 under the authority of the Conciliation Act. At the outset its chief duties comprised the administration of certain provisions of this statute which were designed to aid in the prevention and settlement of labour disputes, the administration of the Government's fair wages policy for the protection of workmen employed on Dominion Government contracts and on works aided by grants of public funds, the collection and classification of statistical and other information relative to conditions of labour, and the publication of a monthly periodical known as the *Labour Gazette*. From 1900 to 1909 the Department was administered by the Postmaster General, who was also Minister of Labour. It was constituted a separate Department under the Labour Department Act, 1909.

The work of the Department was greatly increased in 1907 by the passage of the Industrial Disputes Investigation Act. At present the Department is also charged with the administration of an Act passed in 1918 known as the Employment Offices Co-ordination Act, the Government Annuities Act of 1908, the Technical Education Act enacted in 1919, the White Phosphorous Matches Act of 1914, the Fair Wages and Hours of Labour Act, 1935, the Vocational Education Act, 1931, the Combines Investigation Act, 1923, as amended in 1935 and 1937, and the Dominion relief legislation. The work of the Department has developed in other directions, especially in the collection and publication of information as to industrial disputes, wages, industrial agreements, prices, industrial accidents, labour legislation and labour organization; also in connection with the International Labour Organization of the League of Nations. For the operation of the Government Annuities Act and the Technical Education Act, see the chapters on Insurance and Education, respectively.

**Industrial Disputes Investigation Act.**—The Industrial Disputes Investigation Act (R.S.C., 1927, c. 112) has attracted considerable favourable attention from legislators and publicists throughout the world. As enacted in 1907, it forbids strikes and lockouts in mines and certain public utility industries until the matters in dispute have been dealt with by a board of conciliation and investigation consisting of three members, two appointed by the Minister of Labour on the recommendation of the respective parties to the dispute, the third on the recommendation of the first two, or, if they fail to agree, by the Minister himself. Should either of the parties fail to nominate a board member, the Minister may appoint a fit person on its behalf. After such a board has made its report, either of the parties to the dispute may reject its findings and declare a strike or a lockout, a course adopted, however, only in a small percentage of cases. The machinery of the Act may be extended to other industries with the consent of the parties concerned.

In January, 1925, a judgment was rendered by the Judicial Committee of the Privy Council declaring that the Act as it stood was not within the competence

of the Dominion Parliament.\* At the ensuing session of Parliament amendments were made to the statute with the object of limiting its operation to matters not within exclusive provincial jurisdiction. It was also provided by these amendments that the statute should apply in the case of "any dispute which is within the exclusive legislative jurisdiction of any province and which by the legislation of the province is made subject to the provisions of this Act". The legislatures of all provinces except Prince Edward Island took advantage of this provision and enacted enabling legislation by which the Dominion Industrial Disputes Investigation Act became operative in respect of disputes of the classes named in the Dominion law and otherwise within exclusive provincial jurisdiction. In December, 1937, however, a statute entitled "Industrial Conciliation and Arbitration Act" was enacted by the British Columbia Legislature providing provincial machinery for dealing with industrial disputes within the legislative jurisdiction of the province and repealing the "Industrial Disputes Investigation (British Columbia) Act".

A review of the proceedings under the Industrial Disputes Investigation Act from its enactment in March, 1907, to Mar. 31, 1937, shows that, during the 30 years, 866 applications were received for the establishment of boards of conciliation and investigation, as a result of which 557 boards were established. In all but 39 cases, strikes or lockouts were averted or ended.

**Fair Wages Branch.**—The Fair Wages Branch of the Department of Labour is charged with the preparation and enforcement of the labour conditions and schedules of minimum wage rates which are inserted in Dominion Government contracts for works of construction, remodelling, repair or demolition. The number of fair wages schedules prepared from the time the Fair Wages Policy was adopted by the Dominion Government in 1900 up to the end of the fiscal year 1936-37 was 7,517. The number of fair wages schedules furnished during the fiscal year 1936-37 was 512.

The Department of Labour also co-operates closely with other Departments of the Government in ensuring the observance of fair wages conditions inserted in contracts for the manufacture of various classes of equipment and supplies for Government use, and is frequently consulted by other Departments regarding the prevailing rates of wages to be observed on works carried out by day labour.

The Fair Wages Policy of the Government of Canada was originally based on a resolution adopted by the House of Commons in 1900. It was later expressed in an Order in Council adopted on June 7, 1922, amended on Apr. 9, 1924, and again on Dec. 31, 1934. Under these Orders in Council certain specified conditions were designated as being applicable to contracts for building and construction operations, and other conditions as being applicable in the case of contracts for the manufacture of certain classes of Government equipment and supplies. The policy required that the current wage rates and working hours of the district should be observed in the case of all workmen employed, or, if there were no current rates or hours in existence, then fair and reasonable conditions should be observed in both respects. Contracts for railway construction to which the Dominion Government has granted financial aid, either by way of subsidy or guarantee, are likewise subject to fair wages conditions. The policy has, moreover, been extended within recent years to cover contracts for works carried out by the several Harbour Commissions and by the National Harbours Board which replaced them.

\* See p. 241 of the *Labour Gazette* for February, 1925, for text of judgment of the Judicial Committee of the Privy Council in regard to the validity of this statute.

On May 30, 1930, an Act of Parliament was adopted known as the Fair Wages and Eight Hour Day Act, 1930, providing for the payment of current wage rates to all persons employed on contracts made with the Government of Canada for works of construction, remodelling, repair or demolition, provided that the wages in all cases should be fair and reasonable. This statute also directed that the working hours of persons while so employed should not exceed eight hours a day. It was further declared that the foregoing conditions were to be applied to all workmen employed by the Government itself on the construction, remodelling, repair or demolition of any work.

The Fair Wages and Eight Hour Day Act, 1930, was superseded, however, on May 1, 1936, by the Fair Wages and Hours of Labour Act, 1935, which was adopted by Parliament on June 28, 1935. This latter statute re-enacts a number of the sections of the former Act and adds new provisions to comply with the recommendations of the Royal Commission on Price Spreads. Like its predecessor, the Act makes provision for fair wages and an eight-hour day on Government contracts for works of construction, remodelling, repair or demolition, imposing, however, a limit of forty-four hours a week on such works and extending the Dominion Government's policy of fair wages and an eight-hour day to works carried out by any provincial or municipal authority with the aid of Dominion Government funds, as well as to other works aided by the Government of Canada.

The Act sets out that the term 'fair wages' means such wages as are generally accepted as current for competent workmen in the district in which the work is being performed for the character or class of work in which such workmen are respectively engaged; but shall in all cases be such wages as are fair and reasonable.

The benefits of the Fair Wages Policy apply also to workmen employed by Government Departments on a day labour basis in building and construction works.

On Mar. 27, 1930, an Order in Council was passed providing that, except in cases where the work of employees was intermittent in character, or the application of the rule was not deemed to be practicable, or in the public interest, the hours of work of any Dominion Government employees who had up to that time been required to work more than eight hours daily should be reduced to eight hours a day, with a half-holiday on Saturday.

An Order in Council was adopted on Dec. 31, 1934, rescinding the labour conditions previously applied to contracts for the manufacture of various classes of government supplies, and substituting other conditions therefor. The provision for the payment of wages not less than current rates, or fair and reasonable rates if there are no current rates, is retained in the new conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age or over be less than 30 cents an hour, and for female workers 18 years of age or over, 20 cents an hour. It is also declared that males and females under 18 years of age shall be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces, and that, in any cases where the provincial minimum wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Dominion contract work.

**Labour Gazette.\***—Since the establishment of the Department of Labour in 1900, a monthly publication known as the *Labour Gazette* has been issued. From its inception the *Labour Gazette* has maintained a continuous record of industrial,

\* A charge of 20 cents per annum, postage prepaid, is made for this publication to subscribers in Canada, the United States of America, and Mexico, and of \$1.00 per annum to subscribers in all other countries.

social, and economic conditions in Canada, as reflected in legislation, employment and unemployment, price trends, labour disputes, conventions and recommendations of labour organizations, and industrial relations programs. One of the particular functions of the Department is the promotion of industrial harmony, and prominence is therefore given in the *Labour Gazette* to proceedings under the Industrial Disputes Investigation Act and the Conciliation and Labour Act. Complete information is also given with respect to proceedings under other measures administered by the Department, including the Employment Offices Co-ordination Act, the Combines Investigation Act, the Technical Education Act, the Government Annuities Act, the Relief Acts, and the Fair Wages and Eight Hour Day Act.

Included in the statistical information published is a monthly analysis of prices, wholesale and retail, in Canada, indicating trends in the cost of living, the prices of staple articles, and index numbers of price movements over a series of years. A special section records the work of the International Labour Organization (League of Nations), the draft conventions and recommendations adopted by that body being published in full.

The *Labour Gazette* is widely distributed throughout Canada, and the statistical and other information contained therein is constantly used in connection with the discussion of wages and other issues between employers and workers.

**Labour Legislation.**—The Department gives considerable attention to labour legislation in Canada and abroad. Notes and articles are published in the *Labour Gazette* and special bulletins in printed or mimeographed form are issued from time to time. While each of these deals with some particular phase of labour legislation in the Dominion or in some of the provinces, information is usually given concerning legislation on the same subject in other countries.

Since 1917, the Department has published a series of reports on labour legislation in Canada. Three reports reproduced the text or a summary of all the labour legislation in force at the ends of the years 1915, 1920, and 1928, respectively. The report for 1937 also covers all the Dominion and provincial legislation on the statute books at the end of that year. The reports for the intervening years relate only to the laws enacted during the year.

### Section 3.—Provincial Labour Departments and Bureaus.

The rapid industrial development at the end of the nineteenth century in Quebec and Ontario, the leading manufacturing provinces, brought with it the recognition of the need of special provincial offices to safeguard the interests of labour, with the result that the Ontario Bureau of Labour was established in 1900 and the Quebec Department of Public Works and Labour in 1905. In 1904, an Act was passed in New Brunswick providing for a Bureau of Labour, but this never became operative. Some years later, to cope with conditions created by the growth of industry in the West, Acts were passed providing for the creation of Provincial Bureaus of Labour in Manitoba (1915), in Saskatchewan (1920), and in Alberta (1922), while a Department of Labour was established in British Columbia in 1917. A Department of Labour was established in Nova Scotia by c. 3 of the Statutes of 1932, and the Manitoba Bureau of Labour became a Department in 1934. All these authorities publish annual reports on their activities.

**The Nova Scotia Department of Labour.**—The Act establishing the Nova Scotia Department of Labour provides that "the Department of Labour shall take cognizance of all matters relating to labour and shall administer such affairs, matters,

Acts and regulations as the Governor in Council from time to time assigns to that Department, whether or not the same have been assigned or have belonged by or under any Act of the Legislature of Nova Scotia or otherwise to some other Department or to some member of the Executive Council”.

The Department is in charge of a Minister of Labour, who has under him a Deputy Minister of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Department by Order in Council. At present, labour bureaus in the province, the administration of the Factories Act, Minimum Wage Board, Limitation of Hours Board, Industrial Standards Act, Trade Union Act as affects check-off, and unemployment relief have been assigned by Order in Council to the Department of Labour.

**The Quebec Department of Labour.**—This Department was formerly known as the Department of Public Works and Labour, each division having a separate Deputy Minister, but in 1931 each division was recognized as a distinct Department.

The duties of the Department of Labour include the institution and control of inquiries into important industrial questions and it may collect useful facts and statistics relating thereto, to be transmitted to the Quebec Bureau of Statistics. The Department is charged with the administration of provincial Acts respecting industrial and commercial establishments, trade disputes, and the maintenance of fair wages clauses in Provincial Government contracts. The Quebec Workmen's Compensation Commission is under its jurisdiction, together with the Provincial Employment Service.

The Department is responsible for the licensing and qualification of electricians, moving-picture machine operators, stationary enginemen and firemen, and pipe mechanics; it is also charged with the inspection of electrical installations, heating installations, steam, hot-water and hot-air furnaces, boilers registered under the Interprovincial Code, together with the registering of blue prints in connection with the construction of boilers. A special branch of the Department is entrusted with the inspection of public buildings and the approval of the plans of new buildings.

The Department, since the 1934 session, was charged with the enforcement of the Collective Labour Agreements Extension Act which has been repealed and replaced during the 1937 session by the Act respecting Workmen's Wages. However, this new legislation, while an improvement, carries out the policy of the earlier Act. It is not the duty of the Government to lead employers and employees into the preparation of agreements, but when a collective labour agreement has been passed and adopted by the Lieutenant-Governor in Council, a joint committee is formed to supervise the enforcement of the Order in Council. The joint committee, under the authority of the Act, may adopt regulations for its own administration, render obligatory the certificate of competency in a given trade in cities of more than 5,000 population and collect an assessment, not exceeding one-half of one per cent, on the payrolls of employers and on the wages of employees for the purposes of the putting into force of the Order in Council. During the fiscal year 1936-37, 57 collective labour agreements were enforced in the province in various industries.

In order to supply the needs of unorganized trades wherein collective labour agreements could not be entered into, the Fair Wage Act was adopted in 1937. The Fair Wage Board, created under its authority, is a permanent arbitration tribunal having the powers and rights of a corporation. It may determine even

on its own initiative, for the periods of time fixed by it, for the territories it may designate and for any category of employees it may indicate, fair wages, working hours, and, in general, deal with any matter pertaining to employment. However, this Act does not affect collective labour agreements in force or which may become compulsory thereafter. It replaced the former Women's Minimum Wage Act which, of course, was only devoted to the welfare of women.

The 1937 session has given fresh life to the Old Age Pension Act adopted in 1936 according to the Dominion Old Age Pension Legislation; a commission is formed to supervise the carrying out of this Act and since September 1936, it is placed under the jurisdiction of the Department of Labour.

An Act respecting the welfare of youth authorizes the Lieutenant-Governor in Council to prohibit work by boys and girls under 16 years of age in industrial or commercial establishments designated by him and, with respect to such dangerous work as he may designate, the employment of boys and girls of less than 18 years of age.

Allowances to needy mothers will be granted in virtue of the Act to provide such assistance. The Old Age Pension Commission, which is entrusted with the carrying out of this social legislation, is also the organization supervising the enforcement of the Blind Persons Aid Act. Blind men and women over 40 years old are now in receipt of an allowance.

The Department has jurisdiction over the limitation of hours of work; since the coming into force of the Act giving it authority, hours of labour in the building trades have been limited to 44 and 48 per week throughout the province.

Since September, 1936, the Department of Labour has been charged with the control of unemployment relief in the province; such service was formerly under the jurisdiction of the Department of Public Works.

The Department issues qualification certificates to workmen charged with the use and handling of explosives and is responsible for the enforcement of the Scaffolding Inspection Act in towns where there is no municipal service providing for such duties.

**The Department of Labour of Ontario.**—The Department of Labour of Ontario was established in 1919 and placed under the direction of a Minister and a Deputy Minister of Labour. This Department had its origin in the Bureau of Industries formed in 1882 under the Department of Agriculture, to collect and publish statistics relating to the industries of the province and (later) to administer the first Factory Act of 1886. In 1900 a Bureau of Labour, attached to the Department of Public Works, was authorized to collect and publish information relating to employment, wages and hours, strikes, labour organizations, and general conditions of labour. Several investigations were made regarding such matters and the first free employment offices were opened by the Bureau of Labour. In 1916 this Bureau was in turn superseded by the Trades and Labour Branch, also under the Ministry of Public Works but administered by a Superintendent. The establishment of the Branch had been recommended by the Ontario Commission on Unemployment and the expansion of the work undertaken by the Branch, and the increase in the demands made upon its resources led to the creation of a special Department of the Government by the Department of Labour Act, 1919.

The Department of Labour administers the following Acts: the Department of Labour Act; the Factory, Shop and Office Building Act; the Steam Boiler Act; the Operating Engineers Act; the Building Trades Protection Act; the Employment Agencies Act; the Apprenticeship Act; the Regulations respecting the Protection of

Persons working in Compressed Air; the Regulations respecting the Protection of Persons working in Tunnels and Open Caissons; the Minimum Wage Act, 1937; the Industrial Standards Act; the One Day's Rest in Seven Act; and the Government Contracts Hours and Wages Act.

The Minimum Wage Act, 1937, revises the former Minimum Wage Act as it applies to female workers and extends the scope of the Act to include male employees. Pursuant to an amendment to the Department of Labour Act, the Industry and Labour Board was established in 1937. It consists of five members, one of whom is chairman and three of whom are officers of the Department of Labour. One member is a woman. The Board has power to administer the provisions of any Act assigned to it, and the Minimum Wage Act, 1937, the Apprenticeship Act, and the Industrial Standards Act have been assigned for administrative purposes.

The Department is required to maintain employment offices, to collect information respecting employment, sanitary and other conditions in work places, wages and hours of work, and to study labour legislation in other parts of the British Empire and in foreign countries, as well as any suggested changes in the labour laws of Ontario. The representatives of the Department of Labour have right of access to offices, factories, and other work places at any reasonable hour, and may be authorized to hold inquiries under the Public Inquiries Act. The Department publishes annual reports which cover the work of the officers employed in the administration of the various Acts assigned to it.

**The Manitoba Department of Labour.**—The Act of 1915, establishing the Manitoba Bureau of Labour, provided that it be attached to the Department of Public Works; an amendment of 1922, however, provided for its attachment to any other Department as the Lieutenant-Governor in Council may determine. The Bureau was created a separate Department by c. 28 of the Statutes of Manitoba, 1931, but the Act was not proclaimed until July 6, 1934.

The Department is charged with the administration of the following Acts: the Bureau of Labour Act; the Manitoba Factories Act; the Bake Shop Act; the Shops Regulation Act; the Minimum Wage Act; the Elevator and Hoist Act; the Steam Boiler Act; the Building Trades Protection Act; the Public Buildings Act; the Fair Wage Act; the Electricians' Licence Act; the Amusements Act (Secs. 11 to 15); the One Day's Rest in Seven Act; the Employment Bureau Act; The Strikes and Lockouts Prevention Act.

The Bureau of Labour and Fires Prevention Branch is a sub-department of the Department of Labour (formerly a sub-department of the Department of Public Works). The Bureau also enforces the Fires Prevention Act.

**The Saskatchewan Bureau of Labour and Public Welfare.**—This Bureau was created by an Act of 1934 to replace the Department of Railways, Labour and Industries. It is administered by the Minister of Municipal Affairs, assisted by a permanent Commissioner. The function of the Bureau is to administer matters relating to the relief of distress in addition to the following Acts: the Factories Act; the Building Trades Protection Act; the Employment Agencies Act; the One Day's Rest in Seven Act; the Weekly Half-Holiday Act; the Minimum Wage Act; the Workmen's Wage Act and the Industrial Standards Act. It is also charged with the operation of public free employment offices; the collection and publication of information and statistics relating to employment; wages and hours of labour throughout the province; strikes and other labour difficulties; trade unions and labour organizations; the relations between capital and labour, and other subjects connected with industrial problems; the commercial, industrial, and sanitary conditions of employment.

**The Alberta Department of Trade and Industry.**—This Department supervises the administration of the following Acts: the Minimum Wage Act, 1925, relating to the wages of women workers; the Male Minimum Wage Act; the Industrial Standards Act; the Alberta Trades Disputes Act; the Factories Act; the Theatres Act; the Trade Schools Act; and the Qualification of Tradesmen Act. The Department of Health has the administration of the Alberta Employment Offices Act as well as measures for unemployment relief.

**The British Columbia Department of Labour.**—This Department was instituted by an Act of 1917, under a Minister and Deputy Minister of Labour. It administers the laws of British Columbia affecting labour, and is empowered to collect information respecting industries, wages, employment, prices, labour organizations, and other data pertaining to labour problems. Prominent among the Acts administered by the Department are: the Male Minimum Wage Act 1934; the Female Minimum Wage Act 1934; the Hours of Work Act 1934. These are administered by the Board of Industrial Relations, the Deputy Minister of Labour being Chairman of the Board. Other activities of the Department include the administration of: the Semi-monthly Payment of Wages Act; the Factories Act; the Apprenticeship Act; the Trade-Schools Regulation Act; the Industrial Conciliation and Arbitration Act 1937; and the operation of employment bureaus within the province.

#### Section 4.—Canada and the International Labour Organization.\*

The International Labour Organization of the League of Nations was set up in 1919 in accordance with Part XIII of the Treaties of Peace to promote the improvement of industrial conditions by legislative action and international agreement.

The Organization comprises the International Labour Conference, which meets annually and is composed of four representatives of each Member State, two of whom are government delegates, while two represent employers and workers respectively, and the International Labour Office in Geneva, which functions as a secretariat of the annual conference and also collects and publishes information on subjects relating to industrial life and labour. The Office is under the control of a Governing Body, consisting of 32 persons, appointed by the International Labour Conference, of whom 16 represent governments, 8 represent employers and 8 represent workers. In addition to its control of the Labour Office, the Governing Body is charged with the preparation of the agenda of the annual conference.

Under the terms of the Peace Treaties, eight of the government seats on the Governing Body are held by the countries of "chief industrial importance". Canada has been designated by the Council of the League of Nations as one of these eight States of chief industrial importance. Sixty-one countries are members of the International Labour Organization, comprising all of the industrial states of the world with the exception of Germany. The United States, although not a member of the League of Nations, joined the International Labour Organization in 1935, as did also Russia. Egypt, which was not a member of the League, also joined the International Labour Organization in 1936. Dr. W. A. Riddell, who had served as Canadian Advisory Officer to the League of Nations in Geneva since 1924, was transferred to the staff of the Canadian Legation in Washington in the autumn of 1937 and was replaced by Mr. H. Hume Wrong, who had previously served as Counsellor of the Canadian Legation in Washington since its establishment in 1927. At the triennial election of the Governing Body of the International Labour Office in

\* On this subject see also the 1921 Year Book, pp. 607-609; 1922-23 Year Book, pp. 704-707; and 1924 Year Book, pp. 660-670.

1937, Mr. P. M. Draper, the President of the Trades and Labour Congress of Canada, was elected as a deputy member of the workers' representatives on this body.

The conclusions of the International Labour Conference are cast in the form of draft conventions or recommendations, addressed to the national governments which comprise the membership of the International Labour Organization. A two-thirds majority of the Conference is required for the adoption of either a draft convention or recommendation. Under the Treaties of Peace, the Member States are bound to bring the draft convention or recommendations before the authority or authorities within whose competence the subject matter lies, for the enactment of legislation or other action. Thus the findings of the Conference become binding in the various countries concerned only if and when action regarding them is taken by the latter.

The Dominion Department of Labour is entrusted with the duties arising out of the relations of Canada with the International Labour Organization. These have entailed much correspondence, not only with the International Labour Organization, but also with the different departments of the Dominion Government, with the provinces, and with employers' and workers' organizations. Replies have also been prepared in the Department of Labour to various questionnaires issued by the International Labour Office. Performance of these duties has necessitated a close study of the different technical questions which have figured on the agenda of the various conferences and at the meetings of the Governing Body.

Twenty-three sessions of the International Labour Conference have been held since its inception in 1919. Sixty-one draft conventions and 56 recommendations have been adopted at these annual gatherings. The draft conventions and recommendations of the Conference have, among other subjects, related to the following: hours of labour, measures for the avoidance of unemployment, employment conditions of women and children, employment conditions of seamen, employment in agriculture, weekly rest, statistics of immigration and emigration, principles of factory inspection, inspection of emigrants on board ship, workmen's compensation for accidents and occupational diseases, social insurance, minimum wages, prevention of accidents to dockers, forced labour, holidays with pay, and regulation of hours of work of salaried employees and of workers in coal mines.

Up to Dec. 31, 1937, 742 ratifications of these conventions had been registered with the League of Nations, of which 11 were conditional or with delayed application; 40 had been approved by the competent national authority; and 136 had been recommended to the competent national authority for approval.

**Canadian Action on Draft Conventions and Recommendations.**—Seven draft conventions in all have been ratified by the Dominion Government, namely: (1) minimum age for employment of children at sea; (2) unemployment indemnity for seamen in case of the loss or foundering of a ship; (3) minimum age for employment as trimmers and stokers; (4) medical examination of children and young persons employed at sea; (5) limiting hours of work in industrial undertakings to eight in the day and forty-eight in the week; (6) weekly rest in industrial undertakings; and (7) creation of minimum-wage-fixing machinery. The first four of these conventions were ratified in March, 1926, following the adoption of legislation by Parliament to give effect to the proposals which were respectively involved. The last three conventions were ratified in March, 1935, following the adoption of legislation by Parliament on these respective subject matters, i.e., hours of labour, weekly rest and minimum wages. Doubts having arisen as to the legal competence of the Dominion Parliament to deal with these matters, a reference was submitted

to the Supreme Court of Canada, which was later carried in appeal to the Judicial Committee of the Privy Council. The judgments of the latter body, given in January, 1937, were to the effect that all three of these statutes were *ultra vires* of the Parliament of Canada.

At the 1935 session of Parliament resolutions were also adopted approving of three other draft conventions of the International Labour Conference with a view to their subsequent ratification, namely: seamen's articles of agreement; safety of workers engaged in loading and unloading ships; and the marking of weights on heavy packages transported by vessel.

### Section 5.—Organized Labour in Canada.

The Dominion Department of Labour publishes annually a report on labour organization in Canada. This report outlines the composition and development of the various organizations of wage-earners in the Dominion, and gives statistical and other information respecting membership, benefits, registration of trade unions, etc.

**Total Reported Membership of Organized Labour in Canada.**—The numerical strength of organized labour in Canada at the close of 1936 was given by the Department of Labour as follows: international organizations, 1,896 local branches with an aggregate membership of 174,769; Canadian central labour bodies, 740 branches and 83,841 members; independent units, 60 with 18,863 members; National Catholic unions, 190 with 45,000 members; grand total, 2,886 local branches and 322,473 members. As compared with 1935 this represents an increase of 158 branches, and of 41,769 members. Table 4 shows, by years, the membership of trade unions in Canada since 1911.

4.—Membership of Trade Unions in Canada, 1911-36.

| Year.     | Members. | Year.     | Members. | Year.     | Members. |
|-----------|----------|-----------|----------|-----------|----------|
| 1911..... | 133,132  | 1920..... | 373,842  | 1929..... | 319,476  |
| 1912..... | 160,120  | 1921..... | 313,320  | 1930..... | 322,429  |
| 1913..... | 178,799  | 1922..... | 276,621  | 1931..... | 310,544  |

| 1916..... | 160,407  | 1925..... | 271,064  | 1934..... | 281,774  |
| 1917..... | 204,650  | 1926..... | 274,604  | 1935..... | 280,704  |
| 1918..... | 248,837  | 1927..... | 290,222  | 1936..... | 322,473  |
| 1919..... | 378,047  | 1928..... | 300,602  |           |          |

**Main Groups.**—The following paragraphs outline the main groups into which Canadian labour organizations now fall.

**Trades and Labour Congress of Canada.**—The Trades and Labour Congress is representative of the international trade union movement in the Dominion, the bulk of its membership being drawn from the international organizations which have local branches in Canada. According to reports for 1936, the Congress had in affiliation the Canadian membership of 62 international bodies and the membership of 4 national organizations as well as that of 98 directly chartered unions, the combined membership being 149,398, comprised in 1,679 local branches.

**All-Canadian Congress of Labour.**—The All-Canadian Congress of Labour was organized in Montreal, Mar. 16, 1927, by representatives of national and independent organizations. At the close of 1936, the All-Canadian Congress of Labour had 6 central bodies in affiliation, with a combined membership of 27,489, as well as 42 directly chartered local unions with a membership of 3,894, making a total combined reported membership of 31,383.

*Canadian Federation of Labour.*—Following a disagreement among the executive of the All-Canadian Congress of Labour prior to the scheduled convention of that body in September, 1936, a new organization was formed under the name of Canadian Federation of Labour. At the close of 1936, according to available information, the Federation was composed of 5 directly chartered unions, of which the membership was not reported, and in addition 6 central organizations, embracing 60 local branches, with a combined reported membership of 25,081.

*Federation of Catholic Workers of Canada.*—In 1918, a conference of National Catholic Unions, which were first established in 1901, was held in Quebec city, followed by other meetings in Three Rivers in 1919 and Chicoutimi in 1920. The delegates at the latter conference, numbering 225 from 120 unions, decided to establish a permanent central body to co-ordinate the work of the scattered units. Accordingly, at the 1921 conference held in Hull, at which approximately 200 delegates representing 89 unions were present, a constitution to govern the new body was approved. The name selected was "Federation of Catholic Workers of Canada", and permanent officers were elected, the constitution and by-laws becoming effective on Jan. 1, 1922. From information at hand, there were at the close of the year (1936) 190 National Catholic Unions, with a combined membership of 45,000.

*One Big Union.*—At a conference held at Calgary, Alberta, Mar. 13, 1919, by representatives of local trade unions, principally from the four western provinces, the One Big Union was established as an industrial organization. According to information supplied by the general secretary, the O.B.U., at the close of 1936, had 44 units under charter, as well as 2 central labour councils (bodies similar to trades and labour councils), the combined reported membership being 23,745.

*International Trade Unions Operating in Canada.*—Table 5 gives the names of the 87 international craft labour organizations and the 1 industrial union which now carry on operations in Canada, and shows: (1) the number of branches which were in existence in the Dominion at the close of 1936, and (2) the reported membership.

<sup>1</sup> The Labour Department's definition of 'Canadian' does not include the National Catholic or Independent Unions with reported memberships of 45,000 and 18,863 respectively. <sup>2</sup> Membership not reported.

<sup>3</sup> Affiliated with the Canadian Federation of Labour.

## Section 6.—Fatal Industrial Accidents.

Statistics of fatal industrial accidents have been compiled by the Dominion Department of Labour since 1903, the data being obtained from provincial Workmen's Compensation Boards, the Board of Railway Commissioners for Canada and various other governmental authorities, from departmental correspondents and from press clippings. Table 7 shows the numbers of fatal industrial accidents reported to the Department during each year from 1933 to 1937, inclusive. The number of fatalities in each of the different industries is also shown as a percentage of the total number. Preliminary figures show 1,209 fatal accidents in 1937.

†Figures subject to revision.

**Causes of Fatal Accidents.**—The classification of fatal accidents in 1937, by causes, shows that the largest number, 385, came under the category "by moving trains, vehicles, etc". This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as moving implements, water craft and aircraft.

"Falling objects" caused 223 fatalities. Next in order as a cause came "falls of persons", including those (186 in number) who fell into pits, shafts, holds of vessels, harbours, rivers, etc. Fatalities numbering 148 were caused by dangerous substances, including electric current, explosives, hot and inflammable substances, gas fumes, boiler explosions, etc. Animals caused 33 fatalities, including 21 caused by horses. There were 28 fatalities caused by striking against or being struck by objects, 25 by prime movers, 25 by hoisting apparatus, 24 by working machines, 18 by the handling of heavy or sharp objects, and 11 by tools. The heading "other causes" includes 33 caused by lightning, frost, storms, and sunstroke, 31 due to industrial diseases, strain, etc., 18 to cave-ins, etc., 13 caused by shooting and violence, and 5 by drownings not otherwise specified.

Numbers of industrial accidents, fatal and non-fatal, dealt with by the various provincial Workmen's Compensation Boards, are included in the following section on Workmen's Compensation.

## Section 7.—Workmen's Compensation in Canada.

An account of the development of workmen's compensation legislation in Canada from employers' liability legislation was given at pp. 744-746 of the 1927-28 Year Book, while a summary of the legislation with regard to workmen's compensation, including a statement of the current scale of compensation in each province, appears in the general sketch of labour legislation in Canada at pp. 787-796 of the current edition. Details regarding the operation of the various Workmen's Compensation Boards of the provinces are given below.

**Operations of the Workmen's Compensation Boards.**—*Nova Scotia.*—The Workmen's Compensation Act was passed in 1915, but only became effective on Jan. 1, 1917. During the twenty-one years between that date and Dec. 31, 1937, 161,272 accidents were reported to the Board of which 143,413 were compensated as shown in Table 8. Prior to Jan. 1, 1920, medical aid was furnished only in special cases.

## 8.—Compensation Paid and Accidents Compensated by the Nova Scotia Workmen's Compensation Board, 1917-37.

(Estimates for outstanding claims not included.)

| Year.     | Compensation. | Medical Aid. | Total.    | Accidents Compensated. |

<sup>1</sup>Revised since the publication of the 1937 Year Book.

*New Brunswick.*—The Workmen's Compensation Act of New Brunswick was passed in 1918. It extends to a wide range of industries, and is administered by a Board of three persons, levying assessments and paying benefits. For the sums paid out annually from 1920 to 1937 as compensation and for medical aid, see Table 9.

## 9.—Compensation Paid by the New Brunswick Workmen's Compensation Board, 1920-37.

| Year.                   | Weekly Compensation. | Permanent Partial Disability. | Fatal.            |                       | Medical Aid.                      |                               | Permanent Total Disability Reserve. |

*Quebec.*—The Quebec Workmen's Compensation Commission was established in 1928 by authority of cc. 79 and 80 of the Statutes of that year. The Act was brought into force by proclamation on Mar. 22, 1928, operations of the Commission commencing as of Sept. 1, 1928. Under this Act, the Quebec Commission did not insure employers against their liability. On Apr. 4, 1931, a new Act was enacted by the Quebec Legislature (21 Geo. V, c. 100), effective Sept. 1, 1931, providing for state insurance, practically along the same lines as the Workmen's Compensation Act of Ontario. This new Act was amended by 23 Geo. V, c. 98, enacted on Apr. 13, 1933; by 25-26 Geo. V, c. 80, enacted on Apr. 11, 1935; by 1 Edw. VIII, cc. 39-40, enacted on Nov. 12, 1936; and by 1 Geo. VI, c. 94, enacted on May 20, 1937. Table 10 shows the operations of the Quebec Commission from Sept. 1, 1928, to Dec. 31, 1937.

<sup>1</sup> Figures subject to revision.

*Ontario.*—Under the system operated by the Ontario Workmen's Compensation Board in Schedule 1, where the liability is collective, 24 classes of industries pay various percentages of their payrolls annually to the Board, and escape individual civil liability for accidents and certain specified industrial diseases. The percentage of payroll collected by the Board is graded according to the degree of hazard in the occupation and ranged in 1937 from 20 cents per \$100 of payroll in printing to \$14.30 for wrecking and window cleaning. The average for all classes was \$1.39 per \$100 of payrolls which amounted to \$488,259,000. Certain other industries under Schedule 2, including municipal undertakings, railways, car shops, telegraphs, telephones, etc., are made individually liable to pay the rates of compensation fixed under the Act. Employees of the Dominion or of the province, killed or injured in the discharge of their duty, are by special legislation placed on the same footing as those of private employers of the second class.

Statistics of the benefits awarded and the accidents to workers reported during the 23 years of the operation of the Act appear in Table 11. During the year 1937, 66,868 accidents were *paid for*, including 353 cases of death, 20 of permanent total disability, 1,091 of permanent partial disability, 29,806 of temporary disability, and 35,098 in which medical aid only was provided; the latter are all under Schedule 1, as medical aid in Schedule 2 cases and Crown cases is furnished directly by the employer.

<sup>1</sup>No provision for medical aid.

<sup>2</sup>Half year only.

*Manitoba.*—Under the Workmen's Compensation Act, effective Mar. 1, 1917, Part I of the Act, dealing with workmen in hazardous occupations, is administered by the Workmen's Compensation Board, which charges insurance rates according to the hazard of the industry, the sums received by the workman being in lieu of the rights of action previously existing. The province, the city of Winnipeg, and certain corporations operating public utilities are permitted by the law to practise self-insurance.

The Workmen's Compensation Board also administers the provisions of the Dominion Act respecting payment of compensation of employees of His Majesty who are killed or suffer injuries while performing their duties, being c. 15 of the Statutes of 1918 and subsequent amendments.

From the date of the coming into force of the Manitoba Workmen's Compensation Act to Dec. 31, 1936, the Board has dealt with 119,103 compensable accidents and paid out \$15,490,867 for compensation and medical aid. Of the accidents in 1936, 4,860 involved medical aid costs only, 4,186 involved temporary and 216 permanent disability, while 37 resulted in death. The figures quoted above and hereunder cover accidents dealt with under both provincial and Dominion legislation.

*Saskatchewan.*—The Workmen's Compensation (Accident Fund) Act became fully effective July 1, 1930, and covers practically all employees in the province except railway employees engaged in the running trades, casual workers, farm and ranch labourers, domestic and menial servants, janitors, retail store employees, and persons who cannot be classed as workmen.

The Act is administered by a Board of three and imposes compulsory collective liability on the employers covered. The schedule of benefits is similar to that provided by other compensation Acts. Table 13 shows the number of accidents and benefits paid to the end of 1936.

*Alberta.*—The Workmen's Compensation Act of 1918 became effective Aug. 1, 1918, as regards mining, and Jan. 1, 1919, in respect of almost all industries except agriculture, railroading, and the operation of retail stores and offices. Railroading (except for the running trades) was brought within the scope of the Act in 1919, and a further amendment in 1928 left only conductors and trainmen exempt from the operations of the Act.

Table 14 shows the operations of the Board for the calendar years 1921 to 1936. Of the 12,381 accidents reported in 1936, 39 were fatal and 91 resulted in some permanent injury. The amounts shown below do not include sums transferred to the pension fund, which had assets amounting to \$3,217,085 on Dec. 31, 1936, nor do they include administration expenses nor sums set aside to cover estimated liabilities. The numbers of accidents compensated shown in the last column do not include claims disposed of by payment only of account for medical aid.

*British Columbia.*—The Workmen's Compensation Act, effective Jan. 1, 1917, provides compulsory accident insurance in almost every industrial occupation carried on in the province, protecting in 1936 approximately 135,000 employees with a payroll of almost \$145,000,000. Insurance rates levied against employers are graded according to the hazard of the industry. All employers under the Act are required, in addition, to deduct one cent per day or part thereof from the wages of employees and to remit this money to the Board to the credit of the medical aid fund, which provides all necessary medical, surgical and hospital expenses for injured employees. Silicosis was added as an industrial disease in metal mining commencing Jan. 1, 1936. For figures see Table 15.

### Section 8.—Strikes and Lockouts.

Statistics of strikes and lockouts in Canada have been collected by the Dominion Department of Labour since its establishment in 1900. Table 16 shows the numbers of disputes, of employees involved in disputes, and the time loss in working days for each year from 1921 to 1937 and the totals for the period 1901-20, inclusive. The items in the columns headed "time loss in man-working days" in the tables following are calculated by multiplying the number of persons directly involved in strikes and lockouts by the number of working days they are so affected during the time the disputes are in existence. Tables 17 and 18 give detailed analyses, by provinces and by industries, for 1936 and 1937.

Summary tables of the figures with details as to strikes and lockouts during 1937 will be found in the *Labour Gazette* for March, 1938, pp. 241-271.

**Industrial Disputes in Recent Years.**—From 1930 to 1937 the figures as to numbers of strikes and lockouts, numbers of employees involved and time loss were substantially greater than during the period 1926 to 1930, but were still much lower than during the years prior to 1926 when coal-mining strikes involved large numbers of employees and resulted in great time loss. Since 1930 most of the important disputes have been in clothing manufacturing, logging, sawmilling and wood-working industries, with a substantial number in coal mining. In 1937, as in 1936, there were important disputes in textile factories, especially cotton, both in Quebec and Ontario. Other disputes of importance were of coal miners at Stellarton, N.S., and Minto, N.B., lumber mill workers in Miramichi district, N.B., foundry and ship repair workers at Sorel, Que., women's clothing workers at Montreal, Que., automobile workers at Oshawa, Ont., loggers at Flanders, Ont., meat packers at Calgary and Edmonton, Alta., also at Vancouver, B.C. The number of disputes in 1937 was 278 as compared with 156 in 1936, the number of workers involved was 71,905 as compared with 34,182 in 1936, and the time loss 886,393 man-working days as compared with 276,997 in 1936. Table 16 includes figures regarding coal mining, industries other than coal mining, and all industries.

## 16.—Strikes and Lockouts in the Coal Mining, Other, and All Industries in Canada, calendar years 1921-37.

NOTE.—For the years 1901-20, see the 1933 Year Book, p. 763.

<sup>1</sup> Revised since the publication of the 1937 Year Book.

Table 17 is a record of industrial disputes by provinces for the years 1936 and 1937. In 1936, the important disputes by provinces and industries were as follows: in Ontario in textile and clothing manufacturing; in British Columbia in fishing, logging and water transportation (longshoremen); in Nova Scotia in coal mining; in Quebec in cotton, silk and dress manufacturing, and in transportation (taxi drivers); in Alberta in coal mining; and in Manitoba in fur and men's work-clothing manufacturing. In 1937 the important strikes by industries were located in the provinces as follows: in Ontario in textile, automobile, furniture, sawmilling, rubber, boot and shoe industries, and water transportation (pulpwood loaders and longshoremen); in Quebec in textile, clothing, meat-packing, foundry and ship repair industries; in Nova Scotia in coal mining; in New Brunswick in coal mining and sawmilling; in Manitoba in fur manufacturing; in Alberta in coal mining and meat packing; in British Columbia in gold mining and meat packing.

## 17.—Strikes and Lockouts, showing Numbers of Workers Involved and Time Loss, by Provinces, calendar years 1936 and 1937.

<sup>1</sup> Non-ferrous smelting is included with "Mining"; erection of all large bridges is under "Bridge" Construction; water service is under "Public administration".

<sup>2</sup> None reported.

**Causes and Results of Industrial Disputes.**—In each of the previous years since the record was begun in 1901, the most important cause of disputes has been changes in wages, but in 1936 and in 1937 union questions led to a great number of disputes and involved very large numbers of workers. Nearly one-half of the strikes were caused by wage demands, and one-third by union demands—chiefly for recognition of union or against discharge of workers for union membership or activity. Strikes for union recognition were responsible for more than half of the time loss in

1937, involving one-third of the workers. As in 1936, about one-half of the disputes were terminated by direct negotiation between the parties and approximately one-quarter by the return of workers or their replacement.

In 1935, 1936, and 1937 there was a marked gain in the proportion of strikes settled by conciliation and arbitration, such proportion being roughly one-quarter as compared with about one-eighth in previous years.

## Section 9.—Employment and Unemployment.

### Subsection 1.—Operations of the Employment Service of Canada.

**Employment Service of Canada.**—Under Sec. 3 of the Employment Offices Co-ordination Act (c. 57, R.S.C., 1927), an Act passed by the Dominion Parliament in May, 1918, the Minister of Labour is empowered:—

"(a) to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them;

"(b) to establish one or more clearing houses for the interchange of information between employment offices concerning the transfer of labour and other matters;

"(c) to compile and distribute information received from employment offices and from other sources regarding prevailing conditions of employment."

The Act further provides that certain sums of money are to be appropriated annually and paid to the provinces on a basis proportionate to the amount that each expends on the maintenance of employment offices.

The desired uniformity and co-ordination of employment-office activities throughout the various provinces are obtained by having the Dominion's payments contingent upon an agreement ensuring that the provinces, in the conduct of their employment offices, shall endeavour to fill situations in all trades and occupations for both men and women, and that no charge shall be made to employers or employees for this service. Each province agrees to maintain a provincial clearance system in co-operation with the interprovincial clearance system established by the Dominion Government, in order to secure the necessary mobility of labour as between localities in the same province or in different provinces. For the fiscal year 1937-38, agreements were concluded with all of the provinces except Prince Edward Island. Thus is formed the Employment Service of Canada—a chain of employment offices reaching from Halifax to Vancouver. At the time the Act came into force only 12 provincial employment offices were operated in Canada. This number was steadily increased until, at the close of 1919, due to the impetus given by the Employment Offices Co-ordination Act together with the requirements of the demobilization period, offices were functioning at 84 different centres. Subsequent contractions have reduced the Service to offices permanently located at 68 centres (on Dec. 31, 1937), distributed by provinces as follows: Nova Scotia, 3; New Brunswick, 4; Quebec, 11; Ontario, 28; Manitoba, 2; Saskatchewan, 7; Alberta, 5; and British Columbia, 8.

**Employment Service Council of Canada.**—An Order in Council, issued in 1918 in pursuance of the Act, provided for the formation of a body to be advisory to the Minister of Labour in the administration of the Act. This body, known as the Employment Service Council of Canada, is composed of representatives of the Dominion Departments of Labour and of Pensions and National Health, the Provincial Governments, the Canadian Manufacturers' Association, the Canadian Construction Association, the Trades and Labour Congress of Canada, the Railway Association of Canada, the Railway Brotherhoods, the Canadian Lumbermen's Association, the Canadian Council of Agriculture, and the returned soldiers. At the eleven meetings of the Council, the most recent of which was held on Aug. 21-22, 1930, various recommendations and suggestions relative to employment office administration were brought forward and presented to the Minister.

**Operations of Employment Offices.**—Statistics covering the work of the local offices are collected and tabulated by the Employment Service Branch of the Department of Labour. Table 19 shows the positions available, applications for work and placements effected by the Service in each year since 1920 for the Dominion, and for the years 1936 and 1937 by provinces. During 1937 there were 712,223 applications for employment, 418,388 vacancies and 389,536 placements recorded, as compared with 680,053 applications, 355,376 vacancies and 331,450 placements in 1936. About 29 p.c. of the total placements were of a casual nature, many of these being the result of work given on a rotation basis by municipalities and Provincial Governments on various relief schemes throughout the year to persons who, otherwise, would have been unemployed.

**Reduced Railway Fares.**—In order to facilitate the movement of labour in cases where there were not enough workers in any one locality to fill the available vacancies, the Employment Service, by special arrangement with nearly all the members of the Canadian Passenger Association, has been granted the privilege of issuing certificates which entitle the bearers to purchase railway tickets at the reduced rate of 2.5 cents per mile. This rate is for a second-class ticket and is applicable only to fares of not less than \$4. During 1937, 14,158 certificates were issued, 11,961 to persons proceeding to points within the same province as the dispatching office and 2,197 to workers going to points in other provinces. During 1936, 9,045 certificates for special rates were granted, 8,254 to persons travelling to employment within the same province as the dispatching office and 791 to persons for whom employment had been secured in other provinces.

**19.—Applications for Employment, Positions Offered, and Placements Effected by the Employment Service of Canada, 1920-37, and by Provinces, 1936 and 1937.**

**NOTE.**—Figures by provinces for the years 1920-25 will be found at p. 708 of the 1926 Year Book, for 1926-29 at p. 721 of the 1930 Year Book, for 1929-30 at p. 773 of the 1931 Year Book, for 1931-32 at p. 708 of the 1933 Year Book, for 1933 at p. 826 of the 1934-35 Year Book, and for 1934-35 at p. 707 of the 1936 Year Book.

## Subsection 2.—Unemployment as Reported by Trade Unions.

Monthly statistics on unemployment are compiled and published by the Employment Service Branch of the Dominion Department of Labour, based on returns received from 1,800 local trade unions having an aggregate membership of nearly 202,000 workers. "Unemployment" as here used means involuntary idleness, due to economic causes. Persons engaged in work other than their own trades, or idle because of illness, are not considered as unemployed, while unions involved in industrial disputes are excluded from the tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentages of unemployment are based, it should be understood that the figures for each month have reference only to the reporting organizations. Table 20 is a record of unemployment in trade unions, for the past 12 years, by provinces. The maximum of unemployment in 1937 was in January, when the percentage stood at 14.5; the 1937 low was 7.6 p.c. recorded in August. In 1936 the April figure of 15.1 p.c. constituted the maximum, and the minimum of 10.8 p.c. was reached in August. Employment among organized workers, as indicated by these statistics, was more active on the average in 1937 than in 1936, the average of the monthly figures of unemployment for 1937 being 10.7 p.c., while for 1936 the corresponding figure was 13.2 p.c.

## 20.—Percentages of Unemployment in Trade Unions, by Provinces, half-yearly, 1926-36, and by months, 1937.

NOTE.—For percentages of unemployment at June 30 and Dec. 31 from December, 1915, to December 1925, see p. 827 of the 1934-35 edition of the Year Book. For data by months from 1921, see successive issues of the Year Book commencing with the 1922-23 edition.

### Subsection 3.—Employment as Reported by Employers.

The Dominion Bureau of Statistics tabulates monthly reports of the numbers employed by firms having 15 or more persons on their staffs; the returns are representative of practically every industry except agriculture and the more specialized business and professional callings. During 1937, about 10,200 of these employers reported an average working force of 1,085,831 persons, varying from 975,862 at Mar. 1, to 1,197,647 at the beginning of October.

These employment statistics have been shown in a special study\* which correlates the distribution of workers covered in 1931 with the distribution of workers enumerated at the 1931 census, to be representative, as far as several major industrial groupings are concerned, of the census classification.

The census of occupations showed 2,570,097 wage-earners in the Dominion, of whom 2,100,139 or 81.7 p.c. were at work on the census date (June 1, 1931). Obviously it is with those at work that the monthly employment figures for the same date must be compared. The 7,865 firms making returns for June 1, 1931, reported 940,875 employees, being 36.6 p.c. of the total number of persons reporting themselves as actual or potential wage-earners, and 44.8 p.c. of those at work in all industries at the census date. When the classes of workers not covered in the employment surveys are deducted from the census figures, there remains a total of 1,318,954 persons at work at the census date in the industries sampled in the monthly record, or a total of 1,369,351 if a due proportion of the unspecified workers is included. The employment survey for June 1, 1931, constituted 71.3 p.c. of this adjusted figure, i.e., of the census total for the comparable industries without the unspecified workers, and 68.7 p.c. if a proportion of the unspecified workers is regarded as belonging in the census statistics adjusted industrially for this comparison. This sample may be considered quite adequate, but it would be rather larger if comparison could be made with a similar census taken at the present time, since the number of co-operating firms is constantly growing, having risen from 7,905 at June 1, 1931 to 10,178 at June 1, 1937, or 9,690 at June 1, 1936; the June 1 comparison is used so that the seasonal factor may not enter into the case. The increase in the co-operating employers is accompanied by a growth in the ratio of wage-earners sampled, though the latter increase is not in proportion to the gain in the number of reports tabulated, owing to the fact that the firms now being added to the mailing list tend to employ staffs below the average.

Representation in "Manufacturing" when correlated, is shown to be 82.8 p.c. of the workers enumerated at the census in the same industrial group; in mining it was 96.9 p.c.; in communications 80.4 p.c.; and in transportation 64.2 p.c. It follows that the figures of employment collected monthly may be used as a good index of the movement of the wage-earning population in intercensal years. (See also p. 741).

Employment as reported by leading employers in Canada was unusually active in 1937, reaching a level only surpassed by that of the boom year, 1929. The index, (based on the 1926 average as 100) averaged 114.1 in the twelve months; as compared with the 1936 mean of 103.7, this was an increase of 10 p.c., which was decidedly larger than the gain recorded between any other consecutive years, with the exception of that reported in 1934 over 1933. In the seventeen years of the record, the 1937 average index was only exceeded by that of 119.0 in 1929.

\*See the report "Comparison of the Geographical and the Industrial Distribution of the Workers included in the Monthly Employment Surveys, with the Geographical and Industrial Distribution of the Workers enumerated at the Census of 1931", by M. E. K. Roughsedge, obtainable from the Dominion statistician, Ottawa.

The fluctuations in general industrial employment in the past 12 years are illustrated in the following chart. This shows, to September, 1937, the generally upward movement that has characterized industrial activity since the low point of employment in the depression was reached at April, 1933.

The generally high level of industrial activity in 1937 was accompanied by a diminution in unemployment, though this was not commensurate with the advance in employment. The Census Analysis Branch of the Dominion Bureau of Statistics in a comprehensive study\* of the known facts regarding employment, unemployment, and population in Canada, has evolved very significant estimates of the total number of wage-earners, of those in employment and those unemployed; the estimates cover workers in all industries, including agriculture and other important classes necessarily excluded from the monthly employment surveys. During 1937, the average number of wage-earners was estimated at 2,802,000, of whom 2,452,000 were employed and 349,000 were unemployed. In 1936, the estimated number of wage-earners was 2,671,000, of whom 2,225,000 were employed and 447,000 were unemployed. Based on these estimates, the unemployed in 1937 constituted some 12.5 p.c. of the total wage-earners, as compared with 16.7 p.c. in 1936. In 1928, when unemployment was at the minimum in the years since 1921, this proportion had been estimated at 2.5 p.c., and in 1929, at 4.2 p.c. The low point of the depression was reached in 1933, when it was estimated that, on the average, there were 265 unemployed men and women in each thousand wage-earners.

In the chart on p. 770 are depicted the fluctuations since 1921 in the estimated number of wage-earners, of those in employment and those unemployed, showing that in 1937 the potential and actual wage-earners reached their maxima while the estimated number of unemployed, though still abnormally large, was smaller than in any other year since 1930.

\*See monograph "Unemployment" by M. C. McLean, M.A., which may be obtained from the Dominion Statistician.

**Employment by Economic Areas.**—The employment reported by leading industrial establishments was in considerably greater volume in 1937 than in 1936 in the Maritime Provinces, Quebec, Ontario, and British Columbia, but in the Prairie Provinces the situation was generally unchanged. In the Maritime Provinces and Quebec, industrial activity was higher than in any other year of the record, while in Ontario the 1929 index only was higher than that for 1937. In each of the economic areas, general improvement was noted in manufacturing, logging, mining, services, and trade, although the rate of increase varied in the different divisions of the country. A higher level of employment was indicated in transportation, except in the Prairies, where there was a slight decline, due to the crop failures in many sections. Construction in the western areas was also slacker than in 1936.

**21.—Index Numbers of Employment as Reported by Employers in Economic Areas, as at the First of each Month, January, 1936, to December, 1937, with Yearly Averages since 1921.**

*Note.*—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated economic area to the total reported by all employers making returns in Canada at Dec. 1, 1937.

| Year.               | Maritime Provinces. | Quebec. | Ontario. | Prairie Provinces. | British Columbia. | Canada. |
|---------------------|---------------------|---------|----------|--------------------|-------------------|---------|
| Averages, 1921..... | 102.4               | 82.2    | 90.6     | 94.0               | 81.1              | 88.8    |

| <b>Averages, 1937.....</b>  | <b>121.0</b>           | <b>115.4</b> | <b>118.3</b> | <b>99.3</b>           | <b>106.8</b>         | <b>114.1</b> |
| Relative weights of employment in economic areas, as at Dec. 1, 1937 <sup>2</sup> ..... | 7.6                    | 31.1         | 42.3         | 11.1                  | 7.9                  | 100.0        |

<sup>1</sup>Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

<sup>2</sup>Percentages of Dominion total.

**Employment by Cities.**—Improvement was reported in each of the eight centres for which statistics are segregated, firms in Montreal, Quebec city, Toronto, Ottawa, Hamilton, Windsor, Winnipeg, and Vancouver affording more employment than in 1936. The greatest gains, proportionately, were in Hamilton and Windsor, where marked activity in the iron and steel industries brought employment to an unusually high level, only exceeded in the former by that of 1928 and 1929, and in the latter by that of 1929. The indexes in these two centres were higher than in any other of the eight, while the lowest indexes were in Winnipeg, Quebec city, and Montreal.

Despite the generally upward movement indicated in the year under review, industrial activity in the leading cities, taken as a unit, continued to lag behind that in the Dominion as a whole, their 1937 indexes averaging 105.8, as compared with the Canada index of 114.1. In the four years of general industrial revival from the low point of the depression, indeed, the improvement in these cities has not kept pace with that in the Dominion as a whole.

Employment in manufacturing, communications, trade, and construction in the larger cities generally, does not yet appear to have reached a level equal to that in other parts of Canada. The most outstanding difference in this comparison is, of course, in construction, in which the index for the cities averaged 62.7 during 1937,

compared with the Canada figure of 99.5; in the building division, the indexes were 50.9 and 60.1, respectively. On the other hand, transportation in the cities appears relatively more active, their index at 91.9, being 7.8 p.c. higher than the figure for the Dominion as a whole. In the service division, the level of employment in the larger cities was similar to that elsewhere recorded.

**22.—Index Numbers of Employment as Reported by Employers in Leading Cities, as at the First of each Month, January, 1936, to December, 1937, with Yearly Averages since 1922.**

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated city to the total reported by all employers making returns in Canada at Dec. 1, 1937.

<sup>1</sup> Not available.

<sup>2</sup> Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here shown for the 13 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

<sup>3</sup> Percentages of Dominion total.

**Employment by Industries.**—An analysis of the data furnished by employers shows that practically all industries shared in the improvement reported in 1937 over 1936, while in many cases, the situation was also more satisfactory than

in any other year since 1929. Manufacturing experienced during 1937 a lengthy period of uninterrupted expansion. All branches of factory employment contributed in greater or less degree to the recovery, which resulted in a higher level of industrial activity than in any other year since 1929.

Mining, particularly of metallic ores, advanced during many months of the year just passed, with the result that employment in the group as a whole was at its maximum for the seventeen years of this record. Logging showed exceptionally pronounced increases, and in that industry also, activity during 1937 reached the highest point yet recorded.

The volume of employment afforded in trade was greater than in any other year for which data are available, while in services (mainly hotels and restaurants, and laundries and dry-cleaning establishments), the 1937 annual index was only exceeded by that for 1929. Improvement in general business conditions in the Dominion, together with an excellent tourist season, resulted in the favourable situation in these industries during 1937. Communications provided employment for a greater number of persons than in any other year since 1932, but the index number in this industry was lower than in preceding years since 1921. Transportation showed little general change; although it was slightly more active than in the period 1932-36, it was quieter than in earlier years of the record.

Construction generally, was brisker than in 1936 or 1935, and also afforded more employment than in 1933 or 1932; nevertheless, employment in this industry continued at a relatively low level. Railway construction provided work for a larger number of workers than in the period, 1932-35, but was quieter than in 1936, when many men had been transferred from the unemployment relief camps to the construction departments of the railways. The building contractors furnishing data reported, on the whole, a rather better situation than in any other year since 1931. Work on the highways was also more active than in 1936, approximating the 1935 volume. In the past few years, the unemployment relief programs of the various governments have been an important factor in the employment afforded in the construction industries.

**23.—Index Numbers of Employment as Reported by Employers, by Industrial Groups, as at the First of each Month, January, 1936, to December, 1937, with Yearly Averages since 1921.**

*NOTE.*—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of the employees reported in the indicated industry to the total reported by all employers making returns in Canada at Dec. 1, 1937.

<sup>1</sup> Except agriculture (see p. 768).

<sup>2</sup> Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

<sup>3</sup> Percentages of Dominion total.

#### Subsection 4.—Employment and Unemployment Statistics of the Census.

In the 1933 edition of the Year Book, pp. 775-780 were devoted to an examination of the preliminary figures of unemployment as reported at June 1, 1931, for that date and for the preceding twelve months. The final results of this inquiry are available in Vol. VI of the Census Publications, which may be obtained from the King's Printer, Ottawa, at a price of 75 cents for the paper-bound volume.

Tables 24 and 25, on p. 836 of the 1934-35 Year Book, summarize, by industries, the statistics of those actually unemployed at the date of the Census, and of time lost during the twelve months preceding that date.

#### Subsection 5.—Unemployment Relief.

The assistance rendered by the Dominion Government under the Unemployment Relief Act, 1930, the Unemployment and Farm Relief Act, 1931, the Relief Act, 1932, the Relief Act, 1933, the Relief Act, 1934, the Relief Act, 1935, and the Unemployment Relief and Assistance Act, 1936, is set out in previous issues of the Canada Year Book. The recapitulation appearing at the end of this statement shows the Dominion's disbursements under those statutes as at Dec. 31, 1937.

The Unemployment and Agricultural Assistance Act, 1937.—At the second session of the Eighteenth Parliament the Unemployment and Agricultural Assistance Act, 1937, which received Royal Assent on Apr. 10, 1937, was enacted. This statute, the administration of which was vested in the Minister of Labour, provided that the Governor in Council might authorize the execution of works and undertakings determined to be in the general interests of Canada. It was further provided by the statute that agreements might be entered into by the Governor in Council with any of the provinces respecting the alleviation of unemployment conditions and of agricultural distress therein, and for the granting of financial assistance to any province by way of loan, advance or guarantee for the purpose of assisting the province to pay its share of the expenditure for such purposes.

*Grants-in-Aid.*—Under the provisions of the Unemployment and Agricultural Assistance Act, 1937, the Dominion continued throughout the fiscal year 1937-38 to assist the provinces in discharging their responsibilities in connection with the granting of aid to necessitous persons by way of a monthly grant-in-aid. The amounts of the monthly grants-in-aid paid to each of the provinces for the months of April to December, 1937, inclusive, are set forth in the following statement:—

| Province.                 | April, 1937, to<br>June, 1937,<br>inclusive. | July, 1937, to<br>September, 1937,<br>inclusive. | October, 1937, to<br>December, 1937,<br>inclusive. |
|---------------------------|--|--|--|

| Totals.....               | 1,817,000 per month                          | 1,566,300 per month                              | 1,519,250 per month                                |

As a result of representations made by the province of New Brunswick to the effect that the granting of material aid had been discontinued, and an enlarged works program substituted therefor, the monthly grant-in-aid to that province was replaced by Dominion contribution toward the cost of the province's relief works expenditures of an additional amount equal to that which would have been paid to the province by way of grant-in-aid had such been necessary.

*Relief Works.*—In addition to the payment of the aforementioned monthly grants-in-aid agreements with all the provinces were authorized under the provisions of the Unemployment and Agricultural Assistance Act, 1937, providing for Dominion contribution toward the cost of works consisting in the main of Trans-Canada Highway and provincial highway works, provincial works, and, in some provinces, municipal works. Dominion contribution to the province's works program was generally on a fifty-fifty basis.

*Farm Placement.*—The agreements entered into with the provinces of Prince Edward Island, New Brunswick, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia, under the Unemployment Relief and Assistance Act, 1936, respecting the placement on farms of unemployed persons who would otherwise be in receipt of aid, necessarily expired on Mar. 31, 1937, together with the legislation under which they were executed. Under the provisions of the Unemployment and Agricultural Assistance Act, 1937, these agreements were, at the request of the provinces, extended to Apr. 30, 1937. Later in the year agreements effective from

Oct. 1, 1937, to Mar. 31, 1938, were entered into with the four western provinces providing for the continuance of the Farm Improvement and Employment Plan along the same lines as provided by the 1936 agreements, that is, payment of \$5 per month to the farmer, and payment to the individual placed on the farm at a rate equal at the end of the period to \$7.50 per month. Provision was also made for the purchase of suitable work clothing at a cost not in excess of \$3 for each individual placed, while the necessary cost of transportation of workers from the point of employment to the home of the employing farmer was also contributed to by the Dominion under the terms of the agreements. The basis of the Dominion's contribution to the provinces under the provisions of the Farm Improvement and Employment agreements was the same as under the 1936 agreements, namely, 50 p.c., the provinces bearing all necessary administration expenses. The largest number of placements during any one month under the 1936 agreements was effected during January, 1937, when 43,915 persons were placed.

*Drought Relief.*—As the serious drought conditions in the large agricultural areas of the Prairie Provinces prevalent during 1936 were still existent at Mar. 31, 1937, the date of the expiration of the agreements entered into under the Unemployment Relief and Assistance Act, 1936, for aid in these areas, provision was made for the extension of the agreements to Aug. 31, 1937. These agreements provided for Dominion contribution of 100 p.c. of the costs, exclusive of administration expenses, incurred by the three provinces in distributing food, fuel, clothing; and necessary shelter to all permanent residents of the defined areas in need of material aid, except those located in cities or towns within the areas. The latter were cared for by the provinces and municipalities with the assistance of the Dominion grants-in-aid. Provision was made in the agreements that the measure of aid granted pursuant to the arrangement should not exceed that given to similar needy in other rural sections of the provinces. Effective from Sept. 1, 1937, the administration of aid in the drought areas was, in conformity with the recommendations of the National Employment Commission, transferred to the Department of Agriculture in order that the different groups of relief recipients might be segregated, and that agricultural assistance might be distinguished as far as possible from unemployment aid.

*Youth Training.*—To help the situation caused by the volume of unemployment among young people which existed concurrently with an increasing measure of industrial recovery and with a growing demand for skilled workers, Parliament voted the sum of \$1,000,000 to the Department of Labour to be used during 1937-38 for training and development projects for "unemployed young people" between the ages of 18 and 30. This fund was established to provide for: (a) training projects of an occupational nature devised to increase the skill and employability of young people; (b) industrial learnership courses devised to provide theoretical training concurrent with employment; (c) work projects devised to conserve natural resources, as well as to train and recondition the young people participating; and (d) training projects of a physical nature to assist in the maintenance of health and morale. Agreements were entered into with the provinces covering training projects suitable to their individual conditions. Some of the projects undertaken were as follows: forestry work; training in hard rock and placer mining; industrial apprenticeship and learnership; practical and technical training in agriculture; women's courses in household work, handicraft and other specialized services; and various forms of urban occupational training. Provision was made in the execution of these projects for vocational guidance, recreation and instruction in physical education. It was hoped by these means to make available for the primary and secondary industries a more adequate supply of skilled workers, and also to give an opportunity of training

to those young people who, having been unemployed for some years, had lost the advantages of their education and had never had an opportunity to acquire industrial skill. The cost of these youth-training projects was shared by the Dominion and the provinces on an equal basis, the provinces bearing all expenses of administration.

**Relief Settlement.**—The Dominion continued to assist the provinces of Quebec, Manitoba, Saskatchewan and Alberta in placing selected families, who would otherwise be in receipt of material aid, on the land under the relief settlement plan outlined at p. 762 of the 1937 Canada Year Book. The number of settler families and individuals approved and settled under the various agreements entered into with the provinces respecting relief settlement since 1932 are set forth in Table 24.

**24.—Number of Settler Families and Individuals Approved and Settled under the Relief Acts Agreements, to Dec. 31, 1937.**

| Province.             | Settler Families. | Total Individuals. |
|-----------------------|-------------------|--------------------|
| Nova Scotia.....      | 343               | 2,154              |

### Subsection 6.—National Employment Commission.\*

After the presentation of its final report to the Government on Jan. 26 the National Employment Commission was dissolved on Feb. 1, 1938. On July 31, 1937, the commission had presented an interim report covering its activities from June 1, 1936, to June 30, 1937, and containing a summary of the recommendations made up to the latter date. This interim report, of which approximately 7,000 copies were distributed, was subsequently made an appendix to the final report.

During the year 1937 the Commission continued its activities, including a national re-registration and classification of persons in receipt of unemployment aid and the promotion of the Dominion Government Home Improvement Plan. The former was improved and speeded up so that figures were available with a minimum of delay. Promotion of the Home Improvement Plan, including the establishment of local and provincial voluntary committees throughout Canada, produced very satisfactory results. Not only were direct loan totals of considerable size, but it is estimated that expenditures on home improvement stimulated by the Plan but not involving borrowing were much larger. It is probable that such improvement as has been evident in the building industry can be attributed, in appreciable measure, to the success of the Home Improvement Plan.

Starting with July, 1937, the Commission issued a monthly information bulletin (25,000 copies) which circulated widely throughout Canada. This publication was designed to cover various phases of the Commission's attack on relief and unemployment and to clarify obscure features of these problems. It also provided a medium for issuing the monthly statistical breakdown of relief figures and other pertinent data.

A report on phases of employment conditions in Canadian industry, based on 7,725 replies to a questionnaire circulated among employers with more than 15 employees each, was completed. A great deal of valuable statistical data on employment conditions has thus been made available in compact form and distributed.

The Farm Improvement and Employment Plan, which resulted in placing 46,961 single unemployed persons, of whom 38,606 were males and 8,355 females, on farms during the winter of 1936-37, was again put into operation by the Government in the winter of 1937-38 and over 40,000 persons were placed. Supplementary plans provided for 6,784 men in the winter of 1936-37 and for approximately 2,500 men in that of 1937-38.

The Commission co-operated with the Department of Labour in reviewing all provincial plans for youth training and reconditioning under the Dominion appropriation of \$1,000,000 for that purpose. Studies of women's employment problems were made by the Women's Employment Committee and certain suggestions based on them incorporated in the final report. The importance of the tourist industry as a factor in enlarging employment opportunities was fully realized by the Commission and prompted recommendations calculated to develop and stimulate this trade.

The final report crystallized the views of the Commission on 'long range' policies and dealt at some length with methods which might be utilized to avoid, or at least to mitigate, unemployment conditions similar to those through which Canada had been passing. Drawing attention to the fact that the Commission had so far functioned almost entirely in an advisory capacity, it expressed the view that such work was substantially completed. The translating of Commission

\* See 1937 Year Book, pp. 1052-1053.

recommendations into practical effect required a different type of activity, administrative as distinct from advisory. It recommended that the National Employment Commission be succeeded by a small administrative committee to be entrusted with the practical implementation of National Employment Commission recommendations as approved by the Dominion Government.

## Section 10.—Old Age Pensions and Pensions for Blind Persons.

**The Old Age Pensions Act, 1927.**—Legislation respecting Old Age Pensions (R.S.C., 1927, c. 156) was adopted by the Dominion Parliament in 1927. Under the provisions of this statute the Dominion Government reimbursed each province participating in the Dominion scheme to the extent of one-half of the provincial expenditure for old age pensions. An amendment passed at the 1931 session of Parliament (c. 42, Statutes of 1931) provided that the Dominion contribution to the provinces be increased from 50 p.c. to 75 p.c. of the provincial disbursements for old age pensions. The Dominion contribution of 75 p.c. of provincial disbursements was made effective from Nov. 1, 1931; the provinces have since been reimbursed on this basis.

Sec. 5 of the Act provides that before any agreement is made with a province the scheme for the administration of pensions proposed to be adopted by the province shall be approved by the Governor in Council, and that no change in such scheme shall be made without the consent of the Governor in Council.

The qualifications required of an applicant for pension are set forth in Sec. 8 of the Act which reads as follows:—

(1) Provision shall be made for the payment of a pension to every person who, at the date of the proposed commencement of the pension:—

- (a) is a British subject, or, being a widow, who is not a British subject, was such before her marriage;
- (b) has attained the age of seventy years;
- (c) has resided in Canada for the twenty years immediately preceding the date aforesaid;
- (d) has resided in the province in which the application for pension is made for the five years immediately preceding the said date;
- (e) is not an Indian as defined by the Indian Act;
- (f) is not in receipt of an income of as much as three hundred and sixty-five dollars (\$365) a year; and
- (g) has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.

(2) The receipt of a pension shall not by itself constitute a disqualification from voting at any provincial or municipal election.

Sec. 9 provides that the maximum pension payable shall be \$240 yearly, subject to reduction by the amount of the income of the pensioner in excess of \$125 a year. The pension authority may accept a transfer of the pensioner's interest in a dwelling house in which he resides, in which case the value of the dwelling is not considered in calculating the amount of pension payable. Subject to certain conditions, the pension authority is entitled to recover out of the estate of any deceased pensioner the amount of pension payments with interest at 5 p.c. per annum, compounded annually.

Sec. 11 provides for the reduction of pension where a pensioner has resided for a portion of the 20 aforementioned years in a province with which no agreement has been made. Sec. 15 provides for the suspension of pension where a pensioner has transferred his residence to some place out of Canada. It is provided by Sec. 16 that a pension shall not be subject to alienation or transfer by the pensioner or to seizure in satisfaction of any claim against him.

The Governor in Council was empowered by Sec. 19 of the Act to make regulations pursuant to this section. Existing regulations were revised and approved by Orders in Council dated Dec. 9, 1937, and Feb. 3, 1938.

The Dominion Old Age Pensions Act is now operative in all provinces and in the Northwest Territories.

The Gold Commissioner of Yukon was given authority, by a Yukon Territorial Council Ordinance passed in 1927, to enter into an agreement with the Dominion Government for the purpose of obtaining the benefits of the Old Age Pensions Act for residents in the Territory. No proposed scheme of administration for adoption in Yukon has been submitted for the approval of the Governor in Council.

Table 26 is a financial summary of old age pensions in Canada as at the end of the calendar year 1937.

<sup>1</sup> Estimates of population on which these figures are based are given at p. 155. <sup>2</sup> Includes pay-  
ment for pensions granted Aug. 1 to Dec. 31, 1936. These contributions were made during 1937.

**Pensions for Blind Persons.**—By an amendment to the Old Age Pensions Act in 1937, provision was made for the payment of a pension to every blind person who, at the date of the proposed commencement of pension:—

- (a) is, and continues to be, so blind as to be unable to perform any work for which eyesight is essential;
- (b) has attained the age of forty years;
- (c) is not in receipt of a pension in respect of blindness under the Pension Act, or an allowance in respect of blindness under the War Veterans' Allowance Act;
- (d) is:—
  - (i) unmarried, or a widower without a child or children, or a widow without a child or children, and is not in receipt of an income of as much as four hundred and forty dollars a year, or—
  - (ii) married, or a widower with a child or children, or a widow with a child or children and is not in receipt of an income of as much as six hundred and forty dollars a year; and—
- (e) fulfils the conditions laid down in paragraphs (a), (c), (d), (e) and (g) of Subsection 1 of Section 8 of the Act.

The maximum pension payable to a blind person is \$240 yearly except in the case of a blind person, who, after the coming into force of the amendment to the Act, marries a person so blind as to be unable to perform any work for which eyesight is essential. The maximum pension in such a case is \$120 yearly.

The amended Act provides that pensions payable to blind persons shall be subject to reduction as follows:—

- (a) in the case of an unmarried person or a widower without a child or children or a widow without a child or children, by the amount of the income of the pensioner in excess of two hundred dollars a year;
- (b) in the case of a married person or a widower with a child or children or a widow with a child or children, by the amount of the income of the pensioner in excess of four hundred dollars a year;
- (c) in the case of a person married to a blind person receiving a pension under the amended Act, by the amount of the income of the pensioner in excess of two hundred dollars a year.

It is also provided that no blind person who is married, or is a widower with a child or children, or a widow with a child or children, shall be entitled to any pension in excess of the pension to which an unmarried person is entitled unless such married person and his or her spouse or such widower or widow and one or more of his or her children are living together.

The Governor in Council is empowered to make regulations with regard to pensions for blind persons and to define the expression "is so blind as to be unable to perform any work for which eyesight is essential".

## 27.—Financial Summary of Pensions for Blind Persons in Canada, by Provinces, as at Dec. 31, 1937.

## Section 11.—The Co-operative Movement in Canada.

A general article on "The Co-operative Movement in Canada" appeared at pp. 704-720 of the 1925 edition of the Year Book under the three sub-headings of "Consumers' Co-operation", "Co-operative Credit", and "Producers' Co-operation".\* Because of the pressure upon space, this article is not reprinted here, but

\*The article referred to above was prepared for the Year Book by Miss Margaret Mackintosh, M.A., of the Department of Labour, Ottawa.

a digest of the latest available material on each of these three subdivisions of co-operation follows, the presentation of producers' co-operation being confined to that among agricultural producers.

The Co-operative Union of Canada was formed in 1909, with six affiliated societies and 1,595 members. In 1936, 59 societies reported to the Union, their membership being 152,633. The sales of the reporting societies totalled \$9,803,754 and the purchase dividends returned to their members amounted to \$208,239. The classes of co-operative activities covered included retailing, wholesale trading, marketing, dairying, transportation societies, and buying clubs.

Since October, 1909, the Union has published a monthly, *The Canadian Co-operator*, from which these statistics and those in Subsection 1 have been taken.\*

### Subsection 1.—Consumers' Co-operation.

The statistics in Table 28, which cover only those retail societies reporting to the Co-operative Union of Canada, cannot be considered as strictly comparable due to the fact that, should a large society fail to report in any one year (and this has frequently happened in the past), an apparent decrease in the activities of the societies, not in line with actual conditions, would result.

The following notes, covering membership only, will help the reader to judge the real trend of consumers' co-operative activity. The increase of 624 in 1932 was due, in part, to the failure of 2 existing societies to report in 1931, although 3 new societies reported a membership of 583. Of the total increase of 1,354, in 1933, 1,058 was due to the reporting, for the first time, of 4 societies which had been in existence from 2 to 5 years, while one new society reported 57 members. In 1934, the apparent increase of 418 is modified by the fact that it includes 210 members of a society not reported in 1933, while one new society, with 44 members, reported in 1934. In 1935 the situation was complicated, since 6 societies which reported in the previous year failed to do so in 1935, their 1934 membership having totalled 736—on the other hand, 2 previously-existing societies, which did not report in 1934, reported 177 members and 3 new societies reported 525 members; as these two factors almost balance, it would appear that the existing societies increased their membership by nearly 600. In 1936 three new societies reported a membership of 461, while those established societies which reported in both 1935 and 1936 showed an increase in membership of 1,022; in addition, six buying clubs in Quebec and Ontario reported a membership of 739.

\*For details regarding the Co-operative Union of Canada and its activities, see the 1925 Year Book, pp. 706-709.

## Subsection 2.—Co-operative Credit in Quebec.

A form of co-operation which has achieved great success is that which provides short-term credit for small farmers and industrial workers in the province of Quebec. In 1900, what are known as "Les Caisses Populaires", or People's Banks, were begun with the establishment, by the late Alphonse Desjardins, of La Caisse Populaire at Lévis. M. Desjardins adopted the following principles: of lending money only for approved purposes to carefully selected members in a restricted area; of limited liability; of withdrawable shares of small amount payable by instalments; and of distribution of profits. These banks are for the most part established in agricultural districts. Loans are made to purchase agricultural implements at cash prices, to increase farm live stock, to improve farm buildings, to tide over a period of depression, to pay off a merchant, and for various similar purposes. The loans, though comprised within the term 'short credit', are for longer periods than are usual in ordinary commercial transactions because agricultural operations necessarily extend over longer periods than those of trade. They may be for 12, 15, or even 24 months, because they must give time for the farmer to realize on his products.

Details of organization may be found in the Statistical Year Book of Quebec, in the 1936 edition of which may be found statistics of the system as a whole. Complete information of the working of each individual bank, including such details as number of members and depositors, rates of interest paid, loans made and profits realized, classification of size of loans, receipts and expenses and a résumé of chief operations from 1917 to 1936, are published in the report entitled "Co-operative People's Banks and Co-operative Agricultural Societies".

Table 29 shows the progress of these banks by quinquennial years from 1915 to 1930 and annually since then.

29.—Progress of Co-operative People's Banks in Quebec, 1915, 1920, 1925 and 1930-36.

| 1935 <sup>1</sup> ..... | 202              | 43,045   | 42,856      | 11,987     | 12,175         | 2,803,748               | 472,543           |
| 1936.....               | 234              | 49,890   | 49,796      | 13,453     | 13,974         | 3,370,821               | 459,601           |

All figures for 1935 have been revised since the publication of the 1937 Year Book.

### Subsection 3.—Agricultural Co-operation in Canada in 1936.\*

Farmers' co-operative business organizations occupy an important position in the marketing of Canadian agricultural products. The activities of the larger organizations such as the wheat pools, live stock, and fruit co-operatives have reached a high stage of development, and have received world-wide recognition. In addition to these, there are hundreds of comparatively small organizations working effectively to serve local areas.

Available statistics show 1024 co-operative associations actively engaged in business in 1936. The 1024 associations have 2,963 branches which, combined, make a total of 3,987 places of business engaged in the marketing of farm products and the purchase of supplies for farmers. The shareholders and members financially interested number 396,918 and patrons reported total 451,231. Combined assets total \$87,938,453 with plant and equipment valued at \$36,333,952. The members' equity amounts to \$51,252,828, consisting of paid-up share capital \$9,265,747 and reserves and surplus of \$41,987,081. Sales of farm products for the year under review amounted to \$157,031,405. The sales value of supplies handled totalled \$16,363,966 and other revenue \$531,746, which, combined, make a total business of \$173,927,117.

Available records indicate that the most important early activity of farmers in the field of co-operation in Canada was directed toward the marketing of farm products. In comparing the volume of business, marketing associations transact 12 times the business handled by purchasing agencies. Membership in the co-operative marketing associations is given as 357,798 persons compared with 38,167 members in purchasing organizations.

Within the marketing group the grain and seed co-operatives, which include the wheat pools of Western Canada, have the largest membership and investment, and exceed all other commodity groups in volume of business, which is estimated at \$110,826,433 for the year under review. A membership of 190,576 grain growers contributed to this business through 2,156 co-operative marketing agencies. Mainly through deductions from the selling price of their grain, these members have invested a sum of \$37,109,909 in their business and in addition have paid up \$3,467,754 in share capital. Combined assets total \$68,456,819.

One hundred and forty-six dairy co-operatives with 428 depots in Canada reported a membership of 49,796 with assets valued at \$5,077,441. Paid-up share capital amounted to \$1,962,202 with reserves of \$948,634. Sales of dairy products totalled \$16,328,900 for the year under review.

The records for 115 live-stock shipping and marketing associations showed a combined membership of 46,719. Financing of these associations is mainly by membership fees and commissions. Assets were comparatively low with value of plant and equipment amounting to \$560,053. This accommodated a business of \$15,713,236. The live-stock co-operatives undertake very little processing of their product. Their main activity is the assembling of live stock in cars at producing points for shipment to central markets.

\*Statistics contained in this review are based on records received by the Economics Branch, Department of Agriculture, in 1937, covering the business year of 1936.

A large part of the fruit and vegetable crop is marketed through 129 co-operative agencies with a combined membership of 12,170 fruit growers. Assets for all companies total \$3,904,030; reserves and surplus amount to \$896,538. Sales of fruits and vegetables during the year amounted to \$8,192,975 which, together with supplies and other revenue, gave a total business of \$9,709,738.

Poultry producers have organized in each of the provinces to sell their products co-operatively. There were 57 associations with 280 places of business which reported a membership of 34,868. Assets amounted to \$533,193 with reserves of \$209,241. Sales for the year amounted to \$3,282,693.

Practically all the wool marketed co-operatively in Canada is handled by the Canadian Co-operative Wool Growers Limited. The company operates in each province through the medium of 18 sheep-breeders' and wool-growers' associations. The co-operative stores, grades and markets the wool received from its 8,000 patrons. In addition, it carries on advertising and educational work and handles materials and supplies for its members. The quantity of wool handled by the co-operative during the year amounted to 4,000,000 pounds.

In Ontario and Quebec, the honey producers are organized co-operatively with a combined membership of approximately 1,800. Two tobacco co-operatives in Ontario, and three in the province of Quebec report a total membership of 1,382 and sales of approximately \$500,000 for 1936. The *Producteurs de Sucre et Sirop d'Erable de Québec*, with a membership of 1,988, is organized on a co-operative basis. During the year under review the sales value of maple products marketed by this association amounted to \$456,048.

For years the Canadian National Silver Fox Breeders' Association has been engaged in the inspection of silver foxes for registration and the marketing of silver fox pelts in all the provinces of Canada. Sales of silver fox and other furs by this Company amounted to about \$1,500,000 in 1936. Operating within the province of Nova Scotia, the Nova Scotia Silver Fox Breeders' Association grades, warehouses, and markets fox pelts for its members in addition to carrying on valuable educational and field service work. Sales for the year under review amounted to approximately \$250,000.

Available statistics show 515 associations are organized for the purpose of purchasing farm supplies and merchandise on the co-operative plan. These consumer associations, of which nearly one-half are established in the province of Saskatchewan, have a combined membership of 38,167. The sales value of supplies handled during the year, by associations organized exclusively for the handling of supplies, amounted to \$12,304,994. In five of the provinces co-operative wholesale buying societies purchase goods for their member associations.

Within the miscellaneous group is included the Consumers' Refineries Co-operative Association Limited, Regina, Saskatchewan, which was incorporated in 1935 for the purpose of manufacturing petroleum products and selling them on a wholesale basis to local co-operative organizations throughout Saskatchewan. The co-operative completed its second year of operation successfully with sales amounting to approximately \$500,000.

For further information see Table 30, p. 786.

Subject to revision.

## Section 12.—Labour Legislation in Canada.

Owing to the division of legislative powers in Canada between the Dominion and the provinces under the British North America Act, labour legislation has been enacted by both the Dominion Parliament and the provincial legislatures, but most laws for the protection of workers are provincial.

Laws for the health and safety of persons employed in mines, factories, shops, and other places of business, other than transportation and communication services extending beyond the bounds of any province, and laws concerning trade unions, hours of work, wages, and workmen's compensation fall, in the main, under the head of "property and civil rights" or that of "local works and undertakings" and thus have been enacted by the provinces.

**Dominion Legislation.**—The Dominion Parliament has passed legislation relating to its own employees, to persons employed on Dominion public works and on works subsidized by the Dominion and to workmen employed in connection with railways and shipping. There are Dominion laws concerning trade unions, protecting trade union labels, for the prevention and settlement of industrial disputes and regulating picketing. The Lord's Day Act passed in 1906 prohibits Sunday labour except in works "of necessity and mercy". Regulations have been made to protect workers engaged in handling imported hides and skins from anthrax and there are laws prohibiting the importation and manufacture of matches made of white phosphorus and safeguarding persons handling explosives. The Alien Labour Act prohibits the bringing into Canada under contract of labour from any country placing a similar restriction on labour from Canada.

The Trade Unions Act permits the registration of trade unions with the Dominion Government. The agreements and trusts of registered unions, with certain exceptions, are enforceable and such unions may sue and be sued with respect to property in their own names.

Under the Criminal Code, trade unions are not liable to prosecution on the ground of conspiracy in restraint of trade and no prosecution may be maintained against any person for refusing to work with or for any employer or workman or for doing any act or causing any act to be done for the purpose of a trade combination unless such act is an offence punishable by statute. As regards picketing, it is declared an offence to beset or watch a house or place of business, if done wrongfully and without lawful authority, in order to compel any person to abstain from doing anything which he has a lawful right to do or to do anything from which he has a lawful right to abstain, but by an amendment of 1934 it is stipulated that "attending at or near or approaching to such house or other place as aforesaid, in order merely to obtain or communicate information, shall not be deemed a watching or besetting within the meaning of this section".

Any person is liable to a fine not exceeding \$5,000 or to two years' imprisonment or to both, who violates any law by paying a wage less than the legal minimum, by falsifying an employment record or by putting the wages of more than one employee in the same envelope in order to evade any law or who employs a child or minor in violation of any law.

Under the Fair Wages and Hours of Labour Act, 1935, persons employed on Dominion public works, either directly by the Government or by a contractor, or on work subsidized by the Government, must be paid fair and reasonable wages and their hours of work limited to eight a day and 44 a week, except when otherwise provided by the Governor in Council. Except in the case of work which is inter-

mittent or where it is impracticable to apply the rule, the hours of work of Dominion Government employees may not exceed eight a day with a half-holiday on Saturday.

As regards industrial disputes, there are two Dominion statutes, the Conciliation and Labour Act, a consolidation of two statutes of 1900 and 1903, and the Industrial Disputes Investigation Act of 1907. The former statute provided for the establishment of a Department of Labour, for the compilation and publication of information on labour matters and for the appointment of conciliators in industrial disputes.

The Industrial Disputes Investigation Act requires disputes in mines and public utilities, including railways and shipping, electric, gas, power, and water works, to be submitted to a tripartite board of conciliation and investigation, and reported on before a stoppage of work may be brought about by either employer or employed. With the consent of both parties to a dispute, a board may be established in any industry. The compulsory provisions of the Act apply to such of the above industries as are within Dominion jurisdiction and may be applied to those within provincial jurisdiction on enactment of a provincial law to that effect. Under such provincial statutes, the Act is in force in all the provinces but Prince Edward Island and British Columbia.

The Employment Offices Co-ordination Act enables grants to be made to the provinces to encourage the maintenance of free public employment offices and provides for clearing-houses to facilitate the transfer of labour from one province to another and for the publication of information.

Technical education was assisted by subsidies from the Dominion under the Technical Education Act of 1919, which appropriated \$10,000,000 for that purpose over a period of 10 years. The Vocational Education Act, 1931, was designed to continue this policy by providing \$750,000 annually for 15 years but the Act has not been put in operation.

The Railways Act provides for the safety of persons employed on railways within Dominion jurisdiction, requires wages to be paid at least semi-monthly and gives power to the Board of Railway Commissioners to limit hours of labour.

The Canada Shipping Act contains health and safety provisions and insures the payment of seamen's wages. It gives effect to six Conventions of the International Labour Conference; Conventions fixing a minimum age for employment at sea, establishing a minimum age for employment as trimmer or stoker, providing for unemployment indemnity in case of loss of the ship, requiring a medical examination of children and young persons employed at sea, regulating seamen's articles of agreement and requiring the marking of the weight on heavy packages. Provision is made for regulations to implement two other Conventions for the protection of dock workers and for the repatriation of seamen. Regulations have been made giving effect, in a large measure, to the Repatriation of Seamen Convention.

**Provincial Legislation.**—Early legislation in all the provinces but Prince Edward Island, Nova Scotia and New Brunswick provided for the recovery of wages and there were statutes in all the provinces regulating apprenticeship. Little change has been made in the former Acts enabling a justice of the peace to whom a complaint has been made concerning the non-payment of wages to summon the employer and direct payment of wages found due. Apprenticeship Acts more in line with modern conditions and based on the co-operation of employers in the training of apprentices under provincial regulation and with provincial inspection were enacted in Ontario in 1928, in British Columbia in 1935, and in Nova Scotia in 1937. In the first instance they applied only to certain building trades but pro-

vision was made for their extension to other industries. At the present time the Ontario Act applies also to the repair of motor vehicles and the British Columbia Act to automobile maintenance, sign painting, ship and boat building and repairs, electrical repair work, jewellery manufacture and repairs, and the construction and repair of aircraft.

*Conciliation.*—Laws for conciliation in labour disputes which were passed about the turn of the century have been repealed in Ontario, Nova Scotia and British Columbia, while in Quebec the Trade Disputes Act enacted in 1901 is still in operation. Quebec has also a statute of 1921 providing for compulsory arbitration in disputes between certain classes of municipal employees and their employers where 25 or more workpeople are employed. The Ontario Municipal Board Act of 1906 enables mediation and arbitration in disputes in connection with railways or public utilities under its jurisdiction.

In Manitoba, the Strikes and Lockouts Prevention Act, 1937, and in British Columbia, the Industrial Conciliation and Arbitration Act, 1937, make provision for conciliation and for investigation and report by a board if conciliation fails. A somewhat similar statute has been enacted in Alberta in 1938. It repeals the Labour Disputes Act of 1926, providing for the appointment of boards of conciliation and investigation. The Manitoba, British Columbia and Alberta statutes prohibit strikes and lockouts after application has been made for the appointment of a board of conciliation and investigation in Manitoba, or of a conciliation commissioner in Alberta and British Columbia, and until a final report has been made in each province. In the methods of procedure laid down in these three statutes they are largely similar to the Dominion Industrial Disputes Investigation Act.

The New Brunswick Fair Wage Act, 1936, repealed in 1938, provided for a Fair Wage Officer to hear complaints, make inquiries, and effect adjustment of differences and for a Fair Wage Board to inquire into labour conditions and establish fair rates of wages and the maximum hours to which such rates should apply. The Labour and Industrial Relations Act, 1938, provides for a Fair Wage Officer with the same duties, and, like the three western provinces, for conciliation and investigation in disputes before a stoppage of work.

In each of the provinces except British Columbia and Prince Edward Island there is a statute declaring the Dominion Industrial Disputes Investigation Act applicable to disputes within its scope which are within provincial jurisdiction.

*Trade Unions.*—Until 1937, only British Columbia and Quebec had statutes relating expressly to trade unions. The British Columbia Trade Union Act of 1902 declared a trade union not liable for any wrongful act in connection with a strike or lockout unless through its officers it had authorized or concurred in the act. Persuasion without intimidation or the publication or communication of information concerning a dispute may not be enjoined or made a cause for damages.

The Quebec Professional Syndicates Act of 1924 enables the incorporation of trade unions of 20 or more persons, of whom two-thirds are British subjects, with the right to hold property, establish benefit funds and enter into enforceable agreements with other unions and with employers.

The Nova Scotia Trade Union Act, 1937, the Alberta and British Columbia Conciliation and Arbitration Acts, and the Saskatchewan Freedom of Trade Union Association Act, 1938, declare it lawful for employees to form a trade union and to bargain collectively through the union officers or, in Alberta and British Columbia, through representatives duly elected by a majority vote of the employees affected.

Penalties are provided for any employer who, by intimidation or threat of dismissal or by actual dismissal, prevents or tries to prevent any employee from joining an association of employees. In Nova Scotia, in Alberta (as the Act of the latter province was amended and re-enacted in the Industrial Conciliation and Arbitration Act, 1938) and in Saskatchewan (by the Act of 1938) every trade union is required to file its constitution and by-laws with the Government. In New Brunswick, this may be required and also financial returns. In Alberta and Saskatchewan, financial statements must be furnished if requested. In Nova Scotia, annual financial returns are required.

The Manitoba Strikes and Lockouts Prevention Act, 1937, declares any person liable to a fine who seeks, by intimidation or threat, to compel any person to join or refrain from joining a trade union.

The Quebec Workmen's Wages Act, 1937, rendered liable to a penalty of fine or imprisonment any employer who tried to prevent an employee by threats of dismissal or other threats from becoming a member of an association. Slightly different provision was made by the Fair Wage Act, 1937. Both statutes were changed in 1938 to apply the clause to any person instead of any employer.

The New Brunswick Act of 1938 declares the right of employees to organize and to bargain collectively through representatives elected by a majority vote. It provides a penalty for any person who by threat of dismissal or actual dismissal seeks to compel any person to join or refrain from joining any organization or to work or abstain from working.

*Collective Agreements.*—In Quebec, as stated above, collective agreements between "professional syndicates" and employers are legally enforceable under an Act of 1924. The Collective Labour Agreements Extension Act, 1934, as amended, gives the Lieutenant-Governor in Council power to declare binding on all employers and employees engaged in an industry the wages and hours and apprenticeship terms of a collective agreement arrived at by employers and trade unions in the industry, provided that the agreement covers a sufficient proportion of the industry. The Act, as amended in 1938, applies also to agreements with "groups of employees".

*Industrial Standards.*—The Industrial Standards Act, 1935, of Ontario enables the Minister of Labour, on petition of representatives of employers and employed in any industry, to call a conference of employers and workers in the industry for the purpose of arriving at an agreement as to wages and hours. If there is agreement between a proper and sufficient representation of employers and employees, the Lieutenant-Governor in Council may, on the recommendation of the Minister, declare the minimum wages and maximum hours agreed upon to be binding on all employers and employed in the industry within the area designated. Similar statutes have been passed in Alberta, Nova Scotia (applying only to building trades in Halifax and Dartmouth) and in Saskatchewan.

Under these statutes, schedules, as they are called, of wages and hours have been made binding in the following industries: in Ontario, in certain building trades in 12 cities or towns, in men's clothing, women's coats and suits, millinery, wood furniture, and in soft furniture in Toronto and vicinity, in brewing and in logging in three districts, in baking in Ottawa, and in barber shops in 31 cities and towns; in Alberta, in two building trades in Edmonton and Calgary, in brewing, in baking in two districts, and for creosote workers in Calgary, and taxi drivers in Edmonton; in Nova Scotia, in four building trades in Halifax and Dartmouth; and in Saskatche-

wan, in one or two building trades in three cities, for barbers and hairdressers in three cities, and in shoe repairing in Regina.

*Minimum Wages.*—Minimum wage laws applying to female workers have been enacted in all provinces except Prince Edward Island. The New Brunswick Minimum Wage Act, 1930, has not been proclaimed. In Alberta and British Columbia, there are also Minimum Wage Acts for male employees and the Acts of the other provinces, except New Brunswick and Nova Scotia, have been revised or amended to cover male workers. The New Brunswick Fair Wage Act, 1936, is, in part, a conciliation measure and relates to both sexes. All the minimum wage laws provide for an administrative body to fix the minimum rates. Only in Manitoba does the statute itself make any stipulation as to the rate of wages. The Manitoba Act provides that, where a minimum has been fixed for any class of employees, no person over 18 years of age may be employed in the industry for less than 25 cents an hour unless a different rate is fixed by the Minimum Wage Board.

In Alberta, British Columbia, New Brunswick, Nova Scotia, Ontario, and Quebec the Acts apply to all industries except agriculture and domestic service and in Manitoba the Act may be extended to such industries by Order in Council. In Saskatchewan the law is restricted to factories, mail-order houses and retail stores, beauty parlours, barber shops, hotels, and restaurants. The geographical scope of the minimum wage laws has also been extended so that at the present time all the Acts apply, or may be applied, to all parts of the provinces. In Saskatchewan existing minimum wage orders, however, apply only to cities and within a 10-mile radius thereof.

Under the first Acts in the four western provinces the Boards could limit hours of labour. In Ontario, Quebec, and Nova Scotia the Boards had merely power to specify the hours to which the rates were to apply and to fix overtime rates. In Alberta the Hours of Work Act, 1936, relating to all industries but agriculture and domestic service, repealed the section of the Minimum Wage Act relating to hours. In British Columbia hours of work may still be restricted under the Female Minimum Wage Act and in Manitoba and Saskatchewan under the Acts applying to both sexes, but in Saskatchewan the orders now in force omit the clauses which formerly limited hours of work. Only in British Columbia and Manitoba, therefore, are hours limited by Minimum Wage Orders. In the former province only female workers are affected by such restriction, but in Manitoba maximum hours are fixed for both sexes by the Minimum Wage Board.

Orders have been made under all the minimum wage laws in force, but in New Brunswick the only orders issued have applied to particular plants where the Fair Wage Board inquired into conditions after complaints had been made. In Ontario and Quebec the orders issued by the former Minimum Wage Boards, applying to women, remain in force until replaced by orders made under the new Acts of 1937 relating to both sexes.

Under special statutes minimum wages are fixed for motor vehicle drivers and lumber workers in some provinces.

In Manitoba the Fair Wage Act, applying to provincial public works, was extended in 1934 to cover private construction of more than \$100 value in cities and towns of over 2,000 population.

*Fair Wages.*—New Brunswick, Manitoba and Ontario have statutes requiring the payment of "fair wages" to persons employed on provincial public works. In the

other provinces a similar policy is based on a resolution of the legislature or departmental regulations. Fair wages are defined as those current for competent workmen in the district or those determined as fair by the Minister. The Ontario Government Contracts Hours and Wages Act, 1937, like the Dominion statute, also provides for an 8-hour day and 44-hour week for public works employees.

*Hours of Labour.*—In addition to the limitation of hours of work effected under the Quebec Workmen's Wages Act, the Industrial Standards Acts, and the Minimum Wage Acts, as indicated above, there is statutory regulation in all provinces but Prince Edward Island.

In Alberta and British Columbia Hours of Work Acts apply to both sexes. In British Columbia the Act provides an 8-hour day and 48-hour week for persons employed in mines, factories, construction, retail and wholesale stores, road transport, barber shops, and bakeries, and in catering or as hotel clerks or elevator operators. The Alberta statute fixes a maximum of 9 hours a day and 54 hours a week for male workers and 8 hours a day and 48 hours a week for females in any trade or occupation except agriculture or domestic service. Both Acts permit temporary and permanent exceptions to be made by regulation.

In Quebec and Nova Scotia there are statutes authorizing regulations to limit hours of work. In the former province hours have thus been restricted throughout the province in the building trades, except on small jobs, to 8 a day and 48 a week for all but the skilled workers in the Montreal Division, for whom the weekly maximum is 44. Maximum hours of work have been fixed for beauty parlours and shoe-repair shops on the island of Montreal at 55 and 64, respectively. The Nova Scotia Act may be applied to mining, manufacturing and construction of any kind but no action has been taken to apply it.

The only other legislation in Canada to limit hours of work is contained in statutes applying to certain kinds of undertakings, such as mines, factories, and shops, or certain classes of workers such as motor vehicle operators.

Coal miners below ground have a maximum 8-hour day in Alberta, British Columbia, New Brunswick, and Nova Scotia and in Saskatchewan unless it is agreed otherwise. Work above ground in coal mines is also limited to 8 hours a day in Alberta and, unless employer and employee make a contrary agreement, in Saskatchewan. Metal miners below ground have a maximum 8-hour day in British Columbia, New Brunswick, northern Ontario and Yukon. In Alberta there is a statutory 9-hour day and 54-hour week both above and below ground in metal mines. In British Columbia workers above ground, as below, have an 8-hour day and in Yukon also, unless a special overtime rate is paid.

In factories, hours of women and young persons are restricted by the factory laws of Manitoba, New Brunswick, Ontario, Quebec, and Saskatchewan. Maximum hours fixed by these statutes are: 48 a week in Saskatchewan, 9 a day and 54 a week in Manitoba, 10 a day and 55 a week in Quebec, and 10 a day and 60 a week in New Brunswick and Ontario. A new Act in New Brunswick would limit weekly hours to 50 but it has not been proclaimed. In Manitoba the factory law has been superseded in respect to weekly hours by an order of the Minimum Wage Board which fixes a maximum of 48 for women and for boys under 18 in factories. In all provinces provision is made for longer hours in cases of emergency. There is no limitation of hours in Nova Scotia factories and in Prince Edward Island there is no factory law.

In shops, hours of all workers are limited in Alberta and British Columbia by the Hours of Work Acts. In Ontario maximum hours for women and for boys under 16 are 10 a day and 60 a week. In Quebec this weekly maximum applies to women and to boys under 18 in cities of 10,000 or over. Provision for overtime is made in these four provinces. In Manitoba a minimum wage order fixes for all shop employees a basic 48-hour week, 9-hour day and 10½-hour Saturday with special rates for overtime. Overtime may not be worked by any person under 18 and it is limited for females to 36 days in the year.

In hotels and restaurants, hours of work are restricted in Alberta and British Columbia by the Hours of Work Acts. In British Columbia the Act limits to 8 a day and 48 a week the hours of work of hotel clerks and of persons employed in hotels, restaurants, dance-halls, ice-cream parlours or other places, in the preparation or serving of food or refreshments for which a charge is made, or in work incidental thereto. A minimum wage order for female workers in the hotel and catering industry gives a maximum 8-hour day and 48-hour week to all women and girls employed in hotels, lodging-houses, cafes, dance-halls, hospitals (except nurses), clubs, dining-rooms and kitchens connected with industrial or commercial establishments or with schools or office buildings or any other place where lodging or meals are provided at a charge. An order of the Manitoba Minimum Wage Board limits the hours of all persons employed in restaurants and of boys under 18, and girls and women in hotels to 10 a day and 48 a week. In Ontario boys under 16 and women and girls may not be employed more than 10 hours a day or 60 a week in restaurants. In Quebec working hours are limited by regulation in towns of 3,000 or more to 12 a day in hotels, restaurants or clubs where 5 or more workers are employed. In all provinces provision is made for longer hours in emergencies and in some cases for certain workers.

There is statutory provision for a weekly rest day for workers in hotels and restaurants in the cities of Manitoba, Ontario, and Saskatchewan. In Quebec provision is made by Order in Council relating to such hotels, restaurants or clubs as are indicated in the preceding paragraph.

The hours of office workers are governed in Alberta by the Hours of Work Act and in Manitoba by a minimum wage order fixing maximum hours in Winnipeg at 8 a day and 44 a week.

For street railway employees the only statutory limitation of hours is in Ontario, where it is stipulated that no employee may work more than 6 days of 10 hours each. In road transport hours are limited in Alberta and British Columbia by the Hours of Work Acts. Special regulations provide for overtime in British Columbia, and in Alberta the maximum hours of drivers of motor buses in Edmonton are 12 a day on 6 days a week and of passenger vehicles in the province 9 hours a day or, when permitted on certain routes, 10 hours a day. In Manitoba, New Brunswick, Ontario, Prince Edward Island, and Saskatchewan hours of work of drivers of motor vehicles for commercial use are limited by statute or regulation. In Prince Edward Island and Ontario maximum hours that may be spent in driving are 10 in any 24-hour period; in New Brunswick 10 in 16 hours, except in emergencies; and in Manitoba regulations restrict the hours of driving passenger vehicles to 9 in 24 and the hours of work in any capacity to 12 in 24 and the number of days to 6 in a week. In Winnipeg maximum hours for taxi drivers are 12 on 6 days in the week.

*Weekly Rest Day.*—As noted above, a weekly rest day is provided by law for hotel and restaurant employees in cities in Quebec, Ontario, Manitoba, and Saskatchewan. In the two latter provinces this law has a wider application. In Saskatchewan it covers any trade, industry or occupation and in Manitoba the establishments specified include factories, works of construction, and the operation of street railways. In both provinces the Act applies to cities but may be extended by Order in Council to other parts.

The Alberta Hours of Work Act, 1936, stipulates that every employee in any industry except agriculture and domestic service shall have a weekly day of rest and in Nova Scotia the Limitation of Hours Act, 1935, relating to mining, manufacturing, construction and the furnishing of electric power, and water or gas, makes similar provision.

The Lord's Day Act of the Dominion Parliament was noted above. There is also a Sunday Observance Act in Quebec.

*Child Labour.*—A minimum age for employment is established by Acts applying to mines, factories, shops, and street trades. Child labour is forbidden in most of the provinces in mines and factories. In other kinds of establishments its prohibition is less general.

In all the provinces where mining is carried on, except Manitoba, the employment of children below ground is prohibited, but the age-limit varies. Above ground there is no prohibition in New Brunswick or Quebec or about coal mines in Saskatchewan. For work in coal mines below ground the legal minimum is 14 years in Saskatchewan, 15 in British Columbia, 16 in New Brunswick and Nova Scotia, and 17 in Alberta. In metal mines and in mining for non-metallic minerals other than coal no boy may be employed below ground under 12 years of age in the Yukon Territory, under 15 in Quebec, 16 in New Brunswick, Nova Scotia, and Saskatchewan or 18 in British Columbia and Ontario. Boys may not be employed above ground about coal mines at less than 14 years of age in British Columbia, 16 in Nova Scotia and 17 in Alberta. For work above ground the minimum age in mines other than coal mines is 12 in Yukon, 14 in Saskatchewan, 15 in British Columbia and 16 in Nova Scotia and Ontario.

Factory employment is prohibited by law to children under specified ages in all the provinces but New Brunswick and Prince Edward Island. In New Brunswick the Factories Act, 1937, would forbid such employment for those under 15 but the Act has not been proclaimed. The minimum age for workers in factories is 14 in Nova Scotia (except in canneries from July to October), Quebec, and Ontario and for boys in Saskatchewan; and 15 in Alberta, Manitoba, and British Columbia and for girls in Saskatchewan.

Labour in shops is prohibited by children under 14 years of age in Ontario and Quebec, under 15 in Manitoba, and in cities of over 5,000 population in Alberta. Only in Ontario does the provincial law directly forbid children engaging in street trades, the age-limit being 12 for boys and 16 for girls during the day. Municipal by-laws may be made in practically all the provinces to regulate the work of children as messengers, vendors of newspapers and small articles.

Compulsory school attendance laws are in effect in all the provinces but New Brunswick and Quebec, and employment of children of school age during school hours is prohibited. In New Brunswick special legislation requires attendance up to 14 years in six cities and towns; in the remainder of the provinces attendance at school is compulsory only at local option. The school-leaving age is 12 in rural New Brunswick if a by-law requires attendance, 13 in Prince Edward Island, 14 in Nova Scotia and Manitoba and in Fredericton, Saint John, Newcastle, Chatham, Marysville, and Edmundston in New Brunswick, 15 in Alberta, British Columbia, and Saskatchewan, and 16 in Ontario, in the towns and cities of Nova Scotia and in such urban districts of New Brunswick as adopt a by-law to that effect. Higher ages may be fixed by the district in Manitoba and in rural Nova Scotia. In Manitoba a child who is not employed must attend school until 16 years of age. Exemption from school attendance for a certain period or after a certain age is permitted under all the provincial laws but that of British Columbia. In Ontario no child between 14 and 16 years of age may be employed between 8 a.m. and 5 p.m. and in Quebec no child under 16 may be employed unless he can read and write fluently or is attending night school.

*Mining and Factory Laws.*—In all the provinces but Prince Edward Island, provision is made for inspection with a view to the safety and health of those employed. The Factory Acts give general powers to the inspectors to order proper measures to be taken. Only in Quebec and Ontario have special regulations been made. In the former province regulations have been made concerning ventilation, temperature, humidity, sanitary conditions, dust, etc., and prohibiting the employment of women and young persons in certain hazardous trades. In Ontario, by regulation, occupational diseases are required to be notified, containers of lead and benzol labelled, medical examination of workers may be required and special precautions must be taken to control dust. All the Mining Acts, in addition to giving general authority to inspectors to direct dangerous conditions to be remedied, lay down detailed regulations to ensure safe conditions of work.

*Workmen's Compensation.*—Compensation is provided in all the provinces but Prince Edward Island for accidents occurring in the course of employment and for certain industrial diseases. In Prince Edward Island railway workers are taken care of in this respect by a Dominion statute and are eligible for compensation at the same rate as in New Brunswick. Each province except Prince Edward Island has set up a board to administer an accident fund made up of contributions from employers who are classified according to the hazard of the industry and assessed accordingly. Employers in each class are thus collectively liable for accidents in the industries within the class and assessments are based on their accident record. In Ontario and Quebec public authorities, railway and shipping companies, and telephone and telegraph companies are individually liable for compensation. The industries covered vary from one province to another but in all provinces the most hazardous industries are within the scope of the Act, including mining, lumbering, manufacturing, construction, and transportation by rail and water. In Alberta and Saskatchewan certain classes of railroad employees are within an earlier employer's liability law.

Free medical aid, including medical, surgical, hospital and nursing services, is provided for injured workmen in all provinces but Alberta and British Columbia. In British Columbia the workers contribute 1 cent a day for medical aid and in Alberta they contribute from  $\frac{1}{4}$  to 10 cents a day according to the industry.

Compensation is paid in all provinces for anthrax and for poisoning from arsenic, lead, mercury, and phosphorus. The other diseases compensated vary according to the industries of the different provinces.

The following statement shows the scale of compensation as at Jan. 1, 1938:—

| Item.   | N.S.  | N.B.  | Que.  | Ont.  | Man.  | Sask.   | Alta.   | B.C.   |
|---|---|---|---|---|---|---|---|--|
| Death—<br>Funeral.....  | \$100   | \$100   | \$125   | \$125   | \$150   | \$125   | \$125   | \$100  |
| Widow or invalid<br>widower per<br>month.                         | \$30  | \$30  | \$40 plus<br>lump sum<br>of \$100.  | \$40 plus<br>lump sum<br>of \$100.  | \$40  | \$40 plus<br>lump sum<br>of \$100.  | \$35  | \$35   |
| Each child under<br>16, per<br>month.                             | \$7-50  | \$7-50, up to<br>18 years<br>if a girl.                         | Under 18,<br>\$10.  | \$10 up to<br>\$40.   | \$12+\$10+<br>\$9+\$8<br>for each<br>additional<br>child<br>up to 18<br>yrs. for<br>educa-<br>tion. | \$10  | \$12+\$10+<br>\$9+\$8<br>for each<br>additional<br>child<br>up to 18<br>yrs. for<br>educa-<br>tion. | \$7-50   |
| Orphan child under<br>16, per<br>month.                           | \$15, Max.<br>\$60.   | \$15 and up<br>to 18 yrs.<br>if a girl.                         | Under 18,<br>\$15.  | \$15  | \$15  | \$15  | \$15  | \$15, Max.<br>\$60.  |
| Disability <sup>2</sup> —Per<br>cent of earnings<br>for duration. | 66 $\frac{2}{3}$ p.c.<br>Min. \$3<br>per wk.<br>or earn-<br>ings, if<br>less. | 55 p.c.<br>Min. \$0<br>per wk.<br>or earn-<br>ings, if<br>less. | 66 $\frac{2}{3}$ p.c.<br>Min.<br>\$12-50 per<br>wk. or<br>earnings,<br>if less. | 66 $\frac{2}{3}$ p.c.<br>Min.<br>\$12-50 per<br>wk. or<br>earnings,<br>if less. | 66 $\frac{2}{3}$ p.c.<br>Min. \$15<br>per wk.<br>or earn-<br>ings, if<br>less.                      | 66 $\frac{2}{3}$ p.c.<br>Min.<br>\$12-50 per<br>wk. or<br>earnings,<br>if less. | 66 $\frac{2}{3}$ p.c.<br>Min. \$10<br>per wk.<br>or earn-<br>ings, if<br>less.                      | 62 $\frac{1}{2}$ p.c.<br>Min. \$10<br>per wk.<br>or earn-<br>ings, if<br>less. |
| Maximum earnings<br>that may be<br>reckoned.                      | \$1,500   | \$1,500,<br>Max.<br>comp.<br>\$2,500.                           | \$2,000   | \$2,000   | \$2,000   | \$2,000   | \$2,000   | \$2,000  |

<sup>1</sup> Invalid child entitled to compensation for longer period. <sup>2</sup> Where disability is partial, the same rate is fixed but is calculated on difference between earnings prior to and subsequent to accident. In Quebec the rate for partial disability is 66 $\frac{2}{3}$  p.c. for the period of time fixed, basis being 4 weeks for each 1 p.c. of incapacity. In New Brunswick the Board may fix amount for permanent partial disability.

### Section 13.—Legislation Respecting Combinations in Restraint of Trade.

A general article on Canadian legislation concerning combinations and monopolies in restraint of trade was published in the 1927-28 Year Book under the heading "Legislation Respecting Combinations in Restraint of Trade". In subsequent issues of the Year Book an annual statement on proceedings under the Combines Investigation Act has been included.

The first Dominion legislation in this field was "An Act for the Prevention and Suppression of Combinations formed in Restraint of Trade", passed in 1889 and now in force in amended form as Sec. 498 of the Criminal Code. Legislation providing special facilities for the investigation of combines was first enacted in 1907 and was included in the Customs Tariff of 1907. In 1910 the Combines Investigation Act of that year was enacted. The latter Act was replaced by the Combines and Fair Prices Act, 1919, which in turn, after declaration of its constitutional invalidity by the Judicial Committee of the Privy Council, was replaced by the present Combines Investigation Act in 1923.

**The Combines Investigation Act.**—The Combines Investigation Act (R.S.C., 1927, c. 26) provides means for the investigation of trade combinations, mergers, trusts and monopolies alleged to have operated in restraint of trade and to the detriment of the public. The Act was passed in 1923 and amended in 1935 and 1937. In 1931 its constitutional validity was upheld by the Judicial Committee of the Privy Council following a reference of questions on this point by the Governor in Council to the Supreme Court of Canada. The Combines Investigation Act provides for publication of reports of investigations of alleged combines. Participation or knowing assistance in the formation or operation of combinations or monopolies which are detrimental to the public and come within the scope of the Act is an indictable offence. Provision also is made in the Act for the reduction or removal of customs duties at the instance of the Governor in Council in cases where it is found that with respect to any commodity there exists any combine to promote unduly the advantage of manufacturers or dealers at the expense of the public and that such disadvantage to the public is facilitated by existing customs duties.

**Legislation in 1937.**—The Combines Investigation Act Amendment Act, 1937, which came into effect on Apr. 10, 1937, provided for the administration of the Combines Investigation Act by a Commissioner reporting to the Minister of Labour. It also removed amendments added to the Act at the instance of the Senate in 1935 whereby documents required to be produced in investigations under the Act had been rendered inadmissible as evidence in possible subsequent prosecutions under the Act against the persons who had produced them. Provisions of the Combines Investigation Act respecting revocation of patents were repealed in view of a revision of related provisions of the Patent Act effected in 1935 and in view of the terms of an International Convention ratified by Canada with regard to patents. Certain further amendments, introduced for the purpose of strengthening the Combines Investigation Act in a number of respects, were included in the amending Bill of 1937 as passed by the House of Commons but were deleted in the Senate and not enacted.

**Investigations in 1937.**—An investigation under the Inquiries Act was made into the importation and distribution of anthracite coal, following the similar inquiry made under the Combines Investigation Act and the court actions which had been completed in 1935 in connection with that case. The report of the Commissioner appointed to conduct the inquiry, was made public in February, 1937. The Commissioner found no evidence as to price-fixing arrangements. He reported

that importers' gross margins, which had increased in the years preceding the first inquiry, had declined substantially since 1933. This change, he considered, was due in large measure to the proceedings under the Combines Investigation Act in 1933. His recommendations included maintenance of competitive conditions with respect to sources of supply and in the distribution of anthracite coal; with enforcement by municipalities of regulations to prevent fraudulent practices and inadequate descriptions of coal.

Other less extensive investigations were made during the year under the Combines Investigation Act with respect to complaints regarding conditions alleged to be existing to the detriment of the public in particular manufacturing and distributive trades. These included questions of alleged price agreements among manufacturers or distributors, exclusive dealing arrangements, resale price maintenance, price discrimination, the withholding of supplies for various reasons and other trade practices alleged in particular instances to be unfair to certain classes of persons and to be injurious to the general public.

### Section 14.—Mothers' Allowances.

Seven of the nine provinces of Canada provide for the payment of allowances to mothers who are widowed or without adequate means of support. The province of Manitoba was the first to make such provision in 1916, and the example has been followed by the other western provinces and by Ontario, Nova Scotia, and Quebec. The Mothers' Allowances Act, 1930, of New Brunswick has not been proclaimed in effect, and no action has been taken under the Quebec statute.

All the mothers' allowances Acts stipulate that the mother must be a resident of the province at the time of making application and a widow or, in all provinces but New Brunswick and Nova Scotia, a wife, whose husband is mentally incapacitated. Under all the laws, except those of New Brunswick, Nova Scotia, and Quebec, the wife of a physically disabled man is eligible but the section in the Alberta Act bringing such persons within its scope has not been proclaimed.

In Alberta, British Columbia, Ontario, and Saskatchewan, deserted wives are paid an allowance, and in British Columbia and Saskatchewan, the wives of inmates of penal institutions are eligible. Under all the statutes except those of Alberta and Saskatchewan, the mother must be a British subject, or the widow or wife of a British subject. Allowances may be paid to foster-mothers under certain conditions in all the provinces but Alberta, Nova Scotia, and New Brunswick.

In New Brunswick, Nova Scotia, and Quebec, allowances are payable in respect of two or more dependent children, but in New Brunswick and Nova Scotia an allowance is payable for one child under 16 if there is an invalid child over 16 years of age. In the other provinces, allowances are payable in respect of one or more dependent children, but in Manitoba, under the regulations, no allowance is payable in respect of an only child, or an only child under 15 years of age unless the mother is temporarily or permanently unable to care for the child. A dependent child is a child under 16 years of age in British Columbia, New Brunswick, Nova Scotia, Ontario, Quebec, and Saskatchewan. In Alberta, a boy under 15 or a girl under 16 is deemed to be

dependent. In Manitoba, only children under 15 are regarded as dependent unless they are invalids.

In Alberta, British Columbia, and Manitoba, the cost of the allowances is divided between the province and the municipalities concerned. In Saskatchewan, Ontario, Quebec, New Brunswick, and Nova Scotia, the whole cost is carried by the province.

**Rates of Allowances.**—In British Columbia, the Act provides for a maximum monthly allowance of \$42.50 for a mother with one dependent child, an additional \$7.50 for each other child under 16 years of age, and a further \$7.50 in cases where the husband of the mother is totally disabled and is living with her. In New Brunswick and Nova Scotia, a maximum allowance of \$60 per month is fixed by statute. In the other provinces, the provincial authority administering the Act has power to fix the rate of the allowance. In Ontario, the maximum for a mother and one child is \$35 per month in a city, \$30 in a town of over 5,000 population and \$25 in a rural district, with an additional \$5 for every child in each case. In Saskatchewan, under the terms of an Order in Council of January, 1936, maximum monthly payments range from \$8 to a mother with one child to \$44 to a mother with ten or more children.

In Manitoba, the maximum allowance for a mother and two children is \$50, excluding allowance for winter fuel, with a maximum of \$89 for a family of seven or more children. In Alberta, the allowance is determined by the special circumstances in each case, the maximum payment ranging from \$25 per month to a mother with one child, to \$50 per month where there are five children.

Tables 31 to 36 show, for six provinces, the numbers of families and of children assisted, the total benefits paid, and the division of the cost of the latter between provinces and municipalities, for as many years as comparable figures are available.

**Nova Scotia.**—The Mothers' Allowances Act (c. 4, 1930) was passed at the session of 1930 and came into force on Oct. 1, 1930. Table 31 shows the numbers of families assisted and the amounts paid under the Act from its inception to Nov. 30, 1936.

31.—Mothers' Allowances in Nova Scotia, fiscal years 1931-36.

| Fiscal Year.                         | Numbers Assisted. |           | Benefits Paid. |
|--------------------------------------|-------------------|-----------|----------------|

Manitoba.—The Mothers' Allowances Act (1916, c. 69), the first of its kind in Canada, came into operation on Mar. 10, 1916. Allowances are now made under the authority of the Child Welfare Act (1936, c. 6). Table 33 shows the benefits paid since Dec. 1, 1918, together with statistics of families and children assisted, these latter figures are not available for all of the earlier years.

33.—Mothers' Allowances in Manitoba, fiscal years 1919-37.

<sup>1</sup> Subject to revision.

British Columbia.—The Mother's Pensions Act (R.S.B.C., 1936, c. 194) was originally passed as c. 61 of the Acts of 1920, and came into force in July, 1920. Table 36 shows the numbers of families and the numbers of children assisted, together with the amounts expended in each of the fiscal years 1921-37.

Under the original Act, the full cost of pensions was borne by the province. In 1932 one-half of the costs of pensions paid to residents of a municipality was charged to the municipality to which they belonged and at the end of the fiscal year 1936-37 responsibility for all payments was again assumed by the province.

In 1937 there were 346 cases where mothers received extra allowances for incapacitated husbands.

## PART II.—WAGES AND COST OF LIVING.

### Section 1.—Wage Rates.\*

Statistics of rates of wages and hours of labour have been collected for recent years by the Dominion Department of Labour, and are published in a series of bulletins supplementary to the *Labour Gazette*. Report No. 1 of this series was issued in March, 1921. The records upon which the statistics are based begin in most cases with the year 1901. Index numbers have been calculated to show the general movement of wage rates; the series covers six groups of occupations back to 1901, and common factory labour, miscellaneous factory trades and lumbering back to 1911. The index numbers are based upon wage rates in 1913 as 100. Average index numbers, weighted according to the average numbers of employees in each group, as shown in the Censuses of 1921 and 1931, are also given. Weighting has not been applied within groups. In groups by occupations or industries such

\* See pp. 774-783 of the 1927-28 Year Book for an article on the "Wages Statistics of the Census of 1921" and pp. 797-799 of the 1933 Year Book for "Earnings in the Census Year 1931".

as these, weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, common factory labour, miscellaneous factory trades, and logging and sawmilling, the index numbers being calculated from samples, the averages are automatically weighted by the numbers of samples which vary according to the numbers of workers in the various occupations and industries. The upward movement which appeared in the index numbers for some groups in 1934 became general in 1935 and continued in 1936 and in 1937. On steam railways wages were not changed in 1936 but were increased in 1937.

### 1.—Index Numbers of Rates of Wages for Various Classes of Labour in Canada, 1913-37.

NOTE.—Rates of wages in 1913=100. Index numbers for 1901-12 were given at p. 674 of the 1932 Year Book.

<sup>1</sup> Weighted according to average numbers of workers in each group in 1921 and 1931.

Rates of wages and hours of labour in 1937 in various trades in the largest cities of the five economic areas of Canada will be found in Table 2. The attention of those specially interested in the subject of wages and hours is directed to the valuable detailed study, *Wages and Hours of Labour in Canada, 1929, 1936 and 1937*, published by the Department of Labour as a supplement to the *Labour Gazette*, January, 1938.

<sup>1</sup> For statistics of the wages and hours of employees of steam railways and wages of employees in and about coal mines in Canada, see pp. 751-752 of the 1930 Year Book, where the rates, etc., for the past seven or eight years to 1929, are given. Wages in coal mines of Nova Scotia were reduced 10 p.c. in 1932, and in Drumheller, Alta., in 1933; in 1935 in both districts 5 p.c. was restored. On steam railways deductions of 10 p.c. were in effect during 1932, 1933, 1935 and 1936; 15 p.c. in 1934; running trades 20 p.c. for six months in 1933. In 1937 the deduction was reduced gradually from 10 p.c. to 4 p.c. In editions of the Year Book prior to 1933 a table showing the wages and hours of common labour in factories for certain cities was given in this section. The information for 1937 can be found at p. 61 of *Wages and Hours of Labour in Canada*, published as a supplement to the *Labour Gazette* for January, 1938. For the five cities of Table 2 it is included under sub-heading 5 of the stub.

<sup>2</sup> Maximum rates based on length of service; Halifax rate for one-man cars; 5 cents extra for one-man car operators in Montreal, Toronto, and Winnipeg; Vancouver 6 cents extra.

## Section 2.—Wages and Hours of Labour Under Provincial Minimum Wage Legislation.

All of the provinces in Canada except Prince Edward Island have in effect legislation providing for the establishment of minimum wage rates for female employees in certain industries and occupations through boards which are authorized to establish and enforce these minimum rates. Such legislation was enacted between

1918 and 1920 in all of these provinces except New Brunswick. In Nova Scotia the legislation is applicable to female workers only, but in the other provinces it now applies both to male and female workers. There is also legislation for the restriction of hours of labour which are regulated in some of the provinces by the minimum wage boards but in the others only under the factory acts, etc. (See Section 12 of Part I on Labour Legislation in 1937.)

In British Columbia since 1925, and in Manitoba since 1931, separate orders have been effective for some classes of male workers and their scope was much extended in 1934 and subsequent years. In New Brunswick, under the Fair Wage Act, 1936, the establishment of wage rates was authorized but no orders of general application had been issued at the end of 1937. In Saskatchewan since 1936, and in Quebec from 1937, all minimum wage orders for females apply also to male workers. In Alberta, separate orders for male workers were issued in 1937 for the first time. In Ontario, under the Minimum Wage Act, 1937, the legislation was extended to male workers but no orders for males had been made effective at the end of 1937. In Quebec and New Brunswick, wages in logging are regulated under forestry regulation acts.

Beginning in Quebec in 1934, certain wage rates established through collective agreements were made binding under the Collective Labour Agreements Extension Act, 1934, and later under the Workmen's Wages Act, 1937. The Industrial Standards Acts of Ontario and Alberta in 1935, that of Nova Scotia in 1936 and of Saskatchewan in 1937 provided for the establishment of wage scales in various industries for all employees.

A supplement to the *Labour Gazette* for January, 1938, on wages and hours of labour in Canada in 1929, 1936, and 1937 contains an appendix giving, in some detail, information as to minimum wages for male and female workers.

Information as to minimum wage rates for work under Dominion Government contracts for the manufacture and supply of equipment, stores, clothing, etc., appears in the paragraphs on Fair Wages in the section on the Dominion Department of Labour at pp. 787-788.

### Subsection 1.—Minimum Wages for Females.

The table on pp. 806-807 gives information as to minimum rates of wages and as to hours for which these rates are payable under the orders of the various provincial boards and commissions in effect at the end of 1937.

The information here given is intended to afford merely a statistical summary of the minimum wages with hours of labour in the provinces and industries affected, and while some of the more significant details have been given in footnotes, it has been found impossible to include the information in such form as to indicate any more than the general conditions under these provisions.

For complete information it is necessary to refer to the orders as issued by the various provincial boards. These have been given in some detail in the *Labour Gazette* from time to time as issued, and in summary form, by provinces, in the Wages and Hours Supplement to the *Labour Gazette*, January, 1938. In some provinces these orders include regulations as to employment conditions, sanitary conditions, etc. The boards have power to issue licences for lower rates of pay for handicapped workers and to meet special conditions in the nature of emergencies.

## 3.—Minimum Wage Rates for Female Workers in Canada Under

Notes.—For further details regarding minimum wage rates for females, see pp. 123-134 of *Wages and*

| 9 Telephone operators...             | 9-00-11-00                | 6-00-10-00             | 44-50           | 14                                | 14                       | 14              | 7-00-12-50                | 5-00-11-00              | 48              |

<sup>1</sup> Rates apply to cities and incorporated towns.

<sup>2</sup> Rates vary according to population and industry, the higher rates for Montreal and district; all rates apply to males as well as females.

<sup>3</sup> Rates vary according to locality and population.

<sup>4</sup> Rates apply generally throughout province, also to male workers in many cases and to boys under 18 in cities.

<sup>5</sup> Only in cities and within a radius of 5 miles; apply to males as well as females.

<sup>6</sup> Orders apply throughout the province except telephone exchange order which applies only in centres with population of 600 or over.

<sup>7</sup> Rates apply throughout the province. Provision made for washing, curing, packing, etc., (except canning) of fish as follows: experienced—\$15-50 per week (48 hours) or 32 ¼ cents per hour; minors, learners, etc.—\$12-75 to \$14-75 per week.

<sup>8</sup> In some industries, instead of a graduated scale according to experience, stipulated percentages of female workers in each establishment must receive the full minimum wage, while the remainder may work at lower minimum rates.

<sup>9</sup> Hourly rates are fixed for certain industries: adults, experienced—21 to 26 cents per hour; minors, learners, etc.—12 to 22 cents. Establishments with less than 10 workers not covered by another order in municipalities of less than 5,000: adults, experienced—18 cents per hour; minors, learners, etc.—12 and 15 cents per hour.

<sup>10</sup> Custom millinery trades not in factories: minors, learners, etc.—\$5-00 to \$10-00.

<sup>11</sup> 50 hours per week for tailoring, dressmaking, and millinery establishments.

<sup>12</sup> Factory order includes garages and automobile service stations.

<sup>13</sup> Millinery shops, \$4-00-\$10-00 per week.

<sup>14</sup> Not reported.

## Orders of Provincial Minimum Wage Boards, as at Dec. 31, 1937.

Hours of Labour, Report No. 21, issued as a supplement to the *Labour Gazette*, January, 1938.

| 10-00-12-00                  | 14                       | 48               | 14                         | 14                       | 14              | 14-00 <sup>32</sup>   | 7-50-12-00 <sup>32</sup> | 48              | 15-00 <sup>32</sup>            | 11-00-13-00 <sup>32</sup> | 48 9            |

<sup>12</sup> Order includes fur-sewing, dressmaking, and millinery establishments.<sup>15</sup> Apply also to departmental and chain stores and wholesale establishments.<sup>17</sup> For both male and female employees; apply also to departmental stores and mail-order houses (under separate order).<sup>19</sup> Apply also to wholesale and mail-order houses; delivery service provided for as follows: experienced—\$3-00; inexperienced—\$3-60 to \$3-90.<sup>21</sup> Apply also to wholesale and mail-order houses.<sup>23</sup> Hotels, per month with room and board. Restaurants, 17 and 15 cents per hour.<sup>25</sup> Higher rate applies to Winnipeg and district, and Brandon at any time; to Portage la Prairie, May to October, and to any summer resort, June to September.<sup>27</sup> Or 25 cents an hour; adults, inexperienced—10½ cents per hour, first six months; 21 cents second six months.<sup>29</sup> Restaurants only—any place where meals provided.<sup>31</sup> Apply also to chambermaids in lodging houses and to elevator operators; there is a separate order for janitresses in apartment houses.<sup>32</sup> Shoe shine parlours in Toronto only, all \$12-50 (under separate order).<sup>34</sup> Or 25 to 30 cents per hour.<sup>36</sup> No minors to be employed.<sup>38</sup> Applies also to attendants at garages and automobile service stations, drivers of motor cars and other vehicles.<sup>40</sup> Apply also to elevator operators including learners (under separate order).<sup>42</sup> Winnipeg, St. Boniface and St. James, only.<sup>44</sup> Apply also to attendants in physicians', dentists' and optometrists' offices.<sup>46</sup> Apply also to telegraph employees.

In the preceding table figures for adult learners and for minors and apprentices are shown in a range covering both classes. There is wide variation in the rates for such classes in the several industries and the time allowed for such periods varies in most cases from one year to 18 months. Probationary periods (usually 3 months) without pay are allowed in some cases—beauty parlours, millinery, dress-making in shops, etc. Where no rates for minors, learners, etc., are shown the rates for experienced adults apply.

#### Subsection 2.—Minimum Wages for Male Employees.

Provisions for minimum wage rates for male employees are outlined in the Wages and Hours Supplement to the *Labour Gazette*, January, 1938, pp. 135-143, a summary of which follows:—

In Prince Edward Island, the city of Charlottetown, as authorized by an amendment to its incorporating Act, has established by by-law a minimum wage rate of 35 cents per hour for labourers and workmen engaged by contractors.

In New Brunswick, the Fair Wage Act, 1936, amended in 1937, provides for the establishment of minimum rates of wages and maximum hours for both male and female workers. Orders were issued in 1937 for a number of individual establishments but none of general application in any trade or industry. Under the Forest Operations Act, the Commission during 1937 established for stream-driving a minimum average rate of \$3 per day and board net, or its equivalent in case of piece work. For booming and sorting a minimum rate of 28 cents an hour without board was set. For cutting, yarding, and hauling, a minimum rate of \$34 and a minimum average rate of \$40 per month and board, net, were fixed.

In Quebec, the Fair Wage Act, 1937, replacing the Women's Minimum Wage Act, applies to both male and female workers and orders under the new Act provided that all existing minimum wage orders should apply to male as well as female workers in all the industries so covered until replaced by new orders. Under the Act to Assure Reasonable Wages for Workmen engaged in Forest Operations, a minimum of \$45 per month with board, was established except for youths 18 to 20 years for whom the minimum is \$30 per month with board; regular hours are limited to 60 per week.

In Ontario, until repealed in 1937, the Minimum Wage Act had provided that wherever a male employee replaces a female employee in any class of industry, the male employee must be paid at least the minimum rate established. This Act was replaced by the Minimum Wage Act, 1937, applying to both male and female workers. At the end of the year 1937, no orders had been issued under the new Act and the old orders were still in effect.

In Manitoba, the Minimum Wage Act provides that when a minimum wage scale has been established for any industry, no person of the age of 18 years or over may be paid less than 25 cents per hour except where the Board has passed specific regulations providing for a different rate. As all industries except farming, market gardening, and domestic service are now under regulation, the above minimum rate of 25 cents per hour for male persons of 18 years of age or over applies to all except where special regulations have been made, as follows: The orders governing manufacturing and general occupations, departmental stores and mail-order houses, retail and wholesale stores, and general employees apply to male as well as female employees. For hotels, restaurants, etc., the minimum for male workers over 18 is \$12 per week of 48 hours or 25 cents per hour in Greater Winnipeg and Brandon at any time and in Portage la Prairie and summer resorts during summer months, and \$10 per week of

48 hours or 21 cents per hour in the rest of the province. All orders apply to boys under 18 in cities except that special orders for boys under 18 in cities provide for minimum rates of \$8 to \$10 in manufacturing establishments, hotels, garages, etc. For apprentices, the rates specified in the indenture must have the approval of the Board but may not be less than the rates established in the industry for persons under 18 years. The Taxicab Act establishes for Greater Winnipeg a minimum of \$17.50 per week or 40 cents per hour with a minimum of \$1.60 per day, hours not to exceed 12 per day, 6 days per week. The Highway Traffic Act sets minimum rates for drivers of public passenger vehicles at \$80 per month or \$20 per week, 9 hours per day for driving, 12 hours in any capacity, 6 days per week. The Fair Wage Act provides for minimum wages and maximum hours on public works under contract, and also on private construction work as defined in the Act, under schedules approved by the Minister of Public Works.

In Saskatchewan, minimum wage rates for female employees now extend to male employees. The Coal Mining Industry Act, 1935, and an amendment to the Public Services Vehicles Act in 1935 provide for the establishment of minimum wage rates but none had been set by the end of 1937.

In Alberta, under the Male Minimum Wage Act, a general order covers all workers except those engaged in farm work and domestic service, those working under schedules under the Industrial Standards Act and casual, seasonal or temporary workers for employers not engaged in the industry, and except woodworking, etc., in rural districts. The general order establishes a minimum of 33½ cents per hour for full-time employees over 21 years with at least one year's experience and 28 and 30 cents for such employees with less than one year's experience; for full-time employees under 21 years, the minimum rates are from 20 cents for beginners to 33½ cents after three years' experience. Corresponding minimum rates for part-time employees are from 30 to 40 cents for those over 21 and from 23 to 35 cents for those under 21. A special order for employees of sawmills, box factories, woodworking, logging, and tie-cutting in rural districts provided minimum rates of 25 and 28 cents per hour. Under the Public Service Vehicles Act, 1936, an order provides for a minimum rate of \$15 per week of 6 days for taxi drivers in the city of Calgary.

In British Columbia, under the Male Minimum Wage Act, 1934, applying to all occupations except farm labourers and domestic servants, orders have been issued as to the following: logging, sawmilling, shingle, furniture and woodworking industries, baking, fruit and vegetable canning, preserving, etc., construction, the carpentry trade in Victoria and vicinity, shipbuilding, transportation (other than rail, water, or air), wholesale and retail establishments, stationary steam engineers, barbering (excluding beauty parlours), elevator operators, first-aid attendants, and janitors. In many instances the minimum rates for unskilled labour are 40 cents per hour for males over 21 years of age, 25 to 35 cents for those between 18 and 21, with 20 to 25 cents per hour for those under 18. In addition, the Female Minimum Wage Act, 1934, provided that where a minimum wage rate has been set for female workers in any industry, male workers may not be employed at work usually done by female employees at less than the fixed minimum wage.

### Subsection 3.—Wages and Hours of Labour under Collective Agreements and Schedules of Wages and Hours Made Obligatory by Order in Council in Certain Provinces.

In Nova Scotia, under the Industrial Standards Act, 1936, minimum wage rates and standard hours have been fixed for bricklayers, carpenters, electrical workers, plumbers and steamfitters in Halifax and Dartmouth.

In Quebec, under the Collective Labour Agreements Extension Act, 1934, and the Workmen's Wages Act, 1937, which replaced it, wages and hours in agreements between representatives of employers and of workers have been extended and made compulsory for all employers in the trade or industry in the district affected, and were in effect at the end of 1937, as follows: for the whole province, in certain manufacturing industries, *viz.*, boots and shoes, gloves, men's and boys' clothing (except work clothing), children's clothing, women's coats and suits, dress cutting, furniture, also for granite, marble and stone quarrying; in practically all of the province, for building trades; in most of the cities and towns and in some villages for the barbering and hairdressing trades; in three districts, which include all cities of over 11,000 population, for job-printing trades; iron oxide mining and aluminium smelting in the only districts in which these industries are carried on; in the five largest cities and Sorel, for bakeries; in Sorel, for butchers; in the Montreal and Quebec districts, for ornamental iron and bronze work; in Montreal and district, for the fur industry and for women's and children's millinery; in Montreal, for longshoremen (inland navigation) and in Sorel, for all longshoremen; in Sorel, for taxi drivers; in four northern towns, for clerks and accountants; in four Eastern Township counties, for horseshoers and wheelwrights; in Montreal and Victoriaville, for shoe repairing.

In Ontario, under the Industrial Standards Act, 1935, wages and hours schedules have been made binding by Order in Council and were effective at the end of 1937, for the following industries: throughout the province, for breweries, furniture (wood and soft) factories, men's and boys' clothing factories, women's cloak and suit factories, and millinery shops; in four districts, for the logging industry; in Toronto and Ottawa, for the principal building trades; and in Kingston, Cornwall, Pembroke, Hamilton, Kitchener, London, Windsor, Sault Ste. Marie, Timmins, Port Arthur, and Fort William, for one or more of the building trades; and also in 31 cities and towns for barbers.

In Saskatchewan, under the Industrial Standards Act, 1937, schedules have been put into effect by Order in Council, as follows: one building trade in Moose Jaw and Saskatoon and two building trades in Regina; barbers and hairdressers in four districts; shoe repairing at Regina and sign painting at Moose Jaw.

In Alberta under the Industrial Standards Act, 1935, schedules have been put into effect by Order in Council and were effective at the end of 1937, as follows: throughout the province, for the brewing industry; in Calgary, Edmonton and the adjacent districts, for bakers; two building trades at Calgary and two at Edmonton and their surrounding districts; creosote workers at Calgary and taxi drivers at Edmonton.

### Section 3.—Cost of Living of Wage-Earners.

An index number of the cost of living in working-men's families has been computed by the Department of Labour since 1913, and is published monthly in the *Labour Gazette*. This index is specifically designed for the purpose of measuring the trends of the cost of living for certain wage-earning classes with a somewhat lower standard of living than that which is measured by the Bureau of Statistics index number of retail prices, shown on pp. 819-823 of the present volume. The former wage-earners index is used extensively in negotiations as to wage rates and in the settlement of industrial disputes. An abridgment of this index is presented in Table 4.

## 4.—Changes in the Cost of Living in Canada from 1914 to 1937.

(Average prices in 1913=100.)

| Year and Month.     | Food. | Fuel and Light. | Rent. | Clothing. | Sundries. | All Items. <sup>1</sup> |

| January.....        | 115   | 141             | 135   | 115       | 154       | 129                     |
| February.....       | 118   | 141             | 135   | 115       | 154       | 129                     |
| March.....          | 116   | 141             | 135   | 117       | 154       | 129                     |
| April.....          | 116   | 141             | 135   | 117       | 154       | 130                     |
| May.....            | 117   | 139             | 140   | 117       | 154       | 131                     |
| June.....           | 116   | 138             | 140   | 117       | 154       | 130                     |
| July.....           | 117   | 138             | 140   | 118       | 155       | 131                     |
| August.....         | 120   | 138             | 140   | 118       | 155       | 132                     |
| September.....      | 119   | 138             | 140   | 118       | 155       | 131                     |
| October.....        | 119   | 139             | 142   | 118       | 157       | 132                     |
| November.....       | 120   | 140             | 142   | 118       | 157       | 132                     |
| December.....       | 120   | 140             | 142   | 118       | 157       | 133                     |

<sup>1</sup> The figures for "All Items" were calculated by giving the following weights to each group: Food, 35 p.c.; Fuel, 8 p.c.; Rent, 18½ p.c.; Clothing, 18½ p.c.; Sundries, 20 p.c.

## Section 4.—Earnings in the Census Year 1931.

The total number of wage-earners in Canada reporting earnings for the census year ended June 1, 1931, was 2,476,414 or 96·35 p.c. of all wage-earners and the total amount of their earnings was \$2,100,552,700. A table at p. 789 of the 1937 Year Book showed statistics of wage-earners, by sex, and their earnings, for the census years 1911, 1921, and 1931.

## CHAPTER XX.—PRICES.\*

For purposes of statistical analysis, commodity prices are usually divided into two principal groups, wholesale prices and retail prices. The term 'wholesale' is not used literally, and included in this group primary producers', factory, and jobbers' quotations are often found, as well as actual wholesale prices. Markets in which this type of price is quoted are usually well organized, and frequently very sensitive. They are responsive to changing business and monetary conditions. Wholesale quotations are accordingly preferred, therefore, for sensitive index numbers of prices designed to reflect price reactions to business factors, and for more general index numbers to furnish a basis of measuring changes in the purchasing power of money. Although possessing admitted defects, general wholesale price index numbers are widely used for this latter purpose.

Chart 1

Retail prices represent more diffused markets, and are less sensitive. There is ordinarily a lag of several months between this type of quotation and its wholesale counterpart. Retail prices are important from a statistical point of view, however, because they indicate changes in living costs and, along with measurements of income, show fluctuations in the economic well-being of the community.

### Section 1.—Wholesale Prices of Commodities.

#### Subsection 1.—Historical Review of Canadian Prices.

Annual average index numbers for every year since Confederation are given in Table 1. In that table will be noted the high prices of 1867, following the close of the American Civil War and the Austro-Prussian War of 1866, and the tendency

\* Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. This Branch compiles and publishes statistics on: Prices (wholesale, retail, securities, bond yields, services, exchange, cost of living), Retail and Wholesale Trade, Foreign Capital Investments in Canada and Canadian Investments Abroad, Balance of International Payments, and other related subjects. For a complete list of the publications of this Branch, the reader is referred to Chapter XXIX, Section I, under "Internal Trade".

to declining prices in subsequent years. Prices went up again after the Franco-German War of 1871 and reached a high point in 1872 and 1873, but the crisis of the latter year resulted in a decline. A downward trend persisted fairly steadily throughout the 25 years from 1872 to 1897, when the gold supply of the world did not increase as rapidly as the supply of commodities. This gold shortage was accentuated by the demonetization of silver, which ceased to be legal tender and was reduced to the level of token money by most nations. Relief came through the discoveries of gold in the Rand mines and the application of the cyanide process to low-grade ores. The result was a rapidly increasing world production of gold from about 1890 to the outbreak of the Great War, with consequent rising prices as the volume of the new gold became an appreciable part of the total stock. Thus prices increased from the low point of 75.6 in 1897 to 100 in 1913 and 102.3 in 1914. Afterwards, the Great War, both through the scarcity of commodities which it occasioned and the inflation of the currency which it produced, drove prices rapidly upward to a maximum of 243.5 in 1920, followed by a rapid drop to 152.0 in 1922. This was succeeded by a slight increase to 160.3 in 1925. The tendency from 1925 to 1929 was gradually downward, although the period was one of increasing prosperity.

Commencing in the autumn of 1929, the severe economic depression was accompanied by a drastic decline in wholesale prices. Its extent may be gauged from the drop of the wholesale price index from 153.7 in August, 1929, to 99.2 in February, 1933. A subsequent irregular rise carried this index upward to 132.1 in 1937, although the trend of prices was downward in the latter half of that year.

### 1.—Annual Index Numbers of Wholesale Prices in Canada, 1867-1937.

(1913=100.)

| Year.     | Index No. | Year.     | Index No. | Year.     | Index No. | Year.     | Index No. |

### Subsection 2.—The Index Number on a Post-War Base (1926).

The official Canadian index numbers of wholesale prices, along with the other price indexes computed by the Dominion Bureau of Statistics, were revised in 1928, when the list of commodities included was increased from 236 to 502. The weighting system was extended to obtain a fairer distribution among sub-groups, and the base was shifted to the year 1926. By that time most of the leading countries of the world had completed the first phase of post-war currency reorganization, and a reasonable degree of price stability seemed to have been established. Commodities and weights were again revised at the beginning of 1934, bringing the total number of price series in the index up to 567.

From 1926 to the latter part of 1929 a moderate decline occurred, but its effect upon the price structure was not great. Subsequent dislocation, however, was extremely serious, as may be observed from the following percentage declines of group prices between August, 1929, and February, 1933: Canadian farm products, 60.7 p.c.; raw and partly manufactured materials, 50.5 p.c.; fully and chiefly manufactured goods, 29.3 p.c.; and the average of all commodities at wholesale, 35.5 p.c. From March, 1933, to July, 1937, the movement of commodity prices was irregularly upward, culminating in a sharp rise dating from June, 1936. The July, 1937, index of 87.5 was 36 p.c. above that for February, 1933, although this increase was partly cancelled by a decline of 2.9 points in the last five months of the year. The following index numbers show the relationship between the average of all commodities and specified commodity groups for December, 1937: all commodities, 100.0; Canadian farm products, 101.8; raw and partly manufactured materials, 97.7; and fully and chiefly manufactured materials, 97.0. This represents material improvement over conditions existing at the nadir of the depression, and points to a substantial restoration of equilibrium between the major price groups.

## 2.—Weighted General Wholesale Price Index Numbers, by Months, 1925-37.

(1926=100.)

| Month.           | 1928. | 1929. | 1930. | 1931. | 1932. | 1933. | 1934. | 1935. | 1936. | 1937. |

| June.....        | 96.9  | 93.4  | 87.7  | 71.8  | 66.4  | 67.5  | 72.0  | 71.4  | 72.3  | 84.6  |
| July.....        | 96.0  | 97.2  | 85.3  | 71.3  | 66.5  | 70.5  | 72.0  | 71.4  | 74.3  | 87.6  |
| August.....      | 95.3  | 98.4  | 83.7  | 70.5  | 66.7  | 69.5  | 72.2  | 71.7  | 76.1  | 85.6  |
| September.....   | 95.4  | 97.8  | 82.1  | 69.7  | 65.9  | 68.9  | 71.9  | 72.4  | 76.4  | 85.0  |
| October.....     | 95.2  | 96.8  | 81.0  | 69.9  | 65.0  | 67.9  | 71.3  | 73.1  | 77.1  | 84.7  |
| November.....    | 94.9  | 95.7  | 79.5  | 70.7  | 64.7  | 68.9  | 71.1  | 72.7  | 77.2  | 83.1  |
| December.....    | 94.6  | 96.0  | 77.7  | 70.4  | 64.0  | 69.0  | 71.1  | 72.7  | 79.6  | 82.7  |
| Yearly Averages. | 96.4  | 95.6  | 86.6  | 72.1  | 66.7  | 67.1  | 71.6  | 72.1  | 74.6  | 84.6  |

This irregular rise in Canadian price levels which dates from February, 1933, received its first major setback in the last half of 1937. The Bureau's index of wholesale prices for December was 82.7 on the base 1926=100; it compared with a December 1936 figure of 79.6, and indicated a net rise of 3.9 p.c. Year-end indexes alone, however, fail to give a true picture of price movements. The rapid advance which featured the latter half of 1936 continued at an accelerated pace until the final week of March when the Bureau's weekly index reached a peak of 86.9. Coincident with subsequent recession in world commodity markets, Canadian price levels reacted moderately carrying the index to 84.1 for the week ended June 11. Rapid deterioration of the grain crop on the Prairies then stimulated an advance in the Canadian farm products index of more than 12 p.c. in the next 5 weeks, while the general index rose 4 p.c. to 87.7. A second decline commenced in August, and subsequent monthly indexes fell steadily with many wholesale prices ending the year considerably below opening figures.

Movements of indexes for the various component materials showed less variation in 1937 than in 1936. In the preceding year the range of dispersion was marked by vegetable products which advanced 25.2 p.c. and by a rise of 0.6 p.c. for non-metallic mineral products. In 1937 the range was from +13.9 p.c. to -7.1 p.c., and the actual percentage changes were as follows: vegetable products +1.5, animal products +5.8, textiles -2.7, wood products +8.5, iron and its products +13.9, non-ferrous metals -7.1, non-metallic minerals +1.4, and chemicals +2.0.

### 3.—Annual Weighted Index Numbers of Wholesale Prices of Commodities (on the 1926 Base), by Groups (Chief Component Material Classification), 1913-37, with Monthly Figures for 1936-37.

NOTE.—Monthly figures for 1932 and 1933 will be found at p. 863 of the 1934-35 Year Book, for 1934 at p. 807 of the 1936 Year Book, for 1935 at p. 793 of the 1937 Year Book, and those for certain earlier years in the corresponding table of previous editions.

| Year and Month.                         | Vegetable Products. | Animals and Their Products. | Fibres, Textiles and Textile Products. | Wood, Wood Products and Paper. | Iron and Its Products. | Non-Ferrous Metals and Their Products. | Non-Metallic Minerals and Their Products. | Chemicals and Allied Products. | All Commodities. |

## Section 2.—Retail Prices of Commodities.

Collection of data and calculation of index numbers of retail prices and the cost of living are carried out in co-operation by the Dominion Bureau of Statistics (Department of Trade and Commerce) and the Department of Labour. Resultant series of index numbers are computed from different points of view. The computations of the Labour Department are designed to show changes in the cost of living for workmen in cities. They are constructed from family budgets, principally a weekly family budget of staple foods, fuel, and rent which has been published

monthly in the *Labour Gazette* since 1915 and annually since 1911; in addition, figures are included for clothing and sundry items and further data for fuel, light, and rent. The Labour Department aims, by this method, to have a basis for computation that can be readily applied to the data for any given locality or district at any time, or for any class of labour—for instance, coal miners, who usually do not live in cities. Index numbers of retail prices and costs of living issued by the Bureau are constructed from a more general point of view, having for their object the measurement of the general movement of such prices and costs in the Dominion as a whole, and being so calculated as to make comparisons possible with other general index numbers constructed on similar principles, for example, the index of wholesale prices. Calculated, as they are, on the aggregative principle, *i.e.*, the total consumption of each commodity, the Bureau's index numbers afford an excellent measurement of changes in the average cost of living in the Dominion as distinguished from that of any particular class or section.

In the Bureau's index, 1926 is taken as the base year and is represented by 100 to bring it into conformity with other series of index numbers shown in this chapter. A description of the system of weighting of individual items, sub-groups and groups, and of the method of construction of this index number was given at pp. 812-818 of the 1931 Year Book. The Labour Department uses 1913 as 100 for both cost of living and wages index numbers. As will be seen from Table 7, the general cost of living index moved up from 80.8 in 1936 to 83.1 in 1937, continuing the upward trend apparent after July 1933. Higher prices for foods, rentals, clothing and sundries were chiefly responsible for the advance. Fuel declined from 86.4 to 85.4. The monthly index for living costs fluctuated during 1937 between 81.8 and 84.3. January and December group indexes were as follows: foods, 75.2 and 79.1; fuel, 86.3 and 86.1; rent, 84.9 and 89.0; clothing, 71.6 and 73.3; sundries, 93.0 and 93.9.

**7.—Index Numbers of Retail Prices, Rents and Costs of Services (on the 1926 Base), 1913-37.**  
(1926=100.)

| Year.     | Food Index. | Fuel Index.       | Rent Index. | Clothing Index. | Sundries Index.   | Total Index.      |

<sup>1</sup> Revisions in the method of computing the clothing index are responsible for minor changes in the clothing group index, and in the total index.<sup>2</sup> Subject to revision.

Table 9 shows the average prices of items included in the family budget in 1920, 1926, and in each of the years from 1929-37. These prices are weighted by the quantities used by the Department of Labour in computing a weekly family budget each month. Table 10 gives the group indexes by provinces. An examination of the tables reveals the course of the budget, consisting of food, fuel and lighting, and rent, over the period shown.

9.—Prices of a Family Budget of Staple Foods, Fuel and Lighting, and Rent, for Sixty Cities in Canada, 1920, 1926, and 1929-37.

## Section 3.—Index Numbers of Security Prices.

Security prices have long been utilized in statistical measurements related to economic phenomena. They are extremely sensitive to changing business conditions, although this valuable characteristic is sometimes overshadowed by the fact

that their movements may be greatly influenced by speculative interest very remotely associated with underlying economic conditions. Thus in 1928 and 1929, common stock prices advanced far beyond levels indicated by business profits and prospects.

The behaviour of Canadian common stock prices has been quite different from that of commodity prices since pre-war years. There was no advance in security markets during the Great War paralleling the pronounced inflation in commodity values. Between 1926 and 1929, however, when commodity prices were declining gradually, common stocks more than doubled in price. Both sets of prices recorded a sharp drop between 1929 and 1933, and both have shown recovery subsequently. This has been much more pronounced in the case of security prices.

**Investors Index Numbers of Common Stocks.**—Canadian security prices of all types suffered net losses during 1937. Amounts varied, ranging from an average of approximately 20 p.c. for common stocks down to 2 p.c. for Dominion long-term bonds. Year-end comparisons fail to reveal the extent of price reactions in 1937 which came between February and October, following a period of rapid appreciation dating from the summer of 1935. This recession wiped out gains of 1936 and part of those recorded for 1935, before signs of hesitant recovery appeared in November and December. Mining stocks showed considerable improvement at this time, although industrials and utilities made little progress.

Industrial common stocks reached a major turning point on Mar. 10 and thereafter moved definitely downward. This marked the termination of an irregular advance dating from February, 1933. Intervening reactions were all of a minor character and bore little semblance to the drastic decline of the past year. The first phase of this movement ended on Apr. 29 in a heavy wave of liquidation. The industrial index for that day was 205.0 as compared with the Mar. 10 peak of 247.3 and the opening level of 220.0 on Jan. 4. There followed a period of erratic recovery terminating on Aug. 14 with the index at 226.0. Most of the improvement occurred in July. The second phase of decline was much more drastic although it gathered momentum rather gradually. Termination came on Oct. 19 after a week which witnessed the sharpest break in prices since October, 1929, and after the index had reached 154.9. Subsequent recovery was equally pronounced at first, but markets soon settled down into a series of cyclical fluctuations, usually of about two weeks duration, and little headway resulted. The industrial price index for Dec. 31 was 165.6. The 1937 December average of 167.7 was 21.2 p.c. below the corresponding average for 1936. Percentage declines between monthly average levels for December, 1936 and 1937, for various industrial stock groups were as follows: machinery 26, pulp and paper 38, milling 26, oils 13, textiles 9, foods 15, beverages 21, building materials 28, industrial mines 29.

Utility stock prices followed the general market swings of the industrial section, but fluctuations were less pronounced. Opening at 66.1 on Jan. 4, a price index of 19 utility common stocks moved gradually upward to the year's high of 75.3 on Feb. 20, three weeks before industrials reached their crest. The subsequent decline halted at an intermediate low of 59.2 on Apr. 28. The second low in utilities of 48.0 came on Oct. 19 after an intervening rise to 67.3 on Aug. 9. Subsequent rallies showed little underlying strength and during the last two months the utility average twice dropped under the lowest October levels. It was 47.8 on Dec. 31. Sharp declines in the transportation section, and last quarter weakness in the power issues were responsible for the losses registered by the utility group.

## 11.—Investors Index Numbers of Common Stocks (on the 1926 Base), by Months, 1937.

NOTE.—Figures for 1933 and 1934 were published at pp. 874 and 875 of the 1934-35 Year Book, for 1935 at p. 816 of the 1936 Year Book and for 1936 at p. 803 of the 1937 Year Book; those for earlier years may be found in the corresponding table of earlier editions.

**Preferred Stocks.**—Preferred stock prices in 1937 continued to parallel the movements in industrial and utility common stock markets. Their recovery in recent years has been less decided than that shown for common stocks except in 1936, when the preferred section advanced 27 p.c. as compared with 20 p.c. for industrial and utility averages. The relative position of preferred issues was further improved in 1937 by a less pronounced decline of 14 p.c., approximately one-third less than the reaction in common stock averages. An index of 25 preferred stock prices advanced from 93.9 for December, 1936, to 103.1 in April, 1937, and then declined irregularly to 81.0 in December. The greatest part of this recession came in September and October.

## 12.—Index Numbers of 25 Preferred Stocks, by Months, January, 1927-April, 1938.

(1926=100.)

| Year.     | Jan.  | Feb.  | Mar.  | Apr.  | May.  | June. | July. | Aug.  | Sept. | Oct.  | Nov.  | Dec.  |

**Weighted Index Numbers of Mining Stocks.**—The movement of mining stocks showed the same broad outline as that for industrials and utilities, but the amplitude of fluctuations and positions of turning points differed materially. The first decline in the mining section started sooner and was much more severe. The second was less pronounced and subsequent recovery offered a marked contrast to weakness in utilities and the hesitant behaviour of the industrial section. The year's peak in gold stock prices came on Feb. 3, when an index for 21 gold issues reached 142.0, up 6 points from the first of the year. The decline which followed was gradual at first, but accelerated during April, and despite repeated rallies reactionary forces continued to predominate until the latter half of June. From 101.6 on June 23, the index moved up to 115.4 on Aug. 16, only to establish successive new lows of 98.7 and 96.5 on Sept. 10 and Oct. 19, respectively. A strong rebound followed by more gradual but persistent advances brought the series up again to 118.3 on Dec. 31.

Fluctuations in base metal stock prices were the most violent in many years. The net decline for 1937, indicated by comparison of 1936 and 1937 December averages, was 33 p.c., as compared with 12 p.c. for gold issues. Although the year's peak in base metals came later in February, major turning points for the group coincided closely with those for the gold section. They were marked by the following daily price indexes: 321.8 on Jan. 4, 372.6 on Feb. 22, 234.9 on June 23, 299.8 on Aug. 7, 168.7 on Oct. 19, and 214.7 on Dec. 31. The closing rise in stock prices anticipated later improvement in commodity markets.

#### Section 4.—Prices of Services.

A study of the prices of services sheds considerable light on the cost of living, as such services are a considerable item in the average family budget. Information with regard to the trend of street-car fares, of rates for manufactured and natural fuel-gas, of domestic electric-light rates and of telephone charges was published at pp. 801-804 of the 1927-28 Year Book. Later information shows that the prices of manufactured fuel-gas have shown a downward tendency, the Dominion index number for 1936 being 93.0, as compared with 100.0 in 1926. The index number of the price of natural fuel-gas also declined from 100.0 in 1926 to 92.5 in 1930, rose again to 94.3 in 1932, then declined to 92.6 in 1936.

On the other hand, telephone rates have shown a distinct increase, the Dominion index number of domestic telephone rates having risen from 100.0 in 1926 to 107.4 for 1933, 1934, 1935, and 1936. Again, the business telephone rate has risen from 100.0 in 1926 to 118.5 for 1933, 1934, 1935, and 1936.

Additional information and details by provinces regarding the prices of services will be found at pp. 119-130 of the Annual Report on Prices and Price Indexes, 1913-36, issued by the Dominion Bureau of Statistics.

**Hospital Charges.**—In view of discussions of the increased cost entailed by illness and hospital treatment, special investigations on hospital charges are now made annually and the results are given as Dominion averages in the following table. In general, this shows that hospital charges in 1930 were 94 p.c. above the 1913 level. From 1930 to 1935 rates gradually declined to less than 89 p.c. above those in 1913, then rose slightly in 1936. Operating room charges have not increased at the same rate as room charges, being only 54 p.c. above those in 1913, while the latter averaged almost 90 p.c. higher. The cost of maintaining patients in hospitals declined more than 11 p.c. between 1930 and 1936.

The detailed results of this investigation, including the statistics by provinces, are to be found at pp. 120-124 of the Annual Report on Prices and Price Indexes, 1913-36, issued by the Dominion Bureau of Statistics.

## Section 5.—Index Numbers of Bond Yields.\*

Few economic statistics are of more significance than the net rates of return received on absolutely the safest securities, such as government bonds maturing on a fixed date. Interest rates naturally grade upward from the rates which the safest of possible borrowers has to pay, and from the fluctuations of that price an idea may be obtained as to the relation between the supply of, and the demand for, funds for investment.

The exceptional requirements of the war years turned the Dominion authorities to the internal market, a field which had hitherto served mainly the needs of the provinces and municipalities. To the latter, therefore, it is necessary to go for earlier historical records of long-term bond yields in the internal market. Province of Ontario issues covering the years from 1900 to date are available in this field, and were utilized for the first long-term bond yield index constructed by the Bureau of Statistics. The relatively long period for which these records have been preserved makes this series of considerable value. On pp. 805 and 806 of the 1937 Year Book a statement will be found bearing on the movements of Ontario bond yields since 1900. Since the War, however, the growing importance of Dominion financing in the domestic market has made it advisable to supplement the Ontario series with the Dominion index of bond yields shown in Table 15.

\* The index of Ontario long-term bond yields formerly shown may be found in the Bureau's monthly bulletin "Prices and Price Indexes", obtainable from the Dominion Statistician.

Prices of Dominion of Canada long-term bonds declined moderately during 1937, but remained well above average levels of recent years. Year-end averages showed a net loss of approximately 2 p.c., but were only 3 p.c. below the all-time peak levels of August and September, 1936. An index of prices for representative Dominion long-term issues dropped from 118.2 for December, 1936, to 112.7 for April, 1937. Gradual recovery subsequently caused the index to advance to 115.5 for August, and it closed at 115.6 after narrow intervening fluctuations. Weakness in February and March appeared to be mainly associated with outside factors, as there were no new financing operations or other disturbing internal developments at this time. Refunding and loan operations of the Dominion and provinces proved generally successful. Eastern provincial issues were firm throughout the year and in some cases showed greater strength than Dominion maturities. Saskatchewan and Alberta bonds suffered appreciable losses, while those for Manitoba and British Columbia registered moderate net declines.

## Section 6.—Wholesale Price Index Numbers of Principal Imports and Exports.

For a country such as Canada, whose economy is vitally affected by foreign trade, the importance of statistics relating to all phases of international commerce is readily apparent. Prices of imports and exports, although of less general concern than aggregate values, are nevertheless significant, and the examination of price fluctuations must form a part of any complete analysis of trade statistics. If trade value figures decline, it is important to know whether this represents a contraction of markets or simply a reduction in prices with volume maintained at former levels. Indexes of both volume and price are necessary for a complete knowledge of such facts. They are also useful in determining the influence of tariff policy upon trade movements. It is likewise of considerable importance that repercussions of international price fluctuations upon domestic price levels should be observed, and measurements made of their effect.

The calendar year import and export valuation indexes formerly published have been replaced by a new and more comprehensive series of wholesale price index numbers for principal imports and exports. These are available from 1913 to the present time on the base 1926=100. They compare closely with the corresponding valuation indexes and have been constructed so as to be directly comparable with other wholesale price index numbers which the Bureau publishes. From 1934 onward, the new series is available upon a monthly basis.

| 1935..... | 68.5                           | 74.6                        | 63.6                                   | -                              | 94.4                   | 68.0                                   | 82.5                                      | 89.7                           | 77.9           |
| 1936..... | 68.4                           | 78.7                        | 67.7                                   | -                              | 96.3                   | 71.6                                   | 82.0                                      | 80.9                           | 79.4           |
| 1937..... | 79.7                           | 89.0                        | 72.1                                   | -                              | 114.5                  | 95.6                                   | 82.8                                      | 95.1                           | 89.8           |

It will be seen from Table 16 that from 1926 to 1937 the total wholesale price index of exports showed a net decline of 8.7 p.c. more than that of imports. This is not unexpected in view of the preponderance of raw materials in Canadian export trade and the effect of the depression on such prices. For the low year of the depression, 1932, the total exports index was 54.9 and the imports index 70.5. From this level the recovery of export prices has therefore been 26.2 p.c. as compared with 19.3 for import prices. The groups in which recovery has been strongest for both exports and imports are: fibres, textiles and textile products; vegetables and their products; and animals and their products.

## CHAPTER XXI.—PUBLIC FINANCE.

The following treatment of public finance includes an outline of Dominion, provincial, and municipal finance in Canada, supported by the necessary detailed statistics, and closes with a brief discussion of the national wealth and national income of the Dominion as the basis of all public finance.

The great increase in Dominion expenditure since 1913 has been due partly to the Great War with the resulting burden of interest, pension charges, etc., and partly to railway expenditures and social services including, latterly, unemployment relief. Increases on a commensurate scale have also taken place during the same period in provincial and municipal expenditures. Thus, in their fiscal years ended 1936, the total ordinary expenditure of the nine Provincial Governments was \$248,141,808 as compared with \$53,826,219 in 1916, only 20 years before—an increase of over 361 p.c. (The aggregate interest payments of Provincial Governments rose from \$7,817,844 in 1916 to \$79,893,083 in 1936). Again, in recent years, between 1924 and 1935, the aggregate tax receipts of the municipalities of Ontario have increased from \$94,526,271 to \$122,108,912 (comparable figures are not available for earlier years)—an increase of over 29 p.c. In Quebec the ordinary receipts of municipalities increased from \$33,288,115 in 1915 to \$79,471,242 in 1933—an increase of 139 p.c.; the 1934 and 1935 figures given in Table 30 are not comparable as explained in the footnote thereto. While taxation receipts in the Prairie Provinces and the Maritime Provinces, for those years for which comparable figures are available do not show an upward trend, except in the case of Nova Scotia, the figures cover relatively recent years in the majority of cases, and in the Prairie Provinces a larger proportion of tax levies has remained uncollected. In British Columbia the taxes collected by the municipalities totalled \$9,382,099 in 1917 and \$17,185,917 in 1935.

**Public Debt of Canada.**—The latest year for which a figure for the aggregate public debt of Canada can be given is 1936. The statement below is summarized from the statistics given in the respective Sections of this chapter, the guaranteed or indirect debt being shown separately. The figures with regard to provincial debt are for the respective fiscal years of the provinces ended in 1936, given on p. 878.

### SUMMARY OF THE AGGREGATE PUBLIC DEBT OF CANADA (*CIRCA*) 1936.

| (Dominion, Provincial, and Municipal Debt.)   |                          |    |
|---|--------------------------|----|
| <b>NET DIRECT DEBT—</b>   |                          | \$ |
| Net Debt of Dominion Government, Mar. 31, 1936.....   | 3,006,100,517            | \$ |
| Net Direct Liabilities Provincial Governments, 1936 (sinking funds and available capital, current and trust account assets deducted)..... | 1,084,107,202            |    |
| Direct Liabilities all Canadian Municipalities (less sinking funds and investments, 1935).....  | 1,445,537,075            |    |

(See text and statement on page 832)

**NET DIRECT DEBT**  
\$5,535,744,794

**GUARANTEED OR INDIRECT DEBT**  
\$1,503,346,744

\* Including Canadian National Steamships and Harbour Commissions.

## Section 1.—Dominion Public Finance.\*

**Historical Sketch.**—Both under the French *régime* and in the earlier part of the British, the territorial or casual revenues of Canada, consisting of certain seigniorial dues and the proceeds of the sale of government timber and land, were reserved to the Crown, while the right of levying taxes and of regulating the trade and commerce of the colony was, after 1763, deemed to be vested in the British Parliament.

By the Quebec Act of 1774, certain duties on spirits and molasses were imposed, to be expended by the Crown in order to provide a revenue "towards defraying the expenses of the administration of justice and the support of the civil government of the province". A little later, in 1778, the British Government, by the Declaratory Act (18 Geo. III, c. 12), renounced forever the right of taxing the colonies to provide Imperial revenue, but maintained its claim to impose duties considered necessary for the regulation of trade, the proceeds to go towards defraying the expenditures of the colonial administration. After the Constitutional Act of 1791, the customs duties remained under the control of the Imperial Government, their revenue, as well as the territorial revenue above mentioned, coming in to the Executive Administration independently of the Legislative Assembly and thus making the Executive power largely independent of the Legislature. In case these revenues proved insufficient, recourse could generally be had to the grant made by the Imperial Government for the support of the army. As time went on, however, the Crown revenues became more and more inadequate to meet the increasing expenditure, while the wave of economy in the United Kingdom after 1815 made it impossible any longer to supplement these revenues from military sources. On the other hand, the purely provincial revenues collected under the authorization of the Provincial Legislature showed an increasing surplus. The power of the purse thus began to pass into the hands of the Legislatures; further, in 1831 the British Parliament passed an Act placing the customs duties at the disposal of the Legislatures.

Under the Act of Union, a consolidated revenue fund was established. All appropriation bills were required to originate in the Legislative Assembly, which was forbidden to pass any vote, resolution or bill involving the expenditure of public money unless the same had first been recommended by a written message of the Governor General. The British Government surrendered all control of the hereditary or casual revenues, which were thenceforth paid into the treasury of the province to be disposed of as its Legislature should direct.

At the interprovincial conference which took place prior to Confederation, it was decided that the new Dominion Government, which was to take over permanently, as its chief source of revenue, the customs and excise duties that had yielded the greater part of the revenues of the separate provinces (direct taxation being as unpopular in British North America as in other new countries), was also to assume the provincial debts and to provide out of Dominion revenues definite cash subsidies for the support of the Provincial Governments. (See Tables 15 and 16.) Until the Great War, which made other taxes necessary, the customs and excise revenue con-

\* Revised under the direction of Dr. W. C. Clark, Deputy Minister, Department of Finance, with the exception of those parts dealing with war tax revenue and inland revenue on pp. 850 to 856, which were revised by the Department of National Revenue.

stituted the chief resource of the Dominion Government for general purposes—the Post Office revenue and the Government railway receipts, which are not taxes at all, being mainly or entirely absorbed by the expenses of administering these services. Indeed, for many years preceding the War, customs and excise duties, together with the revenue from the head tax on Chinese immigrants, were the only items of receipts which were classified as taxes by the Department of Finance. In the last pre-war fiscal year these two items aggregated \$126,143,275 out of total receipts on consolidated fund account amounting to \$163,174,395, the Post Office and Government railways furnishing between them \$26,348,847 of the remainder, offset, however, by expenditures on these two services amounting to \$27,757,196. Miscellaneous revenue, largely fees, amounted in that year to \$10,682,273—a comparatively small fraction of the total. As both customs and excise taxes were indirect, the average Canadian felt but little the pressure of taxation for Dominion purposes.

The War enormously increased the expenditure, and this increase had in the main to be met by loans. It is, however, a cardinal maxim of public finance that, where loans are contracted, sufficient new taxation should be imposed to meet the interest charge upon the loans and to provide a sinking fund for their ultimate extinction. This war taxation was begun in Canada within the first weeks of the War when, in the short war session of August, 1914, increases were made in the customs and excise duties on various commodities, including, coffee, sugar, spirituous liquors, and tobacco. In 1915 special additional duties of 5 p.c. *ad valorem* were imposed on commodities imported under the British preferential tariff and 7½ p.c. *ad valorem* on commodities imported under the intermediate and general tariffs, certain commodities being excepted. New internal taxes were also imposed on bank circulation, on the income of trust and loan companies, on insurance in other than life and marine companies, on telegrams and cablegrams, railway tickets, sleeping-car berths, etc., also on cheques, postal notes, money orders, letters and post cards. In the following year, the business profits war tax (dropped in 1921)\* was introduced, and in 1917 an income tax was imposed. In 1918 both of these taxes were increased and their application widened, and in 1919 the income tax was again increased, and still further augmented in 1920 by a surtax of 5 p.c. of the tax on incomes of \$5,000 and over; the sales tax was also introduced in 1920. The cumulative result of these war taxes was that, in the fiscal year ended Mar. 31, 1921, customs duties were for the first time displaced from their position as the chief factor in Canadian revenue, the war taxes yielding \$168,385,327, as against the customs yield of \$163,266,804. This situation has remained true down to 1937 with the exception of the period between 1928 and 1931, when customs duties temporarily assumed their former position.

The importance which the sales tax has attained as a source of revenue will be seen from Tables 9 and 10. When first introduced in 1920 the tax was 1 p.c. on sales but the rate has been varied from year to year and from May 2, 1936, has been 8 p.c. A statement is appended showing the changes made from the inception of the tax up to the present. A lesser, but still substantial, source of revenue is the special excise tax on importations, instituted in 1931, the changes in rates of which are shown in Statement II.

\* Related revenue from this tax has been collected in subsequent fiscal years down to 1933 (see Table 8, p. 851).

## I.—STATEMENT OF SALES TAX CHANGES, 1920-38.

NOTE.—Sales tax is payable by purchaser to manufacturer or wholesaler. For proceeds of tax, see Tables 2, 9, and 10.

A more detailed sketch of the changes made in taxation from 1914 to 1926 will be found at pp. 755-759 of the 1926 Year Book, while similar information *re* tax changes in 1927 to 1929 was given at pp. 791-792 of the 1930 Year Book and for the years 1930 to 1935 at pp. 824-826 of the 1936 Year Book.

**Recent Modifications in the System of Taxation.**—In 1936 important changes were made in various taxation rates. The ordinary rate of income tax on corporations was increased from 13½ p.c. to 15 p.c., and where returns are consolidated, the rate was increased from 15 p.c. to 17 p.c. No changes were made in the existing rates on individual incomes. In order to stimulate an expansion of mining activity, an exemption from corporate income tax was granted to any metalliferous mine coming into production between May 1, 1936, and Jan. 1, 1940, such exemption to apply to its income for the first three years following the commencement of production. A new category embracing non-resident-owned investment corporations was established with provision for a rate of half the normal rate of tax on corporations.

The rate of sales tax was increased from 6 p.c. to 8 p.c. Certain changes in the exemption list were made to eliminate double taxation on materials consumed in the process of manufacture commonly known as 'consumable materials'.

Changes were made in the schedule of excise taxes on automobiles with a limitation providing that the tax per automobile in no case shall exceed \$250.

The excise duty on Canadian brandy was reduced from \$4 to \$3 per gallon. The duty on spirits used in the manufacture of medicines, etc., was reduced from \$2.50 to \$1.50 per gallon.

The more important tariff changes were as follows: Intermediate Tariff on automobiles was fixed at  $17\frac{1}{2}$  p.c. instead of former varying rates of  $17\frac{1}{2}$ ,  $22\frac{1}{2}$ , and 30 p.c.; Intermediate Tariff on agricultural implements reduced from  $12\frac{1}{2}$  to  $7\frac{1}{2}$  p.c.; Intermediate Tariff on gasoline reduced from  $2\frac{1}{2}$  cents to 1 cent per gallon.

Under the British Preferential Tariff the following were the more important changes: free listing of iron and steel machinery of a class or kind not made in Canada; the removal of existing specific duties on all yarns or fabrics wholly of cotton, and on yarns and fabrics of artificial silk; and a reduction in rate on all unenumerated commodities made of iron or steel.

Reductions under all tariffs applied to printing machinery and equipment, various requirements for public hospitals, and all articles imported for use of the blind.

An important change was the provision for allowing Canadians returning from abroad to import free of customs duties goods to the value of \$100, for their personal use.

In 1937 no changes were made in the rates of taxation. Several small items were added to the list of goods exempted from the sales tax, including articles specially designed for the use of the blind, raw and salted hides, certain refractory materials, spinal braces and parts thereof, ingredients used in canning fish, parts for grain- and seed-cleaning machines and art work and printing plates made therefrom for non-advertising purposes in periodical publications.

Tariff changes of considerable importance were effected in 1937, resulting for the most part from the revised trade agreement between Canada and the United Kingdom, signed at Ottawa on Feb. 23, 1937. Canada's commitments under the agreement were implemented by amendments to the customs tariff introduced during the course of the Budget Speech on Feb. 25.

The agreement resulted in reduction of the British preferential rate of duty under 179 tariff items. The concessions included reduced rates, or free entry, on textiles, including those of wool, cotton, silk and artificial silk, as well as on clothing and wearing apparel, knitted goods of all kinds, blankets and carpets; on glass tableware and cut glass; on various primary forms of iron and steel, and on a wide range of processed steel goods, including machinery, vacuum cleaners, and sewing machines, enamelled ware, and electrical goods; on leather and leather products; on boots and shoes; on numerous paper products; and on paints and varnishes, earthenware, canned fish, soaps, brushes, and silverware.

The 1937 Budget Speech also introduced a considerable number of tariff amendments not directly related to the trade agreement. Certain of these were merely technical in character, but others provided for reductions under all tariffs on fumigants, plastic materials, seamless well-casing, and other articles, and for reductions of the intermediate or both intermediate and general rates on a number of products of which plate glass and cotton clothing were among the most important.

There were no increases in duty under the British preferential tariff. The intermediate rate on furniture was raised from 30 p.c. to 37½ p.c., in each case less a discount of 10 p.c. to most-favoured-nations, as the result of a Tariff Board report received while the House of Commons was in committee. Other increases of the intermediate or general tariff were few in number and of minor importance.

As a result of commercial arrangements with other countries, Canada, during 1937, extended her intermediate tariff to the Panama Canal Zone and accorded Brazil most-favoured-nation treatment. All non-self-governing British colonies and specified mandated territories were given most-favoured-nation treatment, and the list of countries entitled to the British preferential tariff was expanded by the addition of a number of non-self-governing colonies not already receiving its benefits. And, finally, the trade agreements with Australia and New Zealand were revised and extended. Canada granted some additional concessions to Australia and New Zealand, of which probably the most important was a reduction of the rate on lamb and mutton from 3 cents per lb. to ½ cent per lb. The reduced rates went into effect on Oct. 1, 1937.

A statement at pp. 811-817 of the 1937 Year Book showed complete details of the Dominion tax system as of July, 1936.

### Subsection 1.—The Current Balance Sheet of the Dominion.

A summary review of the current financial situation of the Dominion as at Mar. 31, 1933-37, is given in the balance sheet shown as Table 1. This shows the figures for gross debt on Mar. 31, 1937, to have been \$3,542,521,139, partly offset by active assets aggregating \$458,568,837, leaving the net debt at \$3,083,952,202. Non-active assets, including such public works as canals and railways, also loans to railways, amounted in the aggregate to \$1,833,901,293, leaving a debit balance on Consolidated Fund Account on Mar. 31, 1937, of \$1,250,050,909. The details of the various assets and liabilities are contained in the schedules accompanying the balance sheet and printed in the Public Accounts.

#### 1.—Balance Sheets of the Dominion of Canada, as at Mar. 31, 1933-37.

NOTE.—Dashes indicate that the items were not applicable in the years so indicated.

<sup>1</sup> Included in "Miscellaneous current accounts" in earlier Year Books. <sup>2</sup> Direct liabilities only.  
 Indirect liabilities or guarantees given by the Dominion of Canada are listed in Table 22, on pp. 865-866.  
<sup>3</sup> The Bank of Canada assumed liability for outstanding Dominion notes from Mar. 11, 1935.

## Subsection 2.—Receipts and Disbursements.

The receipts of the Dominion Government on Ordinary Account for the fiscal year ended Mar. 31, 1937, were \$445,028,955, an increase of \$72,806,749 as compared with the previous year; besides these, special receipts amounted to \$8,463,997 and other credits, including refunds to capital account and credits to non-active accounts, amounted to \$660,795—a total revenue of \$454,153,747. The regular expenditure on Ordinary Account was \$387,112,072, while Special Expenditures amounted to \$78,003,702. Under the category of "Government-Owned Enterprises", total disbursements amounted to \$44,218,526, under "Capital Account" to \$3,491,544, and under "Write Down of Assets" to \$19,179,588. Thus total disbursements amounted to

\$532,005,432. There was an increase of \$77,851,685 in the net debt (gross debt less active assets) during the year. (See Table 20 for interest-bearing debt.)

Detailed statistics of receipts and disbursements are contained in Tables 2 and 3. Tables 4 and 5 are historical tables giving the figures of the main items of Dominion receipts and expenditures since Confederation, while Table 6 shows the per capita receipts and expenditures for these years, calculated on census and estimated populations. Per capita receipts and expenditures are given by principal items in Table 7.

**Changes in the Public Accounts, 1936.**—Several important changes were made under various headings in the Public Accounts for 1936. On the revenue side "War and Demobilization Receipts", previously carried as "Special Receipts", were transferred to Ordinary Account (Casual Revenue). On the expenditure side several recurring items were also transferred from "Special" to "Ordinary", as follows: cost of loan flotations, representing flotation costs of new loans and annual charges for amortization of bond discount; the Government's annual contribution to the Superannuation Fund; the annual payment to maintain the reserve in the Government Annuities Fund; adjustment of war claims; and expenditures made under the Railway Grade Crossing Act. A new category was established under the heading "Government-Owned Enterprises", to cover expenditures incurred by the Government on account of the Canadian National Railways, the Canadian National Steamships and various Harbour Commissions. Other major changes were the establishment of a separate category for Write Down of Assets, and transference of payment of Old Age Pensions from the Department of Labour to the Department of Finance.

In Tables 2, 3, and 7 the new classification of items has been adopted for the 1936 and 1937 figures and the figures for 1933 to 1935 have been adjusted to the new basis. The result is that the figures for each year as given in the tables do not conform with the figures shown in the Public Accounts for that same year, because of the new set-up for 1936, but the figures below are on a comparable basis throughout.

## 2.—Details of Revenue Receipts, fiscal years ended Mar. 31, 1933-37.

NOTE.—See text above re adjustment of statistics for 1933-35 as compared with earlier Year Books. Dashes in this table indicate that no revenue was collected under the corresponding heads because the items were not applicable in the years so indicated.

<sup>1</sup> Expenditure (Collection of Revenue). After 1919 railway receipts were applied directly to railway expenditure; this accounts for the great decline in the figures in 1920 and subsequent years.

<sup>2</sup> The expenditures shown do not include moneys spent for Civil Government account and miscellaneous expenditures and to this extent do not correspond with the Post Office figures shown in Table 3 for the years 1923-37.

<sup>3</sup> Includes various non-enumerated items.

<sup>4</sup> Nine months.

## 4.—Principal Items of Dominion

NOTE.—Dashes in this table indicate that there were no expenditures under the

<sup>1</sup> For detailed statements see Table S, p. 851.  
for most earlier years and special receipts since 1921.<sup>2</sup> Includes various smaller items of revenue receipts  
<sup>3</sup> Nine months.  
<sup>4</sup> First year reported.

### 6.—Per Capita Figures of Taxation, Total Revenue Receipts, Expenditure on Consolidated Fund Account and Total Expenditure, 1888-1937.

Note.—The years marked with an asterisk (\*) are those of the censuses, April 2, 1871; April 4, 1881; April 6, 1891; April 1, 1901; June 1, 1911, 1921 and 1931. For the intercensal years the populations are estimated as at June 1 (see p. 155 for estimates of population). See the tables on pp. 839-842 for the figures of revenue and expenditure on which this table is based.

<sup>1</sup> Nine months.

### 7.—Per Capita Revenue Receipts and Expenditures, by Principal Items, 1933-37.

Note.—See Table 2 on pp. 839-840 for the revenue receipts and Table 3 on pp. 840-842 for expenditures on which these per capita figures are based. Dashes in this table indicate that no revenue was collected or expenditures made under the corresponding heads because the items were not applicable in the years so indicated.

### Subsection 3.—War Tax Revenue.

An account of the various war taxes imposed in 1915 and subsequently has already been given on p. 835 in the introduction to this Section. For convenience of reference, the amounts received from these taxes since the beginning are segregated and the totals paid to the Receiver General are given in Table 8. The taxes imposed on banks, trust and loan companies, and insurance companies are collected by the Department of Finance. The excise war taxes, the business profits war tax and the income war tax are collected by the Department of National Revenue. The amounts of excise war taxes collected from different sources in the past six fiscal years are given in Table 9, while Table 10 contains the details by provinces for the latest year. (See also Tables 37 to 42 of this Chapter.)

### 8.—War Tax Revenues Received by the Receiver General, fiscal years ended Mar. 31, 1915-37.

NOTE.—Dashes in this table indicate that no revenue was collected under the corresponding heads because the items were not applicable in the years indicated.

| Fiscal Year. | Banks. <sup>1</sup> | Trust and Loan Companies. <sup>1</sup> | Insurance Companies. <sup>1</sup> | Business Profits. <sup>2</sup> | Income Tax.   | Sales, Transportation Tax, etc. | Total War Tax Revenue. |

<sup>1</sup>The figures are for special taxation only, imposed in 1915 as outlined on p. 835. "Insurance Companies" are exclusive of life and marine insurance companies. <sup>2</sup>Although this tax was not charged upon profits accruing after Dec. 31, 1920 (see 14-15 Geo. V, e. 10), belated revenue therefrom continued to be received until 1933.

### 9.—Summary of Excise War Taxes Collected by the Department of National Revenue, fiscal years ended Mar. 31, 1932-37.

(Accrued Revenue.)

NOTE.—Dashes in this table indicate that no revenue was collected under the corresponding heads because the items were not applicable in the years so indicated.

**Subsection 4.—Inland Revenue.**

Under the Inland Revenue Act (R.S.C., 1906, c. 5), the Department of Inland Revenue had the control and management of standard weights and measures and of the collection of excise duties, of stamp duties, internal taxes, bridge and ferry tolls and rents until 1918. It administered the statutes which dealt with the adulteration of food and other articles, electricity and gas inspection, patent medicines, petroleum, naphtha, and the analysis of fertilizers and feeding stuffs. This Department also established the food standards which were put into force by Orders in Council under the authority of Sec. 26 of the Adulteration Act. Later the

administration of the Adulteration of Food, and the Proprietary and Patent Medicine Acts was transferred to the Department of Health, that of the Commercial Feeding Stuffs, and Fertilizers Acts to the Department of Agriculture, and that of the Acts relating to weights and measures, and the inspection of gas, electric light, and water meters to the Department of Trade and Commerce. By Order in Council of May 18, 1918, the Departments of Customs and of Inland Revenue were combined as the Department of Customs and Inland Revenue, under one Minister of the Crown. On June 4, 1921, the Department of Customs and Inland Revenue was consolidated as the Department of Customs and Excise (11-12 Geo. V, c. 26). As from Apr. 1, 1927, the name of this Department, which collects the great bulk of the revenue of the Dominion, was changed to Department of National Revenue by authority of 17 Geo. V, c. 34. This Act provides for three chief departmental officers—the Commissioner of Customs, the Commissioner of Excise and the Commissioner of Income Tax, while an Assistant Commissioner of Customs may also be appointed.

In the fiscal year ended Mar. 31, 1937, the gross amount of customs duties collected by the Department was \$92,282,059, as compared with \$82,784,317 in 1936, \$84,627,473 in 1935, \$73,154,472 in 1934, \$77,271,965 in 1933, \$113,997,851 in 1932, and \$149,250,992 in 1931. The total of excise duties and excise war taxes collected in the fiscal year ended Mar. 31, 1937, was \$202,498,882, as compared with \$161,830,681 in 1936, \$158,576,297 in 1935, \$145,176,663 in 1934, \$123,478,841 in 1933, \$109,586,366 in 1932, and \$93,986,975 in 1931.\* The total of income tax collected in the fiscal year ended Mar. 31, 1937, was \$102,365,242, as compared with \$82,709,803 in 1936. While the income tax and the business profits war tax (see Table 8) are collected by the Commissioner of Income Tax, the other main branches of inland revenue—the excise duties and excise war taxes—are collected by the Commissioner of Excise.

**Canadian Excise Tariff.**—The following is a statement of the Canadian excise tariff, as existing at Jan. 1, 1938:—

|   |   |
|---|---|
| 1. Spirits distilled in Canada, per proof gal. \$ 4-00  | 3. Beer or Malt Liqueur:—   |
| Canadian brandy, per proof gal. .... 3-00   | (a) Brewed in whole or part from any substance other than malt, per gal. .... 0-22    |
| Except Spirits as follows:—   | (b) Imported (in addition to any of the duties otherwise imposed), per gal. .... 0-07 |
| (a) Used in a bonded manufactory for medicines, extracts, etc., per proof gal. ... 1-50   | 4. Malt—  |
| (b) Used in a bonded manufactory for perfumes, per proof gal. .... 1-50   | (a) Produced in Canada and screened, per lb. .... 0-06                                |
| (c) Used in a bonded manufactory for vinegar, per proof gal. .... 0-27  | (b) Imported, per lb. .... 0-08   |
| (d) Used for chemical compositions approved by Governor in Council, per proof gal. .... 0-15  | (c) Imported, crushed or ground, per lb. .... 0-06                                    |
| (e) Sold to licensed druggists for pharmaceutical preparations, per proof gal. ... 1-50   | 5. Malt Syrup:—   |
| (f) Distilled from native fruits and used by a licensed wine manufacturer for fortification of native wines, per proof gal. .... Free | (a) Produced in Canada, per lb. .... 0-10   |
| 2. Spirits imported (in addition to any of the duties otherwise imposed), per proof gal. .... 0-30                                    | (b) Imported, per lb. .... 0-16   |
|   | 6. Tobacco, Cigars and Cigarettes:—   |
|   | (a) Manufactured tobacco, per lb. .... 0-20   |
|   | (b) Cigarettes weighing not more than 3 lb. per M., per M. .... 4-00                  |
|   | (c) Cigarettes, weighing more than 3 lb., per M., per M. .... 11-00                   |
|   | (d) Cigars, per M. .... 3-00  |

A drawback of 99 p.c. of the duty may be granted when domestic spirits, testing not less than 50 p.c. over proof, are delivered in limited quantities to universities, scientific or research laboratories, or to any *bona fide* public hospital for medicinal purposes only.

**Revenue from Excise Duties.**—The inland revenue collected from excise duties, other than war taxes, is shown by items for the past six fiscal years in Table 11.

\*Table 9, p. 851, gives the details of the revenues from individual taxes for the years 1932-37 and Table 10, p. 852, gives this information by provinces for 1937.

Tobacco, including cigarettes, is shown by the figures to have supplied about 61 p.c. of the revenue from excise duties in the fiscal year 1937.

### 11.—Details of Excise Duties Collected, fiscal years ended Mar. 31, 1932-37.

(As shown in the Report of the Commissioner of Excise.)

Norn.—Dashes in this table indicate that no revenue was collected under the corresponding heads because the items were not applicable in the years indicated.

| Item.                    | 1932.             | 1933.             | 1934.             | 1935.             | 1936.             | 1937.             |
|--------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|

| Duty Collected Ex-manufactory on Deficiencies and Assessment— |                   |                   |                   |                   |                   |                   |
| Amount.....proof gal.   | 9,643             | 575               | 297               | 80                | 664               | 678               |
| Duty.....\$   | 87,061            | 5,187             | 2,076             | 559               | 2,655             | 2,942             |
| <b>Totals, duties collected plus licence fees.....\$</b>      | <b>94,186</b>     | <b>11,437</b>     | <b>7,826</b>      | <b>5,559</b>      | <b>7,405</b>      | <b>7,442</b>      |

It will be seen from the above table that the quantity of spirits manufactured dropped between 1932 and 1933 from 7,099,637 proof gal. to 4,345,834 proof gal. Since 1933 there has been an increase to 8,723,005 proof gal. for 1937, although for the year 1935 the low figure of 4,321,457 was recorded. The duties collected ex-manufactory on deficiencies etc., plus licence fees fell from \$94,186 to \$5,559 between 1932 and 1935 but showed an improvement at \$7,442 for 1937.

Alcohol and Tobacco Taken out of Bond.—In Table 13 are shown the quantities of spirits, malt liquor, malt, cigars, cigarettes, and tobacco taken out of bond for consumption in the fiscal years ended 1911 to 1937.

Between 1920 and 1937 the number of cigars taken out of bond fell from 270,089,761 to 123,956,872 and the quantity of tobacco, which was 23,049,012 lb. in 1920, had fallen to 20,870,651 lb. by 1925, since when there was a steady increase

to 24,122,763 lb. in 1937. The consumption of cigarettes increased from 1,553,468,890 in 1919 to 5,082,314,590 in 1931 but thereafter showed a decline. After 1935, however, consumption reached new records.

Between 1923 and 1929 spirits taken out of bond (exclusive of imported spirits) rose from 729,678 gal. to 2,016,802 gal., but there was a decided and steady drop to 769,527 gal. for 1933. Since 1933 substantial increases have been shown. Malt liquor showed an increase from 36,789,195 gal. in 1923 to 65,719,129 gal. in 1929 but there was a decrease to 40,105,883 for 1934; the figure for 1937 was 59,920,298 gal.

**13.—Quantities of Spirits, Malt Liquor, Malt, and Tobacco Taken out of Bond for Consumption, fiscal years ended Mar. 31, 1911-37.**

NOTE.—For years prior to 1900, see 1916-17 Year Book, p. 528, and for 1901-10, see 1933 Year Book, p. 840.

| Fiscal Year. | Spirits. <sup>1</sup> | Malt Liquor. | Malt.       | Cigars.     | Cigarettes.   | Tobacco. <sup>2</sup> |

<sup>1</sup> Exclusive of imported spirits but inclusive of non-potable spirits down to 1921.

<sup>2</sup> Including snuff.

**Subsection 5.—Subsidies and Loans to Provinces.**

**Subsidies.**—By the provisions of the British North America Act and subsequent arrangements entered into from time to time, the Dominion is required to make certain annual payments to the individual provinces. These payments fall into the following classes:—

**Interest on Debt Allowances.**—By the terms of the Union of the provinces at Confederation in 1867, the Dominion assumed all the outstanding debts and liabilities of the provinces and undertook to pay, except in the case of Ontario and Quebec, interest at 5 p.c. on the amounts by which the actual per capita indebtedness of the provinces fell short of a basic debt allowance calculated at approximately \$25 per capita. On the subsequent entry of additional provinces into Confederation,

similar arrangements were effected regarding the assumption of their pre-Confederation indebtedness. From time to time, adjustments have been made in the basis of calculation of the debt allowances of the various provinces and the Dominion pays interest at 5 p.c. per annum on the amounts by which the actual debts of the provinces, on their entry into Confederation, fell short of the allowed debts as adjusted. The aggregate annual payment from the Dominion to the provinces in respect of interest on debt allowances is \$1,609,386.

*Allowances for Government and Legislature.*—Under the terms of the Union, annual grants of specific amounts were made to the various provinces for the support of their governments and legislatures. These fixed amounts vary with the population of the provinces according to the following scale, approved in 1907:—

| Where population is—                       | \$      |
|--|---------|
| Under 150,000 .....                        | 100,000 |
| 150,000, but does not exceed 200,000 ..... | 150,000 |
| 200,000, " " 400,000 .....                 | 180,000 |
| 400,000, " " 800,000 .....                 | 190,000 |
| 800,000, " " 1,500,000 .....               | 220,000 |
| Over 1,500,000 .....                       | 240,000 |

The aggregate annual allowances presently paid under this head amount to \$1,750,000.

*Allowances per Head of Population.*—Under the British North America Act of 1867, a grant of 80 cents per head of the population was allowed to each province. The British North America Act of 1907 provided that the grant would be paid to each province at the rate of 80 cents per head up to a population of 2,500,000, and at the rate of 60 cents per head for so much of the population as exceeds that number. The cost to the Dominion in 1937 of the annual allowances paid to the provinces per head of population was \$8,094,931.

*Special Grants.*—In the case of certain of the provinces, grants have been added to the original scale of subsidies in view of special circumstances obtaining, which, for the fiscal year 1937, amounted in aggregate to \$2,280,880 as set forth below:—

*Prince Edward Island.*—A special grant of \$195,000, less a deduction of \$39,120 (net grant of \$155,880).

*New Brunswick.*—An annual grant of \$150,000 since 1875 in consideration of the repeal of lumber duties reserved to the provinces by the B.N.A. Act of 1867.

*Manitoba.*—A special grant on the basis of population amounting at present to \$562,500 per annum.

*Saskatchewan and Alberta.*—Currently receiving an annual sum as compensation for loss of revenue derivable from their Public Lands, based on their respective populations which amounts, in the case of Saskatchewan, to \$750,000 per annum at present, and, in the case of Alberta, to \$562,500.

*British Columbia.*—A special grant amounting at present to \$100,000 per annum.

*Other Special Grants.*—In addition to the above, there are other special grants paid to the Maritime Provinces and British Columbia which are voted annually, aggregating, in the fiscal year 1937, \$3,225,000 as follows:—

|                            | \$        |
|----------------------------|-----------|
| Prince Edward Island ..... | 275,000   |
| Nova Scotia .....          | 1,300,000 |
| New Brunswick .....        | 900,000   |
| British Columbia .....     | 750,000   |

<sup>1</sup> Compensation for lands and allowances for buildings. <sup>2</sup> Allowances in lieu of debt.

<sup>3</sup> Does not include special grants paid to Maritime Provinces and British Columbia.

**Loans to Provinces.**—All of the provincial loans recently advanced by the Dominion have been made to the western provinces under the authority of relief legislation beginning with the Unemployment and Farm Relief Act, 1931, and these have been secured by interest-bearing treasury bills of the respective provinces, the rate being 3 p.c. since July 1, 1936. The sum total of such loans outstanding as at Mar. 31, 1938, was \$148,288,254.

In addition to these, however, there were also outstanding at that date \$3,308,000 of housing loans, being the balance of loans made to the provinces in the years following the Great War, on the authority of Orders in Council passed in 1918 and 1919, and of the Appropriation Acts of 1920 and 1921. Upon these loans the province of Ontario repaid the whole of the advances in 1928, and the other provinces concerned have in most cases reduced their indebtedness from year to year.

Table 16 gives details of the loans made by the Dominion Government to the provinces concerned on account of relief expenditures, and Table 17 shows the amounts outstanding as at Mar. 31, of each of the years 1920-38, on account of loans made for housing.

## Subsection 6.—The National Debt.

The gross national debt of Canada on Mar. 31, 1914, was \$544,391,369, as against assets of \$208,394,519, leaving a net debt of \$335,996,850. Comparatively small as was this debt, it was a debt incurred almost altogether either for public works of general utility which, like the Intercolonial and transcontinental railways and the canal system, remained assets, though perhaps not realizable assets of the nation, or was expended as subsidies to enterprises, which, like the Canadian Pacific Railway, though not government-owned, assisted greatly in extending the area of settlement as well as the productive and, therefore, the taxable capacity of the country. Broadly speaking, it was a debt incurred for productive purposes. Also, it was mainly held outside the country, the principal of the Dominion funded debt payable in London being \$302,842,485 on Mar. 31, 1914, as against only \$717,453 payable in Canada.

The great changes brought about in our national debt during the 22 years from 1914 to 1937 have been: (1) the enormous increase in net debt from \$335,996,850 to \$3,083,952,202; (2) the gross debt, having been largely incurred for war purposes is not represented by corresponding assets; (3) the debt is now mainly held in Canada, \$2,478,491,235 being payable in Canada at Mar. 31, 1937.

**Recent Funded Debt Operations.**—Conversions and other national debt operations carried out between 1931 and 1934 are dealt with at pp. 905-907 of the 1934-35 Year Book, those of the fiscal year 1935 on pp. 845-846 of the 1936 Year Book, those of the fiscal year 1937 on p. 837 of the 1937 Year Book and those between 1914 and 1930 at pp. 842-843 of the 1933 Year Book. The following review carries the summary down to Mar. 31, 1938.

On May 5, 1937, an issue of \$113,500,000 was made in Canada for the purpose of converting a part of the \$236,299,800 5½ p.c. Victory Loan due Dec. 1, 1937. This issue was a conversion operation only, no cash applications being accepted. The new issue was comprised of three maturities, 1 p.c. two-year bonds due June 1, 1939, 2 p.c. five-year bonds due June 1, 1942, and 3½ p.c. twelve-year bonds due June 1, 1949, yielding 1.38 p.c., 2.375 p.c., and 3.35 p.c., respectively, to the purchaser.

To provide a part of the funds to pay off the unconverted portion of the 5½ p.c. Victory Loan Bonds, an issue of \$100,000,000 was made in Canada on Nov. 3, 1937. This issue was also in three maturities, 1 p.c. one and one-half-year bonds due June 1, 1939, 2½ p.c. seven-year bonds due Nov. 15, 1944, and 3½ p.c. fourteen-year bonds due Nov. 15, 1951, yielding 1.59 p.c., 2.74 p.c., and 3.34 p.c., respectively. The \$33,293,000 4 p.c. school land debentures due July 1, 1937, and held by the provinces of Manitoba, Saskatchewan, and Alberta, were renewed for a further period of one year at an interest rate of 4 p.c.

In the past four years a market for short-term treasury bills has been built up in Canada which has proven highly satisfactory. Each issue has, with two exceptions (where the bills were sold direct to the Bank of Canada), been offered for public tender. A complete list of treasury bills sold by public tender for the period

**The Interest-Bearing Debt of Canada.**—Something of the extent of the burden of national debt being carried by the Canadian people may be realized from the fact that, for the fiscal year ended Mar. 31, 1937, the interest charges on the total interest-bearing debt amounted to about 35 p.c. of the total receipts from taxation and nearly 30 p.c. of the receipts from all sources.

Before the Great War, interest rates were comparatively moderate, but the unprecedented expenditure of the world's capital in that gigantic struggle led, in all the participating countries, to the raising of enormous loans at comparatively high rates of interest, which in many cases still have to be paid until refunding becomes possible under the terms of the contracts made between the nations and their creditors. Thus, in Canada, the average rate of interest paid upon the direct interest-bearing obligations of the nation, which was only 3.368 p.c. at Mar. 31, 1913, rose to 5.164 p.c. at Mar. 31, 1922, and fell gradually to 3.759 p.c. at Mar. 31, 1937. Details of the interest-bearing debt of Canada, and the interest charges thereon, as at Mar. 31 of the years from 1913 to 1937 are given in Table 20.

**20.—The Interest-Bearing Debt, the Annual Interest Charge Thereon and the Average Rate of Interest, as at Mar. 31, 1913-37.**

| Fiscal Year. | Bonds, Debentures and Treasury Bills. | Annual Interest Charges on Bonds, Debentures and Treasury Bills. | Average Interest Rate on Bonds, Debentures and Treasury Bills. | Savings Bank Deposits, Trust and Other Funds. | Annual Interest on Savings Bank Deposits and Other Funds. | Total Interest-Bearing Debt. <sup>1</sup> | Annual Interest Charge. | Average Rate of Interest. |

<sup>1</sup> The total of interest-bearing debt, as here given, includes bonds purchased and held by the Treasury for sinking funds. <sup>2</sup> In 1936 an amount of \$11,827, being compensation to seigneurs, previously included under Savings Bank Deposits, Trust and Other Funds, was transferred to Bonds, Debentures and Treasury Bills.

**Guaranteed Debt of the Dominion.**—Besides the direct debt of the Dominion, already dealt with, there are also large indirect obligations, arising mainly out of the guarantee of securities, by the Dominion, of the railway lines which now form the Canadian National Railways, and the subsequent extensions thereof. Together with these are other smaller indirect obligations, originating in the Government's guarantees of the bonds of the Canadian National Steamship services and of the bonds of its Harbour Commissions, issued in the main for harbour improvements. Since 1932 guarantees of certain bank loans have been made under the various Relief Acts. With the commencement of business of the Bank of Canada on Mar. 11, 1935, the guarantee, authorized by Sec. 27 (6) of the Bank of Canada Act, of the deposit required to be maintained by every chartered bank in the Bank of Canada, came into force. This guarantee will require to be implemented "in the event of the property and assets of the Bank being insufficient to pay its liabilities, and if the Bank suspends payment of any of its liabilities". Under the terms of the Home Improvement Loans Guarantee Act, 1937, the Government guarantees chartered banks and other approved lending institutions against losses up to 15 p.c. of the aggregate value of loans made by each such institution for the financing of repairs, alterations, and improvements to rural and urban dwellings. The Act provides that the aggregate amount of loans to be guaranteed shall not exceed \$50,000,000 and therefore the limit of the Government's guarantee is \$7,500,000. Statistics showing the growth of these indirect obligations since 1914 are given in Table 21, while Table 22 shows the obligations as they existed on Mar. 31, 1937.

**21.—Securities Guaranteed by the Dominion Government (Amounts Held by the Public), as at Mar. 31, 1914-37.**

*Note.*—Dashes in this table indicate that there were no guarantees of the type shown, for the corresponding years.

## Section 2.—Provincial Public Finance.\*

Provincial Governments in Canada are in the position, under Sec. 118 of the British North America Act, 1867 (30 and 31 Vict., c. 3), and the British North America Act, 1907 (7 Edw. VII, c. 11), of having a considerable assured income in subsidies from the Dominion Treasury. Details of these payments are given for recent years at pp. 855-857 of this chapter. In addition, through their retention of ownership of their lands, minerals, and other natural resources, those provinces that, by the voluntary action of their previously existing governments, entered Confederation, raise considerable revenues through land sales, sales of timber, mining royalties, leases of water powers, etc., while the Prairie Provinces, though having controlled their own natural resources since 1930, formerly received from the Dominion special grants in lieu of land revenues. Further, under Sec. 92 of the British North America Act, Provincial Legislatures are given authority to impose direct taxation within the province for provincial purposes and to borrow money on the sole credit of the province. The total revenues received by Provincial Governments for their fiscal years ended 1936 are analysed by source in Table 23.

Prior to the opening of the present century, provincial receipts and expenditures were generally moderate, as may be seen, both for individual provinces and for the provinces collectively, from Tables 25 and 26. The demand, more especially in Ontario and the West, for increased services from governments, particularly in respect of education, sanitation, and public ownership and operation of public utilities, and the performance of these functions, necessitated increased revenues, which had in the main to be raised by taxation. Among the chief methods of taxation to be employed has been the taxation of corporations and estates, succession duties showing a considerably increased yield even within the comparatively short period of twenty years from 1916 to 1936 covered by the statements compiled by the Finance Branch of the Bureau of Statistics.† The fact that provincial government is cheaper per head in the eastern provinces (although both Ontario and Nova Scotia have shown large per capita increases in recent years) is evident from Table 26, which gives the per capita ordinary revenue and expenditure for various fiscal years, from 1871 to 1936. This, however, is not to be taken as evidence that the larger services rendered to the public are not worth what is being paid for them.

For the half-century subsequent to Confederation, the provincial accounts, published by each Government according to its own system of accounting, were quite incomparable as among the provinces, a fact much regretted by students of provincial public finance. Upon the creation of the Dominion Bureau of Statistics in 1918, its Finance Branch undertook the work of placing the various provincial public accounts on a comparable basis, correlating, for example, the revenue derived from succession duties, taxation of corporations, sales of public lands, royalties on forest, mineral and fisheries products, as well as the expenditures on such services as agriculture, civil government, education, and public works. As the result of the Bureau's exhaustive analysis of the provincial public accounts, a summary statement of the ordinary receipts and expenditures of the Provincial Governments appeared for the first time in the 1919 Year Book. The various items of receipts

\*Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues detailed statements on Provincial Finance which may be obtained from the Dominion Statistician. For a list of these publications see Section 1 of Chapter XXIX.

†The succession duties collected by the provinces in 1936 amounted in the aggregate to \$19,948,365, as compared with \$1,020,972 as recently as 1904, or an increase of more than 19-fold in 32 years. The aggregate revenue raised by taxation of corporations, land, income and miscellaneous (exclusive of gasoline taxes, succession duties and amusement taxes), increased from \$7,217,548 in 1916 to \$39,325,639 in 1936, an increase of 552 p.c. in 20 years.

and expenditures were classified under appropriate headings and a uniform terminology was adopted. From these statements it is possible to ascertain the amounts received and expended in each year under the respective headings for each province, as well as for the provinces collectively. The figures for the years 1916 to 1920 will be found on pp. 680-685 of the 1921 Year Book, those for 1921 on pp. 786-791 of the 1922-23 Year Book and those for 1922 to 1926 on pp. 836-841 of the 1927-28 Year Book.

The Bureau now makes more extensive analyses of the finances of the provinces, including capital and trust accounts as well as ordinary revenue and expenditure. These analyses are based on a uniform classification adopted at a conference held in 1933 between provincial treasury officials and the Dominion Bureau of Statistics.

Data for 1936 are given on the new uniform basis in Tables 23 and 24.

#### Subsection 1.—Provincial Revenues and Expenditures.

**Ordinary Revenues and Expenditures.**—The total ordinary revenues and expenditures of the provinces for their individual fiscal years are shown in Table 25, pp. 874-875, for the census years 1871-1911 and for each year from 1916-36. Tables 23 and 24 on pp. 870-873 show detailed ordinary revenues and expenditures for 1936. While revenues have grown very rapidly over the period covered in Table 25, expenditures have more than kept pace.

Some explanation is perhaps necessary in regard to the Capital Receipts and Expenditures and the Trust and Public Charities Funds Receipts and Expenditures shown in the lower parts of Tables 23 and 24. In regard to the former, receipts represent the proceeds of loans and borrowings in the form of bonds, debentures, and treasury bills and are largely offset by capital payments for debt retirements; there are, however, receipts from the Dominion Government in regard to old age pensions and unemployment relief which are regarded as capital receipts. Finally, refunds of capital expenditures, made earlier in the form of advances or loans, are also included under this heading.

With regard to the Trust and Public Charities Funds accounts, these, as will be noted, relate chiefly to the province of Quebec where, under the Public Charities Act, parts of the revenues derived from Liquor Commission profits, taxes on amusements and race tracks, and the hospital tax on meals are transferred to the Public Charities Fund for the benefit of hospitals, sanatoria, refuges, and other charitable institutions. In Quebec and Manitoba there are also judicial deposits in connection with appeals, sales by the sheriff, etc., which are made to the Trust Funds accounts, and Prince Edward Island shows small Trust Fund receipts. Since 1916, *i.e.*, in the short space of 20 years, while total revenues of all provinces have shown an increase of 365 p.c., ordinary expenditures have increased 361 p.c.

**The Growth of Provincial Taxation.**—Whereas in earlier years the Dominion subsidies, together with the revenues arising out of the natural resources of the provinces and from fees for specific services rendered to the citizens, nearly sufficed to cover the whole expenses of government and rendered a resort to taxation for provincial purposes practically unnecessary in most of the provinces, the great increase in the functions of government since the commencement of the present

century has put an end to this state of affairs. The aggregate amount of taxation for provincial purposes in the fiscal years prior to 1916 is unfortunately not available. Since that time provincial taxation has increased, according to the recently amended classification made in the Dominion Bureau of Statistics, from \$12,521,816 in 1916 to \$95,826,440 in 1936, exclusive of motor vehicle licences, liquor traffic profits, and other licences and permits, etc., an almost eight-fold increase in 20 years.

The increase in the use of automobiles, both for commercial purposes and pleasure, is clearly demonstrated by the growing revenues from licences and permits issued by the Provincial Governments. In 1921 the total revenue of all provinces from automobile licensing alone amounted to \$7,857,751. It has since fluctuated considerably, reaching \$21,735,827 in 1929 but declining to \$19,952,575 in 1931. The revenue from this source in 1936 was \$22,854,410.

The gasoline tax is now generally adopted as a means of increasing provincial receipts and has proved to be a lucrative source of revenue. In 1923 only Manitoba and Alberta showed gasoline-tax revenue, the total being \$280,404. In 1924 the five provinces of Prince Edward Island, Quebec, Manitoba, Alberta, and British Columbia collected such revenue to the amount of \$559,543, while in 1925 the same provinces, with Ontario added, collected \$3,521,388. In 1926 all provinces, except Saskatchewan, collected gasoline taxes to the amount of \$6,104,716, in 1927 to \$7,615,907, and in 1928 to \$9,151,735; thereafter, gasoline taxes were collected in all provinces and amounted to \$17,237,017 in 1929, \$20,956,590 in 1930, \$23,859,067 in 1931, \$24,987,273 in 1932, \$25,931,480 in 1933, \$26,812,275 in 1934, \$20,474,977\* in 1935, and in 1936 to \$32,310,353. The higher yields in recent years, however, were due partly to higher rates of taxation.

The provincial revenues from the liquor traffic increased considerably between 1925 and 1930, but subsequently declined until 1934, again increasing in 1936. The adoption of government control of the sale of liquor in one province after another, until now it exists in all but Prince Edward Island where prohibition is still in force, has resulted in trading profits, licensing revenues, and permit fees, all of which have swelled the provincial revenues. Prior to the adoption of government control, such revenues were not available to the provinces. In 1925 the total revenue collected by all provinces from the liquor traffic was \$8,964,824; in 1926 it was \$11,609,392, increasing to \$27,599,687 by 1929. In 1933 such revenue amounted to \$16,160,980, in 1934 to \$12,814,120, in 1935 to \$12,886,197, and in 1936 to \$19,338,366. The figures shown in Table 23 include liquor permits and licences amounting to \$2,217,307 and other items amounting to \$11,166, the corresponding amounts being shown under "Licences and Permits" in former years. The method of control varies somewhat as between the provinces. In the majority of cases there are independent commissions or boards to administer the provincial Liquor Traffic Acts, but the accounting and trading profits are shown somewhat differently in the various provincial public accounts reports.†

**Fiscal Years of the Provinces.**—The fiscal years of the provinces are as follows: P.E.I., Dec. 31; N.S., Sept. 30 prior to 1935 and Nov. 30 thereafter; N.B., Oct. 31; Que., June 30; Ont., Oct. 31 prior to 1935 and Mar. 31 thereafter; Man. and Sask., Apr. 30; Alta. and B.C., Mar. 31.

\* The wide difference between the figure for 1935 and the one for 1936 is accounted for largely by the change in the fiscal year for the province of Ontario from Oct. 31 to Mar. 31, so that the Ontario figures for 1935 included in the 1935 total were for five months only.

† See Chapter XVII, pp. 626-629, and also the report of the Dominion Bureau of Statistics on "The Control and Sale of Liquor in Canada".

<sup>1</sup> For six months.

<sup>2</sup> Includes capital expenditure which cannot be separated.

<sup>3</sup> Includes sinking fund taken from capital expenditure (expenditure out of income).

<sup>4</sup> For eight months.

<sup>5</sup> For fifteen months ended Mar. 31, 1928.

<sup>6</sup> Exclusive of interest paid by Hydro and other commissions.

<sup>7</sup> Certain minor items, amounting to about \$600,000, shown in previous years as ordinary receipts and expenditures, have been transferred to the extraordinary classification in the 1930 Provincial Accounts Report.

<sup>8</sup> Revised since the publication of the 1937 Year Book.

<sup>9</sup> This figure is taken from the Public Accounts of Ontario.

<sup>10</sup> For fourteen months.

<sup>11</sup> For five months.

**Subsection 2.—Provincial Debts and Assets.**

**Bonded Indebtedness of the Provinces.**—Of the total liabilities of the provinces the major part is represented by bonded debt owing to the public in Canada and abroad. The total gross bonded debt amounted to \$1,426,293,679 in 1936 as compared with only \$218,875,927 in 1916, an increase of over \$1,200,000,000 in the 20 years. In addition to this bonded debt there were treasury bills outstanding on provincial accounts amounting to \$232,928,298\* for 1936. Figures of bonded debt for this and previous years to 1916 are given in Table 27. The rapid rise in the bonded debt of the provinces from \$218,875,927 in 1916 is accounted for largely by the development of public ownership of utilities (such as the "Hydro" in Ontario), the extension of the highways and surfaced roads systems in all provinces (highway debentures outstanding in 1936 accounting for \$508,000,000 of the provincial debt), and the requirements for the promotion of industrial activities and public and social welfare. These demanded heavy expenditures which could not easily be met out of current revenue. The borrowings, while increasing the public debt, are in the main considered justifiable, as the public utilities are in most cases meeting from their revenues the interest on indebtedness incurred in their construction, and the provincial assets generally are sound enough to take care of capital investment for other services which are necessary to develop the country.

\*Including \$600,000 which the province of New Brunswick considered a current liability.

27.—Gross Bonded Debt (Exclusive of Treasury Bills) of Provincial Governments, by Provinces, fiscal years 1916-36.

<sup>1</sup> Liabilities statement is for Apr. 30; this amount includes \$500,000 due May 1.

**Total Provincial Public Debt.**—Table 28 gives a classified analysis of the public debt of Provincial Governments at the close of their fiscal years in 1935 and 1936.

23.—Debt of Provincial Governments at the ends of their respective fiscal years in 1935 and 1936, showing Bonded Debt with offsetting Sinking Funds, Treasury Bills, Other Direct Liabilities, Available Assets offsetting Direct Liabilities, and Indirect Liabilities.

NOTE.—For dates on which the fiscal years of the provinces end, see text on p. 589.

| Year and Province.                | Direct Liabilities.                |                    |                      |                                |                      |                    |  |
|-----------------------------------|------------------------------------|--------------------|----------------------|--------------------------------|----------------------|--------------------|--|

<sup>1</sup> In addition to the available assets shown most of the provinces had partially secured loans and advances in connection with unemployment relief, while Alberta had partially secured loans and advances, and sale of contracts for School Lands Fund amounting to over \$1,000,000 for 1935 and \$2,000,000 for 1936; British Columbia had partially secured loans and advances amounting to over \$400,000 for 1935 and \$600,000 for 1936; Saskatchewan had partially secured loans and advances amounting to over \$1,000,000 for 1935 and \$1,000,000 for 1936; Manitoba had partially secured loans and advances amounting to over \$1,000,000 for 1935 and \$1,000,000 for 1936; Ontario does not include Treasury Bills in its Debt. <sup>2</sup> Includes \$1,000,000 of the School Fund, Quebec Unemployment, and Public, Live Stock and Equipment, 'available assets'. <sup>3</sup> Including Treasury Bills regarded as current debt by New Brunswick.

**Interest Payments and Receipts of the Provinces.**—The current burden of a debt in the case of a continuing organization is represented by interest payments, which may be offset in whole or in part by interest received on loans either to provincially-owned public utilities or to corporations or individual citizens. In a country where provincial public policy varies widely with regard to public ownership, it appears desirable to include a statement showing, for each province, the gross interest payments, the interest receipts and the net interest payments. This information is given below for the provincial fiscal years ended in 1936.

| Province.                 | Gross<br>Interest<br>Paid. | Interest<br>Received. | Net<br>Interest<br>Paid. | Net Interest<br>Paid per<br>Capita. <sup>1</sup> |

<sup>1</sup> Estimates of population on which these figures are based are given on p. 155.

### Section 3.—Municipal Public Finance.\*

The existence of local self-governing units has always been characteristic of democratic societies, and nowhere more so than in Canada. The struggle for responsible government was naturally accompanied by an agitation for local self-government in the cities and towns of Canada and, after responsible government had been conceded, a complete system of municipalities was established throughout the old Province of Canada by the Municipal Act of 1849.† Under the division of powers made by the British North America Act between the Dominion and the Provincial Governments, legislation regarding municipal government, being a local matter, was naturally assigned to the provinces, which differ considerably with regard to their types of municipal organization. Thus, in Prince Edward Island the only incorporated municipalities are the city of Charlottetown and seven incorporated towns. In British Columbia seven of the 33 cities have fewer than 1,000 people, while there are no towns at all and only 17 villages; again, in the same province the rural districts are mainly administered from the provincial capital, there being only 28 rural municipalities. Finally, in Saskatchewan and Alberta there exist local improvement districts, areas which have not as yet been organized

\* Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues statements on "Financial Statistics of Urban Municipalities of 10,000 Population and Over", on "Bonded Indebtedness of Municipalities" and on "Assessment Valuations of Municipalities". For a list of publications see Chapter XXIX, Section 1, under "Finance".

† For a brief outline of the rise of the municipal system of Ontario, see 1922-23 Year Book, p. 103.

into rural municipalities, where the taxes are levied, collected, and expended by the Provincial Governments. Such districts, however, may be regarded as on the way to becoming self-governing rural municipalities. Their statistics are therefore included in Table 29 which gives statistics of the numbers and types of municipalities in 1935.

29.—Numbers of Municipalities, by Provinces and Classes, 1935.

<sup>1</sup> Nova Scotia has 18 counties, some of which are 'municipalities', while others are divided into 'municipalities'. <sup>2</sup> There are 43 counties in all, geographically, but a number are united for municipal purposes. <sup>3</sup> Officially known as 'townships'. <sup>4</sup> Includes Finlon Municipal District.

**Municipal Revenue from Taxation.**—As a result of accumulated borrowings to meet conditions peculiar to the depression, the relentless advance of interest charges against realizable taxation has brought about a condition in many municipalities where expenditures are out of all proportion to receipts, in spite of the fact that the trend of interest rates has been definitely downwards. It is natural under such conditions that the general subject of taxation should receive the increasing attention of the public and, of all forms of taxation, the imposition of municipal taxes—where the tax is applied broadly to assessed valuations placed on homes and other real property and on incomes and business—hits the ratepayer's pocket most directly.

In view of the wide public interest in municipal taxation, the Dominion Bureau of Statistics published a bulletin giving as complete a picture as is possible of tax levies and taxation receipts of municipalities, classified into cities, towns and rural municipalities, by provinces, for the years 1913-35.\* The following summary table, taken therefrom, gives figures of tax receipts for these years so far as they are available. Unfortunately, there are certain inconsistencies and omissions, as between provinces, which the footnotes to the table attempt to explain.

\*See the bulletin "Municipal Tax Levies and Receipts, by Provinces", obtainable from the Dominion Statistician.

## 30.—Tax Receipts of Municipalities in Canada, by Provinces, 1913-35.

<sup>1</sup> Statistics are for Charlottetown only. <sup>2</sup> Cities of Saint John, Moncton and Fredericton only, except for 1934 and 1935 figures which are for Saint John and Moncton only. <sup>3</sup> B.C. has no municipal organization of towns and provision was first made for villages in 1922. Statistics of tax receipts for cities and rural districts are shown from 1917-21, and those for cities, villages and rural districts from 1922. <sup>4</sup> Comparable figures not available. <sup>5</sup> The figures shown are for all municipalities except cities, whereas cities are included for other years. A comparable figure is not obtainable but receipts for Winnipeg were \$10,874,891, and the total tax imposition for the cities of Brandon, Portage la Prairie, and St. Boniface was \$1,682,241 in 1931. <sup>6</sup> Revenue for municipalities and receipts for schools. See also footnote 2, to Table 33, p. 884.

**Municipal Assessments.**—The chief basis of municipal tax revenue is the real estate within the limits of the municipalities; though, as indicated above, in certain provinces personal property, income, and business carried on are also taxed. General taxes are normally assessed at the rate of so many mills on the dollar of the assessed valuations. In the Prairie Provinces, the values of improvements made to real property are often rated at a very low figure, *e.g.*, in Saskatchewan, where the taxable valuations of buildings are about 12 p.c. of the taxable valuations of lands, and in Alberta, where they are about 30 p.c. of the taxable valuations of lands, as shown in Table 31.

There are various reasons for fluctuations in assessment valuations, due to differences in laws and varying practices with regard to assessment as among provinces, as among classes of municipalities, and as among municipalities of the same class from year to year. Such matters are more fully dealt with in the special report of the Dominion Bureau of Statistics on "Assessment Valuations by Provinces", obtainable from the Dominion Statistician.

Lands in the West, valuations for which in earlier years were somewhat inflated, have of late been assessed on a sounder basis, and in some provinces the Equalization Boards have placed a more equitable valuation on lands as among the various rural municipalities.

### 31.—Summary Statement Showing Total Assessment Valuations of Municipalities, by Provinces, 1931-35.

Note.—Corresponding figures for 1927 and 1928 will be found at p. 824 of the 1930 Year Book and for 1929 and 1930 at p. 874 of the 1936 Year Book. Data for earlier years will be found in previous editions.

<sup>1</sup> Includes certain other taxable valuations.

<sup>2</sup> Not available.

<sup>3</sup> No assessment in this province.

<sup>4</sup> Includes exemptions for municipality of Cumberland, Nova Scotia. <sup>5</sup> In Nova Scotia personal property and income assessments for cities are for Sydney only.

<sup>6</sup> These amounts include property temporarily exempted. <sup>7</sup> In addition, assessments for schools only in Ontario were: townships \$4,456,630, towns and villages \$20,499,195, and cities \$93,816,472 in 1931; townships \$4,976,492, towns and villages \$18,240,670, and cities \$86,803,023 in 1932; townships \$3,456,026, towns and villages \$12,884,022, and cities \$86,638,940 in 1933; townships \$2,636,133, villages \$1,674,15, towns \$16,656,397, and cities \$86,657,415 in 1934; and cities \$84,204,218 in 1935. Assessments for school purposes only for other municipalities were not shown in the Ontario report for 1935.

<sup>8</sup> Local Improvement Districts not included for 1931 and later years. <sup>9</sup> Complete totals not available. <sup>10</sup> In interpreting these totals, footnotes on the constituent items should be noted.

**Bonded Indebtedness.**—Like other Canadian governing bodies the municipalities of the greater part of Canada borrowed rather freely during the boom period of 1900-12, and again during the nineteen-twenties. The bonded indebtedness of

Ontario municipalities rose from \$153,568,409 in 1913 to \$461,653,182 in 1935, while that of Quebec municipalities increased from \$173,720,141 in 1915 to \$574,883,119 in 1935, and a proportionate increase took place in other provinces. The recent growth in the bonded indebtedness of all classes of municipalities is shown by provinces in Table 32. The figures show that there was an increase in 1935 over 1934 in the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Manitoba and British Columbia; the others showed a decrease. In Saskatchewan, net debenture debt is shown for all municipalities in 1919, while from 1920 the statistics represent gross debenture debt. In Alberta in the earlier years, figures represent principally net debenture debt but from 1929 gross debenture debt is shown. All other provinces give gross total debenture debt throughout.

### 32.—Total Bonded Indebtedness of All Classes of Municipalities, by Provinces, 1919-35.

NOTE.—Figures are for gross debenture debt unless otherwise indicated.

<sup>1</sup> Municipalities included cannot be enumerated for the years 1919-23; figures represent Charlottetown and Kensington 1924-33; Montague for 1925-33; Summerside, Souris, Georgetown, and Alberton 1929-33; and Borden 1932-33. For later years the figures include all eight incorporated municipalities of the province.

<sup>2</sup> Municipalities included cannot be enumerated for the years 1919-23; figures are for 3 cities, 18 towns, 2 villages, and 15 counties in 1924; 3 cities, 13 towns, 2 villages, and 15 counties in 1925; 3 cities, 18 towns, 1 village, and 15 counties in 1926; 3 cities, 23 towns, 4 villages, and 15 counties in 1927, 1928 and 1929; 3 cities, 19 towns, 2 villages, and 15 counties in 1930; and 3 cities, 20 towns, 2 villages, and 15 counties from 1931.

<sup>3</sup> Statistics of school debt for villages and rural municipalities not included.

<sup>4</sup> Footnotes on constituent items should be noted in interpreting these totals.

<sup>5</sup> Includes deferred liabilities, not separable.

<sup>6</sup> Figures for this year are for net debenture debt.

<sup>7</sup> Includes schools.

## Section 4.—National Wealth and Income.

### Subsection 1.—National Wealth.

The economic concept of national wealth is concrete and purely material since economics is not able to take cognizance of the immense field of intangible wealth created by churches, schools and other institutions, nor of such things as climate, location, health, etc., which promote individual and national welfare and are often referred to as wealth, but in a different sense from that meant here. Our national wealth, as here understood, is the sum total of our physical assets. It includes all farms, factories, equipment, merchandise in stock, and the thousand and one material things which Canada as a nation possesses. It does not include such things as stocks, bonds, mortgages, etc., which an individual regards as wealth but which, in reality, are mere evidences of ownership. From the point of view of the nation as a whole, all such claims and counter claims must be ruled out. There is, too, a large field of intangible wealth such as that represented by organizations for doing business of all kinds, the reputation of business firms, managerial experience, etc., of which no account can be taken in a statistical determination of wealth. Further, a distinction must be made between 'present' and 'potential' wealth. Canada has an immense potential wealth in forests, mines, etc., the present value of which it is impossible to estimate.

Notwithstanding the enormous statistical and economic difficulties inherent in any evaluation of the national wealth, the justification for such attempts lies in the importance of such information for an analysis of a nation's social and economic position. A general idea of the size and composition of the national wealth is essential for the intelligent consideration of many problems, both national and international, although, in view of the numerous elements of uncertainty in a calculation of this nature, the statistics must be regarded as indicative rather than strictly accurate; when carefully prepared they hold a very important place in a national statistical system.

There are several methods of computing national wealth, *i.e.*, the aggregate value of the public and private property within the nation apart from undeveloped

natural resources. Perhaps the most familiar of these methods is that of working back to capital values through income tax returns, but this can be applied only in countries where small as well as large incomes are assessed for income tax. A second method is that of estimation from probate returns, the value of the estates of deceased persons being regarded as representative. A third is that of a complete census, based upon a canvass of the individual. A fourth method, namely, the so-called 'inventory' method, is often employed.\* The estimate of Canada's wealth herein presented is based on the inventory principle, *i.e.*, an attempt is made to secure for the nation an approximation of the businessman's inventory of his possessions. This method consists in totalling the amounts known from various sources to be invested in agriculture, manufacturing, dwellings, etc. It does not include the value of undeveloped natural resources but only natural wealth which has been appropriated. For instance, it includes the value of the machinery and other capital equipment used in coal mining but not the unmined coal; the boats used in fishing but not the fish in the sea; the power plants and equipment used in developing water power but not the waterfalls themselves. In the case of forest wealth partial exception is made by the inclusion of accessible raw materials. When making comparison between the different provinces it should be remembered that this method tends to understate the wealth of any section of the country which is rich in mines, fisheries or water power.

Whatever method is used, difficulty arises when we try to reduce all the things which go to make up wealth (things which once created are not themselves subject to violent change) to a common denominator. Estimates of national wealth must always be expressed in terms of the national currency. Yet the purchasing power of the currency unit is always fluctuating and since 1929 had increased at one point (February, 1933) by more than 50 p.c. in terms of wholesale prices. Even in 1930, the average index number of wholesale prices was down by nearly 10 p.c. from 1929, while in December of that year the average index number of wholesale prices was 19 p.c. lower than in the same month of 1929.

The effect of such drastic reductions in values is first felt by the commodities which are being currently produced and, through these commodities, the dollar value of production is diminished and consequently the national income of a country where most people are producers. Ultimately, a persistent decline of this character affects the capital values of real estate, buildings, machinery, etc., and its influence is then felt in a reduction in the national wealth as stated in dollars.

The first official estimate of national wealth issued by the Dominion Bureau of Statistics was for 1921, being based on the census data of that year. The national wealth was then placed at \$22,195,000,000. Later estimates were \$25,673,000,000 for 1925 and \$27,668,000,000 for 1927. The estimates for 1921, 1925 and 1927 are not exactly comparable with those for 1929 and 1933 given below, but are sufficiently so for most purposes. The estimate for 1929 is \$31,276,000,000, and the 1933 estimate \$25,768,000,000. The former presents a picture at the peak of domestic prosperity, whereas that of 1933 reflects the writing down of values resulting from the depression. The 1933 estimate is the latest that has been published.

**Wealth of Canada by Items, 1929 and 1933.**—In the items showing the composition of the national wealth, as set out in Table 34, care has been taken to exclude duplication. In any consideration of the individual items it should be

\*An explanation of method and of the background of early estimates of national wealth as applied to Canada will be found in the article "The Wealth of Canada and Other Nations" by R. H. Coats, Dominion Statistician, published in the *Journal of the Canadian Bankers' Association*, October, 1919.

remembered that each item covers only the portion of wealth which is stated in the description attached thereto. For instance, the item "Fisheries" includes only capital invested in primary operations. Capital invested in fish-canning and -curing establishments is included with "Manufactures", though this also might be considered as part of the wealth connected with "Fisheries". Similarly, the items for "Manufactures" do not include lands and buildings in urban centres which are shown under the heading "Urban Real Property".\*

\* A fuller explanation of the composition of the separate items is contained in the bulletin "Canada's National Wealth", obtainable from the Dominion Statistician.

### 34.—Estimate of the National Wealth of Canada, with Percentage and Per Capita Distribution of Component Items, 1929 and 1933.

NOTE.—For discussion of these items, see p. 871 of the 1933 Year Book and the bulletin referred to above.

| Household furnishings, clothing, etc. (value estimated from production and trade statistics).....  | 1,370,000          | 913,397           | 4.38                   | 3.54          | 136.60   | 85.52           |
| Specie, coin and other currency held by the Government, chartered banks and the general public.....  | 201,030            | 186,362           | 0.64                   | 0.72          | 20.04  | 17.45           |
| <b>Grand Totals.....</b>   | <b>31,276,814</b>  | <b>25,768,236</b> | <b>100.00</b>          | <b>100.00</b> | <b>3,118.54</b>                                      | <b>2,412.53</b> |

<sup>1</sup> These averages are based on the estimates of population as given in Table 35, p. 883.

**Aggregate and Per Capita Wealth, by Provinces, 1929 and 1933.**—As regards the provincial distribution of wealth in 1933, Ontario ranked first with an estimated aggregate wealth of \$8,796,000,000 or 34.14 p.c. of the total; Quebec second with \$6,738,000,000 or 26.15 p.c.; Saskatchewan third with \$2,527,000,000 or 9.81 p.c.; and British Columbia fourth with \$2,431,000,000 or 9.43 p.c. of the whole.

While Ontario and Quebec led in absolute wealth, the western provinces came first in per capita wealth. British Columbia held first rank with a per capita wealth of \$3,414, Alberta second with \$2,721, and Saskatchewan third with \$2,711. Ontario with a per capita wealth of \$2,468 was fourth, Quebec was fifth with \$2,269, and Manitoba sixth with \$2,201. The per capita wealth for the whole Dominion was estimated at \$2,413.

Further details, including revised figures for 1929, are shown in Table 35. In 1929 the provinces held the same relative places, both as regards aggregate and per capita wealth.

### 35.—Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1929 and 1933.

*NOTE.*—Figures for 1921 and 1925 are given on pp. 849-850 of the 1927-28 Year Book, and for 1927 on p. 870 of the 1931 Year Book.

<sup>1</sup> As the statistics for Yukon are uncertain, the per capita estimate of wealth is not shown. <sup>2</sup> Includes the population of the Northwest Territories: 9,000 in 1929 and 10,000 in 1933, 0.09 p.c. in both cases.

**Analyses of Itemized Wealth, by Provinces, 1929 and 1933.**—In Table 39 on pp. 882-883 of the 1936 Year Book detailed statistics of the wealth of each province by leading items were published. This information is not repeated in this edition.

**Subsection 2.—National Income\* and Income Tax Statistics.**

**Definition of National Income.**—"The annual labour of every nation is the fund which originally supplies it with all the necessities and conveniences of life which it annually consumes, and which consist always either in the immediate produce of that labour, or in what is purchased with that produce from other nations."—ADAM SMITH. This is perhaps the earliest modern definition of 'national income' and is still among the best, when it is interpreted in accordance with modern knowledge regarding the balance of international payments and the necessity of keeping productive equipment in running order. It must also be remembered that while the national income consists in goods and services of the most varied kinds, its total amount can be stated only in terms of money.

Following, is a statement of the nature of national income from the standpoint of the statistical technique used in its compilation, the description also being in line with present-day economic theory.

"Year in, year out, the people of this country, assisted by the stock of goods in their possession, render a vast volume of work toward the satisfaction of their wants. Some of this work eventuates in commodities, such as coal, steel, clothing, furniture, automobiles; other takes the form of direct personal services, such as are rendered by physicians, lawyers, government officials, domestic servants, and the like. Both types of activity involve an effort on the part of an individual and an expenditure of some part of the country's stock of goods. If all commodities produced and all personal services rendered during the year are added at their market value, and from the resulting total we subtract the value of that part of the nation's stock of goods which was expended (both as raw materials and as capital equipment) in producing this total, then the remainder constitutes the net product of the national economy during the year. It is referred to as national income produced, and may be defined briefly as that part of the economy's end-product which is attributable to the efforts of the individuals who comprise a nation."<sup>†</sup>

**Approaches to the Measurement of National Income.**—The statistical measurement of the national income is a matter of great difficulty, and the most unremitting research into all the relevant statistics, in order to establish a representative figure, must always leave an appreciable margin of error. Indeed, it is no easy matter even for an individual to establish an accurate money figure as representing his *total* income, especially where he has to include in that total income, besides his cash income, an allowance for the rental value of his (owned) house and his durable belongings therein, together with an allowance for the money value of the commodities produced and consumed within the household (such as eggs and garden produce), and of the services, ordinarily bought and sold but rendered gratis within the family circle. Yet this is the only logical way of obtaining the total income of the family. While such income, not received directly in money, but in commodities produced and services rendered, is not, except for house and furniture rent, an important percentage of the family income in most urban families, it con-

\*The subsection on national income has been revised by Sydney B. Smith, M.A., Dominion Bureau of Statistics.

†See *National Income 1920-32 and 1920-35*, U.S. Department of Commerce.

stitutes a very important part of the income of most rural families, who, to a much larger extent, consume the commodities which they themselves produce. For this reason, indeed, comparisons between the incomes of urban families and rural families are often misleading, through not allowing for the non-money income of the latter. Certainly most people never think of their non-money income as income at all, and would never consider putting the rental value of their owned homes into their income tax returns. Indeed, the income tax authorities of Canada do not expect them to do so.

Difficulties experienced in expressing the total income of an individual as a single figure are multiplied a thousand-fold in any attempt to express the total of the national income as a single figure. The individual and corporate incomes which are to be combined into this grand total *without duplication* are of such a heterogeneous character that any figure which may be given as the grand total of the national income must include some margin of error.

The computation of the national income involves research by two different avenues of approach.

(1) Statistical data on an annual basis is collected by the Bureau of Statistics for most of the groups engaged in commodity production, trade and leading branches of transportation. The gross revenue received by each of these groups is taken as the starting point. The cost of raw materials, process supplies, fuel and purchased electricity is the first deduction. It is necessary also to subtract the miscellaneous expenses including rent, insurance, taxes, etc. The collection of miscellaneous expenses by the census of industry was discontinued after 1921, but the relationships established in the first three years of the post-war period are proving valuable as a basis of estimate. A special questionnaire has also been distributed to obtain a sample of miscellaneous expenses for the years 1929, 1933, and 1936.

Having deducted the miscellaneous expenses, the residue may be called the 'gross national product'. The next step is to estimate depreciation and depletion as a percentage of the fixed capital employed by the several groups. The gross national product less depreciation and depletion is regarded as the national income. It is not feasible to apply this treatment to all industrial groups of the Bureau's classification, but a growing proportion of the field is amenable to the method. Under the heading of real estate in the finance group, an estimate of the imputed rent of owned houses is included. The international balance of dividend and long-term interest payments is also deducted as a final adjustment.

(2) A second approach is by a summation of payments made to individuals. The normal source of information for this method is the tabulation of income tax returns. Such information forms the basis of the excellent estimates of national income prepared for the United Kingdom and the United States. However, the considerable expense involved in tabulation has militated against such elaborately detailed presentation of this material in Canada.

The census of industry furnishes data of the amount of salaries and wages paid, and wage data for decennial census years are available through the population census for each of the main industrial groups. The indexes of wage rates published by the Department of Labour and the monthly survey of employment conducted by the

Bureau, are useful in estimating earnings for the intercensal years where specific information is not otherwise available (see p. 767). The numbers of persons working on own account and employers as reported by the decennial census is valuable for estimating the withdrawals of entrepreneurs. Volumes X and XI of the Census Reports present pertinent data regarding wholesale and retail trade and a portion of the service field.

A sample of dividend and bond interest payments may be compiled from an examination of company accounts. The net amount of dividends paid by privately-owned companies as well as by corporations with public investment interest is also available. It is possible to estimate from census data the total amount of net rentals paid on dwellings. The contribution of government to the national income consists of the net interest paid on the funded debt and the salaries and wages, service and social pensions, compensation payments, and relief.

The aggregate paid to individuals is adjusted for business gains or losses. The latter signify the additions to or deductions from surplus by business concerns. After making the adjustment, the result is an estimate of the national income which should conform closely to the total prepared by the alternate production method.

The Bureau's present solution is to make two independent estimates of the national income for each year. One estimate is derived from a study of the separate industrial fields in which the income originates, the second is mainly an aggregate of incomes received by individuals with an adjustment for business gains or losses.

The computation of the national income by the two-fold method outlined above is in process as the Year Book goes to press, but is not yet ready for publication and the estimates based on the Survey of Production appearing in the edition of 1937 are not being extended pending the revision.

**Income-Tax Assessment as a Measure of National Income.\***—In those countries of the world where an income tax has been established for a considerable time the figures of the assessed income have been generally accepted as furnishing a guide both to the amount and to the distribution of the total national income by classes. Estimates of the national income, based upon income tax statistics, have been published, for example, in the United Kingdom and in the United States.

The War introduced the income tax into Canada in 1917. Under the Income War Tax Act, the returns of the incomes of individuals and corporations are filed in the year following the earning of the incomes. Further, since the fiscal year ends on Mar. 31, the bulk of the receipts from the income tax usually comes in during the first two or three months of the next following fiscal year. Thus the income tax received in the fiscal year ended Mar. 31, 1937, represents, in the main, income tax collected on 1935 income, and the income tax collected in the fiscal year ended 1936 represents, in the main, 1934 income. It is important that these facts should be kept in mind when considering income assessed in different years. Further, the particular provisions of the income tax existing at any particular time, and the amendments extending or contracting the scope of the income tax by raising or

\* This material has been revised by the Income Tax Branch of the Department of National Revenue.

lowering the limit of taxable income, or increasing or lowering the allowances for children, etc., should also be borne in mind in the consideration of the following tables. Among these, Table 36 gives the grand total income of individuals and corporations assessed for the purpose of income war tax for the past seventeen years, while Table 37 gives this income by provinces for the past five years and Table 38 shows the amount of income tax collected by provinces in the past five years. Tables 39 and 40 analyse the payments of income tax in the past four years by size of income class and by occupation of the taxpayer, respectively.

<sup>1</sup> Exclusive of special 5 p.c. tax on interest and dividends; see text accompanying Table 41.

Table 41 shows the amount received from the special 5 p.c. tax of 1933 (c. 41, 1932-33) imposed at the source on interest (if paid solely in Canadian funds) and dividends paid by Canadian debtors to non-residents of Canada, and on interest and dividends received by Canadian residents by way of bearer coupons or cheques where such are payable by Canadian debtors, optionally or otherwise, in foreign currencies, and such coupons or cheques are cashed in a currency which is at a premium over Canadian funds. The receipts are classified by provinces, no further classification being available.

**Subsection 3.—British and Foreign Capital Invested in Canada and  
Canadian Capital Invested Abroad.\***

Revised estimates of British and foreign investments in Canada and Canadian investments in other countries have been issued recently by the Internal Trade Branch of the Dominion Bureau of Statistics. As a result of continued investigations, more complete information has become available. Because of the great variety of forms these investments take and the difficulties inherent in arriving at satisfactory valuations, along with the continual changes in ownership in some cases, these estimates should be considered as approximations rather than exact representations. They are, however, indicative of the general proportions of the investments involved. In using these statistics it should be recognized that changes in value from one year to another do not always reflect actual capital movements between Canada and other countries as there are important changes in the value of 'equity' investments arising from internal operations, such as reinvested profits, for instance, which are quite independent of external factors.

The present investigation has been carried back as far as 1926 and revised statistics of international investments are shown for the years from 1926 to 1935 in Tables 42 and 43. Very marked changes have taken place in Canada's international indebtedness during the present century. The industrial expansion in Canada in the years preceding the Great War was closely related to the heavy inflow of capital from Great Britain. In 1914 the value of British investments in Canada was not much different from the value of British investments as shown in the accompanying tables in recent years, although slightly higher than in 1926. The rapid growth in United States investments in Canada took place after 1914. Part of this increase in the investments of the United States in Canada came after 1926 and is reflected in Table 42 which shows a change in these investments between 1926 and 1930 of from \$3,161,200,000 to \$4,298,400,000. This influx of capital followed two contrasting channels. A large part of the capital was raised through the sale of new issues in New York but the capital coming to Canada through the channel of direct investment was also especially heavy and this capital invested directly in Canada has given United States investments in Canada a particular

\*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. The subject is treated more fully in a bulletin "British and Foreign Capital Invested in Canada and Canadian Capital Invested Abroad, 1926-35" obtainable from the Dominion Statistician. For a list of the publications of this Branch, see Chapter XXIX.

character. Since 1930 there has been a reduction in the value of United States investments in Canada, as a result of the redemption of Canadian securities owned in the United States, changes in the values of equity investments in Canada, and other factors.

In Table 44 there is shown in detail the distribution in 1936 of British and foreign capital invested in Canada. The indebtedness of Canadian governments abroad amounted to \$1,688,700,000 of which \$524,200,000 represented government securities held by British investors and \$1,161,300,000 government securities held by residents of the United States. The total non-resident investments in Canadian railways, \$1,637,000,000, was about the same as the total government securities held abroad, but the British investments predominated in this group, being \$1,068,300,000 compared with a United States investment of \$548,800,000. In most other classes of investment the amounts owned in the United States were larger than the British although the latter were generally substantial.

In appraising Canada's international indebtedness, consideration must also be given to Canadian investments abroad. These have grown from \$1,352,800,000 in 1926 to \$1,671,500,000 in 1936, the principal growth being in Canadian portfolio holdings of United States securities although considerable amounts of the securities of Latin American and European governments were also acquired in the earlier part of the period. The increase in the holdings of these miscellaneous investments in other countries has been greater than the increase in total Canadian investments abroad, as there has been a very marked reduction in the net assets of the Canadian banks in other countries during this period.

For 1936 Canadian capital in other countries is estimated at \$1,671,500,000. The largest part of this, about \$1,000,000,000, was invested in the United States and was principally in the form of direct investments in railways and branch and subsidiary plants and in portfolio investments in the stocks and bonds of United States governments and corporations. Investments in other countries include a miscellaneous item of \$383,000,000 representing an estimate of Canadian holdings of other foreign securities such as the bonds of Latin American and European governments. Direct investments in other countries, largely in the British West Indies and Latin America, amounted to \$173,000,000.

Of further interest in considering the relative importance of Canada's international indebtedness in the nation's economic life is the place Canadian capital occupies in the total amount of capital invested in Canada. It is estimated that the amount of capital invested in Canada is about \$18,000,000,000. This sum includes the bonded indebtedness of Dominion, provincial and municipal governments, investments in railways, all manufacturing concerns, mines and metal industries, public utilities, trading establishments, finance, insurance, land and mortgages. It does not include private capital in domestic enterprises such as farms, homes, etc. Of this sum, it is estimated that 62 p.c., or over \$11,000,000,000, is owned in Canada, 22 p.c., or \$3,984,400,000, in the United States; 15 p.c., or \$2,725,000,000, in the United Kingdom and less than 1 p.c. or, \$124,000,000, in other countries.

**Investments of Canadian Insurance Companies Operating Abroad.**—An important change in the revised figures shown in Tables 42 to 45 is the omission of an item previously included, *viz.*, "Investments of Canadian Insurance Companies Operating in Other Countries". These insurance investments, so-called, are not investments of quite the same character as the other items. The large assets in other countries held by Canadian insurance branches in those countries

have against them, besides ordinary liabilities, the fiduciary interest of the policyholders. In fact when the prospective claims of policyholders are considered it appears that on balance there is a small net investment of these branches in Canada rather than a Canadian investment abroad. This is possible because the assets underlying the reserve funds need not all be held abroad. On the other hand, the fact that assets can be transferred between countries gives an importance to them as a factor in capital movements. Again, British and foreign securities held by Canadian companies in Canada have already been included as Canadian investments abroad. On account of the ambiguity of this item and the fact that it has already been included in another form, therefore, it has not been repeated in the tables.

With regard to British and foreign insurance investments in Canada, since there exist net assets in Canada over all liabilities including reserves against future claims of Canadian policyholders the residual amount is shown as a *bona fide* investment in Canada in Tables 42 and 44.

#### 42.—Estimated British and Foreign Capital Invested in Canada, Classified According to Main Types, as at Dec. 31, 1926-35.

NOTE.—Net equities of policyholders, etc., outside of Canada invested in Canada through Canadian insurance companies operating abroad are not shown in this table for the reason given in the text above. The omission does not materially affect the totals.

## CHAPTER XXII.—CURRENCY AND BANKING; MISCELLANEOUS COMMERCIAL FINANCE.

In this chapter are assembled the statistics regarding financial institutions and transactions, other than those pertaining to insurance which are dealt with separately in Chapter XXIII. The important subject of currency and banking is treated in Part I of the chapter, while trust and loan companies, sales of Canadian bonds, corporation dividends, and foreign exchange, constitute sections of the miscellaneous commercial finance covered in Part II.

### PART I.—CURRENCY AND BANKING.

#### Section 1.—Historical Sketch.

The early history of the currency of Canada, both of the central provinces and of the maritime colonies, from the time of the first settlements to Confederation, is the story of a polyglot currency and the involved difficulties of determining exchange rating for the various coins and pieces.

The salient influences of early political and commercial affiliations upon the types of currency in use are reviewed below.

#### The Development of Currency in New France.

So long as trade remained in the hands of a few private traders, barter was the rule. Beads and other trinkets which appealed to the Indians, blankets and other useful articles, were traded directly for furs. With the further development of the colony during the French *régime*, while barter still remained, the growing complexity of social organization and trade emphasized the need for a convenient monetary unit, which was met by the adoption of French currency, but, in order to retain in the colony the gold and silver coin which arrived there, it was 'over-rated' to the extent of about one-third of its value in France. Thus there was a dual valuation of the same coinage, officially recognized as 'money of France' and 'money of the country'. Copper coins were given an even higher over-rating. Nevertheless, money remained very scarce and at one time wheat at current market rates was made legal tender in spite of the difficulties and hindrances to trade inherent in fluctuating values. The illicit fur traffic with English fur traders resulted in the introduction of Spanish silver dollars as well as various worn and mutilated coins to help fill the need. In 1681 foreign coin was officially recognized but it was stipulated by ordinance that it should pass by weight; it was given the one-third increase in value which custom had established for French currency.

One of the earliest forms of fiat paper money in the western world was introduced into New France in 1685. This 'card money', as it was termed, was not introduced primarily to meet the lack of circulating media (although, incidentally, it did relieve the prevailing scarcity) so much as an official expedient to meet the pay of soldiers until the annual Royal supplies were forthcoming. The first issue was backed by such annual supplies and was duly redeemed when the supplies arrived, but five years later another issue was made without such backing. This was the beginning of an inflationary move. By 1713, the amount of such unbacked currency outstanding was such as to reduce trade to a chaotic condition and confidence was seriously undermined. Later, card money was again resorted to, but on a sounder basis. The expanding needs of the Treasury, however, unfortunately brought about

the introduction and unlimited use of *ordonnances* and *billets* which quickly undermined the financial structure again, and at the time of the cession, the total amount of paper money outstanding was estimated at 80 million livres. It was because none of this paper money in its later issues was paid in full, and much of it was not redeemed in any manner, that the people of Old Canada resisted so firmly the efforts made in 1792, 1807, and 1808 to establish banks of issue under the authority of Parliament.

In 1721 the first effort was made to establish a special currency for the colony, but this was limited to copper coins and was not successful.

### The British Period to Confederation.

The period of military occupation (1759-1763) was marked by conditions of chaos in the matter of currency, but with the revival of the business activity of Montreal and Quebec with Nova Scotia and Massachusetts the currency standards of the latter were adopted and the Spanish dollar again made its appearance. It became the medium by which exchanges were balanced with Britain. Normally, the Spanish dollar was valued at 4s. 6d. sterling, but the tendency was to over-value it and in colonial ratings it varied between 4s. 6d. to as much as 7s. or 8s. In Nova Scotia, for instance, the customary rating for the Spanish dollar was 5s., while in New York colony it was 7s. 6d. to 8s. Corresponding margins of value prevailed in regard to other coins in the different colonies. The former of these two standard ratings, known as the Halifax currency, was accepted by Quebec, and Montreal adopted the latter, known as the York currency. Of course, there was much confusion and hindrance to trade between Montreal and Quebec as a result of the adoption of the dual standard.

In order to iron out the difficulties, Governor Murray passed an ordinance which established an official rating for the Province of Canada. The Spanish dollar was rated at 6s., the French crown at 6s. 0½d., and the British shilling at 1s. 4d. The custom of cutting up larger coins to make small change, which had grown up in the past, was prohibited. To meet such urgent needs for small coin, the merchants themselves issued bills due or 'bons' good at their face value for merchandise. Such 'bons' were the true forerunners of the bank note. The ratings given by Governor Murray were a compromise which was not permanently acceptable and proved unsatisfactory.

After the outbreak of the American Revolution in 1775, Quebec influences prevailed and Halifax currency became standard, although the use of York currency persisted in Upper Canada (where the United Empire Loyalists supported its use) until 1821, when it was deprived of legal recognition by an Act of Upper Canada.

In order to pay the expenses of the War of 1812, army bills issued against the credit of the United Kingdom were circulated. These, in the main, bore interest and were convertible into bills of exchange on the United Kingdom; they were redeemed within the ensuing four or five years. These army bill issues tended to renew confidence in paper money and familiarize the people with its use, thus paving the way for the note issues of the early banks after 1817. These first banks were created in Lower Canada, at first as private corporations but obtained charters a few years later. The charters granted to the early banks in Lower Canada are the foundations upon which subsequent improvements have been built.

In the early days of banking, one of the chief functions of banks was to issue promissory notes payable to the bearer on demand; where the banks' credit was

good these notes passed freely from hand to hand, and were the chief circulating media in the Canadas. In some cases bank notes were preferred to those issued by the colonial governments.

The Bank of Montreal began business towards the end of 1817 as a private institution. In the following year the Quebec Bank was established as well as the Bank of Canada at Montreal. These three Lower Canada institutions obtained their charters in 1822. In Upper Canada the Bank of Upper Canada was established at Kingston in 1818, but the first bank to receive a charter was the second Bank of Upper Canada established at York (Toronto) in 1821. In Nova Scotia, unsuccessful efforts were made as early as 1801 to form banks, and in 1812 the Government began to issue treasury notes not bearing interest and re-issuable, sometimes redeemable and sometimes not. This policy was continued down to Confederation. It seems to be in part because of these treasury issues of notes that no bank was started in Nova Scotia before 1825, when the Halifax Banking Company (private) commenced business. The Bank of Nova Scotia received a regular charter in 1832. A bank, the Bank of New Brunswick, was incorporated in New Brunswick in 1820.

Before the union of the two Canadas, the privilege of issuing paper money had been enjoyed almost entirely by the banks alone. Lord Sydenham now proposed a provincial bank of issue with the chartered banks gradually relinquishing the right to note issue, and Hincks,\* a young financier of promise, became chairman of the Joint Committee on Currency and Banking established in 1841. This Committee supported the provincial bank idea in principle. The chartered banks, of course, opposed it, and the bill was ultimately defeated, but the principle reappeared in subsequent measures and ultimately became the basis of the Dominion note issues. Lord Sydenham and Hincks did much, nevertheless, to strengthen and control the banking system.

A period of crisis in 1848-49 forced the adoption of a policy which led to the withdrawal from the banks of the right to issue notes of lower denominations than five dollars. The Government also now issued provincial debentures to the amount of one million dollars payable on demand. They were made acceptable in all payments due the Government and were reissuable. This is often regarded as the introduction of government paper into the currency system of the country, although, as already noted, Nova Scotia had issued government paper in 1812. Its success led to the revival of the project for a provincial bank of issue and in 1850 the Free Banking Act, designed to restrict note issue privileges and so reduce the number of different media of exchange, was passed, but the chartered banks would not agree to avail themselves of its provisions, nor were conditions in Canada altogether ripe for a change from the elastic system of note issue which had now become established in spite of the fact that, from the point of view of the note-holding public, the proposed system would have been safer.

Between 1840 and 1867 the problem of establishing a uniform metallic currency standard for united Canada was also dealt with. The majority of Canadians strongly favoured the United States decimal system and Hincks declared in its favour. Authorities in the United Kingdom, on the other hand, pressed for the sterling system. In 1853 and in 1858 the decimal system was adopted in the Canadas, and thus duplication of sterling and decimal systems was removed and the Canadian dollar, equivalent to the United States dollar, was established with the sovereign as legal tender. After 1860, the official accounts in Nova Scotia and New Brunswick were kept according to the decimal system.

\*Later, as Sir Francis Hincks, he was Dominion Minister of Finance (1869-73). His influence on the development of Canadian banking was very marked until his death in 1885.

### The Development of Currency and Banking after Confederation.

**Currency Acts.**—At Confederation, jurisdiction over currency passed to the Dominion Government. By the Uniform Currency Act of 1871 (34 Viet., c. 4), the decimal currency was extended throughout the Dominion; the British sovereign, rated at \$4-86 $\frac{2}{3}$ , became the standard coin and the United States eagle was made legal tender for \$10, while authority was given to coin a Canadian \$5 gold piece. No Canadian gold coinage was issued, however, prior to the establishment of the Canadian branch of the Royal Mint in 1908, the first coins struck being sovereigns similar to those of the United Kingdom, but with a small 'C' identifying them as having been coined in Canada. In May, 1912, the first Canadian \$10 and \$5 gold pieces were struck, but the Canadian gold coinage has so far been limited in amount, since Canadians have generally preferred Dominion notes to gold for use within the country, and, when gold is needed for export, bullion or British and United States gold coin serve the purpose equally well.

The currency system established by this Act was very little changed until the Currency Act of 1910 which made the standard a fixed weight of fine gold instead of the British sovereign, the latter becoming legal tender.

In respect to paper currency, the provisions of the Provincial Note Act of 1866 were extended to the new Dominion in 1868, and 'Dominion' notes came into being. After 1870 such notes could be issued to the amount of \$9,000,000 against a 20 p.c. specie reserve (\$2,000,000 reserve was required for the entire \$9,000,000) and notes in excess of this were to have 100 p.c. specie reserve. Dominion notes which were legal tender were in circulation side by side with bank-note issues which were not legal tender. In 1880 the basis of the present system was definitely established (see below, p. 904, and under heading Chartered Bank Notes, pp. 913-914).

**The Bank Act.**—After tentative legislation in 1867, the Bank Act of 1870 provided that new banks must have a minimum paid-up capital of \$200,000; at least 20 p.c. of the subscribed capital had to be paid up in each year after the commencement of business. A proposal to limit the liabilities of banks in relation to capital and specie and Government debenture holdings was not translated into legislation. Bank notes in circulation were not to exceed the amount of paid-up capital. The right to issue notes under \$4 was withdrawn, largely in consideration of the abolition of the tax of 1 p.c. on note circulation. If possible up to 50 p.c., but in no case less than one-third, of a bank's cash reserves were to be held in Dominion notes. Dividends were limited to 8 p.c. until or unless the bank's reserve fund was the equivalent of 20 p.c. of its paid-up capital. In case of the failure of a bank, double liability of shareholders became enforceable without waiting for the realization of the bank's general assets. Banks were required to transmit certified lists of shareholders annually, to be laid before Parliament. Any existing bank was permitted, on the authority of the shareholders, to apply for an extension of its charter, and the Governor in Council, upon the recommendation of the Minister of Justice and the Treasury Board, was empowered to extend such charter to 1881. Any suspension by a bank of payment of its liabilities for a period of 90 days would constitute insolvency, and operate as a forfeiture of its charter.

In 1871 the first comprehensive Banking Act of the Dominion was passed. A large part of the statute was devoted to the re-enactment and consolidation of legislation already in force, although the measure of 1870 contained the main features of the Government's policy. The procedure relative to extension of charters laid down in the preceding year was superseded by this Act, which became the charter

of the banks until July 1, 1881, that date being set in contemplation of regular decennial revisions. No new bank was permitted to commence business with less than \$500,000 capital *bona fide* subscribed and \$100,000 similarly paid up, with the further proviso that at least \$200,000 must be paid up within two years after commencement of business. The sections respecting loans against warehouse receipts, etc., were thoroughly revised and difficulties of procedure removed. Banks were permitted to take security on commodities in store pending marketing, and also while undergoing conversion from the raw to the finished state. Advances were allowed upon security of shares of other banks. It was provided that the rate of interest or discount charged by a bank should not exceed 7 p.c. and that no higher rate should be recoverable. Monthly returns of assets and liabilities were required. Certain technical amendments were made to the Bank Act in 1872, 1873, and 1875. In 1879 the power to lend upon the security of shares of other banks was repealed.

At the first general revision of the Bank Act in 1880 (effective 1881), a note holder was definitely recognized as a preferred creditor, claims of the Dominion and Provincial Governments, respectively, ranking next in order of preference. Banks were prohibited from issuing notes under \$5, higher denominations to be multiples of this sum. Dominion notes were now to constitute not less than 40 p.c. of the bank's cash reserves. Monthly returns of a more detailed character were to be made. The Act was amended in 1883 to enforce more effectively the prohibitions, restrictions, and duties already imposed upon the banks. The use of certain titles by private bankers not operating under the provisions of the Act was prohibited.

At the revision of 1890 (effective 1891), it was stipulated that not less than \$250,000 capital must be paid up before a certificate permitting a bank to commence business could be issued by the Treasury Board. A period of one year from the date of the charter was allowed for the payment of the capital and the carrying out of other preliminaries. Dividends were not to exceed 8 p.c. until or unless the reserve fund was the equivalent of 30 p.c. of the paid-up capital. A fund known as the "Bank Note Circulation Redemption Fund" was established, consisting of deposits made by the banks with the Minister of Finance of amounts equal to 5 p.c. of their average note circulation, such deposits to be subject to adjustment annually, and to constitute a guarantee of the payment of all notes of a suspended bank with interest at 6 p.c. from the date of suspension until the date when their redemption was undertaken by the liquidator. Failing action by the liquidator within two months, the Minister of Finance was authorized to redeem the notes out of the fund, and such outlay, if not made good out of the assets of the failed bank, was to be reimbursed by the contributing banks *pro rata* to their contributions. Another major change gave the banks, in certain classes of loans, the same legal power to take security over the borrowers' goods as had previously been granted by warehouse receipts. This enactment served to make general and more clear principles already recognized by previous legislation and practice. Directors' qualifications were set out more clearly and it was now provided that a majority only of directors, instead of all, need be British subjects. Penalties for excess note circulation were made more severe.

The revision of 1900 (effective 1901) recognized the Canadian Bankers' Association as an agency in the supervision and control of certain activities of the banks. It was charged, under the Treasury Board, with the responsibility of supervising the printing and distribution of notes to the banks and their issue and destruction; also with control over clearing houses and the appointment of curators to supervise

the affairs of suspended banks. The amended Act also included provisions permitting one bank to sell its assets to another. More detailed monthly returns were required and the interest on notes of failed banks was reduced from 6 p.c. to 5 p.c. In 1908, after the financial crisis of 1907, provision was made for emergency circulation during the crop-moving season from October to January, when banks were allowed to issue excess circulation up to 15 p.c. of their combined paid-up capital and rest or reserve funds, this emergency circulation to be taxed at a rate not exceeding 5 p.c. per annum. In 1912, the period was extended to the six months from September to February, inclusive.

At the fourth revision of the Bank Act in 1913 provision was made for an audit of each bank's affairs by auditors appointed by the shareholders. There was also provision for the establishment of Central Gold Reserves in which banks might deposit gold or Dominion notes for the purpose of issuing additional notes of their own there-against. Annual reports to the Minister of the fair market value of real and immovable property held by the banks for their own use were required. Banks were empowered to lend to farmers upon security of their threshed grain. As a war measure the provision for emergency circulation was extended in 1914 to cover the whole year and banks were further authorized to make payments in their own notes instead of in gold or Dominion notes.

The fifth revision of 1923 (13-14 Geo. V, c. 32) resulted in numerous important changes. The qualifications of provisional directors were re-defined, while provision was made for keeping records of attendance at directors' meetings and bringing them to the notice of shareholders. Annual and monthly statements were given further attention and more complete returns required, including statements of controlled companies in the names of which any part of a bank's operations were carried on. Other or special returns were to be made if called for by the Minister. Two auditors were now to be appointed by the shareholders instead of one, and the qualifications, duties, and responsibilities of auditors were more clearly defined. The personal liability of directors in case of distribution of profits in excess of legal limits was also more definitely expressed. Regulations regarding loans were amended and advances to any officer or clerk of a bank could not, in any circumstances, exceed \$10,000. Registration of security for loans under Sec. 88 was provided for. It became necessary for guarantee and pension funds to be invested in trustee securities. The punishment of directors and other bank officials for making false statements of a bank's position was provided for in Sec. 153. In 1924, as a result of the failure of the Home Bank of Canada, provision was made for periodical examination of the chartered banks by an Inspector-General of Banks, who was to be an officer of the Department of Finance.

The sixth revision of the Bank Act was postponed from 1933 to 1934 (c. 24), for adaptation to the establishment of the new Bank of Canada, and most of the alterations outlined the relations of the chartered banks with the Bank of Canada; these are given on pp. 906-907 in the résumé of the legislation under which the Bank of Canada was set up.

**Early Development of Central Bank Institutions.**—As noted above certain features of a central banking system had become evident before the establishment of the Bank of Canada, and provided more centralized control and flexibility of cash reserves. In chronological order with their origins these are again summarized here:—

1.—*Central Note Issue*, permanently established with the issue of Dominion notes under legislation of 1868.

2.—*The Canadian Bankers' Association*, established in 1900, and designed to effect greater co-operation among the banks in the issue of notes, in credit control, and in various aspects of bank activities.

3.—*The Central Gold Reserves*, established by the Bank Act of 1913.

4.—*Re-discount Facilities*, although originated as a war measure by the Finance Act of 1914, were made a permanent feature of the system by the Finance Act of 1923, which empowered the Minister of Finance to issue Dominion notes to the banks on the deposit by them of approved securities. This legislation provided the banks with a means of increasing their legal tender cash reserves at will.

## Section 2.—The Bank of Canada.

### Subsection 1.—The Bank of Canada Act and its Amendment.

C. 43 of the Statutes of 1934, "An Act to incorporate the Bank of Canada", provided for the establishment of a central bank in Canada. The capital of the Bank was originally \$5,000,000, divided into shares of \$50 par value. These shares were offered for public subscription by the Minister of Finance on Sept. 17, 1934, and were largely oversubscribed. The maximum allotment to any one individual or corporation was 15 shares. Shares of the Bank may be held only by British subjects ordinarily resident in Canada, or by corporations controlled by British subjects ordinarily resident in Canada. The maximum holding permitted one person is 50 shares. Directors, officers or employees of the chartered banks may not hold shares of the Bank. The Bank commenced business on Mar. 11, 1935.

By an amendment to the Act passed at the 1936 session of Parliament, the capitalization of the Bank was increased to \$10,100,000 by the sale of \$5,100,000 Class "B" shares to the Minister of Finance. The original shareholders are now designated Class "A".\*

The Bank is authorized to pay cumulative dividends of 4½ p.c. per annum from its profits after making such provision as the Board thinks proper for bad and doubtful debts, depreciation in assets, pension funds, and all such matters as are properly provided for by banks. The remainder of the profits will be paid into the Consolidated Revenue Fund of Canada and to the Rest Fund of the Bank in specified proportions until the Rest Fund is equal to the paid-up capital, when all the remaining profits will be paid into the Consolidated Revenue Fund.

The Bank may buy and sell securities of the Dominion, the provinces, the United Kingdom, and the United States of America, without restriction if of a maturity not exceeding two years, and in limited amounts if of longer maturity. It may also buy and sell securities of British Dominions and France without restriction, if maturing within six months. Short-term securities of the Dominion or provinces may be re-discounted. The Bank may buy and sell certain classes of commercial paper of limited currency, and if endorsed by a chartered bank may re-discount such commercial paper. Advances for six-month periods may be made to chartered banks, Quebec Savings Banks, the Dominion or any province against certain classes of collateral, and advances of specified duration may be made to the Dominion or any province in amounts not exceeding a fixed proportion of such government's revenue. The Bank may buy and sell gold, silver, nickel, and bronze coin and gold and silver bullion, and may deal in foreign exchange.

The provisions regarding the note issue of the Bank of Canada are dealt with on pp. 912-913.

\* At the time of going to press it is announced that legislation will be brought before the House of Commons before the end of the present (1938) session for the purchase of all outstanding Class "A" stock by the Dominion Government with the object of bringing the Bank of Canada under complete government ownership.

The Bank of Canada must maintain a reserve of gold equal to not less than 25 p.c. of its total note and deposit liabilities in Canada. The reserve, in addition to gold, may include silver bullion, balances in pounds sterling in the Bank of England, in United States dollars in the Federal Reserve Bank of New York, and in gold currencies in central banks in gold standard countries or in the Bank for International Settlements, treasury bills of the United Kingdom or the United States of America having a maturity not exceeding three months, and bills of exchange having a maturity not exceeding 90 days, payable in London, New York, or in a gold standard country, less any liabilities of the Bank payable in the currency of the United Kingdom, the United States of America, or a gold standard country.

The chartered banks are required to maintain a reserve of not less than 5 p.c. of their deposit liabilities within Canada in the form of deposits with and notes of the Bank of Canada.

The Bank acts as the fiscal agent of the Dominion of Canada and may, by agreement, act as banker or fiscal agent of any province. The Bank may not accept deposits from individuals and does not compete with the chartered banks in commercial banking fields.

The head office of the Bank is at Ottawa, and it has an agency in each province, namely, at Charlottetown, Halifax, Saint John, Montreal, Toronto, Winnipeg, Regina, Calgary, and Vancouver.

The Governor of the Bank is its chief executive officer and Chairman of the Board of Directors, and he is assisted by a Deputy Governor and an Assistant Deputy Governor. The first appointments were made by the Government. Subsequent appointments are to be made by the Board of Directors subject to the approval of the Governor in Council.

At the first meeting of the shareholders on Jan. 23, 1935, seven directors were elected for terms to run as follows: one until the third annual general meeting (1938), two until the fourth (1939), two until the fifth (1940), and two until the sixth annual general meeting (1941).

By the 1936 amendment the number of directors elected by the Class "A" shareholders will be eventually reduced to three who will hold office for three-year terms. The six directors appointed by the Class "B" shareholder with the approval of the Governor in Council, were announced on Sept. 11, 1936. These directors are appointed for terms to run as follows: two until the annual general meeting in 1940, two until 1941, and two until 1942. Thereafter, the Government directors, each of whom shall hold office for a term of three years, will be appointed by the Class "B" shareholder with the approval of the Governor in Council, two as of the day of the annual general meeting in 1940 and two at the day of each annual general meeting thereafter. In the transaction of the business of the Bank each director has one vote except that prior to the annual general meeting in 1940 each of the directors appointed by the Class "B" shareholder shall be entitled to two votes.

There is also an Executive Committee of the Board of Directors consisting of the Governor, Deputy Governor, and one member of the Board, which must meet once a week. This Committee has the same powers as the Board but every decision is submitted to the Board of Directors at its next meeting. The Board must meet at least four times a year. The Deputy Minister of Finance is an *ex officio* member of the Board of Directors and of the Executive Committee, but is without a vote.

The Governor, or in his absence the Deputy Governor, only has the power to veto any action or decision of the Board of Directors of the Executive Committee, subject to confirmation or disallowance by the Governor in Council.

### Subsection 2.—The Bank of Canada and Its Relationship to the Canadian Financial System.

An article under this title appeared at pp. 881-885 of the 1937 edition of the Year Book. It dealt with such subjects as the functions of the Bank, its control and regulation of credit and currency, the mechanism by which such control is exercised, the expansion and contraction of credit, the mitigation of general economic fluctuations, the control of exchange operations, the advisory function of the Bank, and its duties as the Government's banker.

### Subsection 3.—Bank of Canada Operations.

The operations of the Bank of Canada, as shown by the liabilities and assets statement as at Mar. 13, 1935, and Dec. 31, 1935-37, are shown in Table 1.

#### 1.—Liabilities and Assets of the Bank of Canada, Mar. 13, 1935, and Dec. 31, 1935-37.

<sup>1</sup> From the Bank's Annual Statement.

The chart given below showing Bank of Canada liabilities and assets covers the short period since the Bank was established, but illustrates the relationship between the central bank's balance sheet and chartered bank cash reserves. The expansion of Bank of Canada liabilities and assets has provided for increased Bank of Canada notes in active circulation as the chartered bank-note issue is limited and gradually retired under Bank Act regulations, and somewhat enlarged the cash reserves of the chartered banks. The principal changes in Bank of Canada assets have been those due to revaluation of gold holdings required by the Exchange Fund Act of July, 1935, and the rise in investments, variations in which have been due in part to seasonal variations in cash reserves and active note circulation.

## BANK OF CANADA SOURCES AND DISTRIBUTION OF CASH

MONTHLY AVERAGE OF WEDNESDAY FIGURES  
MILLIONS OF DOLLARS

*Reproduced from the Bank of Canada's "Statistical Summary", April, 1938.*

## Section 3.—Currency.

## Subsection 1.—Canadian Coinage.

The present standard of Canada is gold of 900 millesimal fineness (23·22 grains equal to one dollar). As pointed out on p. 903 gold coin has been authorized but only very limited issues were ever made. The British sovereign and half sovereign, and United States eagle, half eagle, and double eagle are legal tender. Subsidiary coin consists of 50, 25 and 10 cent silver pieces,\* 800 fine (reduced from 925 fine in 1920). Such subsidiary silver coin is legal tender to the amount of ten dollars. The 5-cent piece (now made of nickel) is legal tender up to five dollars and the 1-cent bronze coin up to twenty-five cents. There is no provision for the redemption of subsidiary coin. Table 2 gives statistics of Canadian coinage, and Table 3 shows the coins in circulation at the end of each year from 1926 to 1937.

\*The Currency Act of 1910 made provision for a silver dollar and a 5-cent silver coin. The former was not coined until 1935, when a limited issue was made as a jubilee coin. The 5-cent silver coin was coined freely until 1921. It still has limited legal tender but has been replaced in the coinage by the 5-cent nickel piece.

<sup>1</sup> Nickel coins were first issued in 1922.

**The Royal Canadian Mint.**—The Ottawa Mint, established as a branch of the Royal Mint under the (Imperial) Coinage Act, 1870, and opened on Jan. 2, 1908, was by 21-22 Geo. V, c. 48, constituted a branch of the Department of Finance, and by the Proclamation of Nov. 14, 1931, issued under Sec. 3 of that Act, it has since Dec. 1, 1931, operated as the Royal Canadian Mint. At first the British North American provinces, and later the Dominion of Canada, obtained their coins from the Royal Mint in London or from The Mint, Birmingham, Ltd., and in its earlier years the operations of the Mint in Canada were confined to the production of gold, silver, and bronze coins for domestic circulation, of British sovereigns, and of small coins struck under contract for Newfoundland and Jamaica. Previous to 1914 small quantities of gold bullion were refined, but during the War the Mint came to the assistance of the British Government by establishing a refinery in which nearly twenty million ounces of South African gold were treated on account of the Bank of England, and the subsequent great development of the gold-mining industry in Canada has resulted in gold-refining becoming one of the principal activities of the Mint. Gold coins have not been struck since 1919, most of the fine gold produced from the rough shipments from the mines being delivered to the Department of Finance or, since Mar. 11, 1935, to the Bank of Canada in the form of bars of approximately 400 fine oz. each, the rest being sold in a convenient form to manufacturers. The fine silver extracted from the rough gold, when not required for coinage, is sold in New York or disposed of to local manufacturing firms.

**Subsection 2.—Dominion and Bank of Canada Notes.**

**Dominion Notes.**—It has been explained in the historical outline at the beginning of this chapter that Dominion notes became established in 1868. The legislation by which the issue was expanded with the growth of the country was given in a footnote on p. 952 of the 1934-35 Year Book.

Prior to the taking over of the note issue by the Bank of Canada when it opened on Mar. 11, 1935, Dominion notes were issued under any one of three statutory authorities: (1) the Dominion Notes Act (Statutes of 1934, c. 34), which required a gold reserve of 25 p.c. to be held against the first \$120,000,000 of notes issued and full gold coverage against any issue in excess of \$120,000,000; (2) the Finance Act (R.S.C. 1927, c. 70), Part II of which authorized the Minister of Finance to advance to any chartered bank or to the savings banks of Quebec, Dominion notes to any amount on the pledge of approved securities deposited with the Minister. These advances bore interest and no gold coverage was required to be held on Dominion notes so advanced; (3) C. 4 of the Statutes of 1915, authorizing the Government to issue Dominion notes to the amount of \$26,000,000 without gold coverage, but partly covered by the deposit of \$16,000,000 of railway securities guaranteed by the Dominion Government.

The Dominion note issue was therefore partly gold-backed and partly fiduciary. Dominion notes were legal tender and, in normal times when Canada was on the gold standard, they were redeemable in gold.

Dominion notes were of two types, those for the purpose of general circulation, and 'special' notes. The latter were used only by the banks for inter-bank transactions and clearings, or for cash reserves or deposit in the Central Gold Reserves. They were mainly of \$5,000 and \$50,000 denominations. Dominion notes for the purpose of general circulation were of the denominations of 25 cents, \$1, \$2, \$4, \$5, \$50, \$500 and \$1,000, although for a considerable time no \$4 or \$50 notes had been issued. Since the minimum denomination for chartered bank notes was set at \$5, Dominion notes of lower denominations naturally were largely in circulation among the general public, but there was nothing to prevent any of these Dominion notes from being included in the reserves of the banks, and it was provided that at least 40 p.c. of the banks' reserves were to consist of Dominion notes.

**Bank of Canada Notes.**—The Bank of Canada, when it commenced operations, assumed the liability for Dominion notes outstanding, which were replaced in public circulation, and partly replaced as cash reserves, by its own legal-tender notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50, \$100 and \$1,000. Deposits of chartered banks at the Bank of Canada completed the replacement of Dominion notes as cash reserves.

The chartered banks are required under the Bank Act of 1934 to reduce the issue of their own bank notes gradually during the ten years 1935-45 to an amount not in excess of 25 p.c. of their paid-up capital on Mar. 11, 1935. Bank of Canada notes are thus replacing chartered bank notes as the issue of the latter is reduced.

In Table 5 are shown the denominations of Dominion or Bank of Canada notes in circulation in 1926, 1929, 1932, and in the three latest years. In the denominations under \$5, which have, for many years, been used for general circulation, there has been little change. In the denominations from \$5 to \$1,000, where Bank of Canada notes have partially replaced chartered bank notes or Dominion notes, there has been a large increase. On the other hand, the special Dominion notes in denominations from \$1,000 to \$50,000 which were used almost exclusively for inter-bank transactions or bank reserves, are no longer in use.

5.—Denominations of Dominion or Bank of Canada Notes in Circulation, 1926, 1929, 1932, and 1935-37.

Note.—Annual averages of month-end figures.

Subsection 3.—Chartered Bank Notes.

By reference to the historical outline at the beginning of this chapter, the developments may be traced by which bank notes became the chief circulating medium in Canada in the period preceding the establishment of the Bank of Canada. The main steps of this development which remained as permanent features of the system are assembled and emphasized here. By the Bank Act of 1870 (later consolidated with the general Bank Act of 1871), the note issue of a bank was not to exceed its paid-up capital, no bank notes were to be issued under \$4 in value (later changed to \$5 and multiples thereof), and, while the banks were allowed to use their own discretion regarding the amount of their cash reserves, it was stipulated that at least one-third (later increased to 40 p.c.) of such cash reserves as they chose to carry should consist of Dominion notes. In the revision of 1880, a note-holder was definitely recognized as a preferred creditor. The Bank Act of 1890 provided for the Bank Note Circulation Redemption Fund, made up by each bank depositing with the Minister of Finance an amount equal to 5 p.c. of its note circulation. As a result of the operation of this fund and of making notes a prior lien against the assets of failed banks, no bank-note holder in Canada has suffered a loss since 1881. In 1908, after the financial crisis of 1907, provision was made for the banks to issue, during the crop-moving season, October to January, inclusive (later extended to September to February, inclusive), an excess circulation up to 15 p.c. of their combined capital and 'rest' or reserve funds, such excess to be taxed at a rate not exceeding 5 p.c. per annum. The revision of the Bank Act in 1913 provided for the establishment of Central Gold Reserves in which banks might deposit gold or Dominion notes and

issue additional notes of their own there-against. The Finance Act (c. 3) of 1914, gave the Minister of Finance authority to issue Dominion notes to the banks against approved securities deposited with him. Originally passed as a war measure, this was made a permanent feature of the system by the Finance Act (c. 48) of 1923, and provided the banks with the means of further expanding their note issue by the deposit of the Dominion notes, so obtained, in the Central Gold Reserves.

Bank notes, although forming the chief circulating medium in the hands of the public, were a fiduciary issue; they were not legal tender but were convertible into Dominion notes which were legal tender.

The provisions regarding bank notes were materially changed with the establishment of the Bank of Canada under the Bank Act (c. 24) of 1934. The authority both for seasonal expansion and for additional issue secured by deposit in the Central Gold Reserves was then terminated. Provision was made for a gradual reduction in bank-note circulation over a period of years as explained on p. 912. As a result of these changes, current data on bank-note circulation are not comparable with those of earlier years. However, statistics of total notes in the hands of the general public are comparable. This public circulation includes chartered bank notes together with Dominion notes and Bank of Canada notes, exclusive of those held by the banks as reserves. Statistics on this basis are shown in Table 6.

<sup>1</sup> Gross note circulation of chartered banks. <sup>2</sup> Total issue less notes held by chartered banks and notes deposited in the Central Gold Reserves up to March, 1935. <sup>3</sup> Annual averages of daily figures supplied by the Bank of Canada. <sup>4</sup> Figures based on estimates of population as given on p. 155.

## Section 4.—Monetary Reserves.

### Subsection 1.—Bank of Canada Reserves.

In the 1936 edition of the Year Book, the composition of Canadian Gold Reserves held by the Government was presented for the years 1905 to 1934, in Table 3. p. 895. Since March, 1935, the gold reserves have been held by the Bank of Canada. By authority of the Exchange Fund Act (c. 60, 1935), effective in July, 1935, they are to be valued at the prevailing current market price of gold. The effect of the revaluation as from the above date is shown in the chart on p. 909. The new data are now to be found under the item "Reserves" on the "Assets" side of Table 1, p. 908.

### Subsection 2.—Chartered Bank Canadian Cash Reserves.

**Before the Establishment of the Bank of Canada.**—Up to March, 1935, legal tender cash reserves in Canada were made up partly of Dominion notes (see

pp. 911-912) and partly of gold coin and bullion, and subsidiary coin, including these forms of cash held by the banks themselves and as deposits in the Central Gold Reserves. In so far as these reserves were in actual gold or were in Dominion notes backed by gold, they were subject to the expanding or contracting influences of monetary gold imports or exports arising from Canada's balance of international payments, so long as Canada was on the gold standard.

Since the Establishment of the Bank of Canada.—When the Bank of Canada was established, the chartered banks turned over their reserves of gold in Canada and Dominion notes to the new bank in exchange for deposits with and notes of the Bank of Canada. It was provided that henceforth the chartered banks were to carry reserves in these forms amounting to at least 5 p.c. of their deposit liabilities in Canada. Since that time, therefore, the gold reserves against currency and bank credit have been in the custody of the central bank.

The cash reserves shown in Table 7, include, prior to Mar. 11, 1935, the gold and coin and Dominion notes held by the banks in Canada and the deposits in the Central Gold Reserves not ear-marked against the issue of bank notes, and, since the above date, notes of and deposits with the Bank of Canada.

#### 7.—Cash Reserve of the Chartered Banks in Canada, 1926-37.

NOTE.—Figures supplied by the Bank of Canada. For detailed figures after 1935, see Table 10, item 1.

## Section 5.—Commercial Banking.

### Subsection 1.—Historical.

Since one of the chief functions of the early banks in Canada was to issue notes to provide a convenient currency or circulating medium, it has been expedient to cover both currency and banking in the one historical sketch which will be found on pp. 900-906. However, the function of note issue is no longer as important as it was. Latterly, the services of the chartered banks in gathering deposits from innumerable sources have emphasized the importance of deposit banking by which the savings of the people are put to immediate productive and commercial use; with the development of commercial banking, other necessary commercial banking facilities have been given more importance. Included among these is the mechanism of bills of exchange by which foreign trade is financed. The principal features of this development of commercial banking facilities in the evolution of the Canadian banking system may be summarized as follows: (1) its origin, closely related to the Montreal produce and export trade, and to the commerce of Halifax and Saint John; (2) the development of the branch bank system in order to meet the demands of a rapidly moving frontier of settlement; (3) the adaptation to the requirements of the grain and cattle trade of the west; and (4) the consolidation during later years of the

features which tended towards its early success. The development of a stable system has been accompanied by failures, particularly marked about the middle of the 19th century, but progress has nevertheless been steady, based on sound principles, and adapted as closely as could be to the particular needs of the country.

The branch bank is perhaps the most distinctive feature of the Canadian system as it exists to-day, and for a country such as Canada, vast in area and with a small population, the plan has proved a good one. A result of the growth of branch banks was the development of a partially centralized system—centralized as to banks, of which there are now ten, rather than as to districts as in the partially centralized system of the United States. There were 28 chartered banks in existence at Confederation. The elimination of weaker banks or their amalgamation with more stable institutions has been a progressive move towards greater security and confidence. The banks at Confederation were as follows:—

#### ONTARIO AND QUEBEC.

Bank of Montreal.  
Quebec Bank.  
Commercial Bank of Canada.  
City Bank.  
Gore Bank.  
Bank of British North America.  
Banque du Peuple.  
Niagara District Bank.  
Molson's Bank.  
Bank of Toronto.  
Ontario Bank.  
Eastern Townships Bank.  
Banque Nationale.  
Banque Jacques-Cartier.  
Merchants' Bank of Canada.

Royal Canadian Bank.  
Union Bank of Lower Canada.  
Mechanics' Bank.  
Canadian Bank of Commerce.

#### NOVA SCOTIA.

Bank of Yarmouth.  
Merchants' Bank of Halifax.  
People's Bank of Halifax.  
Union Bank of Halifax.  
Bank of Nova Scotia.

#### NEW BRUNSWICK.

Bank of New Brunswick.  
Commercial Bank of New Brunswick.  
St. Stephen's Bank.  
People's Bank of New Brunswick.

Table 8 shows the amalgamations since 1867, while a table at pp. 894-895 of the 1937 Year Book showed the insolvencies since Confederation; there have been no further changes reported and, therefore, the table is not reprinted here.

#### 8.—Bank Absorptions in Canada since 1867.

NOTE.—The purchasing banks named in the latter part of the table on p. 917 are no longer in business.

| Purchasing Bank.                      | Bank Absorbed.                      | Date. <sup>1</sup> |

<sup>1</sup> Dates given since 1900 are those of the Orders in Council authorizing the absorptions.

## Subsection 2.—Combined Statistics of Chartered Banks.

In Table 9 are given summary statistics of Canadian banking business since Confederation. In order to afford a clear view of the nature of banking transactions in Canada, bank liabilities have been classified in two main groups: liabilities to shareholders and liabilities to the public. Only the latter group is ordinarily considered when determining the financial position of any such institution. Assets are divided into four groups, 'other assets' being included in the total. As of interest to students of banking practice, the relative rates of increase of capital and reserve funds may be noted, also the great increase in the proportion of liabilities to the public to total liabilities, and the gradually increasing percentage of liabilities to the public to total assets. The accompanying chart of ownership division of total assets is of interest in this connection. The declining proportion of notes in circulation to total liabilities to the public is also characteristic of the evolution of banking in recent times. Holdings of Dominion and Provincial Government and municipal securities were relatively insignificant prior to the Great War.

PERCENTAGE DISTRIBUTION OF THE TOTAL ASSETS  
OF THE  
CHARTERED BANKS, 1867-1937

## 9.—Historical Summary showing Development of the Canadian

NOTE.—These statistics are yearly averages computed from the twelve monthly returns. Dashes  
LIABILITIES.

<sup>1</sup> Including deposits in Central Gold Reserves, 1913-34.<sup>2</sup> Includes other assets.<sup>3</sup> First year reported.<sup>4</sup> Ten-month average.<sup>5</sup> Specie and notes of, and deposits in, the Bank of Canada.

## 10.—Assets of Chartered Banks, 1929, 1932, and 1935-37.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year. As the first two items have been worked out only to the nearest million for the years prior to 1936, the totals are not the exact sums of the individual items.

| Item.   | 1929.                | 1932.                | 1935.                  | 1936.                | 1937.                |

<sup>1</sup> Daily average Canadian cash to Canadian deposits; figures supplied by the Bank of Canada.

**Classification of Deposits and Loans.**—As a result of an amendment to the Bank Act in 1934, deposits and loans are required to be classified according to size of the deposit, or purpose of the loan, each year. The figures cover deposits and loans in Canada only. Statistics for 1934 will be found at p. 902 of the 1937 Year Book.

**13.—Classification of Deposits, According to Size, in Chartered Banks in Canada, as at Oct. 31, 1935-37.**

**Clearing-House Transactions.**—In advanced industrial societies money is only 'the small change of commerce'. The great bulk of monetary transfers, particularly in the case of the larger transactions, is made through the banks. Thus it has been estimated that in the United States in 1917 about 6 p.c. of the business transactions of the country were financed by the use of money and the remaining 94 p.c. by the use of cheques. Accordingly, if we knew the aggregate amount of the cheques paid through the banks and charged to accounts, we should have an almost complete record of the volume of business transacted, and thus of the business activity of the country.

Statistics of this character were at first secured through the operation of the clearing houses—places where the representatives of all the banks met daily in the leading cities and presented for payment the notes of other banks and the cheques drawn upon other banks that had been paid in to their institutions in the regular course of business. In Canada, the first clearing houses to be established were those of Halifax (1887), Montreal (1889), Toronto (1891), Hamilton (1891), and Winnipeg (1893), and the number has subsequently increased to 32.

For the purpose of the Central Clearing Settlement, each bank maintains in its account with the Bank of Canada, Ottawa, a balance (in excess of whatever deposit is maintained as part of the 5 p.c. reserve against deposit liabilities in Canada required by statute) deemed sufficient to settle its clearing obligations. Montreal, Ottawa, Toronto, Winnipeg, and Vancouver are settlement points for the clearing houses in their respective zones. The debit or credit balances of the banks at the specified points are daily communicated by the clearing-house manager, and confirmed by the respective bank, to the local Agent of the Bank of Canada (to the Bank of Canada in the case of Ottawa) for transmission to the Bank of Canada at Ottawa by telephone or telegraph, which bank on the same day debits or credits, as the case may be, the account of the respective bank maintained with the Bank of Canada. By this means practically all the banking transactions of the country are adjusted daily in Ottawa in the accounts maintained by the banks with the Bank of Canada.

Table 15 shows for the years 1933-37 the total volume of clearings in the clearing houses of Canada. These figures, it may be added, represent not only actual city clearings but exchanges between numerous rural branches in each district.

**15.—Amounts of Exchanges of the Clearing Houses of Chartered Banks in Canada for the calendar years 1933-37.**

NOTE.—For the years 1919-23, see p. 806 of the 1924 Year Book; for 1924-28, p. 859 of the 1929 Year Book; and for 1929-32, p. 911 of the 1933 Year Book.

**Bank Debits.**—As the number of separate banks has in recent years been steadily diminishing through amalgamations (see pp. 916 to 917), there being only 10 in December, 1937,\* as compared with 18 in 1923, inter-bank transactions are a steadily decreasing proportion of total business transacted, and bank clearings have ceased to be a satisfactory measure of general business. The Canadian Bankers' Association agreed to secure from January, 1924, the monthly aggregate figures of the amount of cheques charged to accounts at all banking offices situated in the clearing-house centres of Canada, and monthly and annual figures of cheques charged to accounts (bank debits) have been published since that time by the Dominion Bureau of Statistics. Further, in order that an estimate might be made of the proportion of banking transactions outside the clearing-house cities to the total, the Canadian Bankers' Association secured for the month of January, 1935, the grand total of all cheques charged to accounts at all branch banks throughout the Dominion. The results were published in the Bureau's Monthly Review of Bank Debits for February, 1935, and showed that the aggregate of transactions outside the clearing-house cities was in January, 1935, 12½ p.c. of the grand total in the clearing-house cities. The corresponding figures in the five economic areas were as follows: Maritime Provinces 104.2 p.c.; Quebec 6.9 p.c.; Ontario 13.5; Prairie Provinces 8.4 p.c.; British Columbia 16.7 p.c. Only in the Maritime Provinces did the total of bank debits in clearing-house cities appear to represent inadequately the grand total of business transactions.

\*Barclays Bank, established in 1920, was the latest addition to the commercial chartered banks in Canada; the number has remained at 10 since 1931.

# 16.—Bank Debits at the Clearing-House Centres of Canada, by Individual Centres, calendar years, 1933-37.

NOTE.—For the years 1924-28, see pp. 860-861 of the 1929 Year Book; and for 1929-32, p. 912 of the 1933 Year Book.

## Subsection 3.—Statistics of Individual Chartered Banks.

**Assets and Liabilities.**—Tables 17 and 18 show, respectively, the principal and total assets and liabilities of the individual banks for the years 1929 and 1934-37, the figures being averages computed from the monthly bank returns. The statistics in column 2 of Table 17 represent, for years prior to 1935, when the Bank of Canada was established, the totals of the banks' holdings of gold and coin in Canada, Dominion notes, and that part of their deposits in the Central Gold Reserves not required against their note issues; they now represent the total of Bank of Canada notes in the possession of the chartered banks together with their deposits at the Bank of Canada. Figures for this column have been supplied by the Bank of Canada.

## 17.—Principal and Total Assets of Individual Chartered Banks, 1929 and 1934-37.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year.

| Bank.                             | Year.             | Cash Reserve<br>against<br>Canadian<br>Deposits. | Total<br>Securities. | Total<br>Loans. | Total<br>Assets. |

<sup>1</sup> Absorbed by the Imperial Bank of Canada, May 1, 1931.

<sup>2</sup> Four-month average. Bank commenced business in September, 1929. The grand totals for 1929 are, however, twelve-month averages for all banks.

**Earnings of Canadian Banks.**—The chartered banks of Canada are for the most part Dominion-wide institutions, doing business in all parts of the country. Their earnings, therefore, reflect with very considerable faithfulness the fluctuations of general business.

**19.—Net Profits of Canadian Banks and Rates of Dividend Paid, for their business years ended 1932-37.**

NOTE.—These figures are not strictly comparable owing to variations from year to year in the practices of individual banks, and between banks. With the exception of La Banque Provinciale du Canada, the profits for 1936 and 1937 are shown after deducting Dominion and Provincial Government taxes.

<sup>1</sup> This bank paid at the rate of 10 p.c. per annum for the first half-year and 8 p.c. for the second.

<sup>2</sup> None reported.

**Branches of Chartered Banks.**—During the period from 1881 to 1901, the number of chartered banks doing business in Canada under the Bank Act remained almost the same, 36 in 1881 and 1891, and 34 in 1901, but during the present century there has been in banking, as in industry, an era of amalgamations, the number of banks having dropped to 25 in 1913 and to 10 in 1931. That this has been far from involving a curtailment of banking facilities is seen in Table 9, which shows the development of the banking business since 1867, and in Table 20, which compares the number of branch banks existing in Canada at different periods, and shows a growth from 123 at Confederation to 4,083, inclusive of sub-agencies, at Dec. 31, 1930. Since then, owing to the shrinkage in commercial activities as a result of the depression, some unprofitable branches have been closed and the total has declined to 3,336, exclusive of 145 branches and agencies in other countries, as at Dec. 31, 1937.

**20.—Numbers of Branches of Chartered Banks in Canada, by Provinces, Dec. 31, 1868, 1902, 1905, 1920, 1926, 1930, 1934-37.**

<sup>1</sup> Includes sub-agencies for receiving deposits for the banks employing them.

Table 21 gives the numbers of branches of the various banks, by provinces, as at Dec. 31, 1937, while Table 22 presents the statistics of branches of Canadian banks doing business outside Canada, an extension of Canadian banking (more especially to Newfoundland and the West Indies) which proceeded very rapidly in the war and early post-war period, rising to a total of 206 in 1921. Since then this number has gradually declined to 145 branches and sub-agencies in 1937.

**21.—Numbers of Branches of Individual Canadian Chartered Banks in each Province and Outside Canada at Dec. 31, 1937.**

NOTE.—This table does not include sub-agencies which numbered 591 in 1937, including 2 outside Canada.

## Section 6.—Government and Other Savings Banks.

In a comparatively new country where capital is relatively scarce, it is a natural thing that the banks which finance the business institutions should also absorb the bulk of the people's savings for use in promoting the business of the country. Thus in Canada the great bulk of the current savings of the people is found in the savings or notice deposits of the Canadian chartered banks, the annual average figures of which are given for recent years in Table 9 of this chapter, the 1937 average being \$1,573,654,555. Further, the current savings of the Canadian people are going very largely into the purchase of life insurance, the total premiums paid in the single year 1936 aggregating \$206,806,949. In comparison with the enormous figures of notice deposits in chartered banks and with total insurance in force, the deposits in the special savings banks are comparatively small, but are none the less significant.

There are three distinct types of savings bank in Canada at the present time, in addition to the savings departments of the chartered banks and of trust and loan companies. First, there is the Post Office Savings Bank, the deposits in which are a direct obligation of the Dominion Government. Secondly, there are Provincial Government savings banking institutions in Ontario and in Alberta, where the depositor becomes a direct creditor of the province. Thirdly, there are in the province of Quebec two important savings banks, the Montreal City and District Savings Bank and the Caisse d'Economie de Notre-Dame de Québec, established under Dominion legislation and making monthly reports to the Department of Finance.

**Dominion Government Savings Banks.**—Prior to 1929 there were two classes of Dominion Government savings banks in Canada, the Post Office Savings Bank, under the Post Office Department, and the Dominion Government Savings Bank, attached to the Department of Finance. The former was established under the Post Office Act of 1867 (31 Vict., c. 10) in order to "enlarge the facilities now available for the deposit of small savings, to make the Post Office available for that purpose, and to give the direct security of the Dominion to every depositor for repayment of all money deposited by him together with the interest due thereon".

Branches of the Government Savings Bank proper, under the authority of the Finance Department, were established in the leading cities of Canada under the management of the Assistant Receivers General and in other places, in the provinces of Nova Scotia and New Brunswick, under managers appointed by the Governor in Council. The Dominion Government Savings Bank was amalgamated with the Post Office Savings Bank in 1929. Historical statistics for both systems will be found in Table 23 and more detailed figures covering the latest six years in Table 24.

**23.—Deposits with Dominion Government Savings Banks,<sup>1</sup> for representative years ended June 30, 1868-1906, and Mar. 31, 1907-37.**

NOTE.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

**Provincial Government Savings Banks.**—Institutions for the deposit of savings are operated by the Provincial Governments of Ontario and Alberta, while a similar institution was in operation in Manitoba from 1924 to 1932 when the depositors' accounts were taken over by the chartered banks.

*Ontario.*—In the session of 1921, the Legislature of Ontario authorized the establishment of the Province of Ontario Savings Office, and in March, 1922, the first branches were opened. The funds received from this source are used almost exclusively to finance farm loans under the Agricultural Development Act. Interest at the rate of 2 p.c. per annum compounded half-yearly is paid on accounts. The deposits are all repayable on demand. Total deposits on Jan. 31, 1938, were over \$38,600,000 and the number of depositors at that date was over 113,000. Twenty-five branches are in operation throughout the province.

*Alberta.*—In Alberta the Provincial Treasury receives savings deposits and issues demand savings certificates bearing interest at 2 p.c., or term certificates for one, two, or three years, in denominations of \$25 and upwards, bearing interest at 2 p.c. for one year and 2½ p.c. for two or three years. The total amount in savings certificates on Dec. 31, 1937, was \$7,278,299, made up of \$4,174,433 in demand certificates and \$3,103,866 in term certificates.

**Other Savings Banks.**—The Montreal City and District Savings Bank, founded in 1846 and now operating under a charter of 1871, had on Dec. 31, 1937, a paid-up capital and reserve of \$4,500,000, savings deposits of \$61,596,525, and total liabilities of \$62,651,999. Total assets amounted to \$67,696,388 including nearly \$50,000,000 of Dominion, provincial, and municipal securities. The Caisse d'Economie de Notre-Dame de Québec, founded in 1848 under the auspices of the St. Vincent de Paul Society, incorporated by Act of the Canadian Legislature in 1855 and given a Dominion charter by 34 Vic., c. 7, had on Dec. 31, 1937, savings deposits of \$13,554,387, a paid-up capital and reserve of \$2,500,000 and total assets of \$16,889,837.

The co-operative people's banks of Quebec (234 reported to the Provincial Government in 1936) are also an important element in promoting thrift and assisting business in that province. Thus on Dec. 31, 1936, savings deposits in these banks amounted to \$7,692,407, while the amount on loan was \$8,943,821. Loans granted in 1936 numbered 13,974 amounting to \$3,370,821. Profits realized amounted to \$459,601. (See also p. 783 of this volume.)

**25.—Deposits in the Montreal City and District Bank and the Caisse d'Economie de Notre-Dame de Québec, as at June 30, for representative years 1868-1906, and Mar. 31, 1907-37.**

## PART II.—MISCELLANEOUS COMMERCIAL FINANCE.

### Section 1.—Loan and Trust Companies.\*

The Canada Year Book, 1934-35, presented at p. 993 an outline of the development of loan and trust companies in Canada from 1844 to 1913.

The laws relating to trust and loan companies were revised by the Loan and Trust Companies Acts of 1914 (4-5 Geo. V, cc. 40 and 55), with the result that the statistics of provincially incorporated loan and trust companies ceased to be collected. In Table 1, however, certain summary statistics of provincial companies have been supplied for 1936 by courtesy of those companies and are included in order to complete the picture for loan and trust companies throughout Canada. The provincial figures are believed to be substantially correct. It will be noted that the totals for the division of assets of trust companies by type of asset (shown in the lower part of the table) do not agree with the totals in the upper part of the trust company section, for the reason that par values are used in the former case and book values in the latter. The statistics of Tables 2 and 3 refer only to those companies operating under Dominion charter, except that, beginning in 1925, the statistics of loan companies and trust companies incorporated by the province of Nova Scotia, and brought by the laws of that province under the examination of the Dominion Department of Insurance, have been included as well as those for trust companies in New Brunswick since 1934 in Table 3. All the tabulations of this Section have been rearranged and revised; the historical series now start with the year 1920, at which time the Dominion Department of Insurance took over the administration of the legislation concerning Dominion trust and loan companies—the Department of Finance had previously exercised supervision of their activities.

As indicating the progress of the aggregate of loan company business in Canada, it may be stated that the book value of the assets of all loan companies rose from \$188,637,298 in 1922 to \$213,649,794 in 1931, but had declined to \$196,120,255 by 1936. The assets of trust companies, not including trust, estates, and agency funds, which cannot be regarded as assets in the same sense as company and guaranteed funds, have increased from \$154,202,165 in 1928 to \$237,588,455 in 1936. In the former year, the total of trust, estates, and agency funds administered amounted to \$1,077,953,643 and in the latter year to \$2,537,931,352. (Table 1.)

**Functions of Loan Companies.**—The principal function of loan companies is the lending of funds on first mortgage security, the money thus made available for development purposes being secured mainly by the sale of debentures to the investing public and by savings department deposits. Of the loan companies operating under provincial charters, the majority conduct loan, savings, and mortgage business, generally in the more prosperous farming communities. The historical statistics published in Tables 1 and 2 respecting loan companies have been revised by the separation of the statistics of small loans companies, which are now included in Section 2.

**Functions of Trust Companies.**—Trust companies act as executors, trustees and administrators under wills or by appointment, as trustees under marriage or other settlements, as agents or attorneys in the management of the estates of the living, as guardians of minor or incapable persons, as financial agents for municipalities and companies and, where so appointed, as authorized trustees in bankruptcy. Some companies receive deposits, but the lending of actual trust funds is restricted by law. The figures of Table 1 are of particular interest in the case

\* Revised under the direction of G. D. Finlayson, Superintendent of Insurance, Department of Insurance.

of trust companies, which, on account of the nature of their functions, are mainly provincial institutions, since their chief duties are intimately connected with the matter of probate, which lies within the sole jurisdiction of the provinces.

**1.—Summary Statistics of the Operations of Dominion and Provincial Loan and Trust Companies in Canada, as at Dec. 31, 1936.**

### Section 2.—Small Loans Companies.

There have been incorporated in recent years, by the Parliament of Canada, a number of companies which make small loans, usually not exceeding five hundred dollars each, on the promissory notes of the borrowers and additionally secured in most cases by endorsements or chattel mortgages. While small loans companies may, under their charter powers, make loans on the security of real estate, actually they have made only a very few of such loans. As the business of these companies has now reached considerable proportions the figures showing the same are now separated from those of the loan companies proper and are no longer included in Table 2. The figures relating to the assets and liabilities of the three companies of this class which have commenced operations are shown in summary form below.

### 5.—Classification of Assets and Liabilities of Small Loans Companies Chartered by the Dominion Government, as at Dec. 31, 1925-36.

#### ASSETS.

| Year.     | Loans Receivable. | Cash on Hand and in Banks. | Other Assets. | Total.    |
|-----------|-------------------|----------------------------|---------------|-----------|
|           | \$                | \$                         | \$            | \$        |
| 1928..... | 128,635           | 3,597                      | 17,007        | 159,239   |
| 1929..... | 434,432           | 9,621                      | 36,341        | 480,394   |
| 1930..... | 598,275           | 21,814                     | 31,551        | 651,640   |
| 1931..... | 777,414           | 13,020                     | 36,939        | 827,373   |
| 1932..... | 644,339           | 22,125                     | 13,449        | 679,913   |
| 1933..... | 1,228,180         | 327,760                    | 14,019        | 1,569,959 |
| 1934..... | 2,353,862         | 284,761                    | 22,111        | 2,660,734 |
| 1935..... | 2,962,580         | 194,406                    | 30,403        | 3,187,389 |
| 1936..... | 4,145,066         | 214,363                    | 32,961        | 4,392,390 |

#### LIABILITIES.

| Year.     | Liabilities to Shareholders. |                     |                  |                    |           | Liabilities to the Public. |        |                   |                    |           |
|-----------|------------------------------|---------------------|------------------|--------------------|-----------|----------------------------|--------|-------------------|--------------------|-----------|
|           | General Reserve.             | Reserve for Losses. | Capital Paid Up. | Other Liabilities. | Total.    | Borrowed Money.            | Taxes. | Un-earned Income. | Other Liabilities. | Total.    |
|           | \$                           | \$                  | \$               | \$                 | \$        | \$                         | \$     | \$                | \$                 | \$        |
| 1928..... | Nil                          | 1,757               | 101,000          | 2,650              | 105,407   | 45,000                     | Nil    | 6,540             | 397                | 51,946    |
| 1929..... | Nil                          | 10,075              | 101,000          | 1,399              | 112,474   | 340,924                    | 40     | 16,656            | 1,531              | 355,151   |
| 1930..... | Nil                          | 15,284              | 141,150          | 7,418              | 164,852   | 450,659                    | 506    | 22,211            | 8,343              | 482,219   |
| 1931..... | Nil                          | 36,029              | 273,150          | 3,992              | 313,170   | 474,959                    | 55     | 24,532            | 10,704             | 509,950   |
| 1932..... | Nil                          | 14,722              | 331,800          | 1,776              | 348,097   | 295,930                    | Nil    | 18,596            | 12,376             | 326,901   |

### Section 3.—Sales of Canadian Bonds.

Interesting aspects of public financing and of the investment of capital in Canadian development since 1911 are illustrated by the sales of Canadian bonds by classes, shown in Table 6. (The figures are reproduced from the *Monetary Times Annual*, 1938.) In the first part of this table, the bonds sold in each year are divided according to whether the financing was for Dominion or Provincial Governments, or for municipalities, railways or other corporations, while in the second part of the table the sales in each year are distributed according to sales in Canada, the United States and the United Kingdom.

The total sales of Canadian bonds naturally reached a very high mark toward the close of the War, owing to the Dominion Government financing required to cover the war expenditures. However, the total sales were greater in 1937 than in any other year, owing largely to the Dominion Government's conversion loans.

Dominion Government financing through bond sales since 1907 may be divided into three periods: the first from 1908 to 1914, when the money was required largely for internal development of the country, public works and Government railways; the second from 1915 to 1919, when war expenditures required very large borrowings; and the third since the War, when the issues have been largely required for refunding former loans at lower interest rates and for expenditures in connection with public works and railways.

Provincial bond issues have been on a much larger scale since the War than formerly, probably due to the development of provincially-owned public utilities and of improved highways. Sales of the bonds of Canadian municipalities, on the other hand, were greater in 1913, toward the end of the 'land boom', than

they have been in any other year, although sales in 1930 almost reached the record. However, allowing for the increased population in cities and towns, there has not been the same marked increase in the average annual sales of municipal bonds in the period since the War, as compared with the period before the War, that is noticeable in the case of provincial bonds.

Sales of corporation bonds, which from 1926 to 1930 had averaged over \$257,000,000 per year, dropped to \$10,550,000 in 1932, and to \$4,385,000 in 1933, this being largely due to the uncertainty of the industrial outlook. Railway bonds also showed a precipitate decline to \$12,500,000 in 1932, and fell to \$1,000,000 in 1933. From 1934 to 1937 substantial recoveries were shown in both classes, the 1936 figures being particularly high.

A very striking change has taken place during the present century in the market in which Canadian bond issues are principally sold. Prior to the War, a great part of the capital required for Canadian development came from the United Kingdom, and the major portion of Canadian bond issues was sold there. The outbreak of war temporarily eliminated that market, and Canadians turned largely to the United States for outside capital. However, the great increase in wealth during and since the War has enabled a much greater proportion of public and industrial financing to be done at home, and beginning with the Victory Loan Campaigns, Canadians not only learned how to invest their money in bonds, but had the necessary funds to invest on a large scale in bond issues. These facts are reflected in the latter part of Table 4 showing that since 1915 a greatly increased proportion of the total issues of Canadian bonds has been sold within Canada. Thus, in 1937, 93 p.c. of all bonds issued were sold in Canada, and 7 p.c. in the United States.

#### 6.—Sales of Canadian Bonds, by Class of Bond and Country of Sale, calendar years 1911-37.

(From the *Monetary Times Annual*.)

NOTE.—Figures for 1904-10, inclusive, will be found at p. 921 of the 1933 Year Book.

##### CLASSES OF BONDS.

**Section 4.—Corporation Dividends.**

(From the *Financial Post Business Year Book*.)

The 1937 improvement in Canadian business, as indicated by higher corporate earnings, was reflected in the total annual dividend payments of \$319,804,000, compared with \$260,641,000 in 1936, or a gain of 22.7 p.c. The 1936 dividend disbursements amounted to over double those of 1933, the lowest year of the depression in this respect. Of the total disbursements for the year, mining companies accounted for \$104,600,000 or 32.8 p.c. In Table 7 there is given an eight-year record of aggregate monthly dollar payments and yearly totals for all companies paying dividends in Canada.

### Section 5.—Foreign Exchange.

The Canadian dollar, adopted as our currency in 1857, was equivalent to 15/73 of the pound sterling; in other words, the pound was equal to \$4.866 in Canadian currency at par, and remained so, with minor variations between the import and export gold points representing the cost of shipping gold in either direction, until the outbreak of the Great War. During the first eleven years after Confederation, the Canadian dollar was at a premium in the United States, as the United States dollar was not, after the Civil War, redeemable in gold until 1878. From the latter date, the dollar in the two countries was equivalent at par, and variation was only between the import and export gold points or under \$2 per \$1,000.

At the outbreak of the Great War, both the pound sterling and the Canadian dollar were made inconvertible into gold and fell to a discount in New York, though this discount was 'pegged' or kept at a moderate percentage by sales of United States securities previously held in the United Kingdom, borrowing in the United States, and, after the United States entered the War, by arrangements with the United States Government. After the War, when the exchanges were 'unpegged' about November, 1920, the British pound went as low as \$3.18 and the Canadian dollar as low as 82 cents in New York. In the course of the next year or two, exchange was brought practically back to par, and the United Kingdom resumed gold payments in 1925 and Canada on July 1, 1926. From then until 1928 the exchanges were within the gold points, but in 1929 the Canadian dollar again fell to a moderate discount in New York. The dislocation of exchange resulting from this discount persisted, with the exception of a few months in the latter half of 1930, into 1931. Dollar rates were below the gold export points, however, only for a few scattered intervals. Fluctuations since September, 1931, are dealt with below.

**Recent Movements in Canadian Exchange.\***—Because of Canada's close financial and commercial relationships with the United Kingdom and the United States, Canadian exchange rates are influenced to a large extent by the London and New York markets. The United Kingdom buys much more from Canada than Canada buys from her, but the reverse is the case as regards the trade between Canada and the United States. The result is that there is a supply of bills on London in excess of the amount needed to meet current obligations in the United Kingdom. By offering these for sale for United States funds in London or New York, a triangular balance is approximated by book transactions and the amount of gold transfers is thereby greatly reduced. The volume of sterling exchange on Canadian account thus passed to the New York market does not greatly influence New York rates of sterling exchange under normal conditions; on the contrary, the volume of the New York-London transactions is sufficient to carry the Canadian rates along with them.

In September, 1931, the equilibrium of international exchange was seriously disturbed. This unfortunate turn of events followed a period of over six years during which the nations of the world had worked steadily towards the stabilization of their currency systems upon a gold basis. Within two months of the time when the United Kingdom found it necessary to suspend free gold shipments, however, only a very small number of countries, including the United States and France, were left with currencies unshaken by preceding abnormal gold movements. The decision of the United Kingdom to go off the gold standard (Sept. 21, 1931) resulted in a sharp depreciation of sterling in New York. Canadian rates depreciated also,

\* Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics.

and fluctuated broadly with sterling until the United States dollar dropped from the ranks of gold standard currencies on Apr. 19, 1933.

Since that time major adjustments have occurred in practically all currencies of the world. The United States dollar was replaced on a gold basis, but was devalued at 59.06 p.c. of its former gold parity (13 $\frac{5}{8}$  grains or  $\frac{1}{20}$  oz. of gold to the dollar as against 23.22 grains previously) on Jan. 31, 1934, with other countries following suit at irregular intervals until the final break-up of the European gold 'bloc' in September, 1936. These countries, including France, Belgium, and Switzerland, were the last to abandon post-war gold standards established between 1925 and 1927. During 1936, the United States dollar and the Canadian dollar fluctuated narrowly about par, while the pound sterling declined in the latter half of the year until it also approached its old New York and Montreal parity of \$4.866. With the exception of the last three months of the year, when readjustments within the former gold bloc were occurring, 1936 exchange fluctuations were unusually narrow. This was broadly true also for 1937, although there were considerable declines in the French franc, Spanish peseta and Brazilian milreis.

### 8.—Monthly Averages of Exchange Quotations at Montreal, 1936 and 1937.

NOTE.—The noon rates in Canadian funds upon which these averages are based have been supplied by the Bank of Canada.

## CHAPTER XXIII.—INSURANCE.\*

Insurance business is transacted in Canada by companies of the following classes, *viz.*, (1) companies incorporated under the laws of the Dominion of Canada or of the former "Province of Canada", (2) companies incorporated under the laws of the provinces of Canada, and (3) companies incorporated or formed under the laws of British and foreign countries. The word "companies", as here used, includes fraternal benefit societies and exchanges which transact the business of insurance. The Dominion Insurance Acts provide that companies of classes (1) and (3) above may not transact business anywhere in Canada unless registered† by the Dominion, but these Acts also provide that fire insurance on property in Canada may be effected in companies of class (3) even though not registered, if the insurance is effected without solicitation, advertising or the use of the mails, and if an office is not maintained in Canada, though property to be insured may be inspected and losses may be adjusted. Insurance so effected is generally known as 'unlicensed insurance'. Companies of class (2) above may transact business in the province of incorporation, subject to compliance with the laws thereof, or in any other province subject to compliance with the laws thereof, or, on compliance with the Dominion laws, may be granted Dominion registration. Most of these companies limit their business to the province of incorporation or to one or more other provinces; a few only have been granted Dominion registration.

What has been said above implies that jurisdiction concerning insurance Companies and insurance business is divided between the Dominion and the provinces. There have been many references to the courts and appeals to the Privy Council with a view to determining the respective legislative domains, both in respect of insurance legislation specifically and in respect of legislation affecting companies generally, including insurance companies. The latest Privy Council decision was handed down in 1931. It may now be taken as established that the Parliament of Canada may require companies formed or incorporated outside of Canada to obtain Dominion registration and to continue to be so registered as a condition of transacting business in Canada, and these companies may be required to make returns from time to time of their business and doings in Canada and to furnish evidence of their solvency. The powers of the Dominion go much further in reference to companies incorporated by the Parliament of Canada, but include all of the powers which may be exercised over companies formed or incorporated outside of Canada and registered by the Dominion. The Acts passed in 1932,‡ as since amended, implement the powers of the Dominion as determined by the Privy Council decisions.

The Dominion Acts under which companies are registered are administered by the Department of Insurance under the Minister of Finance. The chief officer of the Department of Insurance is the Superintendent of Insurance. The first Superintendent was appointed in 1875 as head of a newly created Insurance Branch of the Department of Finance. In 1910 the Insurance Branch was constituted into a separate Department, the Department of Insurance, under the Minister of Finance.

\* The statistics of Fire, Life, and Miscellaneous Insurance have been revised under the direction of G. D. Finlayson, Superintendent of Insurance, and those pertaining to Government Annuities (Section 4) under the direction of W. M. Dickson, Deputy Minister of Labour.

† Prior to 1932, the Dominion Insurance Acts provided for the "licensing" of companies; the Acts passed in 1932 provided for "registration". The change in terminology does not indicate any change in substance.

‡ The Canadian and British Insurance Companies Act, 1932 (22-23 Geo. V, c. 46). The Foreign Insurance Companies Act, 1932 (22-23 Geo. V, c. 47).

Precedent to obtaining first registration, in addition to filing certain documents, including a full and complete financial statement, a company must satisfy the Minister that it is sound and solvent and must make the required initial deposit of securities, varying from \$10,000 to \$100,000, depending on the class of business to be undertaken. Annual returns are required of all registered companies and the Acts require an examination to be made, by the Superintendent or on his behalf, of the books and records of companies with a view to substantiating the accuracy of the statements filed and the soundness of the companies. Should any company show an unsatisfactory financial condition, the Acts require remedial measures to be taken. British and foreign companies are required to maintain in Canada assets sufficient to cover all of their liabilities in Canada, while Canadian companies are required to maintain in Canada all of their assets, except such as it may be necessary to deposit outside of Canada as security for 'out of Canada' business.

The statistics herein given for companies registered by the Dominion are divided into three classes relating to: (1) insurance against fire, (2) life insurance, and (3) miscellaneous insurance, *viz.*, accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, sickness, steam boiler, title, tornado, and weather insurance. These statistics are compiled from the reports of the Department of Insurance; throughout they apply to calendar years.

Since 1915, the Department of Insurance has collected statistics, included herein, of business transacted by provincial companies licensed by the provinces, classified as to: (1) business transacted within the province of incorporation, and (2) business transacted in other provinces.

Returns for unlicensed insurance, above referred to, were required under Sec. 16 of the Special War Revenue Act for taxation purposes, and statistics compiled from these returns were published in the Canada Year Book, prior to the 1933 edition, as Table 8. This section of the Act having been held unconstitutional by the Privy Council decision, Oct. 22, 1931, on an appeal from the Court of the King's Bench of the province of Quebec, the returns for 1930 were incomplete and were not published in the 1933 Year Book. By an amendment to the Act at the 1932 session of Parliament, a section analogous to Sec. 16 was enacted, applicable to unlicensed insurance and the information was, therefore, revived in the 1934-35 edition. This information is, however, no longer required from such companies and has been again dropped.

Statistics of Dominion Government annuities are given at the end of this chapter. The Department of Labour administers the Acts under which these annuities are sold.

### Section 1.—Fire Insurance.

Fire insurance in Canada began with the establishment by British fire insurance companies of agencies, usually situated in the seaports and operated by local merchants. The oldest existing agency of a British company is that of the Phoenix Fire Office of London, now the Phoenix Assurance Company, Ltd., which commenced business in Montreal in 1804. On account of the growth of the insurance business of these early British companies, branch offices were established and local managers were appointed, charged with directing the companies' affairs in Canada.

The Halifax Fire Insurance Co. is the first purely Canadian company of which any record is available. Founded in 1809 as the Nova Scotia Fire Association,

it was chartered in 1819 and operated in the province of Nova Scotia until 1919 when it was granted a Dominion licence. Among the other pioneer fire insurance companies still in operation, mention may be made of the following: the Quebec Fire Assurance Co., which commenced business in 1818 and was largely confined in ownership and operations to Quebec province; the British America Assurance Co., incorporated in 1833, the oldest company in Ontario; the Western Assurance Co., organized in 1851, and now, after a rapid and steady growth, one of the largest companies of its kind on the continent; two United States companies, the Aetna Insurance Co., Hartford, Conn., and the Hartford Fire Insurance Co., which commenced business in Canada in 1821 and 1836, respectively.

The report of the Superintendent of Insurance for the year ended Dec. 31, 1936, shows that at that date there were 269 fire insurance companies doing business in Canada under Dominion registration; of these 50 were Canadian, 68 were British and 151 were foreign companies. In 1875, the first year for which authentic records were collected by the Department of Insurance, 27 companies operated in Canada—11 Canadian, 13 British and 3 United States. The proportionate increase in the number of British and foreign companies from 59 p.c. to over 81 p.c. of the total number is a very marked point of difference between the fire and life insurance businesses in Canada, the latter being carried on very largely by Canadian companies.

Although in its early days the Dominion did not prove a very lucrative field for fire insurance companies, the great advance in building construction and the wide use of improved fire appliances and safety devices have materially reduced the danger of serious conflagrations and have placed the risks assumed by companies in Canada on an equality with those of other countries.

A feature of the fire insurance business, besides the large percentage of British and foreign companies, is the continued increase in the number of companies which are operating on the mutual or reciprocal plan. These companies, in which all profits or losses are directly received or paid by the policyholders, are making themselves felt as competitive factors in the fire insurance business.

**Statistics of Fire Insurance.**—Statistical tables of fire insurance in Canada, illustrative of the progress of total business since 1869, and of the operations of individual companies for the year 1936, follow. The net amount of fire insurance in force on Dec. 31, 1936, with companies holding Dominion licences, was \$9,248,273.-260,\* while the net amount in force with provincial companies on the same date was \$1,184,852,046. Thus the grand total fire insurance in force on Dec. 31, 1936, with Dominion and provincial companies was \$10,433,125,306.

Table 1 shows figures of the growth since 1869 of companies registered by the Dominion, the relationship between losses paid and net premiums written, and the variation in the cost per \$100 of insurance. It will be observed that the cost of insurance reached a maximum in 1904 and 1905; there has since been a steady decrease with the exception of the years 1921, 1922, and 1924, when temporary reversals of the downward swing were in evidence. It is noteworthy that the cost of fire insurance has decreased by 56.88 p.c. since 1905. Table 2 shows the business done in Canada by individual companies during the year 1936, while in Tables 3, 4, and 5 are given figures of the assets, liabilities, incomes and expenditures during the years 1932 to 1936, classified by nationality of companies. A further summary of

\* According to preliminary figures, fire insurance in force in companies registered by the Dominion increased by \$625,326,633 in 1937. The large increases of later years are due, in part, to Dominion registration of certain provincially registered companies.

business is given by provinces in Table 6 for the years 1935 and 1936, showing premiums and losses classified by provinces and by nationality of companies. Further, a summary of the business transacted by both Dominion and provincial licensees is given in Table 7.
